33. Income taxes

Accounting Policy

Current Tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside statement of profit and loss is recognised outside statement of profit and loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

(i) Income tax recognised in profit and loss

	For Year ended 31st March, 2022 ₹ Crores	For Year ended 31st March, 2021 ₹ Crores
Current tax		
For the year	51.13	55.63
In respect of earlier years	(0.99)	-
Current Tax (Including adjustment of tax relating to earlier year)	**50.14**	**55.63**
Deferred tax	6.50	(0.87)
MAT Credit	(44.54)	(49.30)
Deferred Tax (Net)	**(38.04)**	**(50.17)**
Income tax expense reported in the Statement of Profit and Loss	**12.10**	**5.46**

(ii) Reconciliation of tax expense as per the effective rate of tax and India's statutory rate of tax

	For Year ended 31st March, 2022 ₹ Crores	For Year ended 31st March, 2021 ₹ Crores
Profit before tax	292.63	316.48
Applicable income tax rate	34.94%	34.94%
Income tax expense calculated at applicable rate	102.26	110.59
Temporary difference reversed during tax holiday period.	27.57	19.11
On account of 80IA benefits	(121.15)	(130.53)
Other Adjustments	3.42	6.29
Total income tax expense	**12.10**	**5.46**

1. The tax rate used for the financial years 2021-22 and 2020-21 reconciliations above is the corporate tax rate of 34.94% and 34.94% respectively payable by the corporate entities in India on taxable profits under the Indian tax law.
2. The Company has to pay taxes based on higher of income tax on profit of the Company or MAT @17.472% of book profit for the years 2021-22 and 2020-21 respectively.
3. The rate used for calculation of deferred tax is @34.94% for FY 2021-22 & for FY 2020-21 being statutory enacted rates at respective Balance Sheet Dates.

(iii) Income tax recognised in other comprehensive income

	For Year ended 31st March, 2022 ₹ Crores	For Year ended 31st March, 2021 ₹ Crores
Arising on income and expenses reclassified in other comprehensive income:		
Remeasurement of the defined benefit plan	(0.04)	1.14
Total income tax expense recognised in other comprehensive income	**(0.04)**	**1.14**

	358.79	**457.39**

S R Batliboi & Co. LLP Kolkata

MAITHON POWER LIMITED

35. Contingent liabilities

(a) The Company has received a demand of ₹ 45.00 crores from the Office of Assistant Commissioner, Dhanbad under the Building and other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996 contending that the Company has to pay 1% of the Project Cost (estimated to be ₹ 4500.00 crores) as cess.

As per legal advice obtained by the Company, the Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996 is applicable on cost of construction and not on supply of equipment, accordingly the Company had deposited an amount of ₹ 1.26 crores as cess for cost of construction and raised the demand on the concerned contractor / vendor. Further, the Company is of the view that any such demand if payable will be borne by the contractor/vendors. Accordingly, no provision has been made in the books of account.

(b) Claims against the Company not acknowledged as debts for demands raised by the office of the Zonal Jt. Director General Trade for revocation of grant of deemed export benefits which has been disputed by the Company ₹ 36.41 crores (31 March, 2021 : ₹ 36.41 crores).

(c) The Code on Social Security 2020 has been notified in the Official Gazette on 29th September, 2020. The effective date from which the changes are applicable is yet to be notified and the rules are yet to be framed. Impact if any of the change will be assessed and accounted in the period in which said Code becomes effective and the rules framed thereunder are notified.

36. **Earnings per share (EPS)**

Accounting Policy

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. The average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

	For Year ended 31st March, 2022 ₹ Crores	For Year ended 31st March, 2021 ₹ Crores
Basic and diluted earnings per share (face value of ₹ 10/- each)	1.86	2.06
Basic and diluted earnings per share	**1.86**	**2.06**

The earnings and weighted average number of equity shares used in the calculation of basic and diluted earnings per share are as follows:

	For Year ended 31st March, 2022 ₹ Crores	For Year ended 31st March, 2021 ₹ Crores
Profit After Tax	280.53	311.02
The weighted average number of equity shares for Basic and Diluted EPS	1,50,89,17,729	1,50,89,17,729

Note:
There have been no other transactions involving Equity Shares or Potential Equity Shares between the Reporting date and the date of authorisation of these financial statements.

S R Batliboi & Co. LLP Kolkata
MAITHON POWER LIMITED

The management assessed that the fair value of cash and cash equivalents, other balances with bank, trade receivables, loans, unbilled revenues, trade payables, other financial assets and liabilities approximate their carrying amounts largely due to the short term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties. The following methods and assumptions were used to estimate the fair values:

Fair value hierarchy

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:

Quoted prices in an active market (Level 1): Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Valuation techniques with observable inputs (Level 2): Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Valuation techniques with significant unobservable inputs (Level 3): Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

The following table provides the fair value measurement hierarchy of the Company's assets and liabilities.

		Fair value hierarchy as at 31st March, 2022			
	Date of valuation	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
		₹ crore	₹ crore	₹ crore	₹ crore
Asset measured at fair value

Fixed rate borrowings	31st March, 2021	-	712.74	-	712.74
Floating rate borrowings	31st March, 2021	-	1065.67	-	1,065.67
Total		**-**	**1,778.41**	**-**	**1,778.41**

There has been no transfer between level 1 and level 2 during the year.

39.2 Capital Management & Gearing Ratio

For the purpose of the Company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximize the value for shareholders.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. From time to time, the Company reviews its policy related to dividend payment to shareholders, return capital to shareholders or fresh issue of shares. The Company monitors capital using gearing ratio, which is net debt divided by total capital plus net debt. The Company's policy is to keep the gearing ratio around 50%. The Company includes within net debt, interest bearing loans and borrowings, less cash and bank balances, excluding discontinued operations as detailed in the notes below.

The Company's capital management is intended to create value for shareholders by facilitating the meeting of its long-term and short-term goals. Its Capital structure consists of net debt (borrowings as detailed in notes below) and total equity.

Gearing ratio

The gearing ratio at the end of the reporting year was as follows:

	₹ crore	
	As at 31st March, 2022	As at 31st March, 2021
Debt (i)	1,659.79	1,778.41
Less: Cash and Bank balances	12.01	67.34
Net debt	**1,647.78**	**1,711.07**
Total Capital (ii)	2,480.89	2,200.39
Capital and net debt	**4,128.67**	**3,911.46**
Gearing ratio (%)	39.91	43.75

(i) Debt is defined as Non-current borrowings (including current maturities) and Current borrowings (excluding derivative, financial guarantee contracts and contingent considerations) and interest accrued on Non-current and Current borrowings.

(ii) Equity is defined as Equity share capital and other equity including reserves and surplus.

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no significant breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

No changes were made in the objectives, policies or processes for managing capital during the years ended 31st March, 2022 and 31st March, 2021.

S R Batliboi & Co. LLP Kolkata

MAITHON POWER LIMITED

39. Financial Instruments

39.3 Financial risk management objectives and policies

The Company's principal financial liabilities, comprise borrowings, trade and other payables and other financial liabilities. The main purpose of these financial liabilities is to finance the Company's operations and to provide guarantees to support its operations. The Company's principal financial assets include investments, loans, trade and other receivables, cash and cash equivalents, other bank balances, unbilled receivables and other financial assets that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a risk committee that reviews the financial risks and the appropriate financial risk governance framework for the Company. The Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The risk management polices is approved by the board of directors, which is summarized below.

39.3.1 Market risk management

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises of three types of risk: currency risk, interest rate risk and equity price risk. The impact of equity price risk and currency risk is not material. Financial instruments affected by market risk are loans and borrowings.

The sensitivity analysis in the following sections relate to the position as at 31st March, 2022 and 31st March, 2021.

a) Foreign currency risk management

(i) The year end foreign currency exposures of the Company is Nil (31 March, 2021: Nil).

(ii) The Company did not have any long term contract including derivative contract for which there were any material foreseeable losses.

b) Interest rate risk management

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the company's long-term debt obligations with floating interest rates.

The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. The exposure of the Company's borrowings to interest rate changes at the end of the reporting period are as follows :

Particulars	31st March, 2022		31st March, 2021	
	Balance	Percentage	Balance	Percentage
Fixed Rate Borrowings (Includes Current Maturities)	964.16	58%	712.74	40%
Floating Rate Borrowings (Includes Current Maturities)	695.63	42%	1,065.67	60%
Total	1,659.79		1,778.41	

Interest rate sensitivity:

The sensitivity analysis below have been determined based on exposure to interest rates for term loans and debentures at the end of the reporting period and the stipulated change taking place at the beginning of the financial year and held constant throughout the reporting period in case of term loans and debentures that have floating rates.

If the interest rates had been 50 basis points higher or lower and all the other variables were held constant, the effect on Interest expense for the respective financial years and consequent effect on Company's profit in that financial year would have been as below:

Particulars	31st March, 2022		31st March, 2021	
	50 bps increase	50 bps decrease	50 bps increase	50 bps decrease
Interest expense on loan	(+) ₹ 3.48	(-) ₹ 3.48	(+) ₹ 5.33	(-) ₹ 5.33
Effect on profit before tax	(-) ₹ 3.48	(+) ₹ 3.48	(-) ₹ 5.33	(+) ₹ 5.33

S.R. Batliboi & Co. LLP Kolkata

MAITHON POWER LIMITED

39.3.2 Credit risk management

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (i.e. Primarily trade receivables and unbilled revenue) and from its financing activities including loans, foreign exchange transactions and other financial instruments.

Collateral held as security

The Company holds collateral i.e. letter of credit and bank guarantee to partly secure its outstanding trade receivables. Credit risk associated with receivables is mitigated because the receivables are partly secure.

₹ crore

	31st March, 2022	31st March, 2021
Trade Receivables	60.03	27.49
Loans	450.13	200.18
Other Financial Assets	16.23	1.59
Unbilled Revenue	45.41	40.61
Total	**571.80**	**269.87**

Refer Note 15 for credit risk and other information in respect of trade receivables. Other receivables as stated above are due from the parties under normal course of the business and as such the Company believes exposure to credit risk to be minimal.

39.3.3 Liquidity risk management

Liquidity risk is the risk that the company will encounter difficulty in meeting obligation, associated with financial liabilities that are settled by delivering cash or another financial asset.

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. The Company has access to a sufficient variety of sources of funding. Having regards to the nature of the business wherein the Company is able to generate fixed cash flows over a period of time and to optimize the cost of funding, the Company, from time to time, funds its long -term investment from short-term sources. The short-term borrowings can be rollforward or, if required, can be refinanced from long term

	Up to 1 year	1 to 5 years	5+ years	Total	Carrying Amount

Total Non-Derivative Liabilities	**537.17**	**1,350.02**	**452.43**	**2,339.62**	**2,017.32**

The table has been drawn up based on the undiscounted contractual maturities of the financial liabilities including interest that will be paid on those liabilities upto the maturity of the instruments.

39.4 Commodity price risk

The operating activity of the company involves generation of power and therefore requires continuous supply of coal. The company has entered into fuel supply agreements with Central Coalfields Limited and Bharat Coking Coal Limited and any price fluctuation is passed on to the customers.

S R Batliboi & Co. LLP Kolkata

MAITHON POWER LIMITED

40. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

41. **Segment Reporting**

The Company is mainly engaged in the business of generation and selling of power in India. Based on the information reported to the chief operating decision maker (CODM) for the purpose of resource allocation and assessment of performance, there are no reportable segments in accordance with the requirements of Indian Accounting Standard 108- 'Operating Segments', notified under the Companies (Indian Accounting Standards) Rules, 2015.

42. **Mega power status**

The Company had applied to the Ministry of Power, Government of India along with necessary documents for grant of Mega Power Status to the Company's 1050 MW Maithon Right Bank Thermal Power Plant. Pending receipt of the mega power certificate, the Company remains liable to pay excise and customs duty on its receipts of goods and materials wherever applicable. Accordingly, the Company had paid excise duty to its vendors and capitalised aggregating to ₹ 120.24 crores upto 31 March, 2022 (31 March, 2021: ₹ 120.24 crores).

INDEPENDENT AUDITOR'S REPORT

To the Members of Maithon Power Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Maithon Power Limited ("the Company"), which comprise the Balance sheet as at March 31, 2023, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2023, its profit/loss including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the financial year ended March 31, 2023. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Key audit matters	How our audit addressed the key audit matter
Accrual of Recoverable from Beneficiaries/Payable to Beneficiaries for items which are subject matter of true up in tariff orders *(as described in note 18 of the financial statements)*	
The Company's revenue recognition is guided by the tariff norms prescribed by	Following procedures have been performed to address this key audit matter:-

Key audit matters	How our audit addressed the key audit matter
the Central Electricity Regulatory Commission (CERC) guidelines and the tariff orders passed based on these regulations. Consequently, Recoverable from Beneficiaries/Payable to Beneficiaries is recognized for items which are subject matter of True-up in tariff orders to be notified in future years. Judgement is exercised by management in estimating recoverability / payability of such other assets and liabilities in the books of account. As on 31st March 2023, the Company is carrying an amount of Rs. 255.48 crores as Payable to Beneficiaries (Net of Recoverable from Beneficiaries of Rs. 31.53 crores) which is material to the financial statements of the Company. Considering judgements involved in estimates of various elements of capital and operational costs used in the computation of revenue as per applicable regulations, tariff order of prior year, expected true up in future tariff order and the amount involved we have determined this to be a key audit matter.	1. We have tested the design and operating effectiveness of key controls related to the estimation and realisability of such Recoverable from Beneficiaries/Payable to Beneficiaries. 2. We have evaluated the estimation by management of these Recoverable from Beneficiaries/Payable to Beneficiaries with reference to Tariff Regulations and the tariff orders of earlier years, on similar true up and underlying records of the Company. 3. We discussed with management to understand their assessment of each of the qualitative factors and ensured consistency of the management's explanation with the underlying documentation, rules and regulations. 4. We have re-calculated the workings obtained from the management to check the arithmetical accuracy of the calculations. 5. We have also checked the adequacy of the disclosure on these matters in the financial statements of the Company. 6. We have also obtained necessary management representations, as considered necessary.
Recoverability of MAT Credit Entitlement in future *(as described in note 17 of the financial statements)*	
The Company does not have normal taxable income owing to benefits of section 80IA of Income Tax Act, 1961 and therefore it has been paying Minimum Alternate Tax (MAT) under the relevant provisions of the Income Tax Act, 1961. The Act also provides that such MAT paid can be carried forward (MAT credit entitlement) for set off against regular tax payable in subsequent fifteen years period. Such MAT credit entitlements that may be utilized before the expiry of 15 years, are recognized when it is probable that future normal taxable profit will be available against which these MAT credits can be utilized. The Company's ability to recognize these MAT credit assets is assessed by management at the end of each reporting period, taking into account forecasts of future taxable profits and the law and jurisdiction of the land in force. The assumptions on these	Following procedures have been performed to address this key audit matter:- 1. We have tested the design and operating effectiveness of key controls related to the computation and recognition of such MAT credit. 2. We have assessed the methodology applied by the Company with current accounting standards and applicable taxation laws along with the future business forecast of taxable profits. 3. We have assessed the likelihood of the Company to utilize the available MAT credit entitlements in the future with underlying projections and assumptions relating to future estimated profits, future capitalization and depreciation allowance thereon and future estimates of taxable income. 4. We have tested the arithmetical accuracy of working prepared by management for determination of future taxable income against which MAT credit is expected to be realized.

Key audit matters	How our audit addressed the key audit matter
projections are determined by management. At March 31, 2023, MAT credit entitlement recognized in the Company's financial statements amounts to Rs. 513.05 crores. Given the degree of judgment involved in making a forecast of future taxable profit of the Company and the materiality of the amounts involved, we considered this to be a key audit matter.	5. We have also checked the adequacy of the disclosure on these matters in the financial statements of the Company. 6. We have also obtained necessary management representation.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with [the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements for the financial year ended March 31, 2023 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.

2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

   (b) In our opinion, proper books of account as required by law have been kept by the Company, in electronic mode on servers physically located in India so far as it appears from our examination of those books except that we were unable to verify the back up of books of accounts maintained in electronic mode for the period from August 05, 2022 to January 12, 2023, as necessary logs in respect of such period are not available with the company as stated in note 37 to the financial statements;

   (c) The Balance Sheet, the Statement of Profit and Loss including the Statement of Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

   (d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended;

   (e) On the basis of the written representations received from the directors as on March 31, 2023 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2023 from being appointed as a director in terms of Section 164 (2) of the Act;

   (f) With respect to the adequacy of the internal financial controls with reference to these financial statements and the operating effectiveness of such controls, refer to our separate Report in "Annexure 2" to this report;

   (g) In our opinion, the managerial remuneration for the year ended March 31, 2023 has been paid / provided by the Company to its directors in accordance with the provisions of section 197 read with Schedule V to the Act;

   (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

      i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 28 to the financial statements;

      ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

      iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company

      iv. a) The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium

or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

b) The management has represented that, to the best of its knowledge and belief, no funds have been received by the Company from any person or entity, including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

c) Based on such audit procedures performed that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement.

v. The final dividend paid by the Company during the year in respect of the same declared for the previous year is in accordance with section 123 of the Act to the extent it applies to payment of dividend.

The interim dividend declared and paid by the Company during the year and until the date of this audit report is in accordance with section 123 of the Act.

vi. As proviso to Rule 3(1) of the Companies (Accounts) Rules, 2014 is applicable for the Company only w.e.f. April 1, 2023, reporting under this clause is not applicable.

Annexure '1' referred to in paragraph under the heading "Report on other legal and regulatory requirements" of our report of even date

Re: Maithon Power Limited ("the Company")

In terms of the information and explanations sought by us and given by the company and the books of account and records examined by us in the normal course of audit and to the best of our knowledge and belief, we state that:

(i)(a)(A) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and Equipment.

(i)(a)(B) The Company has maintained proper records showing full particulars of intangibles assets.

(i)(b) The Company has verified part of its Property Plant and Equipment during the year in accordance with its regular programme of verification of these assets whereby all the assets are physically verified over a period of 3 years which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed on such verification.

(i)(c) The title deeds of immovable properties (other than properties where the Company is the lessee and the valid lease agreements are duly executed in favour of the lessee) disclosed in note 5.8 to the financial statements included in Property, Plant and Equipment are held in the name of the Company, except the following:

Description of Property	Amount in INR crores	Held in the name of	Whether promoter, director or their relative or employee	Period held – indicate range, where appropriate	Reason for not being held in the name of Company
Raiyati Land (Free hold) located at Maithon, Jharkhand.	159.80	Damodar Valley Corporation (DVC)	Promoter	December 2008	In accordance with the term of agreement dated September 2, 2005 with DVC, the title deed of the land parcel were to be executed in favour of the Company by DVC. We have been informed that such title deeds are yet to be executed in favour of the Company pending mutation in favour of DVC by Government of Jharkhand.
Railway Land (Freehold Land) located at Maithon, Jharkhand.	137.12	DVC	Promoter	October 2008 to March 2015	
Forest land (Leasehold) located at Maithon, Jharkhand	11.54	Government of Jharkhand	Not applicable	May 2008	Lease deed yet to be executed in favour of the Company by the Government of Jharkhand.

GM land-Plant (Leasehold) located at Maithon, Jharkhand	18.59	Government of Jharkhand	Not applicable	July 2010	DVC had surrendered their leasehold rights over the land parcel in favour of the Government of Jharkhand in a prior year to enable the Government of Jharkhand to lease the same land parcel in favour of the Company. The Company is yet to receive a demand from the Government of Jharkhand for execution of lease and hence the lease deed in the name of the Company is yet to be executed.
GM land-Railway (Leasehold) located at Maithon, Jharkhand	5.56	Government of Jharkhand	Not applicable	July 2010	Lease deed yet to be executed in favour of the Company by the Government of Jharkhand.
GM land-Railway (Leasehold) located at Maithon, Jharkhand	5.40	Government of Jharkhand	Not applicable	July 2010	

(i)(d) The Company has not revalued its Property, Plant and Equipment (including Right of use assets) or intangible assets during the year.

(i)(e) As represented to us by the management, there are no proceedings initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made thereunder.

(ii)(a) The management has conducted physical verification of inventory at reasonable intervals during the year and no material discrepancies were noticed on such physical verification. In our opinion the coverage and the procedure of such verification by the management is appropriate.

(ii)(b) As disclosed in note 19.1 to the financial statements, the Company has been sanctioned working capital limits in excess of Rs. five crores in aggregate from banks during the year on the basis of security of current assets of the Company. The quarterly returns/statements filed by the Company with such banks are in agreement with the books of account of the Company. The Company does not have any sanctioned working capital limits from financial institutions.

(iii)(a) During the year the Company has not provided advances in the nature of loans, stood guarantee or provided security to companies, firms, limited liability partnerships or any other parties other than as follows:

Particulars	Amount in INR crores
Aggregate amount granted/ provided during the year	
- Subsidiaries - Joint Ventures - Associates - Others	450.00
Balance outstanding as at balance sheet date in respect of above cases - Subsidiaries - Joint Ventures - Associates - Others	Nil

(iii)(b) During the year the Company has not provided guarantees and security and not granted advances in the nature of loans to companies, firms, Limited Liability Partnerships or any other parties. The investments made and the terms and conditions of the loans granted are not prejudicial to the Company's interest.

(iii)(c) The Company has not granted advances in the nature of loans to companies, firms, Limited Liability Partnerships or any other parties. The Company has granted loans during the year to a company where the schedule of repayment of principal and payment of interest has been stipulated and the repayment or receipts are regular.

(iii)(d) There are no amounts of loans and advances in the nature of loans granted to companies, firms, limited liability partnerships or any other parties which are overdue for more than ninety days.

(iii)(e) There were no loans or advance in the nature of loan granted to companies, firms, Limited Liability Partnerships or any other parties which was fallen due during the year, that have been renewed or extended or fresh loans granted to settle the overdues of existing loans given to the same parties.

(iii)(f) The Company has not granted any loans or advances in the nature of loans, either repayable on demand or without specifying any terms or period of repayment to companies, firms, Limited Liability Partnerships or any other parties. Therefore, the requirement to report on clause 3(iii)(f) of the Order is not applicable to the Company and hence not commented upon.

(iv) There are no loans, investments, guarantees, and security in respect of which provisions of sections 185 and 186 of the Companies Act, 2013 are applicable. Therefore, the requirement to report on clause 3(iv) of the Order is not applicable to the Company and hence not commented upon.

(v) The Company has neither accepted any deposits from the public nor accepted any amounts which are deemed to be deposits within the meaning of sections 73 to 76 of the Companies Act, 2013 and the rules made thereunder, to the extent applicable. Therefore, the requirement to report on clause 3(v) of the Order is not applicable to the Company and hence not commented upon.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section

148(1) of the Companies Act, 2013, related to the generation of electricity, and are of the opinion that, prima facie, the specified accounts and records have been made and maintained. We have not, however, made a detailed examination of the same.

(vii)(a) The Company is regular in depositing with appropriate authorities undisputed statutory dues including goods and services tax, provident fund, employees' state insurance, income-tax, cess and other statutory dues applicable to it. During the year, the Company did not have any undisputed dues towards sales-tax, service tax, duty of customs, duty of excise and value added tax. No undisputed amounts payable in respect of aforesaid dues were outstanding at the year-end for a period of more than six months from dates when they became payable.

(vii)(b) There are no dues of goods and services tax, provident fund, employees' state insurance, income tax, sales-tax, service tax, customs duty, excise duty, value added tax, cess and other applicable statutory dues which have not been deposited on account of any dispute.

(viii) As represented to us by the management, the Company has not surrendered or disclosed any transaction, previously unrecorded in the books of account, in the tax assessments under the Income Tax Act, 1961 as income during the year. Therefore, the requirement to report on clause 3(viii) of the Order is not applicable to the Company and hence not commented upon.

(ix)(a) The Company has not defaulted in repayment of loans or other borrowings or in the payment of interest thereon to any lender.

(ix)(b) As represented to us by the management, the Company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.

(ix)(c) Based on an overall examination of the Balance Sheet and information, explanations and representations provided to us, term loans were applied for the purpose for which they were obtained.

(ix)(d) Based on an overall examination of the Balance Sheet and information, explanations and representations provided to us, no funds raised on short-term basis have been used for long-term purposes by the Company.

(ix)(e) and (f) The Company does not have any subsidiary, associate or joint venture. Therefore, the requirement to report on clause 3(ix)(e) and (f) of the Order are not applicable to the Company and hence not commented upon.

(x)(a) The Company has not raised any money during the year by way of initial public offer / further public offer (including debt instruments). Therefore, the requirement to report on clause 3(x)(a) of the Order is not applicable to the Company and hence not commented upon.

(x)(b) The Company has not made any preferential allotment or private placement of shares /fully or partially or optionally convertible debentures during the year under audit. Therefore, the requirement to report on clause 3(x)(b) of the Order is not applicable to the Company and hence not commented upon.

(xi)(a) As represented to us by the management, no material fraud by the Company or no material fraud on the Company has been noticed or reported during the year.

(xi)(b) During the year, no report under sub-section (12) of section 143 of the Companies Act, 2013 has been filed by cost auditor/ secretarial auditor or by us in Form ADT – 4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.

(xi)(c) As represented to us by the management, there are no whistle blower complaints received by the Company during the year.

(xii) The Company is not a nidhi Company as per the provisions of the Companies Act, 2013. Therefore, the requirement to report on clauses 3(xii)(a), (b) and (c) of the Order is not applicable to the Company and hence not commented upon.

(xiii) Transactions with the related parties are in compliance with sections 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the notes to the financial statements, as required by the applicable accounting standards.

(xiv)(a) The Company has an internal audit system commensurate with the size and nature of its business.

(xiv)(b) The internal audit reports of the Company for the year under audit which were issued till date of this audit report, have been considered by us.

(xv) The Company has not entered into any non-cash transactions with its directors or persons connected with its directors. Therefore, the requirement to report on clause 3(xv) of the Order is not applicable to the Company and hence not commented upon.

(xvi)(a) The provisions of section 45-IA of the Reserve Bank of India Act, 1934 (2 of 1934) are not applicable to the Company. The requirement to report on clause (xvi)(a) of the Order is not applicable to the Company and hence not commented upon.

(xvi)(b) As represented to us by management, the Company has not conducted any Non-Banking Financial or Housing Finance activities without obtained a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.

(xvi)(c) The Company is not a Core Investment Company as defined in the regulations made by Reserve Bank of India. The requirement to report on clause 3(xvi) of the Order is not applicable to the Company and hence not commented upon.

(xvi)(d) As represented to us by the management, the Group has 6 Core Investment Companies as a part of the Group. However, we have not independently verified their existence.

(xvii) The Company has not incurred cash losses in the current financial year and in the immediately preceding financial year.

(xviii) There has been no resignation of the statutory auditors during the year. The requirement to report on Clause 3(xviii) of the Order is not applicable to the Company and hence not commented upon.

(xix) On the basis of the financial ratios disclosed in note 31 to the financial statements, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

(xx)(a) In respect of other than ongoing projects, there are no unspent amounts that are required to be transferred to a fund specified in Schedule VII of the Companies Act (the Act), in compliance with second proviso to sub section 5 of section 135 of the Act. This matter has been disclosed in note 25(ii) to the financial statements.

(xx)(b) The Company has not transferred the amount remaining unspent in respect of ongoing projects, to a Special Account, till the date of the report. However, the period for such transfer i.e., thirty days from the end of the financial year as permitted under sub section (6) of section 135 of the Companies Act, has not elapsed till the date of our report.

ANNEXURE TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF MAITHON POWER LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to financial statements of Maithon Power Limited ("the Company") as of March 31, 2023 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to these financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to these financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to these financial statements.

Meaning of Internal Financial Controls With Reference to these Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in

accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls With Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

1. Corporate Information

MAITHON POWER LIMITED ('the Company'), has been set up pursuant to an agreement entered into between The Tata Power Company Limited (TPCL) and Damodar Valley Corporation (DVC) with 74% and 26% shareholding respectively, to operate and maintain Electric power generating stations. The Company has set up a thermal power generation plant (comprising of two units of 525 MW each namely 'Unit I and Unit II') at Maithon, Jharkhand with a total capacity of 1050 MW. Unit I and Unit II of the project were commissioned on 1 September, 2011 and 24 July, 2012 respectively. The registered office of the Company is Corporate Center, 34 Sant Tukaram Road, Carnac Bunder, Mumbai 400009, Maharashtra, India.

The financial statements have been approved for issue in accordance with a resolution of the directors on 13th April, 2023.

2. Significant Accounting Policies

2.1 Basis of preparation and presentation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III).

The financial statements have been prepared on a historical cost basis except for certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

Accounting Policy are consistent with earlier years unless stated otherwise.

3. Other Significant Accounting Policies (Other than those mentioned in respective notes)

3.1 Foreign Currencies

The functional currency of the Company is Indian rupee (₹)

Income and expenses in foreign currencies are recorded at exchange rates prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses arising on settlement and restatement are recognized in the statement of profit and loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

Exchange differences on monetary items are recognized in profit or loss in the period in which they arise except for exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings.

3.2 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

3.3 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities measured at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in statement of profit and loss.

MAITHON POWER LTD. MAITHON

3.4 Financial Assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), or fair value through profit or loss. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them.

3.4.1 Financial assets at amortised cost

A 'financial asset' is measured at the amortised cost if both the following conditions are met:
a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. The EIR amortisation is included in finance income in the profit or loss.

3.4.2 Financial assets at fair value through other comprehensive income(FVTOCI)

A 'financial asset' is classified as at the FVTOCI if both of the following criteria are met:
a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The asset's contractual cash flows represent SPPI.

On initial recognition, the Company makes an irrevocable election on an instrument-by-instrument basis to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments, other than equity instruments which are held for trading. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit or loss on sale of the investments.

3.4.3 Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.
Other financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in statement of profit or loss.

3.4.4 Derecognition of Financial Assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

i) the right to receive cash flows from the asset have expired, or
ii) the Company has transferred its right to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its right to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

3.4.5 Impairment of financial assets

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

MAITHON POWER LTD. MAITHON

3.5 Financial Liabilities

All financial liabilities are recognised initially at fair value and in case of loans and borrowings and payables, net of directly attributable transaction cost.

For purposes of subsequent measurement, financial liabilities are classified in two categories:

a) Financial liabilities at fair value through profit or loss
b) Financial liabilities at amortised cost (loans and borrowings)

3.5.1 Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Gains or losses on liabilities held for trading are recognised in the profit or loss. The Company has not designated any financial liability as at fair value through profit or loss.

3.5.2 Financial liabilities at amortised cost (Loans and borrowings)

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. The EIR amortisation is included as finance costs in the statement of profit and loss.

3.5.3 Derecognition of Financial Liabilities

A Financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified , such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability . The difference in the respective carrying amounts is recognised in the statement of profit and loss.

3.6 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

3.7 Dividend Distribution to equity shareholders of the Company

The Company recognises a liability to make dividend distributions to its equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Company . As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

In case of Interim Dividend, the liability is recognised on its declaration by the Board of Directors.

3.8 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. Cash and cash equivalents include balances with banks which are unrestricted for withdrawal and usage.

4. Critical accounting estimates and judgements

In the application of the Company's accounting policies, the management of the Company is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

The areas involving critical estimates or judgements are:

a) Estimation of current tax and deferred tax expense (including Minimum alternate tax credit) - Note 17 and Note 26
b) Recoverable from Beneficiaries / Payable to Beneficiaries(Net) - Note 18
c) Estimation of defined benefit obligations- Note 16

d) Judgement to estimate the amount of provision required or to determine required disclosure related to litigation and claims against the Company - Note 28.

Estimates and judgement are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

MAITHON POWER LTD. MAITHON

5. Property, Plant and Equipment

5.1 Accounting Policy

Property, plant and equipment (PPE) is stated at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes purchase price (net of trade discount and rebates) and any directly attributable cost of bringing the asset to its working condition for its intended use and for qualifying assets, borrowing costs capitalised in accordance with Ind AS 23. Capital work in progress is stated at cost, net of accumulated impairment loss, if any. Other Indirect Expenses incurred relating to project, net of income earned during the project development stage prior to its intended use, are considered as pre-operative expenses and disclosed under Capital Work-in-Progress. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the statement of profit and loss as incurred.

5.2 Subsequent Cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably. All other repair and maintenance costs are recognized in the statement of profit or loss as incurred.

5.3 Depreciation

Depreciation commences when the assets are ready for the intended use.

Depreciation on property, plant and equipment in respect of electricity business of the Company is covered under Part B of Schedule II of the Companies Act, 2013, has been provided on the straight line method at the rates using the methodology required by relevant provisions of Central Electricity Regulatory Commission.

Depreciation on all other assets is recognised on the cost of assets (other than freehold land) less their residual values over their estimated useful lives, using the straight-line method.

5.4 Useful lives of tangible assets:

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. The Company, based on technical assessment made by technical expert and management estimate, depreciates certain items of building, plant and equipments over estimated useful lives which are different from the useful lifes prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Type of Asset	Useful Lives
Buildings-Plant	25 Years
Buildings-Others	25 Years
Plant and Equipment	25 Years
Computer	3 Years
Furniture and Fixtures	5 to 10 years
Office Equipment	5 to 10 years
Motor vehicles etc	5 Years
Railway Sidings & Overhead Electrification	25 Years

5.5 Derecognition of tangible assets

An item of Property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipments is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the statement of profit and loss.

5.6 Impairment of tangible and intangible assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets of or Group of assets.

When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Impairment losses of tangible and intangible assets are recognised in the statement of profit and loss.

*Government of Jharkhand

(a) The Land was acquired by Damodar Valley Corporation (DVC) exclusively for the Maithon Right Bank Thermal Power Project (MRBTPP). As per the Shareholders Agreement, the title is to be transferred to the Company. Pending transfer of title as stated above, the Company had entered into an Indenture Deed with DVC on 5 December, 2008, which provided inter-alia, lease of private land for a period of 35 years (and extendable for another 35 years at the option of the Company) and provision to create security in favour of Lenders and transfer this land to the Company at the cost at which it was acquired subject to approval of the Government of the State of Jharkhand. Mutation of Land in the name of MRBTPP, DVC is completed for 471.20 acres as on 31.03.2023 (470.16 acres as on 31.03.2022) out of 564.67 acres.

(b) The Land was acquired by Damodar Valley Corporation (DVC) exclusively for the MRBTPP. As per the shareholders agreement, the title of these lands is to be transferred to the Company. DVC is in the process of transferring title of these lands in favour of the Company as per applicable laws of the State of Jharkhand. Mutation of Land in the name of MRBTPP, DVC is completed for 37.78 acres as on 31.03.2023 (Nil acres as on 31.03.2022) out of 66.74 acres.

(c) The Company has received demand for 191.67 acres of Jungle Jhar (Forest Land) from Government of Jharkhand and has made payment of requisite amount and is in process of execution of lease from Government of Jharkhand in the name of Company.

(d) The Land was acquired by Damodar Valley Corporation (DVC) exclusively for the MRBTPP. As per the shareholders agreement, the lease of these lands is to be transferred to the Company. Accordingly, DVC has surrender the land to facilitate the process of transferring lease of lands in favour of the Company as per applicable laws of the State of Jharkhand. The Company is yet to receive demand from Government of Jharkhand for payment and execution of lease in the name of Company. Refer note 8.1

(e) The Company has applied lease of the land and made partial payment to GoJ. Final Demand is yet to receive from Government of Jharkhand for balance payment and execution of lease in the name of Company.

(f) The expenditure in connection with private land including land compensation and rehabilitation and resettlement expenses has been capitalised as freehold land and the expenditure in connection with GM land and Forest land has been included in Right of Use Assets.

(g) Freehold land with a carrying amount of ₹299.91 crores (as at 31st March, 2022 ₹299.91 crores) has been mortgaged to secure borrowings of the Company (Refer Note 15.1 & 19.1).

MAITHON POWER LTD. MAITHON

6. Capital Work-in-Progress

Accounting Policy

Capital work in progress is stated at cost, net of accumulated impairment loss, if any.

Capital Work in Progress	Amount in CWIP for a period of				Total
	Less than 1 year	1-2 years	2-3 years	More than 3 years	
Projects in progress	205.89	124.51	61.70	3.18	395.28

CWIP ageing Schedule as at 31st March 2022

₹ crore

Capital Work in Progress	Amount in CWIP for a period of				Total
	Less than 1 year	1-2 years	2-3 years	More than 3 years	
Projects in progress	125.73	62.40	2.85	15.88	206.86

Note:- There is no project whose completion is overdue or its cost has exceeded the original plan as at 31st March, 2023 as well as 31st March, 2022.

7. Intangible Assets

7.1 Accounting Policy

Intangible assets acquired separately

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, If any.

7.2 Subsequent Cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably.

7.3 Derecognition of intangible assets

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset is measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognized in profit or loss when the asset is derecognized.

7.4 Amortisation of intangible assets

Intangible assets with finite lives are amortised over the useful economic life on straight line basis and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life is reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Estimated useful lives of the intangible assets are as follows:

MAITHON POWER LTD. MAITHON

8. Right - of - use - assets

The Company recognizes right-of-use assets at the date of commencement of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, lease payments made at or before the commencement date less any lease incentives received and estimate of costs to dismantle. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

- Land: 05 to 35 years

The right-of-use assets are also subject to impairment in accordance with Ind AS 36 "Impairment of assets". The Company presents right-of-use assets that do not meet the definition of investment property in 'Property, plant and equipment'.

8.1 In terms of the Shareholders' Agreement dated 2nd September 2005 between Damodar Valley Corporation (DVC) and The Tata Power Company Limited, DVC was to transfer its leasehold rights over certain land parcels measuring 114.95 acres to the Company. Unamortised consideration paid by the Company to DVC for such leasehold rights is ₹ 1.03 Cr as on March 31, 2023. Based on information received by the management during the quarter/year, DVC had surrendered its aforesaid leasehold rights in favour of the Government of Jharkhand (GoJ) in a prior year for grant of leasehold rights over those land parcels directly to the Company. Pending execution of revised lease deeds by GoJ in favour of the Company, the financial impact of such lease arrangement including lease premium and amortisation thereof based on the terms of the lease agreement to be entered into is not ascertainable at this stage and will be recognised as and when the revised lease deed is executed. Management does not expect that resultant impact, if any, will be material to these financial statements.

Nature and purpose of reserves:

Debenture Redemption Reserve
The Company was required to create a Debenture Redemption Reserve out of the profits which are available for payment of dividend for the purpose of redemption of debentures. Pursuant to Companies (Share Capital and Debentures) Amendment Rules, 2019 dated 16th August, 2019, the Company is not required to create Debenture Redemption Reserve (DRR). Accordingly, the Company has not created DRR during the year and DRR created till previous years will be transferred to retained earnings on redemption of debentures.

Retained Earnings
Retained Earnings are the profits of the Company earned till date net of appropriations.

MAITHON POWER LTD. MAITHON

15.2 Lease Liabilities

Accounting Policy

At inception of contract, the Company assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. At inception or on reassessment of a contract that contains a lease component, the Company allocates consideration in the contract to each lease component on the basis of their relative standalone price.

As a lessee

i) Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. In calculating the present value of lease payments, the Company generally uses its incremental borrowing rate at the lease commencement date if the discount rate implicit in the lease is not readily determinable.

After the commencement date , the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. The carrying amount is remeasured when there is a change in future lease payments arising from a change in index or rate. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

ii) Short term leases and leases of low value of assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

Leasing arrangement as Lessee

The Company has lease contracts for various items of plant, machinery, land, vehicles and other equipment used in its operations. Leases of land generally have lease terms between 05 and 35 years. Expenses related to leases of low value asset has been charged to statement of profit and loss account as lease rent amounting ₹0.61 crores during the current year (31st March 2022 - ₹0.59 crores).

₹ crore

16. Provisions

Accounting Policy

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of time value of money is material).
Present obligations arising under onerous contracts are recognised and measured as provisions with charge to statement of profit and loss. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

Defined contribution plans
Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

Defined benefits plans

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method. Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liabilities and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in the statement of profit and loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liabilities or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non routine settlements; and
- Net interest expense or income.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds. The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates.

Current and other non-current employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of current employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other non-current employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

Employee Benefit Plans

16.1 Defined Contribution plan

The Company makes Provident Fund and Superannuation Fund contributions to defined contribution retirement benefit plans for eligible employees. The provident fund plan is operated by the Regional Provident Fund Commissioner. The Superannuation fund is managed by LIC of India. Under the schemes, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The only obligation of the Company with respect to the retirement benefit scheme is to make the specified contributions.

The Company has recognized ₹ 1.35 crores (31st March, 2022 ₹ 1.28 crores) for provident fund contributions and ₹ 0.42 crores (31st March, 2022 ₹ 0.37 crores) for superannuation contributions in the Statement of Profit and Loss. The contributions payable to these plans by the Company are at rates specified in the rules of the schemes.

16.2 Defined benefit plans

(i) Unfunded

Post-Employment Medical Benefits
The Company provides certain post-employment health care benefits to superannuated employees at some of its locations. In terms of the plan, the retired employees can avail free medical check-up and medicines at Company's facilities.

Pension
The Company operates a defined benefit pension plan for employees who have completed 15 years of continuous service. The plan provides benefits to members in the form of a pre-determined lumpsum payment on retirement. Executive Director, on retirement, is entitled to pension payable for life including HRA benefit. The level of benefit is approved by the Board of Directors of the Company from time to time.

Ex-Gratia Death Benefit

The Company has a defined benefit plan granting ex-gratia in case of death during service. The benefit consists of a pre-determined lumpsum amount along with a sum determined based on the last drawn basic salary per month and the length of service.

Retirement Gift
The Company has a defined benefit plan granting a pre-determined sum as retirement gift on superannuation of an employee.

(ii) Funded

Gratuity Plan
The Company has a defined benefit gratuity plan. The gratuity plan is primarily governed by the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of five years are eligible for gratuity. The level of benefits provided depends on the member's length of service and salary at the retirement, withdrawal, resignation or death of an employee. The gratuity plan is funded plan. The gratuity fund is managed by Aditya Birla Sun Life Insurance Company Limited. The fund has the form of a trust and is governed by Trustees appointed by the Company. The Trustees are responsible for the administration of the plan assets and for the definition of the investment strategy in accordance with the regulations. The funds are deployed in recognized insurer managed funds in India. The Company does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimates of expected gratuity payments.

The Plan assets include investments in G-Sec Bonds and accordingly exposed to financial risk.

MAITHON POWER LTD. MAITHON

(iii) **Risks associated with Plan Provisions**

Risks associated with the plan provisions are actuarial risks. These risks are: - (i) investment risk, (ii) interest risk (discount rate risk), (iii) mortality risk and (iv) salary risk.

Investment risk	The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to Government Bonds Yield. If plan liability is funded and return on plan assets is below this rate, it will create a plan deficit.
Interest rate risk (discount rate risk)	A decrease in the bond interest rate (discount rate) will increase the plan liability; however , this will be partially offset by an increase in the return on the plan debt investments.
Mortality risk	The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after the employment. Indian Assured Lives Mortality (2006-08) ultimate table has been used in respect of the above. An increase in the life expectancy of the plan participants such as, an increase in the salary of the plan participants will increase the plan's liability.
Salary escalation risk	The present value of the defined benefit plan liability is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.
Demographic risk	This is the risk of variability of results due to unsystematic nature of decrements that include mortality, withdrawal, disability and retirement. The effect of these decrements on the defined benefit obligations is not straight forward and depends upon the combination of salary increase, discount rate and vesting criterion.
Medical Inflation rate risk	Higher than expected increase in salary and medical cost will increase the defined benefit obligation.
Change in Leave Balances	This is the risk of variability of results due to a significant variation from expected accumulation of leave balances. All other aspects remaining same, higher than expected increase in the leave balances will increase the defined benefit obligation.

(iv) The principal assumptions used for the purposes of the actuarial valuations were as follows:

S. No.	Particulars	Refer note below	As at 31st March, 2023	As at 31st March, 2022
i.	Discount rate (p.a)	1	7.30%	6.80%
ii.	Salary escalation rate (p.a)	2		
	Management		7.00%	7.00%
	Non-Management		6.00%	6.00%
iii.	Retirement Age		60 years	60 years
iv.	Mortality Table		Indian Assured Lives Mortality (2006-08) Ult	Indian Assured Lives Mortality (2006-08) Ult
v.	Withdrawal Rate			
	Management: 21-44 years		6.00%	6.00%
	45 years and above		2.00%	2.00%
	Non-Management		0.50%	0.50%
vi.	Rate of Gold Inflation		8.00%	8.00%
vii.	Rate of Medical inflation (p.a)		8.00%	8.00%

Note:

1. The discount rate is based on the prevailing market yields of Indian Government securities as at the balance sheet date for the estimated term of obligations
2. The gratuity plan is funded
3. The estimates of future salary increases considered take into account the inflation, seniority, promotion and other relevant factors.

MAITHON POWER LTD. MAITHON

16.3 The amounts recognized in the financial statements and the movements in the net defined benefit obligations (DBO) over the year are as follows:

i. Amounts recognized in the Statement of Profit and Loss in respect of the funded defined benefits plans are as follows:

Particulars	For Year ended 31st March, 2023 ₹ crores	For Year ended 31st March, 2022 ₹ crores
Current service cost	0.97	1.04
Net interest on net defined liability / (asset)	(0.13)	(0.14)
Components of defined benefit costs recognized in profit or loss	**0.84**	**0.90**

ii. Remeasurement on the net defined benefit liability:

Particulars	For Year ended 31st March, 2023 ₹ crores	For Year ended 31st March, 2022 ₹ crores
Actuarial (gain)/Loss due to DBO Experience	1.43	0.20
Actuarial (gain)/Loss due to assumption changes	(0.62)	(0.24)
Actuarial (gain)/loss arising during period	0.80	(0.03)
Return on plan assets (greater)/less than discounting rate	0.51	0.40
Component of defined benefit costs recognized in Other Comprehensive Income	**1.31**	**0.37**

Note:

1) The current service cost and the net interest expense for the year are included in the 'Employee benefits expense ' in the Statement of Profit and Loss.

2) The remeasurement of the net defined benefit liability is included in the other comprehensive income.

iii. The amount included in the Balance Sheet arising from the entity's obligation in respect of its defined benefits plans as follows:

Particulars	For Year ended 31st March, 2023 ₹ Crores	For Year ended 31st March, 2022 ₹ Crores
Present value of funded defined benefit obligation	(13.70)	(12.59)
Fair value of plan assets	13.37	14.17
Funded status surplus/(deficit)	**(0.34)**	**1.57**

iv. Movement in the fair value of the defined benefit obligation:

Particulars	For Year ended 31st March, 2023 ₹ crores	For Year ended 31st March, 2022 ₹ crores
Opening defined benefit obligation	12.59	11.72
Current service cost	0.97	1.04
Interest cost on defined benefit obligation	0.79	0.76
Acquisitions (credit) / cost	0.37	(0.42)
Actuarial (gains) / loss arising from changes in experience	1.43	0.20
Actuarial (gains) / loss arising from changes in financial assumption	(0.62)	(0.24)
Benefits paid directly by the company	(1.82)	(0.47)
Closing defined benefit obligations	**13.70**	**12.59**

MAITHON POWER LTD. MAITHON

v. Movement in the fair value of the plan assets are as follows:

Particulars	For Year ended 31st March, 2023 ₹ Crores	For Year ended 31st March, 2022 ₹ Crores
Opening fair value of plan assets	14.17	13.66
Interest income on plan assets	0.92	0.90
Return on plan assets (greater)/less than discounting rate	(0.51)	(0.40)
Benefits paid	(1.21)	-
Closing fair value of plan assets	**13.37**	**14.17**

Note:

1) The plan assets of the Company managed through a trust are managed by Birla Sun Life Insurance (BSLI) Company Limited. The details of investments relating to these assets are not shown by BSLI. Hence, the composition of each major category of plan assets, the percentage or amount that each major category constitutes to the fair value of the total plan assets has not been disclosed.

2) The Company expects to make a contribution of ₹ Nil (as at 31 March, 2022: ₹ Nil) to defined benefit plan during the next financial year.

vi. Sensitivity analysis

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analysis below have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period, while holding all other assumptions constant.
The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Particulars	31st March, 2023 ₹ Crores		31st March, 2022 ₹ Crores	
	Increase	Decrease	Increase	Decrease
Discount Rate (-/+0.5%)	0.62	(0.58)	(0.56)	0.60
Salary Growth Rate (+/-0.5%)	(0.58)	0.62	0.60	(0.56)
Withdrawal Rate (-/+ 5%)	-	(0.48)	(0.65)	-

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit liability recognized in the Balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

vii. The expected maturity analysis of defined benefit obligation is as follows:

Time Period	31st March, 2023 ₹ Crores	31st March, 2022 ₹ Crores
Within 1 year	0.52	1.05
Between 1-2 years	0.55	0.58
Between 2-3 years	1.95	0.52
Between 3-4 years	2.05	1.90
Between 4-5 years	1.12	2.27
Beyond 5 years	9.99	8.28

Particulars	31st March, 2023	31st March, 2022
The weighted average duration of the defined benefit plan obligation represents average duration for active members	7.4 years	7.6 years

MAITHON POWER LTD. MAITHON

16.4 Other Defined benefit plans

The amounts recognized in the financial statements and the movements in the net defined benefit obligations over the year are as follows:

i. Amounts recognized in the Statement of Profit and Loss in respect of these defined benefits plans are as follows:

Particulars	For Year ended 31st March, 2023 ₹ crores	For Year ended 31st March, 2022 ₹ crores
Current service cost	0.64	0.64
Past Service Cost	0.01	-
Net interest expenses	0.57	0.55
Actuarial (Gain)/ Loss	0.22	0.22
Components of defined benefit costs recognized in profit or loss	**1.44**	**1.41**

ii. Remeasurement on the net defined benefit liability:

Particulars	For Year ended 31st March, 2023 ₹ crores	For Year ended 31st March, 2022 ₹ crores
Actuarial (gain)/Loss due to Defined Benefit Obligation Experience	0.12	0.01
Actuarial (gain)/Loss due to assumption Changes	(0.52)	(0.12)
	(0.40)	(0.11)
Return on plan assets (greater)/less than discounting rate	0.09	0.22
Component of defined benefit costs recognized in Other Comprehensive Income	**(0.31)**	**0.12**

Note:

1) The current service cost and the net interest expense for the year are included in the 'Employee benefits expense ' in the Statement of Profit and Loss.

2) The remeasurement of the net defined benefit liability is included in the other comprehensive income.

iii. Reconciliation of Net Balance Sheet Position

Particulars	For Year ended 31st March, 2023 ₹ crores	For Year ended 31st March, 2022 ₹ crores
Opening Net defined benefit asset/ (liability)	**(8.65)**	**(8.63)**
Current service cost	(0.65)	(0.64)
Net interest on net defined benefit liability/ (asset)	(0.57)	(0.55)
Amount recognized in OCI	0.31	0.33
Actuarial Gains/ (Losses)	0.09	(0.22)
Benefit paid directly by the Company	0.47	0.74
Acquisitions credit/ (cost)	0.22	0.32
Closing Net defined benefit asset/ (liability)	**(8.78)**	**(8.65)**

iv. Sensitivity analysis

Particulars	31st March, 2023 ₹ crores		31st March, 2022 ₹ crores	
	Increase	Decrease	Increase	Decrease
Discount Rate (-/+0.5%)	(0.47)	0.52	(0.48)	0.54
Salary Growth Rate (+/-0.5%)	0.30	(0.28)	0.31	(0.28)
Withdrawal Rate (-/+ 5%)	(1.96)	-	(1.96)	-
Gold Inflation Rate (+/- 5%)	0.07	(0.07)	0.07	(0.06)
Medical Inflation Rate (+/- 5%)	0.13	(0.11)	0.14	(0.12)
Mortality Rate (+/- 5%)	0.04	(0.04)	0.05	(0.04)

vi. The expected maturity analysis of defined benefit obligations

Time Period	31st March, 2023 ₹ crores	31st March, 2022 ₹ crores
Within 1 year	0.38	0.50
Between 1-2 years	0.39	0.51
Between 2-3 years	0.76	0.37
Between 3-4 years	0.78	0.75
Between 4-5 years	0.64	1.08
Beyond 5 years	4.82	4.07

Particulars	31st March, 2023	31st March, 2022
The weighted average duration of the Post Retirement Medical Benefit represents average duration for active members	17 years	17 years

MAITHON POWER LTD. MAITHON

17. Deferred Tax Assets / Liabilities (Net)

Accounting Policy

Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

For operations carried out under tax holiday period (80IA benefits of Income Tax Act, 1961), deferred tax assets or liabilities, if any, have been established for the tax consequences of those temporary differences between the carrying values of assets and liabilities and their respective tax bases that reverse after the tax holiday ends.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

Deferred tax assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognised as deferred tax asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realised. The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent that it is no longer probable that it will pay normal tax during the specified period.

In the situations where one or more units of the Company are entitled to a tax holiday under the tax law, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the concerned unit's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent it is probable that sufficient future taxable income will be available against which such deferred tax assets can be realized. For recognition of deferred taxes, the temporary differences which originate first are considered to reverse first.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax for the year. The deferred tax asset is recognised for MAT credit available only to the extent that it is probable that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset, it is created by way of credit to the statement of profit and loss and shown as part of deferred tax asset. The Company reviews the "MAT credit entitlement" asset at each reporting date.

MAITHON POWER LTD. MAITHON

Note:

a. Deferred tax assets and liabilities are being offset as they relate to taxes on income levied by the same governing taxation laws.

b. The Company is entitled for availing the tax benefit under section 80IA of the Income-tax Act, 1961, with effect from the financial year 2016-17 for 10 years. Deferred tax liabilities as at 31 March, 2023, reflect the quantum of tax liabilities accrued upto the period end but payable after the expiry of the tax holiday period.

c. The Company has recognised MAT credit entitlement of ₹ 513.05 crores as at March 31, 2023 (as at March 31, 2022: ₹ 463.23 crores). Basis the existing tax laws and the projections of future profitability considering definitive Power purchase agreements which are completely tied up with the plant capacity, the management is confident of earning taxable profits each year and will be able to utilise the entire amount of MAT credit entitlement recognised in the financial Statement.

* Amounts unpaid to Micro and Small Enterprises vendors on account of retention money have not been considered for the purpose of interest calculation.

MAITHON POWER LTD. MAITHON

20. Revenue from Operations
Accounting Policy

Revenue recognition
Revenue from contracts with customers is recognised when control of the goods or services are transferred to customers for a consideration that the Company expects to be entitled as per terms of relevant contracts and orders of applicable regulatory authorities.

Description of performance obligations are as follows :

Sale of Power - Generation (Thermal)
Revenue from sale of power is recognised net of cash discount over time for each unit of electricity delivered.

Contract price determined as per tariff regulations
The Company as per the prevalent tariff regulations is required to recover its Annual Revenue Requirement ('ARR') comprising of expenditure on account of fuel cost, operations and maintenance expenses, financing costs, taxes and assured return on regulator approved equity with incentive for operational efficiencies. Accordingly, rate per unit of power supplied is determined using cost of inputs for generation of power based on the Company's efforts to the satisfaction of a performance obligation to deliver power. As per tariff regulations, the Company determines ARR and any surplus/shortfall in recovery of the same is accounted as revenue.

The difference between the revenue recognised and amount invoiced has been presented as deferred revenue/unbilled revenue.

Deferred tax recoverable/payable
The Income tax cost is pass through cost and accordingly the Company recognises Deferred tax recoverable/payable against any Deferred tax expense/ income. The same is included in Revenue from Operations.

Late Payment Surcharge
Late payment surcharge leviable as per CERC Regulations are recognised on accural basis when the company considers that its realisation is probable based on customers acknowledgement or orders issued by relevant regulatory authorities.

No Late Payment Surcharge ('LPS') is charged for the initial 45 to 60 days from the date of receipt of invoice by customer. Thereafter, LPS is charged at the rate prescribed by CERC Regulations on the outstanding balance once the dues are received. Revenue in respect of late payment surcharge leviable as per the relevant contracts are recognised on actual realisation or accrued based on an assessment of certainty of realization supported by either an acknowledgement from customers or on receipt of favourable order from regulatory authorities.

Dividend and interest income
Dividend income from investments is recognized when the shareholder's right to receive payment has been established.

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected or contracted life of the financial asset to that asset's net carrying amount on initial recognition.

		3,029.09	**2,780.20**

Note:-
Tariff to be charged under terms of Long term power supply agreements are determined by Central Electricity Regulatory Commission (CERC) in accordance with its notified tariff regulations or norms. The tariff consists of two parts namely, capacity charge (for recovery of fixed cost based on plant availability) and energy charges (for recovery of fuel costs). The Company has received true-up order for the control period 2014-19 and also the Tariff order for the control period 2019-24, issued by CERC on 8th January, 2022. Further, the tariff order for 2019-24 has considered a significant cost element that has hitherto not been considered in tariff order till date and also in the true-up order for 2014-19, in respect of which the Company has filed review petition with the relevant appellate authority, and has recognised revenue as per the tariff order, on a conservative basis. Further adjustments could arise upon disposal of company's review petition.

24. Finance Costs

Accounting Policy

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognized in statement of profit and loss in the period in which they are incurred.

MAITHON POWER LTD. MAITHON

26. Income taxes

Accounting Policy

Current Tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside statement of profit and loss is recognised outside statement of profit and loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

(i) Income tax recognised in profit and loss

	For Year ended 31st March, 2023 ₹ Crores	For Year ended 31st March, 2022 ₹ Crores
Current tax		
For the year	66.17	51.13
In respect of earlier years	-	(0.99)
Current Tax (Including adjustment of tax relating to earlier year)	**66.17**	**50.14**
Deferred tax	18.07	6.50
MAT Credit	(49.82)	(44.54)
Deferred Tax (Net)	**(31.75)**	**(38.04)**
Income tax expense reported in the Statement of Profit and Loss	**34.42**	**12.10**

(ii) Reconciliation of tax expense as per the effective rate of tax and India's statutory rate of tax

	For Year ended 31st March, 2023 ₹ Crores	For Year ended 31st March, 2022 ₹ Crores
Profit before tax	**379.74**	**292.63**
Applicable income tax rate	34.94%	34.94%
Income tax expense calculated at applicable rate	132.70	102.26
Temporary difference reversed during tax holiday period.	40.18	27.57
On account of 80IA benefits	(146.64)	(121.15)
Other Adjustments	8.18	3.42
Total income tax expense	**34.42**	**12.10**

1. The tax rate used for the financial years 2022-23 and 2021-22 reconciliations above is the corporate tax rate of 34.94% and 34.94% respectively payable by the corporate entities in India on taxable profits under the Indian tax law.
2. The rate used for calculation of deferred tax is @34.94% for FY 2022-23 & for FY 2021-22 being statutory enacted rates at respective Balance Sheet Dates.

(iii) Income tax recognised in other comprehensive income

	For Year ended 31st March, 2023 ₹ Crores	For Year ended 31st March, 2022 ₹ Crores
Arising on income and expenses reclassified in other comprehensive income:		
Remeasurement of the defined benefit plan	(1.00)	(0.04)
Total income tax expense recognised in other comprehensive income	**(1.00)**	**(0.04)**
Bifurcation of the income tax recognised in other comprehensive income into:		
- Items that will not be reclassified to profit or loss	0.18	0.01
	0.18	**0.01**

27. Commitments

	For Year ended 31st March, 2023 ₹ Crores	For Year ended 31st March, 2022 ₹ Crores

	70.63	**358.79**

MAITHON POWER LTD. MAITHON

28. Contingent liabilities

(a) Claims against the Company not acknowledged as debts for demands raised by the office of the Zonal Jt. Director General Trade for revocation of grant of deemed export benefits which has been disputed by the Company ₹ 36.41 crores (31 March, 2022 : ₹ 36.41 crores).

(b) Demand in respect of lease rent for GM Land as referred in note 5.8 (d) and (e).

(c) The Code on Social Security 2020 has been notified in the Official Gazette on 29th September, 2020. The effective date from which the changes are applicable is yet to be notified and the rules are yet to be framed. Impact if any of the change will be assessed and accounted in the period in which said Code becomes effective and the rules framed thereunder are notified.

29. Earnings per share (EPS)

Accounting Policy

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. The average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

	For Year ended 31st March, 2023 ₹ Crores	For Year ended 31st March, 2022 ₹ Crores
Basic and diluted earnings per share (face value of ₹ 10/- each)	2.29	1.86
Basic and diluted earnings per share	**2.29**	**1.86**

The earnings and weighted average number of equity shares used in the calculation of basic and diluted earnings per share are as follows:

	For Year ended 31st March, 2023 ₹ Crores	For Year ended 31st March, 2022 ₹ Crores
Profit After Tax	345.32	280.53
The weighted average number of equity shares for Basic and Diluted EPS	1,50,89,17,729	1,50,89,17,729

Note:
There have been no other transactions involving Equity Shares or Potential Equity Shares between the Reporting date and the date of authorisation of these financial statements.

MAITHON POWER LTD.

The management assessed that the fair value of cash and cash equivalents, other balances with bank, trade receivables, loans, unbilled revenues, trade payables, other financial assets and liabilities approximate their carrying amounts largely due to the short term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties. The following methods and assumptions were used to estimate the fair values.

Fair value hierarchy

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels.

Level 1 : Quoted prices in an active market : Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities and net assets value of mutual funds declared by the issuer

Level 2 : Valuation techniques with observable inputs : Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices)

Level 3 : Valuation techniques with significant unobservable inputs : Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

The following table provides the fair value measurement hierarchy of the Company's assets and liabilities. :

		Fair value hierarchy as at 31st March, 2023			
	Date of valuation	Level 1	Level 2	Level 3	Total
		₹ crore	₹ crore	₹ crore	₹ crore
Asset measured at fair value					
At Fair Value through Profit and Loss (FVTPL) (Unquoted Mutual Funds)	31st March, 2023	134.50	-	-	134.50
		134.50	**-**	**-**	**134.50**
Liabilities for which fair values are disclosed					
Fixed rate borrowings	31st March, 2023	-	969.87	-	969.87

Fixed rate borrowings	31st March, 2022	-	964.16	-	964.16
Floating rate borrowings	31st March, 2022	-	695.63	-	695.63
Total		**-**	**1,659.79**	**-**	**1,659.79**

There has been no transfer between level 1 and level 2 during the year.

32.2 Capital Management & Gearing Ratio

For the purpose of the Company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximize the value for shareholders.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. From time to time, the Company reviews its policy related to dividend payment to shareholders, return capital to shareholders or fresh issue of shares. The Company monitors capital using gearing ratio, which is net debt divided by total capital plus net debt. The Company's policy is to keep the gearing ratio around 50%. The Company includes within net debt, interest bearing loans and borrowings, less cash and bank balances, excluding discontinued operations as detailed in the notes below.

The Company's capital management is intended to create value for shareholders by facilitating the meeting of its long-term and short-term goals. Its Capital structure consists of net debt (borrowings as detailed in notes below) and total equity.

Gearing ratio

The gearing ratio at the end of the reporting year was as follows:

	₹ crore	
	As at 31st March, 2023	As at 31st March, 2022
Debt (i)	1,615.18	1,716.88
Less: Cash and Bank balances	180.61	12.01
Net debt	**1,434.57**	**1,704.87**
Total Capital (ii)	2,195.39	2,480.89
Capital and net debt	**3,629.96**	**4,185.76**
Gearing ratio (%)	39.52	40.73

(i) Debt is defined as Non-current borrowings (including current maturities) and Current borrowings (excluding derivative, financial guarantee contracts and contingent considerations) and interest accrued on Non-current and Current borrowings.

(ii) Equity is defined as Equity share capital and other equity including reserves and surplus.

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no significant breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

No changes were made in the objectives, policies or processes for managing capital during the years ended 31st March, 2023 and 31st March, 2022.

MAITHON POWER LTD.

32. Financial Instruments

32.3 Financial risk management objectives and policies

The Company's principal financial liabilities, comprise borrowings, trade and other payables and other financial liabilities. The main purpose of these financial liabilities is to finance the Company's operations and to provide guarantees to support its operations. The Company's principal financial assets include investments, loans, trade and other receivables, cash and cash equivalents, other bank balances, unbilled receivables and other financial assets that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a risk committee that reviews the financial risks and the appropriate financial risk governance framework for the Company. The Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The risk management polices is approved by the board of directors, which is summarized below.

32.3.1 Market risk management

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises of three types of risk: currency risk, interest rate risk and equity price risk. The impact of equity price risk and currency risk is not material. Financial instruments affected by market risk are loans and borrowings.

The following sensitivity analysis relates to borrowings as at 31st March, 2023 and 31st March, 2022.

a) Interest rate risk management

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the company's long-term debt obligations with floating interest rates.

The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. The exposure of the Company's borrowings to interest rate changes at the end of the reporting period are as follows :

Particulars	31st March, 2023		31st March, 2022	
	Balance	Percentage	Balance	Percentage
Fixed Rate Borrowings (Includes Current Maturities)	969.87	62%	964.16	58%
Floating Rate Borrowings (Includes Current Maturities)	599.00	38%	695.63	42%
Total	**1,568.87**		**1,659.79**	

Interest rate sensitivity:

The sensitivity analysis below have been determined based on exposure to interest rates for term loans and debentures at the end of the reporting period and the stipulated change taking place at the beginning of the financial year and held constant throughout the reporting period in case of term loans and debentures that have floating rates.

If the interest rates had been 50 basis points higher or lower and all the other variables were held constant, the effect on Interest expense for the respective financial years and consequent effect on Company's profit in that financial year would have been as below:

Particulars	31st March, 2023		31st March, 2022	
	50 bps increase	50 bps decrease	50 bps increase	50 bps decrease
Interest expense on loan	(+) ₹ 3.00	(-) ₹ 3.00	(+) ₹ 3.48	(-) ₹ 3.48
Effect on profit before tax	(-) ₹ 3.00	(+) ₹ 3.00	(-) ₹ 3.48	(+) ₹ 3.48

MAITHON POWER LTD. ★ MAITHON ★

32.3.2 Credit risk management

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (i.e. Primarily trade receivables and unbilled revenue) and from its financing activities including loans, foreign exchange transactions and other financial instruments.

Collateral held as security

The Company holds collateral i.e. letter of credit and bank guarantee to partly secure its outstanding trade receivables. Credit risk associated with receivables is mitigated because the receivables are partly secure.

₹ crore

	31st March, 2023	31st March, 2022
Trade Receivables	47.07	45.41
Loans	4.13	65.66
Other Financial Assets	19.35	16.23
Unbilled Revenue	180.61	12.01
Total	**251.16**	**139.31**

Refer Note 9.2 for credit risk and other information in respect of trade receivables. Other receivables as stated above are due from the parties under normal course of the business and as such the Company believes exposure to credit risk to be minimal.

32.3.3 Liquidity risk management

Liquidity risk is the risk that the company will encounter difficulty in meeting obligation, associated with financial liabilities that are settled by delivering cash or another financial asset.

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. The Company has access to a sufficient variety of sources of funding. Having regards to the nature of the business wherein the Company is able to generate fixed cash flows over a period of time and to optimize the cost of funding, the Company, from time to time, funds its long -term investment from short-term sources. The short-term borrowings can be rollforward or, if required, can be refinanced from long term borrowings.

	Up to 1 year	1 to 5 years	5+ years	Total	Carrying Amount
31st March, 2023					
Non-Derivatives					
Borrowings #	369.86	850.71	354.56	**1,575.13**	**1,583.17**
Trade Payables	243.83	-	-	**243.83**	**243.83**
Lease Liability	0.31	1.55	4.68	**6.54**	**3.43**
Other Financial Liabilities	48.98	73.40	-	**122.38**	**122.38**
Total Non-Derivative Liabilities	**662.97**	**925.66**	**359.24**	**1,947.87**	**1,952.81**
31st March, 2022					
Borrowings #	325.06	1,063.84	275.71	**1,664.61**	**1,677.25**
Trade Payables	142.12	-	-	**142.12**	**142.12**
Lease Liability	0.36	1.80	4.74	**6.90**	**3.24**
Other Financial Liabilities	80.29	6.39	-	**86.68**	**86.68**
Total Non-Derivative Liabilities	**547.83**	**1,072.03**	**280.45**	**1,900.31**	**1,909.29**

The table has been drawn up based on the undiscounted contractual maturities of the financial liabilities including interest that will be paid on those liabilities upto the maturity of the instruments.

32.4 Commodity price risk

The operating activity of the company involves generation of power and therefore requires continuous supply of coal. The company has entered into fuel supply agreements with Central Coalfields Limited and Bharat Coking Coal Limited and any price fluctuation is passed on to the customers.

MAITHON POWER LTD. ★ MAITHON ★

33. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

34. **Segment Reporting**

The Company is mainly engaged in the business of generation and selling of power in India. Based on the information reported to the chief operating decision maker (CODM) for the purpose of resource allocation and assessment of performance, there are no other reportable segments in accordance with the requirements of Indian Accounting Standard 108-'Operating Segments', notified under the Companies (Indian Accounting Standards) Rules, 2015.

35. **Significant Events after the Reporting Period**

There were no significant adjusting event that occurred subsequent to the reporting period.

36. **Other Statutory Information**

(i) The Company does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.
(ii) The Company does not have any transactions with companies struck off.
(iii) The Company does not have any charges or satisfaction which is yet to be registered with ROC beyond the statutory period.
(iv) The Company has not traded or invested in Crypto currency or Virtual Currency during the financial year.
(v) The Company has not advanced or loaned or invested funds to any other person(s) or entity(ies), including foreign entities (Intermediaries) with the understanding that the Intermediary shall:
(a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company (Ultimate Beneficiaries) or
(b) provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.
(vi) The Company have not received any fund from any person(s) or entity(ies), including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Company shall:
(a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries) or
(b) provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(vii) The Company have not any such transaction which is not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income Tax Act, 1961.

37. The Company has defined process to take daily back-up of books of account maintained electronically and maintain the logs of the back-up of such books of account for cyclic period of 90 days only. Hence, this is not been considered as non-compliance with the provisions of The Companies (Accounts) Rules, 2014 (as amended), since, at any point of time, logs are available for a period upto 90 days. However, management is taking steps to configure systems to ensure that logs of daily back up for books of account is maintained on a daily basis so long as they are required to be maintained under applicable statute.

38. Previous year's figures are regrouped / rearranged, where necessary, to confirm to the current year's presentation.

INDEPENDENT AUDITOR'S REPORT

To the Members of Maithon Power Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Maithon Power Limited ("the Company"), which comprise the Balance sheet as at March 31 2024, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including a summary of material accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, its profit including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Emphasis of Matter

We draw attention to Note 33 of the financial statements which describes the impact of adjustment related to enabling assets, which had led to a restatement of the financial statements for the year ended March 31, 2023. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the financial year ended March 31, 2024. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.
We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

S.R. Batliboi & Co. LLP

Key audit matters	How our audit addressed the key audit matter
Accrual of Recoverable from Beneficiaries/Payable to Beneficiaries for items which are subject matter of true up in tariff orders *(as described in note 18 of the financial statements)*	
The Company's revenue recognition is guided by the tariff norms prescribed by the Central Electricity Regulatory Commission (CERC) guidelines and the tariff orders passed based on these regulations. Consequently, Recoverable from Beneficiaries/Payable to Beneficiaries is recognized for items which are subject matter of True-up in tariff orders to be notified in future years. Judgement is exercised by management in estimating recoverability / payability of such other assets and liabilities in the books of account. As on 31st March 2024, the Company is carrying an amount of Rs. 272.83 crores as Payable to Beneficiaries (Net of Recoverable from Beneficiaries of Rs. 70.98 crores) which is material to the financial statements of the Company. Considering judgements and estimates involved in various elements of capital and operational costs used in the computation of revenue as per applicable regulations, tariff order of prior year, expected true up in future tariff order and the amount involved we have determined this to be a key audit matter.	Following procedures have been performed to address this key audit matter:- 1. We obtained an understanding from the management, assessed and tested the design and operating effectiveness of the Company's key controls related to accrual/provision of such Recoverable from Beneficiaries/Payable to Beneficiaries. 2. We discussed with the management on the key assumptions and estimates used for recognition of these Recoverable from Beneficiaries/Payable to Beneficiaries with reference to Tariff Regulations and the tariff orders of earlier years, on similar true up and underlying records of the Company. 3. We discussed with management to understand their assessment of each of the qualitative factors and ensured consistency of the management's explanation with the underlying documentation, rules and regulations. 4. We have re-calculated the workings obtained from the management to check the arithmetical accuracy of the calculations. 5. We have also checked the adequacy of the disclosure on these matters in the financial statements of the Company. 6. We have also obtained necessary management representations, as considered necessary.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going

concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements for the financial year ended March 31, 2024 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report, to the extent applicable, that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books except for the matters stated in the paragraph i(vi) below on reporting under Rule 11(g);

   (c) The Balance Sheet, the Statement of Profit and Loss including the Statement of Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

   (d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015, as amended;

   (e) On the basis of the written representations received from the directors as on March 31, 2024 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2024 from being appointed as a director in terms of Section 164 (2) of the Act;

(f) The modification relating to the maintenance of accounts and other matters connected therewith are as stated in the paragraph (b) above on reporting under Section 143(3)(b) and paragraph (i) vi below on reporting under Rule 11(g);

(g) With respect to the adequacy of the internal financial controls with reference to financial statements and the operating effectiveness of such controls, refer to our separate Report in "Annexure 2" to this report;

(h) In our opinion, the managerial remuneration for the year ended March 31, 2024 has been paid / provided by the Company to its directors in accordance with the provisions of section 197 read with Schedule V to the Act;

(i) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 28 to the financial statements;

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

iv. a) The management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

b) The management has represented that, to the best of its knowledge and belief, no funds have been received by the Company from any person(s) or entity(ies), including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

c) Based on such audit procedures performed that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (a) and (b) contain any material misstatement.

v. The interim dividend declared and paid by the Company during the year is in accordance with section 123 of the Act.

As stated in note 14 to the financial statements, the Board of Directors of the Company has proposed final dividend for the year which is subject to the approval of the members at the

ensuing Annual General Meeting. The dividend declared is in accordance with section 123 of the Act to the extent it applies to declaration of dividend.

vi. Based on our examination which included test checks, the Company has used accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software except that, audit trail feature is not enabled for direct changes to data when using certain access rights, as described in note 38 to the financial statements. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with in respect of the accounting software.

Annexure '1' referred to in paragraph under the heading "Report on other legal and regulatory requirements" of our report of even date

Re: Maithon Power Limited ("the Company")

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit and to the best of our knowledge and belief, we state that:

(i)(a)(A) The Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment.

(i)(a)(B) The Company has maintained proper records showing full particulars of intangibles assets.

(i)(b) The Company has verified part of its property plant and equipment during the year in accordance with its regular programme of verification of these assets whereby all the assets are physically verified over a period of 3 years which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed on such verification.

(i)(c) The title deeds of immovable properties (other than properties where the Company is the lessee and valid lease agreements are duly executed in favour of the lessee) disclosed in note 5.8 to the financial statements included in Property, Plant and Equipment are held in the name of the Company, except the following:

Description of Property	Amount in INR crores	Held in the name of	Whether promoter, director or their relative or employee	Period held – indicate range, where appropriate	Reason for not being held in the name of Company
Raiyati Land (Free hold) located at Maithon, Jharkhand.	159.80	Damodar Valley Corporation (DVC)	Promoter	December 2008	In accordance with the term of agreement dated September 2, 2005 with DVC, the title deed of the land parcel were to be executed in favour of the Company by DVC. We have been informed that such title deeds are yet to be executed in favour of the Company pending mutation in favour of DVC by Government of Jharkhand.
Railway Land (Freehold Land) located at Maithon, Jharkhand.	137.12	DVC	Promoter	October 2008 to March 2015	

Forest land (Leasehold) located at Maithon, Jharkhand	10.68	Government of Jharkhand	No	May 2008	Lease deed yet to be executed in favour of the Company by the Government of Jharkhand.
GM land-Plant (Leasehold) located at Maithon, Jharkhand	37.05	Government of Jharkhand	No	July 2010	DVC had surrendered their leasehold rights over the land parcel in favour of the Government of Jharkhand in a prior year to enable the Government of Jharkhand to lease the same land parcel in favour of the Company. The Company is yet to receive a demand from the Government of Jharkhand for execution of lease and hence the lease deed in the name of the Company is yet to be executed.
GM land-Railway (Leasehold) located at Maithon, Jharkhand	8.96	Government of Jharkhand	No	July 2010	Lease deed yet to be executed in favour of the Company by the Government of Jharkhand.
GM land-Railway (Leasehold) located at Maithon, Jharkhand	5.02	Government of Jharkhand	No	July 2010	

(i)(d) The Company has not revalued its Property, Plant and Equipment (including Right of use assets) or intangible assets during the year.

(i)(e) As represented to us by the management, there are no proceedings initiated or are pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made thereunder.

(ii)(a) The management has conducted physical verification of inventory at reasonable intervals during the year and no material discrepancies were noticed on such physical verification. In

our opinion the coverage and the procedure of such verification by the management is appropriate.

(ii)(b) As disclosed in note 19.1 to the financial statements, the Company has been sanctioned working capital limits in excess of Rs. five crores in aggregate from banks during the year on the basis of security of current assets of the Company. The quarterly returns/statements filed by the Company with such banks are in agreement with the books of account of the Company. The Company does not have any sanctioned working capital limits from financial institutions.

(iii)(a) During the year the Company has not provided advances in the nature of loans, stood guarantee or provided security to companies, firms, limited liability partnerships or any other parties. During the year, the Company has provided loan to a Company as follows:

Particulars	Amount in INR crores
Aggregate amount granted/ provided during the year	
- Subsidiaries - Joint Ventures - Associates - Others	150.00
Balance outstanding as at balance sheet date in respect of above cases - Subsidiaries - Joint Ventures - Associates - Others	Nil

(iii)(b) During the year the Company has not provided any guarantee or security and has not granted advances in the nature of loans to companies, firms, limited liability partnerships or any other parties. The investments made and the terms and conditions of the loans granted are not prejudicial to the Company's interest.

(iii)(c) The Company has not granted advances in the nature of loans to companies, firms, Limited Liability Partnerships or any other parties. The Company has granted loans during the year to a company where the schedule of repayment of principal and payment of interest has been stipulated and the repayment or receipts are regular.

(iii)(d) There are no amounts of loans and advances in the nature of loans granted to companies, firms, limited liability partnerships or any other parties which are overdue for more than ninety days.

(iii)(e) There were no loans or advances in the nature of loan granted to companies, firms, Limited Liability Partnerships or any other parties which was fallen due during the year, that have been renewed or extended or fresh loans granted to settle the overdues of existing loans given to the same parties.

(iii)(f) The Company has not granted any loans or advances in the nature of loans, either repayable on demand or without specifying any terms or period of repayment to companies, firms, Limited Liability Partnerships or any other parties. Accordingly, the requirement to report on clause 3(iii)(f) of the Order is not applicable to the Company and hence not commented upon.

(iv) There are no loans, investments, guarantees, and security in respect of which provisions of sections 185 and 186 of the Companies Act, 2013 are applicable. Therefore, the requirement to report on clause 3(iv) of the Order is not applicable to the Company and hence not commented upon.

(v) The Company has neither accepted any deposits from the public nor accepted any amounts which are deemed to be deposits within the meaning of sections 73 to 76 of the Companies Act, 2013 and the rules made thereunder, to the extent applicable. Therefore, the requirement to report on clause 3(v) of the Order is not applicable to the Company and hence not commented upon.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section 148(1) of the Companies Act, 2013, related to the generation of electricity, and are of the opinion that, prima facie, the specified accounts and records have been made and maintained. We have not, however, made a detailed examination of the same.

(vii)(a) The Company is regular in depositing with appropriate authorities undisputed statutory dues including goods and services tax, provident fund, employees' state insurance, income-tax, cess and other statutory dues applicable to it. During the year, the Company did not have any undisputed dues towards sales-tax, service tax, duty of customs, duty of excise and value added tax. No undisputed amounts payable in respect of aforesaid dues were outstanding at the year-end for a period of more than six months from dates when they became payable.

(vii)(b) There are no dues of goods and services tax, provident fund, employees' state insurance, income tax, sales-tax, service tax, customs duty, excise duty, value added tax, cess and other applicable statutory dues which have not been deposited on account of any dispute.

(viii) As represented to us by the management, the Company has not surrendered or disclosed any transaction, previously unrecorded in the books of account, in the tax assessments under the Income Tax Act, 1961 as income during the year. Therefore, the requirement to report on clause 3(viii) of the Order is not applicable to the Company and hence not commented upon.

(ix)(a) The Company has not defaulted in repayment of loans or other borrowings or in the payment of interest thereon to any lender.

(ix)(b) As represented to us by the management, the Company has not been declared wilful defaulter by any bank or financial institution or government or any government authority.

(ix)(c) Based on an overall examination of the Balance Sheet and information, explanations and representations provided to us, term loans were applied for the purpose for which they were obtained.

(ix)(d) Based on an overall examination of the Balance Sheet and information, explanations and representations provided to us, no funds raised on short-term basis have been used for long-term purposes by the Company.

(ix)(e) and (f) The Company does not have any subsidiary, associate or joint venture. Therefore, the requirement to report on clause 3(ix)(e) and (f) of the Order are not applicable to the Company and hence not commented upon.

(x)(a) The Company has not raised any money during the year by way of initial public offer / further public offer (including debt instruments). Therefore, the requirement to report on clause 3(x)(a) of the Order is not applicable to the Company and hence not commented upon.

(x)(b) The Company has not made any preferential allotment or private placement of shares /fully or partially or optionally convertible debentures during the year under audit. Therefore, the requirement to report on clause 3(x)(b) of the Order is not applicable to the Company and hence not commented upon.

(xi)(a) As represented to us by the management, no fraud by the Company or no material fraud on the Company has been noticed or reported during the year.

(xi)(b) During the year, no report under sub-section (12) of section 143 of the Companies Act, 2013 has been filed by cost auditor/ secretarial auditor or by us in Form ADT – 4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.

(xi)(c) We have taken into consideration the whistle blower complaints received by the Company during the year while determining the nature, timing and extent of audit procedures.

(xii) The Company is not a nidhi Company as per the provisions of the Companies Act, 2013. Therefore, the requirement to report on clauses 3(xii)(a), (b) and (c) of the Order is not applicable to the Company and hence not commented upon.

(xiii) Transactions with the related parties are in compliance with sections 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the notes to the financial statements, as required by the applicable accounting standards.

(xiv)(a) The Company has an internal audit system commensurate with the size and nature of its business.

(xiv)(b) The internal audit reports of the Company for the year under audit which were issued till date of this audit report, have been considered by us.

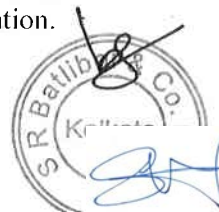
(xv) The Company has not entered into any non-cash transactions with its directors or persons connected with its directors. Therefore, the requirement to report on clause 3(xv) of the Order is not applicable to the Company and hence not commented upon.

(xvi)(a) The provisions of section 45-IA of the Reserve Bank of India Act, 1934 (2 of 1934) are not applicable to the Company. The requirement to report on clause (xvi)(a) of the Order is not applicable to the Company and hence not commented upon.

(xvi)(b) As represented to us by management, the Company has not conducted any Non-Banking Financial or Housing Finance activities without obtained a valid Certificate of Registration (CoR) from the Reserve Bank of India as per the Reserve Bank of India Act, 1934.

(xvi)(c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by Reserve Bank of India. The requirement to report on clause 3(xvi) of the Order is not applicable to the Company and hence not commented upon.

(xvi)(d) As represented to us by the management, the Group has five CICs which are registered with the Reserve Bank of India and two CICs which are not required to be registered with the Reserve Bank of India. However, we have not independently verified such representation.



(xvii) The Company has not incurred cash losses in the current financial year and in the immediately preceding financial year.

(xviii) There has been no resignation of the statutory auditors during the year. The requirement to report on Clause 3(xviii) of the Order is not applicable to the Company and hence not commented upon.

(xix) On the basis of the financial ratios disclosed in note 31 to the financial statements, ageing and expected dates of realization of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

(xx)(a) In respect of other than ongoing projects, there are no unspent amounts that are required to be transferred to a fund specified in Schedule VII of the Companies Act (the Act), in compliance with second proviso to sub section 5 of section 135 of the Act. This matter has been disclosed in note 25(ii) to the financial statements.

(xx)(b) All amounts that are unspent under section (5) of section 135 of Companies Act, pursuant to any ongoing project, has been transferred to special account in compliance of with provisions of sub section (6) of section 135 of the said Act. This matter has been disclosed in note 25(ii) to the financial statements.

ANNEXURE TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF MAITHON POWER LIMTED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to financial statements of ("the Company") as of March 31, 2024 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to these financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these [standalone]financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to these financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to these financial statements.

Meaning of Internal Financial Controls With Reference to these Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

S R Batliboi & Co. LLP Kolkata

A company's internal financial controls with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls With Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

1. Corporate Information

MAITHON POWER LIMITED ('the Company'), has been set up pursuant to an agreement entered into between The Tata Power Company Limited (TPCL) and Damodar Valley Corporation (DVC) with 74% and 26% shareholding respectively, to operate and maintain Electric power generating stations. The Company has set up a thermal power generation plant (comprising of two units of 525 MW each namely 'Unit I and Unit II') at Maithon, Jharkhand with a total capacity of 1050 MW. Unit I and Unit II of the project were commissioned on 1st September, 2011 and 24th July, 2012 respectively. The registered office of the Company is Corporate Center, 34 Sant Tukaram Road, Carnac Bunder, Mumbai 400009, Maharashtra, India.

The financial statements were approved for issue in accordance with a resolution of the directors on 16th April, 2024.

2. Material Accounting Policies

2.1 Statement of compliance and basis of preparation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III).

The financial statements have been prepared on a historical cost basis except for certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

The financial statements are presented in Indian Rupees (₹) and all amounts are in Crore unless otherwise stated.

The Company has prepared the financial statements on the basis that it will continue to operate as a going concern.

3. Other Material Accounting Policies (Other than those mentioned in respective notes)

3.1 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

3.2 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities measured at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in statement of profit and loss.

S R Batliboi & Co. LLP Kolkata

MAITHON POWER LTD. MAITHON

3. Other Material Accounting Policies (Other than those mentioned in respective notes) (Continue)

3.3 Financial Assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis.Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets with in the time frame established by regulation or convention in the market place. All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value,depending on the classification of the financial assets.

3.3.1 Financial assets at amortised cost

A 'financial asset' is measured at the amortised cost if both the following conditions are met:
a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate EIR((Effective interest method). The EIR((Effective interest method) amortisation is included in finance income in the statement of profit or loss.

3.3.2 Financial assets at fair value through other comprehensive income(FVTOCI)

A 'financial asset' is classified as at the FVTOCI if both of the following criteria are met:
a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
b) The asset's contractual cash flows represent SPPI.

On initial recognition, the Company makes an irrevocable election on an instrument-by-instrument basis to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments, other than equity instruments which are held for trading. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit or loss on sale of the investments.

3.3.3 Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.
Other financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in statement of profit or loss.

3.3.4 Derecognition of Financial Assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

i) the right to receive cash flows from the asset have expired, or
ii) the Company has transferred its right to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its right to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

3.3.5 Impairment of financial assets

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

S R Batliboi & Co. LLP Kolkata

MAITHON POWER LTD.

3. **Other Material Accounting Policies (Other than those mentioned in respective notes) (Continue)**

3.4 Financial Liabilities

All financial liabilities are recognised initially at fair value and in case of borrowings and payables, net of directly attributable transaction cost. For purposes of subsequent measurement, financial liabilities are classified in two categories:

a) Financial liabilities at fair value through profit or loss
b) Financial liabilities at amortised cost (borrowings)

3.4.1 Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Gains or losses on liabilities held for trading are recognised in the profit or loss. The Company has not designated any financial liability as at fair value through profit or loss.

3.4.2 Financial liabilities at amortised cost (borrowings)

After initial recognition, interest-bearing borrowings are subsequently measured at amortised cost using the EIR(Effective interest Rate). Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR(Effective interest Rate) amortisation process. The EIR(Effective interest Rate) amortisation is included as finance costs in the statement of profit and loss.

3.4.3 Derecognition of Financial Liabilities

A Financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified , such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability . The difference in the respective carrying amounts is recognised in the statement of profit and loss.

3.5 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is an enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

3.6 Dividend Distribution to equity shareholders of the Company

The Company recognises a liability to make dividend distributions to its equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Company . As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.
In case of Interim Dividend, the liability is recognised on its declaration by the Board of Directors.

3.7 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less,that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value. Cash and cash equivalents include balances with banks which are unrestricted for withdrawal and usage.

4. **Significant accounting judgements, estimates and assumptions**

In the application of the Company's accounting policies, the management of the Company is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

The areas involving critical estimates or judgements are:

a) Estimation of current tax and deferred tax expense (including Minimum alternate tax credit) - Note 17 and Note 26
b) Recoverable from Beneficiaries / Payable to Beneficiaries(Net) - Note 18
c) Estimation of defined benefit obligations- Note 16

d) Judgement to estimate the amount of provision required or to determine required disclosure related to litigation and claims against the Company - Note 28.

Estimates and judgement are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

S R Batliboi & Co. LLP Kolkata

MAITHON POWER LTD.

5. Property, Plant and Equipment

5.1 Accounting Policy

Property, plant and equipment (PPE) is stated at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes purchase price (net of trade discount and rebates) and any directly attributable cost of bringing the asset to its working condition for its intended use and for qualifying assets, borrowing costs capitalised in accordance with Ind AS 23. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the statement of profit and loss as incurred.

Certain capital expenditures incurred by the Company, which although does not directly increase the future economic benefits of any particular existing items of property, plant and equipment (PPE), may be necessary for the Company to obtain future economic benefits from its other assets. Such capital expenditures are allocated to the major items of property, plant and equipment as enabling asset in accordance with Indian Accounting Standard (Ind AS) 16 "Property, Plant and Equipment".

5.2 Subsequent Cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably. All other repair and maintenance costs are recognized in the statement of profit or loss as incurred.

5.3 Depreciation

Depreciation commences when the assets are ready for the intended use.

Regulatory Assets

Depreciation on property, plant and equipment in respect of electricity business of the Company is covered under Part B of Schedule II of the Companies Act, 2013, has been provided on the straight line method at the rates using the methodology required by relevant provisions of Central Electricity Regulatory Commission (CERC).

Depreciation is calculated annually based on Straight Line Method and at rates specified in Appendix-I to CERC regulations for a period of 12 years from the date of commercial operation of the station. The remaining depreciable value as on 31st March of the year closing after a period of 12 years is spread over the balance useful life of the assets.

Non-Regulatory Assets:

Depreciation on all other assets is recognised on the cost of assets (other than freehold land) less their residual values over their estimated useful lives, using the straight-line method.

5.4 Useful lives of tangible assets:

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. The Company, based on technical assessment made by technical expert and management estimate, depreciates certain items of building, plant and equipments over estimated useful lives which are different from the useful lifes prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Type of Asset	Useful Lives
Buildings-Plant	25 Years
Buildings-Others	25 Years
Plant and Equipment	25 Years
Computer	3 Years
Furniture and Fixtures	5 to 10 years
Office Equipment	5 to 10 years
Motor vehicles etc	5 Years

5.5 Derecognition of tangible assets

An item of Property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipments is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the statement of profit and loss.

5.6 Impairment of tangible and intangible assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets of or Group of assets.

When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Impairment losses of tangible and intangible assets are recognised in the statement of profit and loss.

*Government of Jharkhand

(a) The Land was acquired by Damodar Valley Corporation (DVC) ,a member of the Company exclusively for the Maithon Right Bank Thermal Power Project (MRBTPP). As per the Shareholders Agreement, the title is to be transferred to the Company. Pending transfer of title as stated above, the Company had entered into an Indenture Deed with DVC on 5 December, 2008, which provided inter-alia, lease of private land for a period of 35 years (and extendable for another 35 years at the option of the Company) and provision to create security in favour of Lenders and transfer these land to the Company at the cost at which it was acquired subject to approval of the Government of the State of Jharkhand and may be subject to such terms and conditions including financial conditions that may be applied. Mutation of Land in the name of MRBTPP, DVC is completed for 496.54 acres as on 31.03.2024 (471.20 acres as on 31.03.2023) out of 564.67 acres.

(b) The Land was acquired by Damodar Valley Corporation (DVC) ,a member of the Company exclusively for the MRBTPP. As per the shareholders agreement, the title of these lands is to be transferred to the Company. DVC is in the process of transferring these land to the Company at the cost at which it was acquired subject to approval of the Government of the State of Jharkhand and may be subject to such terms and conditions including financial conditions that may be applied. Mutation of Land in the name of MRBTPP, DVC is completed for 37.78 acres as on 31.03.2024 (37.78 acres as on 31.03.2023) out of 66.74 acres.

(c) The Company has received demand for 191.67 acres of Jungle Jhar (Forest Land) from Government of Jharkhand and has made payment of requisite amount and is in process of execution of lease from Government of Jharkhand in the name of Company.

(d) The Land was acquired by Damodar Valley Corporation (DVC) exclusively for the MRBTPP. As per the shareholders agreement, the lease of these lands of 114.95 acres is to be transferred to the Company. Accordingly, DVC has surrendered the land to facilitate the process of transferring lease of lands in favour of the Company as per applicable laws of the State of Jharkhand. The Company is yet to receive demand from Government of Jharkhand for payment and execution of lease in the name of Company. (Refer Note 8.1)

(e) The Company has applied lease of the land of 17.78 acres and made partial payment to GoJ. Final Demand is yet to receive from Government of Jharkhand for balance payment and execution of lease in the name of Company. (Refer Note 8.1)

(f) The Company has applied lease of the land of 10.56 acres and has made payment of requisite amount and is in process of execution of lease from Government of Jharkhand in the name of Company.

(g) The expenditure in connection with private land including land compensation and rehabilitation and resettlement expenses has been capitalised as freehold land and the expenditure in connection with GM land and Forest land has been included in Right of Use Assets.

(h) Freehold land with a carrying amount of ₹299.91 crores (as at 31st March, 2023 ₹299.91 crores) has been mortgaged to secure borrowings of the Company (Refer Note 15.1 & 19.1).

Projects in progress	205.89	124.51	61.70	3.18	**395.28**

Note:- There is no project whose completion is overdue or its cost has exceeded the original plan as at 31st March, 2024 as well as 31st March, 2023.

7. Other Intangible Assets

7.1 Accounting Policy

Intangible assets acquired separately

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any.

7.2 Subsequent Cost

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably.

7.3 Derecognition of intangible assets

An intangible asset is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset is measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognized in profit or loss when the asset is derecognized.

7.4 Amortisation of intangible assets

Intangible assets with finite lives are amortised over the useful economic life on straight line basis and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life is reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Estimated useful lives of the intangible assets are as follows:

Type of Asset	Useful Lives

MAITHON POWER LTD. MAITHON

8. **Right - of - use - assets**

The Company recognizes right-of-use assets at the date of commencement of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, lease payments made at or before the commencement date less any lease incentives received and estimate of costs to dismantle. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

- Land: 05 to 35 years depending upon period of lease

The right-of-use assets are also subject to impairment in accordance with Ind AS 36 "Impairment of assets".

Note:
The Company has paid interim dividend of ₹ 250 Crore during the current year, ₹ 180 cr during the previous year and Final dividend for FY 2021-22 of ₹ 450 Crore during the previous year. The board of directors have proposed final dividend 16.57% of the face value of ₹10 per share (₹ 1.66 per equity share) after the balance sheet date which is subject to approval by the shareholders in the ensuing annual general meeting.

Nature and purpose of reserves:

Debenture Redemption Reserve
The Company was required to create a Debenture Redemption Reserve out of the profits which are available for payment of dividend for the purpose of redemption of debentures. Pursuant to Companies (Share Capital and Debentures) Amendment Rules, 2019 dated 16th August, 2019, the Company is not required to create Debenture Redemption Reserve (DRR). Accordingly, the Company has not created DRR during the year and DRR created till previous years will be transferred to retained earnings on redemption of debentures.

Retained Earnings
Retained Earnings are the profits of the Company earned till date net of adjustments/appropriation.

* (Refer Note 19.1)	1,109.78	219.76	1,199.01	369.86

I. Redeemable Non-Convertible Debentures issued on 30th November 2015

(a) The Company had issued ₹ 500.00 crores of secured, non-cumulative and non-convertible redeemable debentures of face value ₹10.00 lakhs each on 30 November, 2015, at par. The debentures were issued for the repayment of the outstanding term loans from banks and financial institution. The debentures are listed in the wholesale debts market segment of National Stock Exchange of India Limited (NSE).

(b) These debentures are secured in favour of the debenture trustee by a first ranking pari passu mortgage (by way of an equitable or any other mortgage) and charge over all the immovable properties including the freehold land of the plant and railway (included under property, plant and equipment as freehold land) of the issuer, both present and future as per trust deed. (Also refer note no 5.8)

(c) These debentures carry a floating rate which is base rate of HDFC Bank Limited plus 15 basis points. Interest is payable on the 30th of November each year.

(d) These debentures stand fully redeemed as on 31st March 2024.

II. Redeemable Non-Convertible Debentures issued on 9th February 2017

(a) The Company had issued ₹ 500.00 crores of secured, non-cumulative and non-convertible redeemable debentures of face value ₹50.00 Lakhs on 9 February, 2017 at par respectively. The debentures were issued for the repayment of the outstanding term loans from banks and financial institution. The debentures are listed in the wholesale debts market segment of National Stock Exchange of India Limited (NSE).

(b) These debentures have been secured by a first ranking pari passu mortgage (by way of an equitable or any other mortgage) and charge over all the immovable properties including the freehold land of the plant and railway (included under property, plant and equipment as freehold land), all movable properties and assets, all the bank accounts, all current assets, all intangible assets, both present and future as per trust deed. (Also refer note no 5.8) Assignment by way of security over letter of credit, performance bonds or guarantees provided by any person, all the rights, title, interest, benefits, claims and demands, whatsoever of the Issuer in each of the Project Documents, all Insurance Contracts/proceeds under Insurance Contracts, in relation to the Project of the issuer .
The above security will at all times, rank pari-passu inter se the Existing Lenders and the Debenture holders.

(c) These debentures carry a fixed rate of interest of 8% per annum. Interest is payable on the 9th of February each year.
The Company will have to take a prior written no-objection certificate from the debenture holders in the event it intends to create a security over the above secured properties in favour of its working capital lenders over and above ₹ 1000.00 crores.

III. Redeemable Non-Convertible Debentures issued on 24th December 2020

(a) The Company has issued ₹ 199.00 crores of secured, non-cumulative and non-convertible redeemable debentures of face value ₹10.00 Lakhs each on 24th December, 2020 at par respectively. The debentures have been issued for the part-repayment of the existing term loan availed from SBI. The debentures are listed in the wholesale debts market segment of National Stock Exchange of India Limited (NSE).

(b) These Debentures have been secured by Security as mentioned in above para II-(b).

(c) These debentures carry a fixed coupon rate of 6.25% per annum. Interest is payable on 24th December each year.

IV. Term Loan from Axis Bank & Union Bank of India

(a) The Company has entered into a Loan Agreement of ₹ 500 Crore for Railway Infra with Axis Bank on 28th January, 2020. Axis bank has down sell borrowings of ₹ 150 Crs to Union Bank of India with same terms & condition on 6th January 2021.

(b) These loan have been secured by Security as mentioned in above para II-(b).

(c) Interest rate term loan is Axis bank 12 Month MCLR plus 25 basis points, ranging from 9.05% to 9.50%.

V. Term Loans from Axis Bank (Refinancing)

(a) The Company has entered into a Loan Agreement of ₹ 225 Crore with Axis Bank on 29th December, 2020 for the part-refinancing of the outstanding term loan from SBI.

(b) These loan have been secured by Security as mentioned in above para II-(b).

(c) Interest rate term loan is Axis Bank 12 month MCLR plus 5 basis points, ranging from 8.80% to 9.30%.

VI. Term Loans from State Bank of India

(a) The Company has entered into a Loan Agreement of ₹ 537 Crore with SBI on 9th July, 2021 for FGD Project.

(b) These loan have been secured by Security as mentioned in above para II-(b).

(c) Interest rate term loan is SBI 6 month MCLR plus 50 basis points, ranging from 8.80% to 9.30%.

VII Non Current borrowings secured against current assets

The quarterly returns or statements of current assets filed by the Company with banks or financial institutions are in agreement with the books of accounts and there are no discrepancies.

16. Provisions

Accounting Policy

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of time value of money is material).

Present obligations arising under onerous contracts are recognised and measured as provisions with charge to statement of profit and loss. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

Defined contribution plans

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

Defined benefits plans

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method. Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liabilities and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in the statement of profit and loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liabilities or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non routine settlements; and
- Net interest expense or income.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds. The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates.

Current and other non-current employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of current employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other non-current employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

Employee Benefit Plans

16.1 Defined Contribution plan

Provident fund

The Company makes Provident Fund and Superannuation Fund contributions to defined contribution retirement benefit plans for eligible employees. The provident fund plan is operated by the Regional Provident Fund Commissioner. The Superannuation fund is managed by LIC of India. Under the schemes, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The only obligation of the Company with respect to the retirement benefit scheme is to make the specified contributions.

The Company has recognized ₹ 1.44 crores (31st March, 2023 ₹ 1.35 crores) for provident fund contributions and ₹ 0.48 crores (31st March, 2023 ₹ 0.42 crores) for superannuation contributions in the Statement of Profit and Loss. The contributions payable to these plans by the Company are at rates specified in the rules of the schemes.

16.2 Defined benefit plans

(i) Unfunded

Post-Employment Medical Benefits

The Company provides certain post-employment health care benefits to superannuated employees at some of its locations. In terms of the plan, the retired employees can avail free medical check-up and medicines at Company's facilities.

Pension

The Company operates a defined benefit pension plan for employees who have completed 15 years of continuous service. The plan provides benefits to members in the form of a pre-determined lumpsum payment on retirement. Executive Director, on retirement, is entitled to pension payable for life including HRA benefit. The level of benefit is approved by the Board of Directors of the Company from time to time.

Ex-Gratia Death Benefit

The Company has a defined benefit plan granting ex-gratia in case of death during service. The benefit consists of a pre-determined lumpsum amount along with a sum determined based on the last drawn basic salary per month and the length of service.

Retirement Gift

The Company has a defined benefit plan granting a pre-determined sum as retirement gift on superannuation of an employee.

(ii) Funded

Gratuity Plan

The Company has a defined benefit gratuity plan. The gratuity plan is primarily governed by the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of five years are eligible for gratuity. The level of benefits provided depends on the member's length of service and salary at the retirement, withdrawal, resignation or death of an employee. The gratuity plan is funded plan. The gratuity fund is managed by Aditya Birla Sun Life Insurance Company Limited. The fund has the form of a trust and is governed by Trustees appointed by the Company. The Trustees are responsible for the administration of the plan assets and for the definition of the investment strategy in accordance with the regulations. The funds are deployed in recognized insurer managed funds in India. The Company does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimates of expected gratuity payments.

S.R. Batliboi & Co. LLP Kolkata

MAITHON POWER LTD.

(iii) **Risks associated with Plan Provisions**

Risks associated with the plan provisions are actuarial risks. These risks are: - (i) investment risk, (ii) interest risk (discount rate risk), (iii) mortality risk and (iv) salary risk.

Investment risk	The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to Government Bonds Yield. If plan liability is funded and return on plan assets is below this rate, it will create a plan deficit.
Interest rate risk (discount rate risk)	A decrease in the bond interest rate (discount rate) will increase the plan liability; however , this will be partially offset by an increase in the return on the plan debt investments.
Mortality risk	The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after the employment. Indian Assured Lives Mortality (2006-08) ultimate table has been used in respect of the above. An increase in the life expectancy of the plan participants such as, an increase in the salary of the plan participants will increase the plan's liability.
Salary escalation risk	The present value of the defined benefit plan liability is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.
Demographic risk	This is the risk of variability of results due to unsystematic nature of decrements that include mortality, withdrawal, disability and retirement. The effect of these decrements on the defined benefit obligations is not straight forward and depends upon the combination of salary increase, discount rate and vesting criterion.
Medical Inflation rate risk	Higher than expected increase in salary and medical cost will increase the defined benefit obligation.
Change in Leave Balances	This is the risk of variability of results due to a significant variation from expected accumulation of leave balances. All other aspects remaining same, higher than expected increase in the leave balances will increase the defined benefit obligation.

(iv) The principal assumptions used for the purposes of the actuarial valuations were as follows:

S. No.	Particulars	Refer note below	As at 31st March, 2024	As at 31st March, 2023
i.	Discount rate (p.a)	1	7.00%	7.30%
ii.	Salary escalation rate (p.a)	2		
	Management		7.00%	7.00%
	Non-Management		6.00%	6.00%
iii.	Retirement Age		60 years	60 years
iv.	Mortality Table		Indian Assured Lives Mortality (2006-08) Ult	Indian Assured Lives Mortality (2006-08) Ult
v.	Withdrawal Rate			
	Management: 21-44 years		6.00%	6.00%
	45 years and above		2.00%	2.00%
	Non-Management		0.50%	0.50%
vi.	Rate of Gold Inflation		8.00%	8.00%
vii.	Rate of Medical inflation (p.a)		8.00%	8.00%

Note:

1. The discount rate is based on the prevailing market yields of Indian Government securities as at the balance sheet date for the estimated term of obligations
2. The gratuity plan is funded
3. The estimates of future salary increases considered take into account the inflation, seniority, promotion and other relevant factors.

MAITHON POWER LTD. MAITHON

v. Movement in the fair value of the plan assets are as follows:

Particulars	For Year ended 31st March, 2024 ₹ Crores	For Year ended 31st March, 2023 ₹ Crores
Opening fair value of plan assets	13.37	14.17
Interest income on plan assets	0.98	0.92
Return on plan assets (greater)/less than discounting rate	(0.29)	(0.51)
Benefits paid	-	(1.21)
Closing fair value of plan assets	**14.05**	**13.37**

Note:

1) The plan assets are managed by Birla Sun Life Insurance (BSLI) Company Limited. The details of investments relating to these assets are not shown by BSLI. Hence, the composition of each major category of plan assets, the percentage or amount that each major category constitutes to the fair value of the total plan assets has not been disclosed.

2) The Company expects to make a contribution of ₹ Nil (as at 31 March, 2024: ₹ Nil) to defined benefit plan during the next financial year.

vi. Sensitivity analysis

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analysis below have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Particulars	31st March, 2024 ₹ Crores		31st March, 2023 ₹ Crores	
	Increase	Decrease	Increase	Decrease
Discount Rate (-/+0.5%)	0.75	(0.70)	0.62	(0.58)
Salary Growth Rate (+/-0.5%)	(0.70)	0.75	(0.58)	0.62
Withdrawal Rate (-/+ 5%)	-	(0.60)	-	(0.48)

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit liability recognized in the Balance sheet.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

vii. The expected maturity analysis of defined benefit obligation is as follows:

Time Period	31st March, 2024 ₹ Crores	31st March, 2023 ₹ Crores
Within 1 year	0.60	0.52
Between 1-2 years	2.10	0.55
Between 2-3 years	2.30	1.95
Between 3-4 years	1.21	2.05
Between 4-5 years	1.57	1.12
Beyond 5 years	11.23	9.99

Particulars	31st March, 2024	31st March, 2023
The weighted average duration of the defined benefit plan obligation represents average duration for active members	7.5 years	7.4 years

MAITHON POWER LTD.

17. Deferred Tax Assets / Liabilities (Net)

Accounting Policy

Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

For operations carried out under tax holiday period (80IA benefits of Income Tax Act, 1961), deferred tax assets or liabilities, if any, have been established for the tax consequences of those temporary differences between the carrying values of assets and liabilities and their respective tax bases that reverse after the tax holiday ends.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

Deferred tax assets include credit for Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognised as deferred tax asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realised. The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent that it is no longer probable that it will pay normal tax during the specified period.

In the situations where one or more units of the Company are entitled to a tax holiday under the tax law, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the concerned unit's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the Company restricts recognition of deferred tax assets to the extent it is probable that sufficient future taxable income will be available against which such deferred tax assets can be realized. For recognition of deferred taxes, the temporary differences which originate first are considered to reverse first.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax for the year. The deferred tax asset is recognised for MAT credit available only to the extent that it is probable that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset, it is created by way of credit to the statement of profit and loss and shown as part of deferred tax asset. The Company reviews the "MAT credit entitlement" asset at each reporting date.

	As at 31st March, 2024 ₹ Crores	As at 31st March, 2023 ₹ Crores

MAITHON POWER LTD.

Kolkata

Note:

a. Deferred tax assets and liabilities are being offset as they relate to taxes on income levied by the same governing taxation laws.

b. The Company is entitled for availing the tax benefit under section 80IA of the Income-tax Act, 1961, with effect from the financial year 2016-17 for 10 years. Deferred tax liabilities as at 31 March, 2024, reflect the quantum of tax liabilities accrued upto the period end but payable after the expiry of the tax holiday period.

c. The Company has recognised MAT credit of ₹ 585.07 crores as at March 31, 2024 (as at March 31, 2023: ₹ 511.51 crores). Basis the existing tax laws and the projections of future profitability considering definitive Power purchase agreements which are completely tied up with the plant capacity, management is confident of earning taxable profits each year and will be able to utilise the entire amount of MAT credit entitlement recognised in the financial Statement.

20. Revenue from Operations

Accounting Policy

Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to customers for a consideration that the Company expects to be entitled in exchange for those goods & services as per terms of relevant contracts and orders of applicable regulatory authorities.

Description of performance obligations are as follows :

Sale of Power - Generation (Thermal)

Revenue from sale of power is recognised net of cash discount over time for each unit of electricity delivered.

Contract price determined as per tariff regulations

The Company as per the prevalent tariff regulations is required to recover its Annual Revenue Requirement ('ARR') comprising of expenditure on account of fuel cost, operations and maintenance expenses, financing costs, taxes and assured return on regulator approved equity with incentive for operational efficiencies. Accordingly, rate per unit of power supplied is determined using cost of inputs for generation of power based on the Company's efforts to the satisfaction of a performance obligation to deliver power. As per tariff regulations, the Company determines ARR and any surplus/shortfall in recovery of the same is accounted as revenue.

The difference between the revenue recognised and amount invoiced has been presented as deferred revenue/unbilled revenue.

Deferred tax recoverable/payable

The Income tax cost is pass through cost and accordingly the Company recognises Deferred tax recoverable/payable against any Deferred tax expense/ income. The same is included in Revenue from Operations.

Late Payment Surcharge

Late payment surcharge leviable as per CERC Regulations are recognised on accural basis when the company considers that its realisation is probable based on customers acknowledgement or orders issued by relevant regulatory authorities.

No Late Payment Surcharge ('LPS') is charged for the initial 45 to 60 days from the date of receipt of invoice by customer. Thereafter, LPS is charged at the rate prescribed by CERC Regulations on the outstanding balance once the dues are received. Revenue in respect of late payment surcharge leviable as per the relevant contracts are recognised on actual realisation or accrued based on an assessment of certainty of realization supported by either an acknowledgement from customers or on receipt of favourable order from regulatory authorities.

Dividend and interest income

Dividend income from investments is recognized when the shareholder's right to receive payment has been established.

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected or contracted life of the financial asset to that asset's net carrying amount on initial recognition.

Note:-

1. Tariff to be charged under terms of Long term power supply agreements are determined by Central Electricity Regulatory Commission (CERC) in accordance with its notified tariff regulations or norms. The tariff consists of two parts namely, capacity charge (for recovery of fixed cost based on plant availability) and energy charges (for recovery of fuel costs). The Company has received true-up order for the control period 2014-19 and also the Tariff order for the control period 2019-24, issued by CERC on 8th January, 2022. Further, the tariff order for 2019-24 has considered a provisional significant cost element that has hitherto not been considered in tariff order till date and also in the true-up order for 2014-19, in respect of which the Company has filed review petition with the relevant appellate authority, and has recognised revenue as per the tariff order, on a conservative basis. Further adjustments could arise upon disposal of company's review petition.
2. Pursuant to order of the Hon'ble Central Electricity Regulatory Commission (CERC), the Company had entered into a Memorandum of Understanding on May 26, 2023 (MoU) with a customer for resolution of disputes towards supply of electricity in earlier years. As per the terms of the MoU, the Company has received an amount of ₹48.22 Cr towards full and final settlement of such disputes. The Hon'ble CERC had approved the said MOU. Accordingly, the amount of ₹48.22 Cr has been recognized as revenue from operations during the year.
3. Pursuant to order of the Hon'ble CERC in respect of petition filed by the Company seeking clarification on the compensation methodology as notified in the Central Electricity Regulatory Commission (Indian Electricity Grid Code) (Fourth Amendment) Regulations, 2016, the Eastern Regional Power Committee (ERPC) on May 10, 2023 issued Beneficiary-wise Compensation statements on account of degradation of heat rate and auxiliary consumption due to part load operation for the period April 2019 to March 2022. Accordingly, the amount of ₹53.65 Cr has been received and recognized as revenue from operations during the year.

Accounting Policy

Share Based Payments

The Tata Power Company Limited ("Holding Company") has granted employee stock options to eligible employees of the Company. As per the Scheme, on fulfilling of the vesting condition the Holding Company will issue its equity shares to the eligible employees of the Company.

The cost of equity-settled transactions is determined by the fair value of holding company's share at the date of grant. That cost is recognised on straight line basis over ther period during which vesting conditions are met by concerned employee and the Company. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the companies best estimate of the number of equity instruments that will ultimately vest. The expense or credit in the statement of profit and loss for a period represents the movement in cumulative expense recognised as at the beginning and end of that period and is recognised in employee benefits expense.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the companies best estimate of the number of equity instruments that will ultimately vest. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognised for awards that do not ultimately vest because non-market performance and/or service conditions have not been met. Where awards include a market or non-vesting condition, the transactions are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

When the terms of an equity-settled award are modified, the minimum expense recognised is the grant date fair value of the unmodified award, provided the original vesting terms of the award are met. An additional expense, measured as at the date of modification, is recognised for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee. Where an award is cancelled by the entity or by the counterparty, any remaining element of the fair value of the award is expensed immediately through profit or loss.

Equity-settled share option plan

The Tata Power Company Limited – Employee Stock Option Plan 2023

During the year, the shareholders of the Holding Company approved 'The Tata Power Company Limited – Employee Stock Option Plan 2023' ('ESOP 2023'/ 'Plan'). During this year, the Holding Company has granted employee stock options to the eligible employees of the Holding and its subsidiaries, including employees of the Company at an exercise price of ₹ 249.80 (Rupees Two Hundred Forty Nine and Eighty Paise) per option exercisable into equivalent equity shares of ₹ 1 each subject to fulfilment of vesting conditions.

The expense recognised for employee services received during the year is shown in the following table:

	For Year ended 31st March, 2024 ₹ Crores	For Year ended 31st March, 2023 ₹ Crores
Expense arising from equity-settled share-based payment transactions	*0.10*	*Nil*
Total expense arising from share-based payment transactions		
Movements during the year		
Option exercisable at the beginning of the year	*Nil*	*Nil*
Granted during the year	*71630.00*	*Nil*
Forfeited/Expired during the year	*Nil*	*Nil*
Exercised during the year	*Nil*	*Nil*
Expired during the year	*Nil*	*Nil*
Option exercisable at the end of the year	*71,630.00*	*Nil*
Share price for options exercised during the year	Not applicable	*Nil*
Remaining contractual life	2.58 Years	*Nil*

The holding company has estimated fair value of options using Black Scholes model. The following assumptions were used for calculation of fair value of options granted.

Assumption factor		
Dividend Yield (%)	0.70%	*Nil*
Risk free interest rate (%)	7.21%	*Nil*
Expected life of share option (Years)	3 - 5 Years	*Nil*
Expected volatility (%)	39.81%	*Nil*
Weighted Average Share price	249.80	*Nil*
Weighted Average Fair Value at the measurement date	97.75	*Nil*

The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the options is indicative of future trends, which may not necessarily be the actual outcome.

26. Income taxes

Accounting Policy

Current Tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside statement of profit and loss is recognised outside statement of profit and loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

(i) Income tax recognised in profit and loss

	For Year ended 31st March, 2024 ₹ Crores	For Year ended 31st March, 2023 ₹ Crores
Current tax		
For the year	79.61	64.63
In respect of earlier years	0.48	-
Current Tax (Including adjustment of tax relating to earlier year)	**80.09**	**64.63**
Deferred tax	0.40	15.39
MAT Credit Entitlements	(73.56)	(48.28)
Deferred Tax (Net)	**(73.16)**	**(32.89)**
Income tax expense reported in the Statement of Profit and Loss	**6.93**	**31.74**

(ii) Reconciliation of tax expense as per the effective rate of tax and India's statutory rate of tax

	For Year ended 31st March, 2024 ₹ Crores	For Year ended 31st March, 2023 ₹ Crores
Profit before tax	**455.63**	**370.94**
Applicable income tax rate	34.94%	34.94%
Income tax expense calculated at applicable rate	159.22	129.62
Temporary difference reversed during tax holiday period	45.68	40.18
On account of 80IA benefits	(192.02)	(146.64)
Other Adjustments	(5.95)	8.58
Total income tax expense	**6.93**	**31.74**

1. The tax rate used for the financial years 2023-24 and 2022-23 reconciliations above is the corporate tax rate of 34.94% and 34.94% respectively payable by the corporate entities in India on taxable profits under the Indian tax law.
2. The rate used for calculation of deferred tax is @34.94% for FY 2023-24 & for FY 2022-23 being statutory enacted rates at respective Balance Sheet Dates.

(iii) Income tax recognised in other comprehensive income

	For Year ended 31st March, 2024 ₹ Crores	For Year ended 31st March, 2023 ₹ Crores
Arising on income and expenses reclassified in other comprehensive income:		
Remeasurement of the defined benefit plan	(1.28)	(1.00)
Total income tax expense recognised in other comprehensive income	**(1.28)**	**(1.00)**
Bifurcation of the income tax recognised in other comprehensive income into:		
- Items that will not be reclassified to profit or loss	0.22	0.18
	0.22	0.18

27. Commitments

	As on 31st March, 2024 ₹ Crores	As on 31st March, 2023 ₹ Crores
Estimated amount of contracts remaining to be executed on capital account and not provided for	98.33	70.63

S R Batliboi & Co. LLP Kolkata

MAITHON POWER LTD.

28. Contingent liabilities

(a) Claims against the Company not acknowledged as debts towards demands raised by the Office of the Zonal Jt. Director General Trade for revocation of grant of deemed export benefits which has been disputed by the Company ₹ 36.41 crores (31 March, 2023 : ₹ 36.41 crores).

(b) Demand in respect of lease rent for certain parcels of land as referred in note 5.8

(c) The Code on Social Security 2020 has been notified in the Official Gazette on 29th September, 2020. The effective date from which the changes are applicable is yet to be notified and the rules are yet to be framed. Impact if any of the change will be assessed and accounted in the period in which said Code becomes effective and the rules framed thereunder are notified.

29. Earnings per share (EPS)

Accounting Policy

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. The average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

	For Year ended 31st March, 2024 ₹ Crores	For Year ended 31st March, 2023 ₹ Crores
Basic and diluted earnings per share (face value of ₹ 10/- each)	2.97	2.25

The earnings and weighted average number of equity shares used in the calculation of basic and diluted earnings per share are as follows:

	For Year ended 31st March, 2024 ₹ Crores	For Year ended 31st March, 2023 ₹ Crores
Profit After Tax	448.70	339.20
The weighted average number of equity shares for Basic and Diluted EPS [nos.]	1,50,89,17,729	1,50,89,17,729

Note:
There have been no other transactions involving Equity Shares or Potential Equity Shares between the Reporting date and the date of authorisation of these financial statements.

32. Financial Instruments

This section gives an overview of the significance of financial instruments for the Company and provides additional information on balance sheet items that contain financial instruments. The details of material accounting policies, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised in respect of each class of financial asset, financial liability and equity instrument are disclosed in the financial statements.

32.1 Financial assets and liabilities

The carrying value and fair value of financial instruments by categories as of 31st March, 2024 is as follows:

₹ Crores

Particulars	Fair Value through P&L	Fair Value through OCI	Amortised Cost	Total Carrying value	Total Fair Value
Assets					
Cash and Cash Equivalents	-	-	21.15	21.15	21.15

S R Batliboi & Co. Kolkata
MAITHON POWER LIMITED

The management assessed that the fair value of cash and cash equivalents, other balances with bank, trade receivables, loans, unbilled revenues, trade payables, other financial assets and liabilities approximate their carrying amounts largely due to the short term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties. The following methods and assumptions were used to estimate the fair values.

Fair value hierarchy

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels.

Level 1 : Quoted prices in an active market : Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities and net assets value of mutual funds declared by the issuer.

Level 2 : Valuation techniques with observable inputs : Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 : Valuation techniques with significant unobservable inputs : Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

The following table provides the fair value measurement hierarchy of the Company's assets and liabilities.

		Fair value hierarchy as at 31st March, 2024			
	Date of valuation	Level 1	Level 2	Level 3	Total
		₹ crore	₹ crore	₹ crore	₹ crore
Asset measured at fair value					
Carried at fair value through profit and loss (FVTPL)	31st March, 2024	-	-	**105.82**	105.82
Unquoted Mutual Funds		-	-	**105.82**	**105.82**
Liabilities for which fair values are disclosed					
Fixed rate borrowings	31st March, 2024	-	459.20	-	459.20
Floating rate borrowings	31st March, 2024	-	870.34	-	870.34
Total		-	**1,329.54**	-	**1,329.54**

		Fair value hierarchy as at 31st March, 2023			
	Date of valuation	Level 1	Level 2	Level 3	Total
		₹ crore	₹ crore	₹ crore	₹ crore
Asset measured at fair value					
Carried at fair value through profit and loss (FVTPL)	31st March, 2023	-	-	**4.00**	4.00
Unquoted Mutual Funds		-	-	**4.00**	**4.00**
Liabilities for which fair values are disclosed					
Fixed rate borrowings	31st March, 2023	-	599.00	-	599.00
Floating rate borrowings	31st March, 2023	-	969.87	-	969.87
Total		-	**1,568.87**	-	**1,568.87**

There has been no transfer between level 1 and level 2 during the year.

32.2 Capital Management & Gearing Ratio

For the purpose of the Company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximize the value for shareholders.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. From time to time, the Company reviews its policy related to dividend payment to shareholders, return capital to shareholders or fresh issue of shares. The Company monitors capital using gearing ratio, which is net debt divided by total capital plus net debt. The Company's policy is to keep the gearing ratio around 50%. The Company includes within net debt, interest bearing loans and borrowings, less cash and bank balances, excluding discontinued operations as detailed in the notes below.

The Company's capital management is intended to create value for shareholders by facilitating the meeting of its long-term and short-term goals. Its Capital structure consists of net debt (borrowings as detailed in notes below) and total equity.

Gearing ratio

The gearing ratio at the end of the reporting year was as follows:

		₹ crore
	As at 31st March, 2024	As at 31st March, 2023
Debt (i)	1,600.44	1,615.18
Less: Cash and Bank balances	21.15	180.61
Net debt	**1,579.29**	**1,434.57**
Total Capital (ii)	2,386.92	2,189.27
Capital and net debt	**3,966.21**	**3,623.84**
Gearing ratio (%)	39.82	39.59

(i) Debt is defined as Non-current borrowings (including current maturities) and Current borrowings and interest accrued on Non-current and Current borrowings.

(ii) Equity is defined as Equity share capital and other equity including reserves and surplus.

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no significant breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

No changes were made in the objectives, policies or processes for managing capital during the years ended 31st March, 2024 and 31st March, 2023.

MAITHON POWER LTD. MAITHON

32. Financial Instruments

32.3 Financial risk management objectives and policies

The Company's principal financial liabilities, comprise borrowings, trade and other payables and other financial liabilities. The main purpose of these financial liabilities is to finance the Company's operations and to provide guarantees to support its operations. The Company's principal financial assets include investments, loans, trade and other receivables, cash and cash equivalents, other bank balances, unbilled receivables and other financial assets that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by a risk committee that reviews the financial risks and the appropriate financial risk governance framework for the Company. The Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The risk management polices is approved by the board of directors, which is summarized below.

32.3.1 Market risk management

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises of three types of risk: currency risk, interest rate risk and equity price risk. The impact of equity price risk and currency risk is not material. Financial instruments affected by market risk are loans and borrowings.

The following sensitivity analysis relates to borrowings as at 31st March, 2024 and 31st March, 2023.

a) Interest rate risk management

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the company's long-term debt obligations with floating interest rates.

The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. The exposure of the Company's borrowings to interest rate changes at the end of the reporting period are as follows :

Particulars	31st March, 2024		31st March, 2023	
	Balance	Percentage	Balance	Percentage
Fixed Rate Borrowings (Includes Current Maturities)	459.20	35%	599.00	38%
Floating Rate Borrowings (Includes Current Maturities)	870.34	65%	969.87	62%
Total	**1,329.54**		**1,568.87**	

Interest rate sensitivity:

The sensitivity analysis below have been determined based on exposure to interest rates for term loans and debentures at the end of the reporting period and the stipulated change taking place at the beginning of the financial year and held constant throughout the reporting period in case of term loans and debentures that have floating rates.

If the interest rates had been 50 basis points higher or lower and all the other variables were held constant, the effect on Interest expense for the respective financial years and consequent effect on Company's profit in that financial year would have been as below:

Particulars	31st March, 2024		31st March,2023	
	50 bps increase	50 bps decrease	50 bps increase	50 bps decrease
Interest expense on loan	(+) ₹ 2.30	(-) ₹ 2.30	(+) ₹ 3.00	(-) ₹ 3.00
Effect on profit before tax	(-) ₹ 2.30	(+) ₹ 2.30	(-) ₹ 3.00	(+) ₹ 3.00

S R Batliboi & Co. LLP Kolkata

MAITHON POWER LTD. MAITHON

32.3.2 Credit risk management

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (i.e. Primarily trade receivables and unbilled revenue) and from its financing activities including loans, foreign exchange transactions and other financial instruments.

Collateral held as security

The Company holds collateral i.e. letter of credit and bank guarantee to partly secure its outstanding trade receivables. Credit risk associated with receivables is mitigated because the receivables are partly secured.

₹ crore

	31st March, 2024	31st March, 2023
Trade Receivables	451.96	134.50
Loans	0.13	0.15
Other Financial Assets	10.75	19.35
Unbilled Revenue	70.76	47.07
Total	**533.60**	**201.07**

Refer Note 9.2 for credit risk and other information in respect of trade receivables. Other receivables as stated above are due from the parties under normal course of the business and as such the Company believes exposure to credit risk to be minimal.

32.3.3 Liquidity risk management

Liquidity risk is the risk that the company will encounter difficulty in meeting obligation, associated with financial liabilities that are settled by delivering cash or another financial asset.

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. The Company has access to a sufficient variety of sources of funding. Having regards to the nature of the business wherein the Company is able to generate fixed cash flows over a period of time and to optimize the cost of funding, the Company, from time to time, funds its long -term investment from short-term sources. The short-term borrowings can be rollforward or, if required, can be refinanced from long term borrowings.

	Up to 1 year	1 to 5 years	5+ years	Total	Carrying Amount
31st March, 2024					
Non-Derivatives					
Borrowings #	219.76	771.56	343.05	**1,334.37**	**1,338.39**
Trade Payables	288.55	38.28	-	**326.83**	**326.83**
Lease Liability	0.33	1.65	49.38	**51.36**	**51.36**
Other Financial Liabilities	32.90	47.31	-	**80.21**	**80.21**
Total Non-Derivative Liabilities	**541.54**	**858.80**	**392.43**	**1,792.77**	**1,796.79**
31st March, 2023					
Borrowings #	369.86	850.71	354.56	**1,575.13**	**1,583.17**
Trade Payables	215.56	28.26	-	**243.82**	**243.82**
Lease Liability	0.31	1.55	4.68	**6.54**	**3.43**
Other Financial Liabilities	48.98	73.40	-	**122.38**	**122.38**
Total Non-Derivative Liabilities	**634.71**	**953.92**	**359.24**	**1,947.87**	**1,952.80**

The table has been drawn up based on the undiscounted contractual maturities of the financial liabilities including interest that will be paid on those liabilities upto the maturity of the instruments.

32.4 Commodity price risk

The operating activity of the company involves generation of power and therefore requires continuous supply of coal. The Company has entered into fuel supply agreements with Central Coalfields Limited and Bharat Coking Coal Limited and any price fluctuation is passed on to the customers.

S.R. Bathiba... Kol... LLP

MAITHON POWER LTD. MAITHON

33. In terms of the Master Circular on 'Gati Shakti Multi-modal Cargo Terminal (GCT) Policy notified on December 15, 2021, the ownership of all cargo terminals that were under approval or being construction then by eligible terminal operators at their cost shall belong to the Railways. Accordingly, the Company had given an undertaking in February 2022 to abide by all provisions of the aforesaid Master Circular. The Company's railway infrastructure related assets were under approval on the date of the Master Circular and was capitalised on being ready to be put to use during prior years. The Company has been charging depreciation on these assets based on rates and methodology specified in Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 as required by Schedule II of the Companies Act, 2013. The CERC on its order dated 20th January 2024 has allowed the company to sign an agreement with the Indian Railways and transfer ownership rights of its infrastructure, including the track, signalling equipment and OHE to Indian Railways. As the Company will continue to obtain future economic benefits from cost of such transferred assets aggregating ₹626.88 crores, their carrying values have now been allocated to other major items of Property, plant and equipment as enabling asset w.e.f. April 2022 (i.e. after the above undertaking given by the Company) in accordance with Indian Accounting Standard (Ind AS) 16 "Property, Plant and Equipment". This has led to the restatement of Balance Sheet as on March 31, 2023. Consequently, the Statement of Profit and Loss for the year ended March 31, 2023 had to be restated due to additional depreciation charge arising from aforesaid allocation to other major items of Property, plant and equipment. Basic and diluted earnings per share for the prior period has also been restated. The amount of the correction for both basic and diluted earnings per share was a decrease ₹0.04 per share for the year ended March 31, 2023. The correction of the error had no impact on previously reported cash flows from operating, investing and financing activities.
The error has been corrected by restating each of the affected financial statements line items for the prior period as follows:

₹ Crores

Balance sheet	Deferred Tax Assets (Net)	Current Tax Liabilities (Net)	Property, Plant and Equipment	Other Equity	Other Non Current Liabilities
Year Ended 31st March, 2023					
Previously reported	67.36	5.28	3,104.19	686.47	67.36
Increase/(decrease) due to incremental depreciation	1.14	(1.54)	(7.66)	(6.12)	1.14

34. **Recent Pronouncement**
Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On 31st March, 2023, MCA amended the Companies(Indian Accounting Standards) Amendment Rules, 2023, applicable from April 1, 2023, as below:

Ind AS 1 – Disclosure of accounting policies:
The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' ccountlng policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.

Ind AS 8 – Definition of accounting estimates:
The amendments clarify the distinction between changes In ccountmg estimates, changes in accounting policies and the correction of errors. It has also been clarified how entities use measurement techniques and inputs to develop accounting estimates.

Ind AS 12 – Income Taxes
The amendments narrow the scope of the initial recognition exception under Ind AS 12, so that it no longer applies to transactions hat give rise to equal taxable and deductible temporary differences such as leases.

S R Batliboi & Co. LLP Kolkata

MAITHON POWER LTD. MAITHON

35. Segment Reporting

The Company is mainly engaged in the business of generation and selling of power in India. Based on the information reported to the chief operating decision maker (CODM) for the purpose of resource allocation and assessment of performance, there are no other reportable segments in accordance with the requirements of Indian Accounting Standard 108-'Operating Segments', notified under the Companies (Indian Accounting Standards) Rules, 2015. Revenue from four discom on sale of electricity with which Company has entered into a Power Purchase Agreement, accounts for more than 10% of Revenue.

36. Significant Events after the Reporting Period

There were no significant adjusting event that occurred subsequent to the reporting period.

37. Other Statutory Information

(i) The Company does not have any Benami property, where any proceeding has been initiated or pending against the Company for holding any Benami property.
(ii) The Company does not have any transactions with companies struck off.
(iii) The Company does not have any charges or satisfaction which is yet to be registered with ROC beyond the statutory period.
(iv) The Company has not traded or invested in Crypto currency or Virtual Currency during the financial year.
(v) The Company has not advanced or loaned or invested funds to any other person(s) or entity(ies), including foreign entities (Intermediaries) with the understanding that the Intermediary shall:
(a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company (Ultimate Beneficiaries) or
(b) provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.
(vi) The Company have not received any fund from any person(s) or entity(ies), including foreign entities (Funding Party) with the understanding (whether recorded in writing or otherwise) that the Company shall:
(a) directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (Ultimate Beneficiaries) or
(b) provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

(vii) The Company have not any such transaction which is not recorded in the books of accounts that has been surrendered or disclosed as income during the year in the tax assessments under the Income Tax Act, 1961 (such as, search or survey or any other relevant provisions of the Income Tax Act, 1961.
(viii) The Company has not been declared as wilful defaulter by any bank or financial institution or other lender.

38.

The Company has used accounting software for maintaining its books of account which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software, except that audit trail feature was not enabled for direct changes to data for users with certain privileged access rights to the SAP ECC and BW application and/or the underlying HANA database. However stringent control procedures were implemented to effectively restrict direct changes to data throughout the financial year. These procedures included thorough reviews of logs and reconciliation of datasets and during the financial year no direct changes were made that impacted financial records. Further no instance of audit trail feature being tampered with, was noted in respect of other software.

Independent Auditor's Report on Statement of annual and quarterly package wise addition to Property Plant and Equipment (PPE) & Right of Use Assets (ROU) for financial years ended 2019-20 to 2023-24, in support to the requirements of Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019

To
The Board of Directors
Maithon Power Limited
Corporate Center
34, Sant Tukaram Road,
Carnac Bunder, Mumbai- 400009

1. This Report is issued in accordance with the terms of our service scope letter dated November 18, 2024 and Master Engagement Agreement dated October 13, 2022, as amended with Maithon Power Limited (hereinafter the "Company")

2. At the request of the management, we have examined the accompanying Statement of annual and quarterly package wise addition to Property Plant and Equipment (PPE) & Right of Use Assets (ROU) for financial years ended 2019-20 to 2023-24 (hereinafter referred to as the "Statement"), which we have initialled for identification purposes only.

3. The Company intends to submit the accompanying Statement for consideration of and evaluation by the Central Electricity Regulatory Commission in connection with true up petitions filed by the Company as required by the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the control period 2019-2020 to 2023-24.

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the management of the Company including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

5. The Management is responsible for ensuring that the Company complies with the requirements of the CERC Regulations and for providing all relevant information to the CERC.

Auditor's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a limited assurance based on our examination whether details in the Statement for yearly balances are in agreement with books of account and records which were examined by us as considered necessary for the purpose of our audit underlying the audited financial statements for each of the years ended March 31, 2020 to March 31, 2024 and for the quarterly balances, books of account and records underlying the Board approved unaudited interim condensed statements for the quarters ended after April 1, 2019 to March 31, 2024.

   The above paragraph constitutes the "Reporting Criteria".

7. The financial statements of the Company referred to in paragraph 6 above, were audited by us, on which we had issued an unmodified audit opinions vide our reports dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023, April 16, 2024. Our audit of these financial statements was conducted in accordance with the Standards on Auditing, as specified under Section 143(10) of the Companies Act, 2013 and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test check basis, evidence supporting the amounts and

disclosures in the financial statements. Our audits were not planned and performed in connection with any transactions to identify matters that may be of potential interest to third parties.

8. We conducted our examination of the Statement in accordance with the requirements of the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India ("ICAI"). The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

10. Our scope of work did not involve us performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of the amounts reported in the Statement. We have not performed an audit, the objective of which would be the expression of an opinion on the financial results, specified elements, accounts or items thereof, for the Company taken as a whole. Accordingly, we do not express such audit opinion.

11. A limited assurance engagement involves performing procedures to obtain sufficient appropriate evidence on the Reporting Criteria mentioned in paragraph 6 above. The procedures performed vary in nature and timing from and are less extent than for, a reasonable assurance. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement.

12. We have performed the following procedures in relation to the Statement:

    a. Obtained the audited financial statements of the Company for each of the years ended March 31, 2020, March 31, 2021, March 31, 2022 , March 31, 2023 and March 31, 2024 audited by us on which we had issued unmodified audit opinions vide their report dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023, April 16, 2024 respectively and the Board approved unaudited interim condensed statements for each of the quarters ended after April 1, 2019 to March 31, 2024.

    b. Traced the annual aggregate addition to assets as set out in the Statement to respective audited financial statements.

    c. Traced the quarterly aggregate addition to assets as set out in the Statement to unaudited interim condensed statements of respective quarters.

    d. We have solely relied on management representation for appropriateness of classification for package wise additions and have not performed any procedure on it.

    e. Performed necessary enquires with the management and obtained necessary representations. The Company has provided all relevant information for the respective period as stated above. We have relied on the same and have not performed any independent procedures.

    The above-mentioned procedures include examining evidence supporting the particulars in this Statement. Further, our scope of work did not involve us performing audit test for the purposes of expressing an opinion on the fairness or accuracy of any of the financial information or the financial statements of the Company taken as a whole.

Conclusion

13. Based on procedures performed by us, and on observations as set out in paragraph 12 above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes thereon, are in agreement with books of account and records underlying audited financial statements of the Company for the years ended March 31, 2020 to March 31, 2024 and unaudited interim condensed statements for the quarters ended after April 1, 2019 to March 31, 2024.

Status of Land Acquisitions: Progress and reasons for the delay with respect to each parcel of land

1. The Hon'ble Commission, in its order dated January 8, 2022, for Petition No. 408/GT/2020, approved an expenditure of Rs. 3881.64 lakh in 2019-20 towards the cost of 'Land & Site'. The projected expenditure was envisaged for the payment of the revised demand for 114.95 acres GM land as per the then available 2018 circle rate at Rs.3357.71 lakh (i.e. net of revised demand of 3527.71 lakh and already paid amount of Rs 170 lakh). Balance Rs. 523.93 Crore included the remaining 20% of payment demand (of Rs. 59.71 lakh) for Krishi farmland admeasuring 4.81 acres, balance 20% of payment demands (of Rs. 125.17 lakh plus 128.56 lakh) for GM Lands admeasuring 6.96 acre for stage 1 and 6.01 acre for stage 2 respectively which were meant for Railway Corridor and contingency amount of about Rs. 210.49 lakh. The relevant extracts of the order dated 08.01.2022 are extracted as below for the periods 2014-19 and 2019-24 for ready reference-

> *"44……In respect of (i) Payment of demand for GM land acquired for Railway Corridor and payment of license fee for Railway land acquired for Railway Corridor (for Rs.647 lakh in 2018-19) and (ii) Payment of fresh demand of GM Land (114.95 acre) for the project in 2019-24, it is noticed that additional payments were required to be made due to change in the policy of State Government (GoJ) for leasing the land. The sequence of events in regard to the leasing of land is enumerated below:*
>
> *(i) On 5.1.2010: The Government of Jharkhand accorded in-principal approval to DVC for sub-leasing 114.95 acres (already leased to DVC) of land to MPL. Reference placed at annexure P/5-C of the petition.*
>
> *(ii) On 22.1.2011: The Government of Jharkhand amended the leasing policy of land and held that on leased out land, third party right cannot be created and thereby sub-leasing already accorded to MPL vide letter dated 5.1.2010 became ineffective. Reference placed at annexure P/5-E of the petition.*

(iii) On 30.9.2014: The Government of Jharkhand directed DVC to surrender 114.95 acres (already leased to DVC) of land stating that the DVC share being less than 51% in MPL, it does not fall under the category of government company as per Company Act. Thus, sub-leasing to MPL by DVC was withdrawn. Reference placed at annexure P/5-H of the petition.

(iv) On 4.1.2017: The Government of Jharkhand revised the rates for leasing of the land and thereby creating additional liability to MPL for the sameland which was sub-leased to the Petitioner by DVC. Reference placed at annexure P/5-K of the petition.

(v) On 20.10.2017: DVC intimated to Govt. of Jharkhand that DVC Board had approved the surrender of 114.95 acres of land for subsequent grant of the same land to the Petitioner. Reference placed at annexure P/5-L of the petition.

(vi) On 08.11.2017: Petitioner requested the Govt. of Jharkhand that to initiate the leasing process directly in favour of the Petitioner and the same land is already in use for power plant. Reference placed at annexure P/5- of the petition….

45. On perusal of the sequence of events and documents furnished by the Petitioner, it is observed that the delay in payment towards land and site was due to change in policy of the State Government of Jharkhand. Scrutiny of the documents furnished indicates that 'land issues' had prolonged till 24.11.2018, i.e. even after the cut-off date. Though the said work form part of the original scope of work of the project, the Petitioner had to continue the execution of these works even after the cut-off date on account of the delay in the availability of land and site…

46. As already observed, the delay in the availability of land & site was due to changes in the policy of the Govt. of Jharkhand, cancellation of wrongful disbursement of land compensation award and clearance for the development of Railway Corridor after payment of compensation. Also, the delay due to non-availability of land had caused the delay in execution of the General Civil Works by the Petitioner and the same cannot be attributable to

the Petitioner. From the documents enclosed by the Petitioner, it is noticed that the Petitioner has been coordinating with the local administration for speedy resolution of the land issues and has been taking steps to mitigate the delay. Accordingly, actual additional capitalisation of Rs.69.98 lakh in 2015-16, Rs 0.40 lakh in 2016-17 and Rs.2112.86 lakh in 2018-19 towards Land & Site is allowed under Regulation 14(3(i) of the 2014 Tariff Regulations. Consequently, as the General Civil Works were also delayed due to delay in the possession of land, for which reasons and justifications have been furnished in previous paragraphs, the actual additional capitalisation of Rs.791.99 lakh in 2015-16, Rs.184.39 lakh in 2016-17, Rs.154.47 lakh in 2017-18 and Rs.147.49 lakh in 2018-19 towards General Civil Works is also allowed under Regulation 14(3(i) of the 2014 Tariff Regulations."

185. .....We have, in paragraph 38 to paragraph 46 of this order, examined the submissions of the Petitioner with regard to the delay in the availability of land & site and the delay in execution of the General Civil Works, consequent upon the non-availability of land, attributed to the change in policy of State Government and Order of the Hon'ble High Court, and allowed the additional capitalisation of the expenditure claimed by the Petitioner for the period 2015-19 under Regulation 14(3)(i) of the 2014 Tariff Regulations, for compliance with the orders of the Hon'ble Court. Considering the fact that these are balance works which have spilled over from 2018-19 and keeping in view that the Railway Infrastructure Package, being an interdependent activity, contingent upon the clearance of land acquisition issues, we hold, that the delay is on account of events which are not attributable to the Petitioner. In our considered view, the delay due to non-availability of land & site, which has caused the delay in the execution of the General Civil Works for the period 2015-19, holds good for the delay in the completion of Railway Infrastructure Package for the period 2019-21 also. For these reasons, the projected additional capitalization of Rs.68506.24 lakh for 'Railway Infrastructure Package' in 2020-21 and ***the projected additional capitalization of Rs.4041.64 lakh (Rs.3881.64 lakh for cost of Land and Site and Rs.160.00 lakh for General Civil Works) in 2019-20 is allowed***

under Regulation 25(1)(a) of the 2019 Tariff Regulations*. However, the total cost including cost disallowed for the year 2015-16 on Railway Package shall be considered and dealt on merits, after prudence check, at the time of truing-up.*

2. As evident from the above, the Petitioner had projected an expenditure of Rs. 3881.64 lakh in the FY 2019-20 anticipating balance demand in 2019-20 considering receipt of similar demand in 2018-19 for Un-notified forest land for which payment was also made and claimed in 2018-19. Further, discussions on these parcels of land were also in advance stages. **However, despite exercising sufficient caution and follow up with Government Authorities, the Petitioner is yet to receive the revised and/or balance demand from the Land and Revenue Department of the Government of Jharkhand (GoJ). The detailed reasons/progress made so far, for each parcel of land, is enumerated in the following paragraphs for kind perusal of the Hon'ble Commission.**

I. Re Gair Majarua ("GM") Land 114.95 Acres for Main Plant

3. In compliance with directives of GoJ dated September 24, 2016, DVC through its letter dated October 20, 2017 surrendered 114.95 acres of GM land to the GoJ. Subsequently, the Petitioner on 8.11.2017 submitted request to the GoJ to initiate the transfer/lease of 114.95 acres of GM land in favor of the Petitioner and give revised demand in accordance with GR dated 03.01.20217. Pursuant to above and following internal deliberations with Government Authorities, Circle Officer (CO), Nirsa through his letter dated 10.01.2018 sought detailed application along with copies of Map. In response of the same, the Petitioner submitted the required details on 11.06.2018. Thereafter, the Petitioner through various discussions and in review meetings taken by DC, Dhanbad raised the issue of balance demand and further requested for issuance of revised/ or balance of payment demand for remaining parcels of land. It is also evident from the correspondences dated 01.09.2018, 19.08.2019, 16.01.2020, 23.01.2020, 26.02.2020, 21.10.2021, 7.08.2023, 05.08.2024 that the Petitioner has been constantly following up with and providing requisite information to authorities for issuance of revised/ balance

payment demand. All the communications referred above are enclosed as **Annexure P/6(A)-1.**

4. However, in the aforesaid follow up, the Petitioner came to know that certain discrepancies have crept in during recent Haal Survey Khatiyan and out of the 114.95 acres, some land parcels were wrongly and illegally recorded as private land. This is evident from letter dated 21.10.2021 from Additional Collector to Circle (CO), Nirsa which also mentions that. In order to resolve these discrepancies, the Government has filed an Original Suit No. 2091 of 2020 before the Dhanbad Civil Court for the correction in respect to the land title and has sought present status of the case from CO Nirsa. The suit filed by CO, Nirsa in June 2020 against 74 defendants mention as follows.

".....4. That, in the recent revisional survey operation the lands described in the schedule hereunder has been wrongly and illegally prepared and finally published in the names of the Defendants in the Revisional Survey Khatian.

5. That, the Defendants have got no manner of right, title, interest and possession over the lands described in the Schedule hereunder, but they illegally managed to get their names entered in the Revisional Survey Khatian and on the basis of such illegal and wrong entry made in the Revisional Survey Khatian now they are recently trying to grab the same.

....

12. That, the Plaintiff, therefore, prays for the following reliefs;

a) For a decree for declaration, declaring Plaintiff's right, title & interest on confirmation of possession over the land described in the Schedule hereunder in favour of the Plaintiff and agqinst the Defendants.

b) For a decree for declaration declaring that the entry made in the Revisional Survey Khatian in respect of the land described in the Schedule below is illegal, wrong and erroneous.

c) For a decree for permanent injunction restraining the Defendants, their men, agents, representatives from interfering with Plaintiff's possession over the lands described in the Schedule herein below and/or encroaching

upon any portion of the land described in the Schedule herein below and/or doing any acts which is prejudicial to the interest of the Plaintiff.

……."

Aforesaid letters, copy of the Suit No. 2091 of 2020 and updated status of this suit are enclosed as **Annexure P/6(A)-2(Colly)**.

5. In order to expedite the matter, the Petitioner once again through a letter dated August 7, 2023 requested DC, Dhanbad to provide payment demands and expedite the process for transferring the 114.95 acres of GM land. Alternatively, the Petitioner has also requested the GoJ through a letter dated August 5, 2024, to at least initiate the transfer process for the undisputed GM land with clear records and remaining land may be leased or transferred once the necessary record corrections are made, depending on the outcome of Original Suit No. 2091 of 2020 to which response is awaited. Thus, in spite of repeated requests, the Petitioner has still not received the demand by GoJ. In view of the matter being sub-judice, the Petitioner understands that it will receive the demand for this parcel of land and only after the Original Suit No. 2091 of 2020 is decided. Aforesaid communications are already enclosed as part of Annexure P/6(A)-1/2.

II. Re 4.81 Acres krishi farmland (GM) for Railway Project

6. The Petitioner had deposited 80% of the payment demand dated 15.09.2009 and informed the authorities via a letter dated July 7, 2010. In lieu of krishi land, identified GM land of 25 acres in Nirsa was supposed to be transferred in the name of Agriculture Department by the Revenue Department and the Petitioner was directed to pay an amount of Rs. 1 Crore for the development of said land as Agricultural land. Accordingly, in response to the demand note dated November 6, 2017, MPL made a payment of Rs. 1 Crore for the development of agricultural land via treasury challan dated May 9, 2018. This payment was further communicated to the GoJ through a letter dated May 10, 2018. However, MPL is yet to receive the demand note for the remaining 20%. Acting as a prudent entity,

MPL raised the issue in various meetings and also requested the demand note for the remaining balance of 20% from CO Nirsa via letters dated June 17, 2019 and January 23, 2020. Currently, the issue of transfer of GM land to agricultural land is pending with Agriculture Department, GoJ owing to inter-department transfer of land and involves no fault on part of the Petitioner. Same is also evident from the point no.3 of MoM dated 14.09.2020 attached with letter dated September 15, 2020 from Additional Collector to CO, Nirsa who was directed to dispose of the matter without any delay. In order to further expedite, the Petitioner through its letter dated August 7, 2023, to DC Dhanbad requested to raise payment demand for balance 20% and expedite the resolution of land matters. However, the demand is still awaited. Aforesaid communications are enclosed herewith as **Annexure P/6(A)-3(Colly).**

III. Re GM Land 6.96 Acres and 6.47 Acres for Railway Project

7. Similar to above parcels of land, MPL in its various meetings with DC, Dhanbad raised the issue of balance 20% of payment demand and also through communications dated 17.06.2019, 23.01.2020 has requested for issuance of the balance 20% of the payment demand which is awaited. MPL once again through its letter dated August 7, 2023 to DC Dhanbad has requested to expedite the land transfer process and for issuance of payment demand for balance 20% of the amount.
8. In view of the aforementioned reasons, it is evident that primarily the delay in the issuance of the revised and/or balance payment demand by the GoJ for the transfer of land in the name of the Petitioner is getting delayed due to pending disposal of the Suit No 2091 of 2020 before district court of dhanbad, pending inter department transfer of agricultural land and pending computations of balance 20% by appropriate authority. As elaborated in the foregoing paragraphs, it is evident that the said delay is due to reasons beyond the control of the Petitioner.
9. From the foregoing's, it is evident that land transfer has faced numerous critical issues despite the Petitioner exercising sufficient caution. Therefore, in Petitioner's respectful submission, delay in getting the revised demand payment is beyond MPL's control. Accordingly, the Petitioner for the purpose of True-up for

2019-24 has claimed nil cash capitalisation against the said approval. Further, pending disposal of the Suit No 2091 of 2020 before district court, future revision in land rates and noting the complexities involved in Land transfer, the Petitioner is unable to ascertain the fresh timelines or any incremental cost to earlier projections. In light of the uncontrollable/ Force Majeure conditions discussed above, the Petitioner humbly requests this Hon'ble Commission to grant liberty to the Petitioner to update/claim the actual cost towards revised and/or balance payment demand for these parcels of land during the True-up of 2024-29.

IV. Re Actual Additional Capitalization of Rs. 126.77 Lakh in FY 2020-21 towards purchase of Rayati (Private) Land for MPL Railway Project (Rs. 83.40 Lakh included under approved Railway Project Cost) and additional purchase of about 0.64 Acre of land for Rs. 43.37 lakh)

10. It is humbly submitted that the Petitioner earnestly started the work for the completion of the Railway Project immediately after obtaining approval from its Board and securing financing in 2008. However, the completion of the Railway Project was delayed due to reasons beyond the control of the Petitioner. In its previous petition (Petition No. 408/GT/2020), the Petitioner provided detailed reasons for the delay in the Railway Project. These reasons are not being repeated here for the sake of brevity, as the Hon'ble Commission, in its order dated January 8, 2022, acknowledged that the delay was attributable to the land disputes beyond the control of the Petitioner and arising from the wrongful disbursement of land compensation among the beneficiaries by Government authorities. The relevant portion of the order dated January 8, 2022, is extracted as follows:

> *"45. On perusal of the sequence of events and documents furnished by the Petitioner, it is observed that the delay in payment towards land and site was due to change in policy of the State Government of Jharkhand. Scrutiny of the documents furnished indicates that 'land issues' had prolonged till 24.11.2018, i.e. even after the cut-off date. Though the said work form part of the original scope of work of the project, the Petitioner had to continue the execution of these works even after the cut-off date on account of the delay in the availability of land and site. Similarly, the delay in the development of Railway Corridor was cleared when Hon'ble High Court of Jharkhand vide its*

judgment dated 22.2.2018 had directed the State Government of Jharkhand to cancel the earlier awards passed in favour of wrongful awardees and to prepare fresh awards in favour of genuine persons and to proceed in accordance with law. The Petitioner had made all payments mandated due to change in policy of the State Government of Jharkhand and as a consequence of cancellation of wrongful disbursement of land compensation award.

....."

11. The disputes led to the filing of Writ Petition No. 5084 of 2016 by the Petitioner before the Hon'ble High Court of Jharkhand. The High Court issued directions on September 6, 2016, to the Deputy Commissioner, Dhanbad, to expedite the resolution of land issues. As the matter remained unresolved, the Petitioner again filed Writ Petition No. 5242 of 2017 before the Hon'ble High Court of Jharkhand. In its judgment dated February 22, 2018, the Hon'ble High Court directed the State Government (GoJ) to cancel the earlier awards granted to wrongful persons/awardees and to prepare fresh awards for genuine persons within four months. Since the railway infrastructure package is a linear project, it requires possession of all land parcels to perform complete physical measurements for accurate and complete design, thereby enabling the commissioning of the Railway Project. The survey of the entire land and accurate cost estimation could not be conducted due to the lack of access to the land for carrying out the survey. Therefore, the Petitioner made all efforts to expedite the acquisition of all land parcels and to complete construction on those patches of land as and when possession was obtained. This sometimes required changes in design and scope due to actual site measurements differing from the initial design estimates when access to those parcels became available.
12. Due to the deviation between the actual site conditions and the design estimations, it was observed that owing to the uneven terrain retaining walls were required to be constructed between bridge no BR 11- BR 12 of the original route for which access was possible only after the filing of the Tariff Petition No. 408/GT/2020 in January 2020 and, hence, said cost could not be factored/projected at that time.
13. It was observed that the cost for construction of the retaining wall would be Rs. 275.37 Lakh. Owing to the already delayed commissioning and associated

increase in cost, the Petitioner being a prudent utility analysed alternative methods for resolution and it was observed that with slight change in the original route, requiring buying of additional land parcels and then filling the same with Sand/Soil/Compaction/civil construction for required elevations, would result in cost savings to the tune of Rs. 232.00 Lakh compared to the cost of retaining wall in the original route. The detailed Cost-Benefit Analysis and underlying calculations are attached as Annexure P/6 B.

14. Accordingly, the Petitioner in order to resolve the issue, reduce the scope of work and duly considering the cost benefit analysis procured the additional parcels of land which costed about Rs. 43.37 lakh in FY 2020-21 and this increase was beyond the control of the Petitioner as it could not assess the exact requirement in absence of access of disputed parcels of land. The details of the land parcel procured additionally compared to initial projection before filing of the Tariff Petition No. 408/GT/2020 in January 2020 for the aforesaid purpose are summarized in the Table below:

Serial No.	**Sale Deed No**	**Date of execution**	**Area (Acre)**	**Amount (Rs. Lakh)**
1	Pandra- 3053	21.08.2020	0.08	43.37
2	Pandra- 3078	28.08.2020	0.05	
3	Pandra- 4044	22.10.2020	0.37	
4	Paktodhiya- 4005	21.10.2020	0.14	
	Total		**0.64**	**43.37**

15. The rationale for acquiring the Deeds at Sl.No 1 to 3 was to minimize the scope of retaining wall and, consequently, reduce the additional cost of civil construction upon actual site survey. Furthermore, the Deed at Sl.No 4 was executed because although the said land parcel was present in the original route, was inadvertently missed by the Petitioner owing to the inability to do actual site survey due to ongoing disputes. Thus, with no fault of its own, the Petitioner could get the complete access to the land only in the year 2020 and, thereupon, it conducted the detailed survey for balance requirements that was identified in Paktodhiya village.

16. As is discernible from the above, the acquisition of the land for Pandra Deeds was undertaken solely to save costs in the interest of all stakeholders, with no wrongful gain to the Petitioner. Similarly, the acquisition of land for the Paktodhiya Deed was necessary to rectify an inadvertent omission, which did not arise from any default on the part of the Petitioner but was due to inaccessibility to the land for a detailed survey. Therefore, the Petitioner humbly requests the Hon'ble Commission to allow capitalization towards the land cost of Rs. 126.77 Lakh during the year 2020-21 which includes cost of about Rs. 83.40 lakh as per original plan and the additional land cost of about 43.37 lakh incurred for reasons stated above. Since these land parcels were to be utilized for Railway Project, earlier the cost of Rs. 83.40 lakh was claimed and approved under Railway Project hard Cost of Rs. 55938.42 lakh as approved by the Hon'ble Commission in FY 2020-21.

Sub : Transfer of 114.95 Acres GM Land surrendered by DVC

Dear Sir,

This is with reference to DVC letter no. Secc/LA/W/MPL/Land/07 (Vol II)/2593 dated 20.10.2017 (copy enclosed) surrendering the 114.95 Acres land with a request to initiate the leasing process directly in favor of Maithon Power Limited.

You may be kindly aware that the land in question is used for generation of power since 2011 and MPL is keen to take this parcel of land either on permanent transfer or long-term lease basis.

We kindly request you to initiate transfer/lease 114.95 GM land process and submit us the payment demand to enable us to remit the payment to GoJ at the earliest.

To initiate the leasing/Transfer process of GM land, kindly let us know what the formalities MPL are is required to fulfill.

We look forward for an early and favorable action in the matter.

Thanking you

Yours sincerely,

Sub : Surrender of 114.95 Acres GM land by DVC with a request to transfer the same land in the name of Maithon Power Limited

---

Dear Sir,

We are in receipt of your letter no. 243 dated 16.01.2010 on the subject matter, further we would like to bring following facts to your kind notice :

1) DVC had applied for transfer of GM land for MRBTPP an area admeasuring 125.14 Acres in different phases but acquired only 114.95 acres only
2) DVC also made a total payment of Rs. 16998598.00 against various payment demands either through Challans or Cheque/DDs..A statement of payment is attached for your ready reference.
3) GoJ has also acknowledge receipt of Rs. 16998598.00 vide letter no. 476 dated 24.10.09 (a copy attached)
4) Subsequent to the payment made by DVC to GoJ, DVC has requested for refund of amount through two letters no. i.e.
    a. 264 dated 25.11.2013 for refund of excess payment i.e. 1166413.00 for Mouza Madandih .. Letter enclosed
    b. 265 dated 25.11.2013 for refund of excess payment i.e. 1,93050.00 for Mouza Madandih .. Letter enclosed
5) After deducting the excess area i.e. 10.19 Acres from 125.14, a total area i.e 114.95 Acres GM was transferred and leased to DVC on various dates
6) For the total transferred GM land i.e. 114.95 Acres an amount of Rs. 15638075.00 has already been paid by DVC

We hope that you find the above facts & figures and the attached documents in order.

Now, we kindly request your good office to provide us the payment demand after adjusting the already paid amount i.e. Rs.16998598.00.

Thanking you,

Yours truly

अ.स.प.सं.–4/स.भू. (डी.वी.सी.) लीज–124/2017 1306 (4)/रा. राँची, दि–27·5·2020

प्रिय अमित,

विषयः– धनबाद जिलान्तर्गत निरसा अंचल के विभिन्न मौजों के विभिन्न खाता एवं प्लॉटों में अन्तर्निहित कुल रकबा–114.95 एकड़ मैथन राईट बैंक, थर्मल पावर लिमिटेड के लिए डी.वी.सी. को हस्तांतरित भूमि की वापसी (Surrender) के संबंध में।

प्रसंगः– विभागीय पत्रांक–3757, दिनांक–03.10.2019 एवं स्मार पत्रांक–1067, दिनांक–18.03.2019

उपर्युक्त विषयक आपका ध्यान आकृष्ट करते हुए कहना है कि प्रासंगिक पत्रों द्वारा डी.वी.सी. द्वारा प्रत्यर्पित (Surrender) भूमि का कुल रकबा–114.95 एकड़ भूमि के संबंध में निम्नांकित बिन्दुओं पर प्रतिवेदन की माँग की गई थी, जो अब तक अप्राप्त है :–

(i) पूर्व में डी.वी.सी. को हस्तांतरित कुल–114.95 एकड़ सरकारी भूमि थी, तो हाल सर्वे में उसमें से 9.15 एकड़ भूमि रैयती कैसे हो गई?

(ii) प्रतिवेदन में इस तथ्य को स्पष्ट नहीं किया गया है कि डी.वी.सी. को हस्तांतरित भूमि को किसी रैयत के साथ बंदोबस्त कैसे किया गया?

(iii) क्या पूर्व में DVC को भूमि हस्तांतरण (लीज) के पूर्व राज्य सरकार द्वारा निर्धारित राशि शासकीय कोष में जमा की गई थी अथवा नहीं?

आशा है कि आप व्यक्तिगत अभिरूचि लेते हुए वांछित प्रतिवेदन यथाशीघ्र उपलब्ध कराने हेतु आवश्यक कार्रवाई करेंगे।

सस्नेह।

Ref: Letter Number MPL/FY18/1711/006 dated 08.11.2017

Subject: Transfer of 114.95 Acres of GM Land Surrendered by DVC

Dear Sir,

We would like to bring to your esteemed attention the matter regarding the 114.95 acres of GM land surrendered by DVC, as referenced in their letter number Secc/LA/W/MPL/Land/07 (Vol II)/2593 dated 20.10.2017, wherein leasing process of the said land directly in favor of Maithon Power Limited is requested.

In the revisional survey, it has been noticed that 105.80 acres is recorded as GM Land, while 9.15 acres is recorded as Rayati Land. To address this discrepancy, CO, Nirsa has filed Original Suit No. 2091 of 2020 in the Dhanbad Civil Court, seeking correction of records on the Jharbhumi online portal.

Given that the aforementioned land has been in our possession and actively utilized for power generation since 2011, we kindly request the immediate initiation of the leasing/transfer process for the 105.80 acres of GM Land with clear records. The remaining 9.15 acres can be leased once the necessary record corrections have been completed.

We look forward for an early and favorable response.

Thank you.

Yours sincerely,
For Maithon Power Limited

(Aadhaar Number & Mobile Nos. are not available with the Plaintiffs)

Suit for declaration and injunction.

Suit is valued at Rs. 3,21,001/- (Rupees Three Lac, twenty one thousand and one) only.

Suit is filed under section 26 of the Code of Civil Procedure, 1908.

The Plaintiffs, above named, begs to submit and state as follows:-

1. That, the lands situated within P.S. Nirsa, Anchal Nirsa in different mouzas e.z. Sana, Palarpur, Beldang, Kashitand more fully and in detail described in the Schedule herein below recorded as Gair Abad Malik in the Cadastral Survey Settlement Record of Rights.

2. That, after abolition of Zamindari interest the lands described in the Schedule here under has been vested with the State of

Bihar, presently Jharkhand by operation of Bihar Land Reforms Act, 1950 and accordingly came in peaceful possession of the Plaintiff.

3. That, the lands described in the Schedule hereunder are non-cultivable (Patit) land and is lying vacant in possession of the State Govt.

4. That, in the recent revisional survey operation the lands described in the schedule hereunder has been wrongly and illegally prepared and finally published in the names of the Defendants in the Revisional Survey Khatian.

5. That, the Defendants have got no manner of right, title, interest and possession over the lands described in the Schedule hereunder, but they illegally managed to get their names entered in the Revisional Survey Khatian and on the basis of such illegal and wrong entry made in the Revisional Survey Khatian now they are recently trying to grab the same.

6. That, the Defendants have neither got any document of title nor they paid rent ever to the State Govt. in respect of the land described in the Schedule hereunder.

7. That, the Plaintiff recently in the month of June 2020 came to learn regarding the wrong entry made in the Revisional Survey Khatian in the names of the Defendants when the Defendants tried to grab the same by erecting some substantial construction over the same.

8. That, recently the Plaintiff has got on line Revisional Survey Khatian in respect of the suit land and accordingly has been advised to file the present suit for the reliefs noted below.

9. That, the Suit land is the Govt. land and for the benefit of the public in large it should be remained with the State Govt.

10. That, the cause of action for the present suit has arisen in the month of June 2020 when the Defendants tried to grab the same on the basis of wrong entry made in the Revisional Survey Khatian and when the Plaintiff got the online copy of the Revisional Survey Khatian within the jurisdiction of this learned Court.

11. That, for the purpose of court fees and jurisdiction the suit is valued at Rs. 3,21,001/- (Rupees Three Lac, twenty one thousand and one) only, Rs. 3,20,000/- for relief (a) & (b) Rs. 1001/- for relief (c) and accordingly ad valorem court fees is paid herewith.

12. That, the Plaintiff, therefore, prays for the following reliefs;

a) For a decree for declaration, declaring Plaintiff's right, title & interest on confirmation of possession over the land described in the Schedule hereunder in favour of the Plaintiff and against the Defendants.

b) For a decree for declaration declaring that the entry made in the Revisional Survey Khatian in respect of the land described in the Schedule below is illegal, wrong and erroneous.

c) For a decree for permanent injunction restraining the Defendants, their men, agents, representatives from interfering with Plaintiff's possession over the lands described in the Schedule herein below and/or encroaching upon any portion of the land described in the Schedule herein below and/or doing any acts which is prejudicial to the interest of the Plaintiff.

d) For a decree for all costs of the suit.

e) Any other decree to which the Plaintiff is found legally entitle to, may be passed in favour of the Plaintiff and against the Defendants.

धनबाद, दिनांक...15.09.....2020

विषय :– निरसा अंचल अन्तर्गत एम0पी0एल0 को अर्जित भूमि का दाखिल–खारीज के संबंध में।

प्रसंग :– दिनांक–14.09.2020 को उपायुक्त महोदय, धनबाद की अध्यक्षता में सम्पन्न बैठक की कार्यवाही ज्ञापांक–5619/रा0, दिनांक–14.09.2020

महाशय,

उपर्युक्त विषयक प्रासंगिक पत्र के संबंध में कहना है कि निरसा अंचल अन्तर्गत एम0पी0एल0 को भूमि हस्तांतरण एवं अर्जित भूमि का दाखिल–खारीज से संबंधित दिनांक–14.09.2020 को उपायुक्त महोदय, धनबाद की अध्यक्षता में समीक्षा बैठक आहूत की गई थी, उक्त बैठक में समीक्षा के कम में पाया गया कि एम0पी0एल0 द्वारा कुल–**564.67** एकड़ भूमि का दाखिल–खारिज हेतु आवेदन पत्र समर्पित किया गया है। जिसमें से आपके द्वारा **177.33** एकड़ भूमि का दाखिल–खारीज किया गया है। शेष **380.34** एकड़ भूमि का दाखिल–खारिज हेतु वर्त्तमान में लम्बित है। उपायुक्त द्वारा उक्त सम्पन्न बैठक में एक माह के अन्दर शेष रकवा–**380.34** एकड भूमि का दाखिल–खारीज करने हेतु समय–सीमा निर्धारित की गई है। साथ ही निदेशित किया गया कि अंचल अधिकारी, निरसा से प्रतिवेदन प्राप्त करें कि विगत् छः माह में कितनी भूमि का दाखिल–खारीज किया गया है।

अतः बैठक की कार्यवाही इस पत्र के साथ संलग्न कर भेजते हुए निदेशित दिया जाता है कि विगत् छः माह में कितनी भूमि का दाखिल–खारीज किया गया है, इस संबंध में तिथिवार रकवा सहित प्रतिवेदन अद्योहस्ताक्षरी को तीन दिनों के अन्दर उपलब्ध कराना सुनिश्चित करें।

अनुलग्नक :– यथोपरि।

विश्वासभाजन,

15/9/20

अपर समाहर्त्ता,
धनबाद।

14/9/20

दिनांक–14.09.2020 को 01.00 बजे अप0 में उपायुक्त, धनबाद की अध्यक्षता में एम0पी0एल0 को भूमि हस्तांतरण एवं दाखिल–खारिज से संबंधित समीक्षात्मक बैठक की कार्यवाही :–

उपस्थिति– पंजी के अनुसार

एम0पी0एल0 से संबंधित भूमि हस्तांतरण एवं दाखिल–खारिज से संबंधित निम्नलिखित बिन्दुओं पर समीक्षा की गई –

1. **निरसा अंचल** अंतर्गत विभिन्न मौजों में कुल सन्निहित रकवा–**191.67 एकड़** भूमि का हस्तांतरण हेतु पूर्व से प्रस्तावित है। वर्ष 2013 में विभाग से स्वीकृति प्राप्त था, परंतु निर्धारित अवधि में एम0पी0एल0 द्वारा राशि नहीं जमा करने के कारण स्वतः व्ययगत् हो चुका है। एम0पी0एल0 द्वारा पुनः नये सिरे से अधियाचना समर्पित किया गया है। उक्त प्रस्तावित भूमि जंगल–झाड़ी भूमि है। ऐसी स्थिति में यह मामला अगली बैठक में निर्णय लिया जायेगा। अपर समाहर्त्ता, धनबाद को निदेशित किया गया कि जंगल–झाड़ी भूमि से संबंधित विभागीय संकल्प/आदेश की प्रति के साथ बैठक में भाग लेंगे।

2. **निरसा अंचल** अंतर्गत अर्जित रकवा–**564.67 एकड़** भूमि का दाखिल–खारिज हेतु एम0पी0एल0 द्वारा समर्पित किया गया है। समीक्षा के दौरान पाया गया कि जिसमें से **177.33 एकड़** भूमि का दाखिल–खारिज कर दिया गया है। शेष **380.34 एकड़** भूमि दाखिल–खारिज हेतु लंबित है। उक्त भूमि का दाखिल–खारिज नहीं होने के कारण एम0पी0एल0 को लोन आदि कार्य में कठिनाई हो रही है। उपायुक्त, धनबाद द्वारा निर्देशित किया गया कि शेष बचे हुए भूमि का कितने दिनों में दाखिल–खारिज का कार्य पूर्ण किया जायेगा। साथ ही यह भी निर्देश दिया गया कि अंचल अधिकारी, निरसा से तिथिवार प्रतिवेदन प्राप्त करें कि विगत् 06 माह के अंदर कितनी भूमि का दाखिल–खारिज किया गया है। शेष लंबित भूमि का दाखिल–खारिज हेतु 01 माह का समय सीमा निर्धारित किया जाय।

(अनुपालन–अपर समाहर्त्ता, धनबाद एवं अंचल अधिकारी, निरसा)

3. **निरसा अंचल** अंतर्गत मौजा–**कुन्थल,** रकवा–**3.09 एकड़** एवं मौजा–**पोद्दारडीह,** रकवा–**1.72 एकड़** कुल सन्निहित रकवा–**4.81 एकड़** भूमि का **80 प्रतिशत राशि** की माँग संबंधी समीक्षा की गई। उक्त भूमि का प्रस्ताव वर्ष 2013 में उप सचिव, कृषि गन्ना, विकास विभाग, झारखण्ड, राँची को भेजा गया था। उक्त भूमि कृषि विभाग की भूमि है, जो एम0पी0एल0 को हस्तांतरण हेतु पूर्व से प्रस्तावित है। कृषि एवं गन्ना विकास विभाग का पत्रांक–**2739,** दिनांक–**17.09.2014** के द्वारा कुल 05 बिन्दुओं में पृच्छा की गई थी। जिसमें मुख्य रूप से उक्त कृषि भूमि के बदले कृषि फॉर्म हेतु 25.15 एकड़ उपयुक्त भूमि चिन्हित कर उपलब्ध कराने का निदेश प्राप्त है, तथा कृषि योग्य बनाने के लिए 1.00 करोड़ रू0 MPL, धनबाद द्वारा Undertaking दी जायेगी, परन्तु मौजा–**कुन्थल,** रकवा–**3.09 एकड़** एवं मौजा–**पोद्दारडीह,** रकवा–**1.72 एकड़** कुल सन्निहित रकवा–**4.81** एकड़ भूमि का प्रस्ताव अभिलेख अप्राप्त है। कृषि भूमि के बदले मौजा–उपचुड़िया में 25.00 एकड़ भूमि चिन्हित करते हुए इस कार्यालय का पत्रांक–3518/रा0, दिनांक–19.09.2016

के द्वारा स्वीकृति हेतु आयुक्त, उ0छो0प्र0, हजारीबाग के माध्यम से राजस्व, निबंधन एवं भूमि सुधार विभाग, झारखण्ड, रॉची को भेजा गया था, परन्तु राजस्व विभागीय पत्रांक–165/रा0, दिनांक–11.01.2017 के द्वारा वापस किया गया है, जिसमें निदेशित किया गया कि उक्त चिन्हित रकवा–25.00 एकड़ गैर आबाद खाते की भूमि अन्तर्विभागीय निःशुल्क हस्तांतरण जिला स्तर से ही किया जाना है, तथा MPL, द्वारा समर्पित Undertaking के अनुपालनार्थ राशि–1 करोड़ रू0 सरकारी कोषागार में जमा कर लिया जाना होगा। जिसके आलोक में MPL द्वारा राशि 1 करोड़ रू0 जमा किया गया है। कृषि विभाग को कृर्षि फार्म हेतु चिन्हित भूमि रकवा–25.00 एकड़ भूमि त्रुटि के साथ अंचल अधिकारी, निरसा को भेजा गया है। त्रुटि निराकरण के पश्चात् अग्रेत्तर कार्रवाई की जायेगी। इसके उपरान्त कृषि विभाग की भूमि मौजा–**कुन्थल,** रकवा–**3.09 एकड़** एवं मौजा–**पोद्दारडीह,** रकवा–**1.72 एकड़** कुल सन्निहित रकवा–**4.81 एकड़** भूमि का हस्तांतरण हेतु विभाग को पत्राचार किया जायेगा। अपर समाहर्त्ता, धनबाद को निदेशित किया गया कि अविलम्ब मामला का निष्पादन सुनिश्चित करें।

(अनुपालन–अपर समाहर्त्ता, धनबाद एवं अंचल अधिकारी, निरसा)

4. निरसा अंचल अन्तर्गत विभिन्न मौजा में रकवा–6.96 एकड़ भूमि का लीज बन्दोवस्ती हेतु 80 प्रतिशत राशि मांग संबंधी समीक्षा की गई। अपर समाहर्त्ता, धनबाद को निदेशित किया गया कि एक माह के अन्दर 80 प्रतिशत राशि मांग हेतु अंचल अधिकरी, निरसा से राशि गणना कराते हुए MPL को देना सुनिश्चित किया जाय।

(अनुपालन–अपर समाहर्त्ता, धनबाद एवं अंचल अधिकारी, निरसा)

अन्त में सधन्यवाद ज्ञापन के साथ बैठक की कार्यवाही समाप्त की गई।

धनबाद, दिनांक 23/12/2020

विषयः– मैथन राईट बैंक थर्मल पावर प्रोजेक्ट लिमिटेड (MPL) को कृषि विभाग की हस्तांतरण की जा रही 4.81 (मौजा–पोद्दारडीह/105, रकवा–1.72 एकड़ एवं मौजा–कुंथौल/93, रकवा–3.09 एकड़) एकड़ भूमि के बदले धनबाद जिलान्तर्गत अंचल–निरसा के मौजा–उपचुड़िया में कुल रकवा–25 एकड़ भूमि कृषि, पशुपालन एवं सहकारिता विभाग (कृषि एवं गन्ना विकास विभाग) को कृषि फार्म हेतु अन्तर्विभागीय हस्तांतरण के संबंध में।

प्रसंग :– आपका पत्रांक–3244, दिनांक–05.10.2017

महाशय,

उपर्युक्त विषयक प्रासंगिक पत्र के संबंध में कहना है कि मैथन राईट बैंक थर्मल पावर प्रोजेक्ट लिमिटेड (MPL) को कृषि विभाग की हस्तांतरण की जा रही 4.81 (मौजा–पोद्दारडीह/105, रकवा–1.72 एकड़ एवं मौजा–कुंथौल/93, रकवा–3.09 एकड़) एकड़ भूमि के बदले धनबाद जिलान्तर्गत अंचल–निरसा के मौजा–उपचुड़िया/119, खाता नं0–340, प्लॉट नं0–2825(किस्म–पु0प0) एवं 2558(किस्म–प0पाथर) में कुल सन्निहित रकवा–25 एकड़ गैर आबाद खाते की भूमि कृषि, पशुपालन एवं सहकारिता विभाग (कृषि एवं गन्ना विकास विभाग) को कृषि फार्म हेतु अन्तर्विभागीय हस्तांतरण से संबंधित अद्यतन स्थिति निम्नवत् है :–

1. धनबाद जिलान्तर्गत मैथन राईट बैंक थर्मल पावर प्रोजेक्ट लिमिटेड (MPL) को कृषि विभाग की हस्तांतरण की जा रही 4.81 (मौजा–पोद्दारडीह/105, रकवा–1.72 एकड़ एवं मौजा–कुंथौल/93, रकवा–3.09 एकड़) एकड़ भूमि के बदले धनबाद जिलान्तर्गत अंचल–निरसा के मौजा–उपचुड़िया/119, खाता नं0–340, प्लॉट नं0–2825(किस्म–पु0प0) एवं 2558(किस्म–प0पाथर) में कुल सन्निहित रकवा–25 एकड़ गैर आबाद खाते की भूमि कृषि, पशुपालन एवं सहकारिता विभाग (कृषि एवं गन्ना विकास विभाग) को कृषि फार्म के लिए हस्तांतरण हेतु प्रस्ताव अभिलेख सं0–01/2016–17 की स्वीकृति हेतु इस कार्यालय का पत्रांक–3518/रा0, दिनांक–19.09.2016 के द्वारा आयुक्त, उत्तरी छोटानागपुर प्रमण्डल, हजारीबाग के माध्यम से राजस्व निबंधन एवं भूमि सुधार विभाग, झारखण्ड, राँची को भेजा गया था, परन्तु सरकार के संयुक्त सचिव, राजस्व निबंधन एवं भूमि सुधार विभाग, झारखण्ड, राँची के पत्रांक–165/रा0, दिनांक–11.01.2017 के द्वारा वापस किया गया है। जिसमें निदेशित किया गया है कि कृषि फॉर्म हेतु MPL द्वारा समर्पित Undertaking के अनुसार प्रस्तावित 25.00 एकड़ भूमि को कृषि योग्य बनाने हेतु 1 करोड़ रूपये MPL द्वारा जमा की जानी है। साथ ही 25.00 एकड़ प्रस्तावित भूमि का अंतर्विभागीय निःशुल्क हस्तांतरण कार्रवाई अपने स्तर से निष्पादित किया जाय। जिसके आलोक में अनुमण्डल पदाधिकारी, धनबाद के पत्रांक–1749/सा0, दिनांक–22.10.2020 के द्वारा अंतर्विभागीय निःशुल्क भूमि हस्तांतरण हेतु संशोधित प्रस्ताव एवं जिला स्तर पर लगाये गये त्रुटि का निराकरण कर अनुशंसा के साथ इस कार्यालय मे प्राप्त हुआ है। साथ ही कृषि फॉर्म हेतु MPL द्वारा समर्पित Undertaking के अनुसार प्रस्तावित 25.00 एकड़ भूमि को कृषि योग्य बनाने हेतु 1 करोड़ रूपये MPL द्वारा चालान नं0–GRN 1801832399, दिनांक–03.05.2018 के माध्यम से दिनांक–09.05.2018 को भारतीय स्टेट बैंक, हीरापुर शाखा, धनबाद में जमा की

2. MPL को कृषि विभाग की हस्तांतरण की जा रही 4.81 (मौजा—पोद्दारडीह / 105, रकवा—1.72 एकड़ एवं मौजा—कुंथौल / 93, रकवा—3.09 एकड़) एकड़ भूमि का राशि क्रमशः 10,55,736.00 एवं 16,82,505.00 कुल 27,38,241.00 **(सत्ताईस लाख अड़तीस हजार दो सौ एकतालीस) रूपये** कोषागार, धनबाद में जमा की गई है। कोषागार पदाधिकारी, धनबाद का पत्रांक—672, दिनांक—24.11.2020 द्वारा प्राप्त सत्यापन प्रतिवेदन की प्रति संलग्न है।

3. MPL को कृषि विभाग की हस्तांतरण की जा रही 4.81 एकड़ यथा मौजा—पोद्दारडीह / 105, रकवा—1.72 एकड़, प्रस्ताव अभिलेख सं0—04 / 2010—11 एवं मौजा—कुंथौल / 93, रकवा—3.09 एकड़, प्रस्ताव अभिलेख सं0—03 / 2010—11 क्रमशः आयुक्त के सचिव, उत्तरी छोटानागपुर प्रमण्डल, हजारीबाग का पत्रांक—2391 / रा0, दिनांक—15.05.2013 एवं 2392 / रा0, दिनांक—15.05.2020 के माध्यम से कृषि विभाग को भेजा गया है, जो अबतक विभाग में विचाराधीन है।

अत अनुरोध है कि MPL को कृषि विभाग की हस्तांतरण की जा रही 4.81 एकड़ यथा मौजा—पोद्दारडीह / 105, रकवा—1.72 एकड़, प्रस्ताव अभिलेख सं0—04 / 2010—11 एवं मौजा—कुंथौल / 93, रकवा—3.09 एकड़, प्रस्ताव अभिलेख सं0—03 / 2010—11 में अग्रेत्तर कार्रवाई करने की कृपा की जाय, ताकि उक्त भूमि के बदले धनबाद जिलान्तर्गत अंचल—निरसा के मौजा—उपचुड़िया / 119, खाता नं0—340, प्लॉट नं0—2825(किस्म—पु0प0) एवं 2558(किस्म—प0पाथर) में कुल सन्निहित रकवा—25 एकड़ गैर आबाद खाते की भूमि कृषि, पशुपालन एवं सहकारिता विभाग (कृषि एवं गन्ना विकास विभाग) को कृषि फार्म के लिए निःशुल्क भूमि हस्तांतरण हेतु अग्रेत्तर आवश्यक कार्रवाई की जा सके।

No. L/Lease License/19 Asansol, dt.09.04.2019

Head Special Project,
Maithon Power Ltd.,
MA-5 Ganga Colony,
P.O.Maithon Dam,
Dist. Dhanbad,
Pin 828205

Sub: Proposal for renewal of license fees for licensing of 8.04 Hectare of land construction of siding for railway Infrastructure works of MPL of 1050 MW at Stage-1 of Phase-I of total project measuring 8.04 Hts. land licensing as per JPO No. W(6) /4/SDG/Policy Dt. 14/15.09.10

Ref: (i) This office proposal of even No. dt. 22.02.19
(ii) Sr.DFM/ER/ASN's letter No. 45/FB/Vetting/Engg/3106 Dt. 28.02.19
(iii) DRM/ASN's recommendation dt.12.03.19

*****

In reference to the above DRM/ER/Asansol has kindly approved the renewal proposal for land licensing of Railway land for siding works at Stage-1 of Phase-I of total project measuring 8.04 Hts.between Mugma and Thaparnagar.

You have to deposit following for processing the necessary agreement :-

1. License fee for (5 years) from 2019-20 to 2023-24	= Rs.1,76,79,816.00.
2.GST @ 18%	= Rs. 31,82,367.00
3. Security Deposit (1 year license fee)	= Rs. 30,74,355.00
	Total = Rs.2,39,36,538.00

Plan ,Estt.D&G & Deptt. Charges (Outstanding) :-

Land value of 14 -15 is	= Rs 5,11,38,558.00
14.5 % on Rs 5,11,38,558.00	= Rs.74,15,091.00
GST 18%	= Rs.13,34,716.00
	Total = Rs. 87,49,807.00

However, it is mentioned that as per PCE/ER/KKK's letter No. W(6)/340/0 Vol.VI dt. 16.07.12 it has been stated that" Plan, Estimate, D&G and Deptt. charges to be considered @14.5% on land Value + Project cost within Railway Boundary" . On receipt of the project cost from your end 14.5% will be charged accordingly in due course to regularize the matter.

Hence, at present you are requested to deposit a total amount of **Rs.3,26,86,345.00 (Rupees Three crore twenty six lakh eighty six thousand three hundred forty five) only**, in F/o. F.A. & C.A.O/E. Railway/Kolkata in the form of Demand Draft and execute the agreement prior to handing over of the land.

BETWEEN

DAMODAR VALLEY CORPORATION, a Corporation constituted under the Damodar Valley Corporation Act being Act No. XIV of 1948 (hereinafter referred to as "the said Act") and having its Headquarters at DVC Towers, VIP Road, Kolkata-700 054 in the state of West Bengal (hereinafter referred to as **"the First Party"**, which term shall unless excluded by or repugnant to the subject or context include its successors-in-interest and assigns) of the ONE PART

AND

M/s. MAITHON POWER LIMITED, a Company registered under the Companies Act, 1956 and having its registered office at Jeevan Bharti, 10th Floor, Tower-1, 124 Connaught Circus, New Delhi-110 001 (herein referred to as **"the Second Party"** which term shall unless excluded by or repugnant to the subject or context include its successors-in-interest and/or permitted assigns) of OTHER PART.

Contd. on page-2

MAITHON POWER LIMITED NEW DELHI

WHEREAS one of the functions of the First Party under Section 12 (a) of the said Act is the promotion and operation of the schemes inter-alia for the supply of water in the Damodar Valley.

AND WHEREAS under the provisions of Section 15 of the said Act the First Party is vested with power to determine and levy rates for bulk supply and retail distribution of water for industrial and domestic purposes and specify the manner of recovery of such rates.

AND WHEREAS under the provisions of Section 17 of the said Act construction, operation or maintenance in the Damodar Valley of any dam or other work of any installation for the extraction of water shall not be effected by any person without the consent of the First Party.

AND WHEREAS the Second Party has requested the First Party under cover of its letter No. MTP/Intake-14/-258,Dated 21.02.2007 annexed hereto, to allow it to construct , operate and/or maintain the water supply scheme and to allow it to have a supply of water from Maithon Reservoir of DVC at Maithon Right Bank at Maithon, Dist. Dhanbad, Jharkhand in accordance with the approved plan and drawing forwarded by Chief Engineer (Civil), DVC, Maithon under cover of his letter No.CE-17/51-461, Dated March 22nd, 2007 and letter No. MD/DVRR/W-6/2001/181-183, Dated 06.12.2001 of Member Secretary, DVRRC, CWC, Maithon annexed hereto for industrial and/or domestic purpose as laid down in the relevant provisions of the said act.

AND WHEREAS the First Party has agreed to such construction, operation and /or maintenance of the water supply scheme and has further agreed to such supply of water to the Second Party on the terms and conditions as hereinafter appearing.

Contd. on page-3

MAITHON POWER LIMITED NEW DELHI

NOW THIS AGREEMENT WITNESSETH AND IT IS HEREBY DECLARED AND AGREED AS FOLLOWS:-

01. a) PERMISSION:

i) The "**First Party**" who is seized and possessed of and is otherwise well and sufficiently entitled to the plot of land measuring 52,280 sq meter (i.e. 5,62,736.69 sq. ft.) of DVC land, more particularly described in the drawing hereto annexed, hereby grants to the "**Second party**" the right to use/build at his own cost, the intake works comprising the Pump house supporting structures and approaches and also lay down pipes and other works on the above mentioned piece and parcel of land.

(ii) These structures and pumping installation shall be the property of the "**Second party**" and shall be maintained by them.

(iii) For the temporary use/occupation of the said 52,280 sq. meter (i.e. 5,62,736.69 sq.ft.) of DVC land, the second party shall pay the "**First Party**" a token rent of Rs. 5,62,736=69/- (Rupees Five Lacs Sixty Two Thousand Seven Hundred Thirty Six and paise Sixty Nine only @ Rs 1/- per Sq ft) per annum for a period of 35 (Thirty Five) years from the date of possession/occupation of land is made over to the '**Second Party**". The amount of Rs. 5, 62,736=69/- per annum for the whole 35-years is to be paid in advance from the date of occupation of the said land by the '**Second Party**". The rent is subject to change as and when revised by the 'the Corporation' during the pendency of the lease period and the '**Second Party**' is liable to pay the balance admissible amount. The aforesaid lease period may be extended as per discretion of **"the Corporation".**

(iv) The "**Second Party**" shall not be entitled to transfer or let out the said land to others without the consent of the **"First Party**".

(v) The **"First Party** shall not put up any structure of its own on the aforesaid piece of land without the written consent of the **"Second Party**" which shall not be unnecessarily withheld.

Contd. on page-4

MAITHON POWER LIMITED NEW DELHI

(vi) On the termination of the tenure of the temporary use and occupation period unless extended, the "**Second Party**" shall quit, vacate and deliver peaceful possession of the said land by removing the intake works built thereon and restoring it to its original condition at his own cost.

(vii) Neatness and cleanliness of the area occupied should be observed by the second party.

01. b) PERMISSION:

The "**First Party**" hereby grants to the "**Second Party**" the permission to construct, operate and / or maintain the said water supply scheme in accordance with the Plan and Drawing annexed hereto and to extract such quantities of water from Maithon Reservoir for their for their 1050 MW Maithon Right Bank Thermal Power Project as the "**Second Party**" may require up to 30 MGD (55 cusec) at the point in the Damodar Valley indicated in the said Plan and Drawing annexed hereto and in the manner hereinafter mentioned provided the "**Second Party**" desiring to increase or decrease the quantity of water to be extracted as permitted aforesaid the "**First Party**" may require the "**Second Party**" to give the "**First Party**" sufficient notice in writing stating the quantity of water required and the "**First Party**" after receipt of such notice within one month may or may not permit the additional drawal of water depending on the condition prevailing at that time provided further that failure on the part of the '**First Party**' will not be construed as breach of this Agreement.

02. APPROVAL OF PLAN & DRAWING INSPECTION:

The installation of the "**Second Party**" required for extraction of water at the point on the water supply canal of DVC indicated in the said Plan and Drawing shall be duly approved by the "**First Party**" **before** erection provided the "First Party" or its representatives duly authorised in that behalf shall, from time to time, and at all times be entitled to enter such installations of the "**Second Party**" for inspection.

MAITHON POWER LIMITED NEW DELHI

Contd. on page-5

03. (a) EXCESS DRAWAL:

No drawal in excess of the water, as permitted shall be made by the **'Second Party"** without obtaining the specific permission of the **'First Party"** and subject to such terms and conditions as the "First Party" may like to impose.

03. (b) LESS DRAWAL:

The less drawal of water by 30% or more of the agreement quantity for a period more than 3-years will automatically call for revision of the agreement. The revised agreement quantity will be reduced to average of last 3-yrs' actual drawal, without making any further reference to the consumer incorporating the actual average drawal.

04. MODE OF MEASUREMENT & METERS:

For the purpose of measurement of the quantity of water extracted, the **"Second Party"** shall under this Agreement, with the prior Approval of the First Party, install at such points as may be indicated by the First Party, as many meters or as equal to the different type or types of uses of water so as to register the quantity of water in such units of measurement as may be adopted by **"the First Party"** from time to time. Provided that for the purpose of checking the accuracy of the meter/meters installed by **"the Second Party"**, "the **First Party"** may install check meters or other mutually agreed upon check measures and "the Second **Party"** shall provide all facilities required by "the First Party" for such installation or such check.

MAITHON POWER LIMITED NEW DELHI

Contd. on page-6

05. SEALING OF METERS:

All meters referred to in the above mentioned **Clause-04** excepting the ones with automatic recorder on charts if any, shall be properly sealed on behalf of both the Parties hereto and shall not be interfered with by either Party except in the presence of the other Party or its representatives duly authorized in that behalf.

06. METER READING, INSPECTION & BASIS OF PAYMENT:

The Control Valve House housing the meter/meters of the Second Party shall remain in the custody of the Second Party and the First Party through its representative duly authorized in that behalf shall at all times be entitled to enter the said Control Valve House and inspect the meter/meters. The meter reading shall be entered up daily at 9.00 hours in a register by the Second Party or its representatives duly authorized in that behalf. The readings may be checked and attested by the First Party or its representative duly authorized in that behalf, at convenient intervals and only the meter readings as recorded in the Register shall form the basis of payment to the First Party, provided that where it is not possible to record the quantity of water extracted for a particular use directly owing to the absence of a meter directly recording such quantity, the quantity extracted for such use shall be determined by taking the difference between the quantity recorded in the main meter, recording the total quantity extracted for all uses under this Agreement, and the quantity recorded for the other uses for which there may be direct meter/meters, provided further that if this meter/meters installed by the second party for recording the quantity of water is/are out of order, the quantity of water extracted may be assessed by taking the average of the quantity extracted during the previous three months as per the reading of the meter/meters, provided

Contd. on page-7

MAITHON POWER LIMITED NEW DELHI

further that nothing as aforesaid shall prevent the respective parties from arriving at a mutual settlement (agreement) as regard the quantity of water to be charged for during the above period.

07. QUANTITY OF WATER CONSUMED OR EXTRACTED:

The Registers of meter reading referred to in the above mentioned Clause-06 or the assessed quantity of water mutually agreed upon by and between both the parties hereto or on the average of the quantity of water extracted during the three months as aforesaid or computed by taking the difference between the direct recording and main meter shall be the prima facie evidence of the quantity of water extracted by the Second Party.

08. PROPRIETARY RIGHT OF METERS AND UPKEEPMENT:

Meters as mentioned in the above mentioned **Clause-04** shall be the property of the Second Party and the Second Party shall be liable for the upkeep of the meter and for carrying out test once a year or more to the satisfaction of the First Party about the accuracy of such meter/meters.

09. ACCURACY OF METERS:

In the event of any dispute or difference between the First Party and the Second Party as to the sufficiency or accuracy or state of repair of condition of the said meter or as to the quantity of water extracted through such meter, such difference or dispute shall be referred to and determined by an Engineer to be appointed by both the parties hereto.

MANTHON POWER LIMITED NEW DELHI

Contd. on page-8

10. **BASIS OF ASSESMENT IN ABSENCE OF METER:**

If at any time the meters installed for measurement of water extracted shall, at any time, cease to register correctly or be removed for repair, calibration etc., then for the period until the said meters shall have been repaired, replaced or otherwise adjusted so as to register the quantity of water passing through it correctly, the First Party shall be entitled to charge and the Second Party shall be liable to pay for such quantity of water as may be assessed by taking the average of the quantity extracted during the previous three months as per readings of the meters or as otherwise agreed to mutually between the parties hereto.

11. **BILL & THE TARIFF:**

The price for supply of water extracted shall be charged to the Second Party in accordance with the First Party's Schedule of rates and other conditions in force from time to time, provided that any levy such as Sales Tax, Octroi or by whatever other name called, known or made by the State Government, or any other competent authorities on quantity of water extracted by the Second Party shall be paid by the Second Party.

12. **TIME TO SUBMIT CONSUMPTION REPORT & SURCHARGE FOR DELAY IN PAYMENT OF BILLS:**

The First Party shall after the expiry of each month/quarter of the year deliver to the Second Party an account stating quantity of water supplied to the Second Party by the First Party in accordance with the readings of the said meter/meters of the Second Party and the amount payable therefore and the Second Party shall pay the same within 30 days from the date of delivery of such account. If the 'Second Party' fails to pay the amount of any bill due under this

Contd. on page-9

WATHON POWER LIMITED NEW DELHI

Agreement within 30 days from the date of receipt of the bill referred to, it shall pay a surcharge of 1% per month from that date. The date of receipt of payment either in cash or in cheque in the First Party's office will be considered as the date of payment for the purpose of this Agreement. If the amount of such bill remains unpaid for 60 days after the date of receipt of the bill referred to above, the First Party shall give the Second Party 7 (seven) days' notice of its intention to discontinue the supply of water and at the expiry of such period if the payment has not been received, the "**First Party**" may forthwith discontinue supply of water to the "**Second Party**".

13. **MODE OF SUPPLY UNDER NORMAL CONDITION & ABNORMAL CONDITION:**

Save as provided herein 30 (Thirty) MGD which, however, need not be continuous, throughout 24 hours, shall be available to the '**Second Party**' provided that in case of draught, accident, or other unforeseen circumstances, force majeure or any other cause over which the First Party has no control, the '**First Party**' shall not be responsible for any diminution or discontinuance of supply on such occasions, but it shall restore the normal conditions of supply as soon as it reasonably can to the extent possible.

14. **RULES & REGULATION:**

The Second Party agrees to conform to and abide by all rules and regulations made by the "**First Party**" now in force and/or which may from time to time be made by the '**First Party**' consistent with this Agreement relating to the extraction of water from the First Party's sources within the statutory limit of the said Act.

Contd. on page-10

MAITHON POWER LIMITED NEW DELHI

"**The Second Party**" will ensure that the effluent water discharging out of the plant will conform to the latest regulations / prescribed water quality parameters by pollution control board of respective states.

15. **DISPUTE OR DIFFERENCE & ARBITRATION:**

In the event of any dispute or difference arising at any time between the 'First Party' and the 'Second Party' in regard to any matter arising out of or in connection with this Agreement such dispute or difference shall be referred to the Arbitration of three Arbitrators, one to be appointed by each party hereto and the Third Arbitrator to be appointed by the Arbitrators appointed by each party as presiding Arbitrator for adjudication of dispute in accordance with the Arbitration and Conciliation Act 1996 or any statutory modification thereof or for the time being in force. The cost of Arbitration so agreed to by and between the parties, shall equally be borne by both the parties. The venue of Arbitration shall be at Kolkata and the Court at Kolkata shall have Jurisdiction.

16. **TENURE OF AGREEMENT OR VALIDITY:**

This Agreement shall subject as hereinbefore provided be and remain in force for a period of 40 years initially from the date of commencement of supply under this Agreement and thereafter shall continue uninterruptedly for an indefinite period under the existing terms and conditions until determined by either party after the expiration of the fortieth or any subsequent year on giving 12 months' prior notice in writing of such intention and at the expiration of such notice this Agreement shall absolutely cease and determine but without prejudice to the rights and remedies, if any, of either party which may have accrued or arisen hereunder in the meantime and

Contd. on page-11

MAITHON POWER LIMITED NEW DELHI

provided that the Second Party shall on giving the **'First Party'** 12 (Twelve) months' prior notice in writing of such intention be at liberty at any time after the expiration of the fortieth year to terminate this Agreement by making payment of the charges equal to water charge for one year as per the rate of withdrawal of the First Party in force at that time.

IN WITNESS WHEREOF THE PARTIES TO THESE PRESENTS HAVE HERE UNTO PUT THEIR RESPECTIVE HANDS AND SEALS EACH THE DAY AND YEAR FIRST ABOVE WRITTEN.

The Agreement along with Schedule of rates would come into effect on and from the date of commencement of water supply.

MRO/Water Tariff Cell/83 Date: 29.10.2021

REMINDER-1

To,
The Chief Executive Officer,
Maithon Power Limited,
MA 5, Gogna Colony,
P.O-Maithon Dam,
Dist-Dhanbad, Pin-828207,

Sub: Arrear Payment of land license of area 562736.69 Sqr .ft in connection with Water withdrawal from Maithon Reservoir from period 15.03.2009 to 31.01.2022.

Ref.: 1. Agreement No. Nil dated 14.05.2010 for drawal of Raw water from DVC Sources for MPL.
2. Letter No.-MRO/Water Tariff Cell/47 dated 22.07.2021

Dear Sir,

This is to inform that an agreement has been executed between DVC and MPL on 14.05.2010 for drawal of 30 MGD raw water including leasing of DVC land measuring **562736.69 Sqr .ft** for intake structure and pipe line etc for period 35 years (i.e 15.03.2009 to 14.03.2044).

With reference to above, it is to mention that-

1. From the record, it has been observed that rental charges Rs. 1,96,95,784.15/- for land license from 15.03.2009 to **14.03.2044(Total 35 years)** has been paid at old rate @ Rs 1.00/- per sqr ft (for 12 months period).

2. As per the Clause -01(a)(iii) of executed agreement dated 14.05.2010, **"The rent is subject to change as and when revised by the ' The Corporation ' during the pendency of the lease period and the 'Second Party' is liable to pay the balance admissible amount".**

3. The Corporation has revised land license rate @ Rs. 6.00/- per sq. ft. for each term of license i.e 11 (eleven) months vide DVC office memorandum No. Sectt./LA/Rent (Pt)/2011/1004 dated 03.09.2012(Copy enclosed).

4. In view of above you are requested to deposit arrear amounting to **Rs.3, 24, 065, 14.00 /-** (Rs. Three Crore Twenty four Lakh Six Thousand five hundred fourteen only) **(Including GST)** (Copy of bill enclosed) for lease period w.e.f **15.03.2009 to 31.01.2022** against enhanced land license rate.

Your early action in this regard is requested.

Yours faithfully

(S. K. Maji)
Dy. Chief Engineer(Civil),
Water Resources,
DVC, Maithon.

7. Our Letter No MRO/Water Tariff Cell/ Land//MPL /127/ 233 dated: 29.08.2022

Dear Sir,

This is to inform that an agreement has been executed between DVC and MPL on 14.05.2010 for drawal of 30 MGD raw water including leasing of DVC land measuring **562736.69 Sqr .ft** for intake structure and pipe line etc for period 35 years (i.e. 15.03.2009 to 14.03.2044).

With reference to above, it is to mention that-

1. From the record, it has been observed that rental charges Rs. 1,96,95,784.15/- for land license from 15.03.2009 to **14.03.2044(Total 35 years)** has been paid at old rate @ Rs 1.00/- per sqr ft (for 12 months period).

2. As per the Clause -01(a)(iii) of executed agreement dated 14.05.2010, **"The rent is subject to change as and when revised by the ' The Corporation ' during the pendency of the lease period and the 'Second Party' is liable to pay the balance admissible amount".**

3. The Corporation has revised land license rate @ Rs. 6.00/- per sq. ft. for each term of license i.e. 11 (eleven) months vide DVC office memorandum No. Sectt./LA/Rent (Pt)/2011/1004 dated 03.09.2012 and @ Rs12.00/- per sq. ft. for each term of license i.e. 11 (eleven) months vide DVC office memorandum No. m-pl/hr/Genl-1/2018 dated 31.08.2023 w.e.f 17.09.2022.

4. Under above reference letter Sl.No.2, We have received the arrear of revised land license payment of Rs.3, 24, 06, 514.00 /-(Rs. Three Crore Twenty four Lakh Six Thousand five hundred fourteen only) (Including GST) for period 15.03.2009 to 31.01.2022 on dated 28.02.2022.

5. This is to intimate that bill dated 20.07.2021 for arrear payment of land license for period 15.03.2009 to 31.01.2022 under reference letter Sl.No 2 and 3, the GST has been levied wrongly Rs. 30,38,778.00 from our good office only for period 01.07.2017 to 31.01.2022 instead of GST Rs. 52,86,192.00 on entire period bill from 15.03.2009 to 31.01.2022.

6. The corrected bill for arrear land licence fee including GST Rs. 52, 86,192.00 for entire period 15.03.2009 to 31.01.2022, comes to tune of Rs. 3, 46, 53,928.00.

7. The entire corrected GST amount of Rs. 52, 86,192.00 for the period 15.03.2009 to 31.01.2022 of arrear license fee has been paid by DVC on dated 26.03.2022.

8. The arrear GST amount payable by MPL for arrear land license period 15.03.2009 to 31.01.2022 is **Rs. 22,47,414.00** (Rs. 3,46,53,928.00 - Rs.3, 24, 06, 514.00).

9. The arrear payment at revised rate for further period 01.02.2022 to 31.10.2024 (Thirty three months) comes to tune of Rs. 1,98,07,994/- including GST.

In view of above you are requested to deposit GST arrear amounting to **Rs. 22,47,414.00** for period 15.03.2009 to 31.01.2022 and also land arrear dues **Rs.1,98,07,994 /-** (Including GST) **(Copy of bill enclosed)** for lease period w.e.f. 01.02.2022 to 31.10.2024 (Thirty three months) against enhanced land license rate.

Your early action in this regard is requested.

Encl: -1. Bill of land lease
2. Land Rate revision order

Yours faithfully,

दिनांक/Date: 29/09/2022

MEMORUNDUM

विषय/Sub: Licensing out DVC land to outsiders at various projects for non-agricultural purpose other than removal of sand, stones, earth etc.

In supersession of the rates contained in the Corporation OM No. Sectt./LA/Rent (Pt.)/2011/1004 dated 03/09/2012, on licensing out of DVC land to outsiders at various projects, the Corporation hereby revises the policy with immediate effect as per the following:

1. Rate of license fee:
   The license fee for 11 months shall be determined considering annual license fee as 6% of the land value considered as commercial purpose of use.

2. Formation of Standing Committee:
   A Standing Committee shall be formed at various field formations to examine and determine the land value/ rate of license fee of land relevant to the field formation for fresh cases as well as for renewal of old case and recommend to the Head of Project for approval/ acceptance followed by necessary approval from the Competent Authority as per Delegation of Administration Power.

3. Fixing of land value:
   The valuation of land/ market value of land shall be fixed based on the land value of the surrounding area as on 01/04/2022 as determined by the Govt. Revenue Authorities/ Office of the Registrar/ Sub-Registrar/ Circle Office.

   The land value as worked out shall be increased every year on the 1st day of April starting from 01/04/2023 at the rate of 7% over the previous year's land value to arrive at the land value for the following year based on which the annual license fee shall be fixed.

4. Minimum license fee:
   The minimum license fee is to be calculated considering rate as @Rs. 12/- per sq. ft. for each term of license of 11 (eleven) months and it will be increased every year on the 1st day of April at the rate of 7% over the previous year. At the time of determination of the license fee, first the license fee for 11 months shall be determined considering annual license fee as 6% of the land value considered as commercial purpose of use. If the license fee so calculated is lower than the minimum license fee license for the same land (i.e. @ Rs. 12/- per sq. ft.), then the minimum license fee shall have to be realised.

5. Deposit of License Fee:
   The license fee plus applicable GST shall be paid by the licensee in advance for each term of license.

6. Revision of license fee:
   The license fee will go up by 7% over the previous year's fee (either automatically due to land value escalation or due to revision of minimum license fee rate) from the 1st day of April every year provided the period of license in the preceding financial year exceeds six months.

7. Security Deposit:
   Security Deposit (S.D.) equivalent to 11 months' license fee to be paid by the licensee in advance. However, Govt. Departments are exempted from payment of S.D. The Security Deposit shall be refunded to the licensee only after expiry of license period. This clause shall apply to new licensees with immediate effect.

8. Applicability of revised rate:
   The revised rates shall apply to new licensees and renewal of old licensees with immediate expiry of the license period.

9. Agreement for license:
   An agreement for license shall be entered into with each party.

10. Duration of License:
The validity of license is for a period of 11 (Eleven) months initially, may be renewed for further terms of 11 (Eleven) months by the licensing authority on written request of licensee subject to realization of license fee, as applicable.

11. Electricity/Water Charges:
Separate charges would be levied as per approved rate in case of supply of water/electricity by DVC to the licensee.

12. Site Plan Approval:
The site plan of the proposed building/installation on the allotted DVC land shall be approved by the concerned DVC project.

13. Any special purpose land requirement, like erection of Telecom Towers/ establishment of Small Scale Industries (SSI) shall be treated separately. The license fee for such cases will be determined by any local committee of respective field formation, limited to the minimum license fee as per this committee report followed by necessary approval from the Competent Authority as per Delegation of Administration Power.

14. The license fee for licensing out of DVC land to outsiders at various Projects for non-agricultural purpose will be reviewed after every 05 (five) years.

15. In case where licensee is not interested in renewal of license, the assets created on the demised land has to be removed by the licensee within the license period, otherwise the same will vest in DVC without any compensation and DVC shall be entitled to deal with the same at licensors' discretion and at the cost of the licensee.

16. If at any time it is found that the licensee has violated the terms of the license & the activities of the licensee is detrimental to the interest of DVC and/or issues a notice to the licensee regarding termination of the license, the licensee will vacate the demised land within the notice period (one-month) without payment of any compensation by DVC, irrespective of the fact that the structure, building etc. have been erected on the demised land by the licensee at his/her cost. Licensee will be free to remove, at his/ her own cost, any structure, building etc. built by the licensee within a stipulated period to be decided by DVC.

17. Neatness & cleanliness of the area occupied should be maintained by the licensees.

18. For water & sanitary arrangements, if made by the Corporation, separate charge shall be levied by the Corporation.

19. Before granting such license, it should be ensured that the land in question can be spared without any detriment to DVC's own work and also without affecting the aesthetic beauty of the colony.

20. The above policy came into effect from 17/09/2022 and shall remain effective till further revision.

MAITHON POWER LIMITED

Letter Number: MPl /FY21/20-09/018 Date:22-09-2020

To
Officer In-charge,
Nirsa PS

Sub.: Request for providing administrative support to execute work on Plot no 115 of Pandra Mauza, acquired in MPL Railway Corridor

Dear Sir,

We would like to inform you that MPL is in process of constructing the dedicated railway line, which has already been delayed excessively because of multiple issues/ litigations which is challenging the overall feasibility of our plant operations.

In order to expedite the same, Hon'ble High Court, Jharkhand has directed District Administration vide his order dated 22.02.2018 In W.P.(C) No.-5242 of 2017 to complete all the exercise to remove hurdles in the project.

With reference to the above subject, we would like to update that the said plot number 115 of Khata 346, has been acquired by DLAO and transferred to MPL vide possession letter 04.08.2009 "Abhilekh Sankhya: 8/09-08". However, while taking up the construction works, following persons are repeatedly posing resistance

1) Mr. Nimai Rawani S/o Late Sanatan Rawani, Resident of Barwa East, Govindpur (m) 8114514478, 9204249051
2) Mr. Prankisto Rawani urf Pran Rawani, Resident of Kunthal, Nirsa (m) 8873271548

We have further requested them many times to take-up their grievance, if any with concerned competent authorities and offered them full co-operation from us in this regard, however they are still retorting to unlawful means of posing threats to our contractor's workmen.

Hereby, in this situation, I would like to request you to please provide us administrative support to execute our work on the said plot, from 23rd September'2020, as we are apprehending that above mentioned persons may disturb our construction work on the site and create Law and Order Situation

Thanking you

Yours truly,
For Maithon Power Limited

MPL
MAITHON POWER LIMITED

Letter Number: MPL/PA21/20-11/023 Date: 30-11-2020

To
Circle Officer,
Nirsa, Dhanbad,
Govt. of Jharkhand

Sub.: Request guidance on attached claim on Khata no 127, Plot no 1182, Mauza Pandra

Dear Sir,

This is to appraise you that Khata no 127, Plot no 1182 of Maua Pandra has been acquired for MRBTPP Railway Project, and 9 Awards (238 to 246), for the total acquired area of 20 decimal, has been issued to 10 Land losers. They have further been compensated by DLAO and subsequently Ex-gratia compensation has been disbursed by us to all 10 land losers.

However, Mrs Alka Gorai W/o Late Badal Chandra Gorai, has raised her claim citing the hereditary right over the land, and shared her details with your office on 25.11.2020, along with DLAO office and MPL.

Hereby, we would like to request your intervention and suitable action to resolve the issue and enable us in carrying out the construction activities on the said plot.

Thanking you
Yours truly,
For Maithon Power Limited

Head-Railway Project

MPL
MAITHON POWER LIMITED

Letter No. MPL/FY21/2012/021 Dated: 18-12-2020

To,
The Deputy Commissioner,
Govt. of Jharkhand, Dhanbad

Sub.: Request to provide administrative support to execute work in stretch of Pandra Village acquired in Railway Corridor

Dear Sir,

With reference to the above subject, we would like to inform you that MPL is in process of constructing the dedicated railway line, which has already been delayed excessively because of multiple issues/ litigations and thus resulted in overwhelming cost escalations which is challenging the overall feasibility of our plant operations, and posing serious risk of disapproval by CERC, of capital expenditure incurred in the project.

This is pertinent to inform you, that we have been asked by regulators to complete the Railway Project by March 2021; and accordingly we have placed all our efforts and resources to adhere the same. Currently of the total route length of 15.61 Kms, all the construction activities in around 13.61 kms are completed, and in order to complete and commission the whole project, within regulators guidelines, we require to complete construction activities in balance 2 Kms stretch in Pandra by Jan'2021.

Although, most of the litigations/disputes has been resolved by District Administration, in accordance to Honble high court order, and the balance few are sub-judice under LA Court, we are still facing frequent resistance and disturbance from miscreants, illegitimate random claimants, and opinion leaders with vested and untenable interests.

Hereby, I would like to request you to please provide us administrative support to execute our work on the said stretch of Pandra, within said timeframe

Thanking you,

For **Maithon Power Limited**

Dated: 13.08.2020

OFFICE MEMORANDUM

Sub: Time Extension in Scheduled Commissioning Date of Renewable Energy (RE) Projects considering disruption due to lockdown due to COVID-19

In supersession of this Ministry's earlier O.M.s of even no. dated 17th April, 2020 and 30th June, 2020 on the subject issue, the following is hereby conveyed:

(1). The MNRE, vide its O.M. No. 283/18/2020-GRID SOLAR dated 20.03.2020, with the approval of Hon'ble Minister, had inter-alia, issued directions to SECI, NTPC and Addl. Chief Secretaries / Pr. Secretaries / Secretaries of Power /Energy /Renewable Energy (RE) Departments of State Governments /UT Govts. /Administrations, to treat delay on account of disruption of the supply chains due to spread of corona virus in China or any other country, as Force Majeure and that they may grant suitable extension of time for projects, on account of corona virus, based on evidences / documents produced by developers in support of their respective claims of such disruption of the supply chains due to spread of corona virus in China or any other country.

(2). Subsequently, RE developers had represented to this Ministry that they may be granted a general time extension on account of lock down (due to COVID-19) and additional time required for normalization after such lockdown.

(3). This issue has been examined in the Ministry and it has been decided that:

a) All Renewable Energy (RE) implementing agencies of the Ministry of New & Renewable Energy (MNRE) will treat lockdown due to COVID-19, as Force Majeure.

b) All RE projects under implementation as on the date of lockdown, i.e. 25th March 2020, through RE Implementing Agencies designated by the MNRE or under various schemes of the MNRE, shall be given a time extension of 5 (five) months from 25th March 2020 to 24th August 2020. This blanket extension, if invoked by the RE developers, will be given without case to case examination and no documents/evidence will be asked for such extension.

c) The timelines for intermediate milestones of a project may also be extended within the extended time provided for commissioning.

d) The Developers, of the projects covered under para 3(b) above, may also pass on the benefit of such time-extension, by way of granting similar time-extensions, to other stakeholders down the value chain like Engineering Procurement Construction (EPC) contractors, material, equipment suppliers, Original Equipment Manufacturers (OEMs), etc.

e) The State Renewable Energy Departments (including agencies under Power/ Energy Departments of States, but dealing in renewable energy) may also treat lockdown due to COVID-19, as Force Majeure and may consider granting appropriate time extension on account of such lockdown.

(4). This issues in line with approval of Hon'ble Minister, New and Renewable Energy and Power.

Dated: 09th February, 2021

OFFICE MEMORANDUM

Sub: Time Extension in Scheduled Commissioning Date of Renewable Energy (RE) Projects considering disruption due to lockdown due to COVID-19: Clarification

1. Reference is invited to this Ministry's O.M. No. 283/18/2020-GRID SOLAR dated 13.08.2020, wherein, inter-alia, directions were issued to treat lockdown due to COVID-19, as Force Majeure. It was also instructed that all RE projects under implementation as on the date of lockdown, i.e. 25th March 2020, through RE Implementing Agencies designated by the MNRE or under various schemes of the MNRE, shall be given a time extension of 5 (five) months from 25th March 2020 to 24th August 2020. This blanket extension, if invoked by the RE developers, will be given without case to case examination and no documents/evidence will be asked for such extension.

2. Requests were received by MNRE for further extension beyond 5 months on account of COVID-19. The requests have been examined in the Ministry. The MNRE vide its O.M. No. 283/18/2020-GRID SOLAR dated 13.08.2020 has already issued instructions for a blanket extension of 5 months on account of COVID-19 without case to case examination and without asking for any documents/evidence. Further extension beyond 5 months can be granted by implementing agencies in exceptional cases, after due diligence and careful consideration of the specific circumstances of the case, and if allowed in terms of the provisions of the relevant contract.

3. It is also emphasized that this further extension beyond 5 months will not be granted in a routine manner.

4. This issues in line with the approval from Hon'ble Minister (NRE & Power).

OFFICE MEMORANDUM

Sub: Time Extension in Scheduled Commissioning Date of Renewable Energy (RE) Projects considering disruption due to lockdown due to COVID-19: Clarification

1. Reference is invited to this Ministry's O.M. No. 283/18/2020-GRID SOLAR dated 13.08.2020, providing for a blanket extension for RE projects on account of COVID-19. Vide subsequent clarification of even no. dated 09.02.2021, it was clarified that further extension beyond 5 months can be granted by implementing agencies in exceptional cases, after due diligence and careful consideration of the specific circumstances of the case, and if allowed in terms of the provisions of the relevant contract. Reference is also invited to Ministry of Finance O.M. No. 18/4/2020-PPD dated 13.05.2020, which provides for an extension of 3 to 6 months after following due process.

2. The undersigned is directed to further clarify that the total extension provided by implementing agencies on account of COVID-19 should in no case be more than 6 months including the 5 months blanket extension given by this Ministry vide its O.M. of 13.08.2020.

3. In case an implementing agency feels that there is a requirement to give extension beyond 6 months, it shall make a reference for consideration of this Ministry with due justification and supporting documents. No such extension shall be granted by the implementing agencies on their own.

4. This issues with the approval of Hon'ble Minister (NRE & Power).

Preliminary

Report

On

Electrical Resistivity Tomography for void detection along Railway line, Thapanagar

BY

Prof. Sanjit Kumar Pal and Prof. U. K. Singh

DEPARTMENT OF APPLIED GEOPHYSICS

INDIAN INSTITUTE OF TECHNOLOGY

(INDIAN SCHOOL OF MINES)

DHANBAD-826004

Introduction

Unauthorised coal mining activities may result in development of hidden hollows, rat holes, galleries, goafs, shafts etc., which pose great threats of land subsidence, fire, water flooding leading to severe environmental hazards, health problems and safety issues to the local people. Present study deals with delineation and mapping of unauthorised coal mine voids/ galleries near Thaparnagar Station-MPL Railway that lies in Raniganj coalfield, India. Electrical resistivity tomography (ERT) study comprising Schlumberger, and Dipole-Dipole arrays have been carried out along two parallel profiles over the affected area.

Syscal Junior Switch 48 (IRIS Instrument) has been for ERT data acquisition for mapping of possible voids/ illegal mining zones and its possible horizontal extension, geometry and depth extension. The Schlumberger array is moderately sensitive to both horizontal and vertical structures. Further, dipole-dipole array is good in mapping of vertical structures, such as dykes, cavities etc. It is comparatively insensitive to vertical variations in the resistivity distribution, but much more sensitive to difference in horizontal resistivity distribution. This array has better horizontal data coverage than the Wenner (Loke 1999). Further, inversion of cumulative data multi-arrays will carried out for mapping of possible voids/ illegal mining zones in complex geological environment (Vega *et al*. 2003; Stummer *et al.* 2004; Athanasiou *et al*. 2007; Bharti *et al*. 2016a, 2016b, 2019; Das et al. 2017; Saurabh et al. 2020). In theory, combined inversion of data sets coming from different electrode arrays obtained over the same site along the same profile would allow us to combine the relative advantages of every array and thus to produce superior results (Vega *et al*. 2003; Stummer *et al*. 2004; Athanasiou *et al*. 2007). The resolution capability and signal-to-noise ratio are also optimized in joint inversion of combined array data (Zhou and Greenhalgh *et al*. 2000; Dahlin and Zhou 2006). De la Vega *et al*. (2003) presented combined inversion results of Dipole–Dipole and Wenner array data obtained from a hydrocarbon contamination site. They recommended that combined inversion results have superior depth of investigation and better lateral resolution when compared to the inversion results obtained from each array separately.

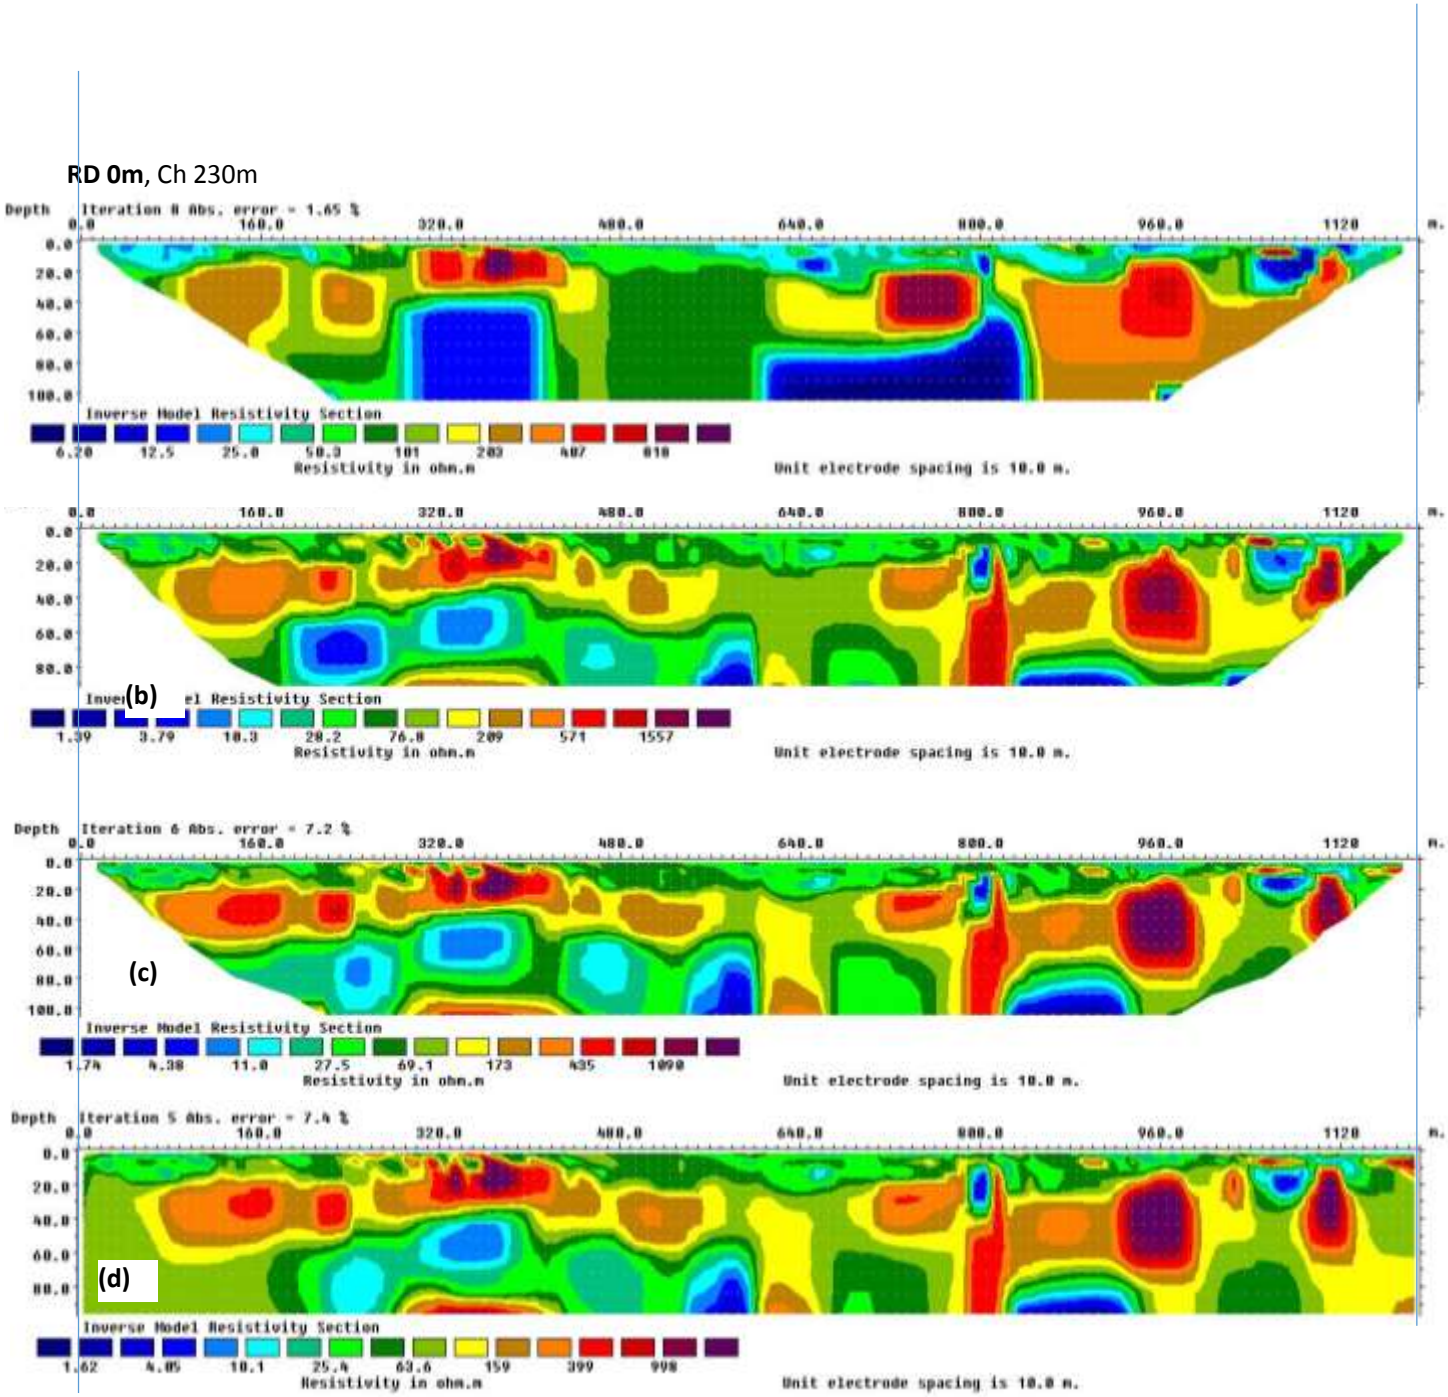

Figure 1. 2D geo-electrical section of Profile AA/ using (a) Schlumberger array, (b) Dipole-Dipole array, (c) joint analysis of Dipole-Dipole and Schlumberger arrays, (d) extended2D geo-electrical section generated using joint analysis of Dipole-Dipole and Schlumberger arrays.

RD 0m, Ch 270m **RD 950m**, Ch 1220m

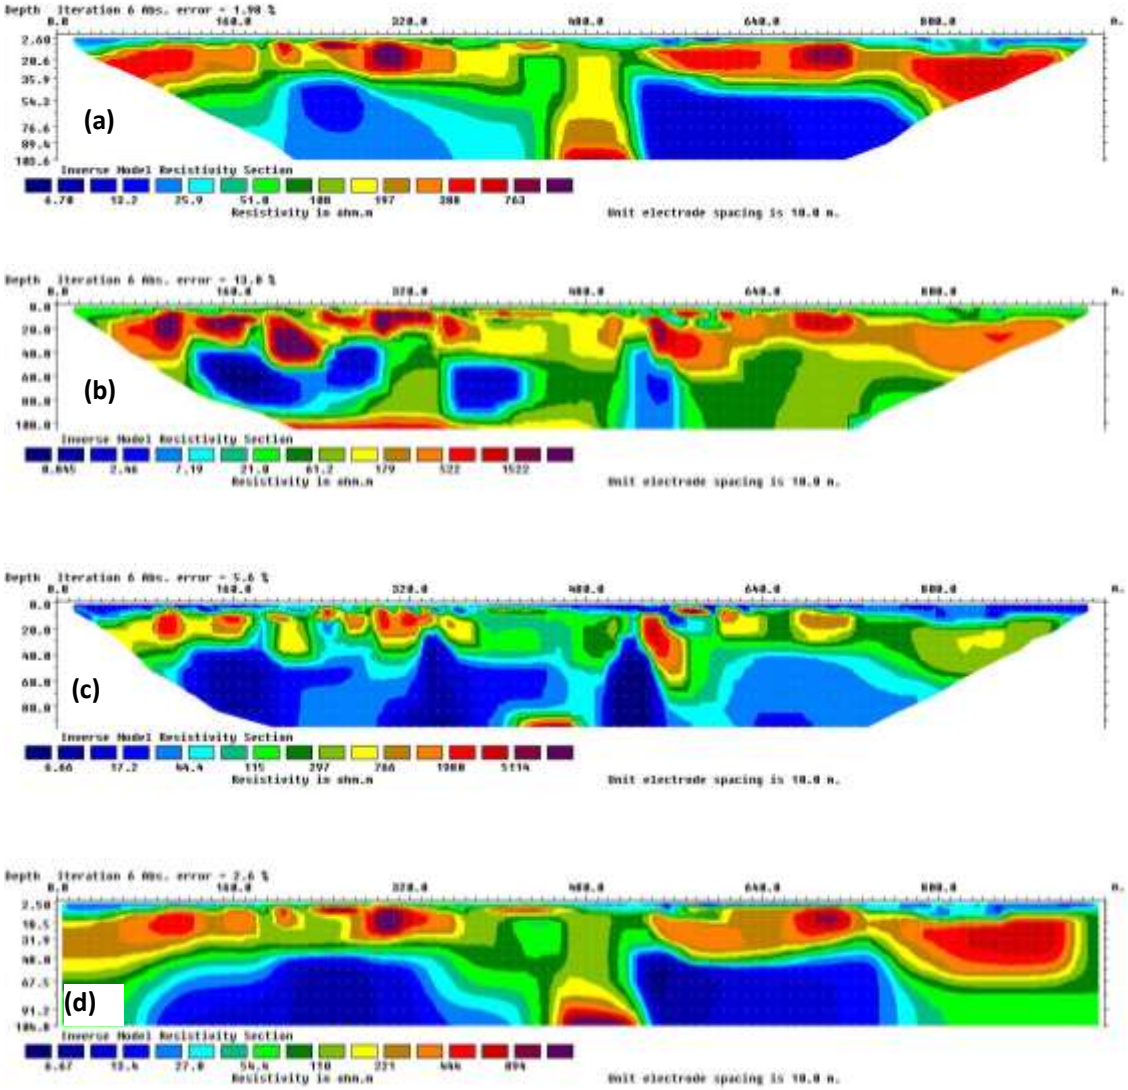

Figure 2. 2D geo-electrical section of Profile BB/ using (a) Schlumberger array, (b) Dipole-Dipole array, (c) joint analysis of Dipole-Dipole and Schlumberger arrays, (d) extended 2D geo-electrical section generated using joint analysis of Dipole-Dipole and Schlumberger arrays.

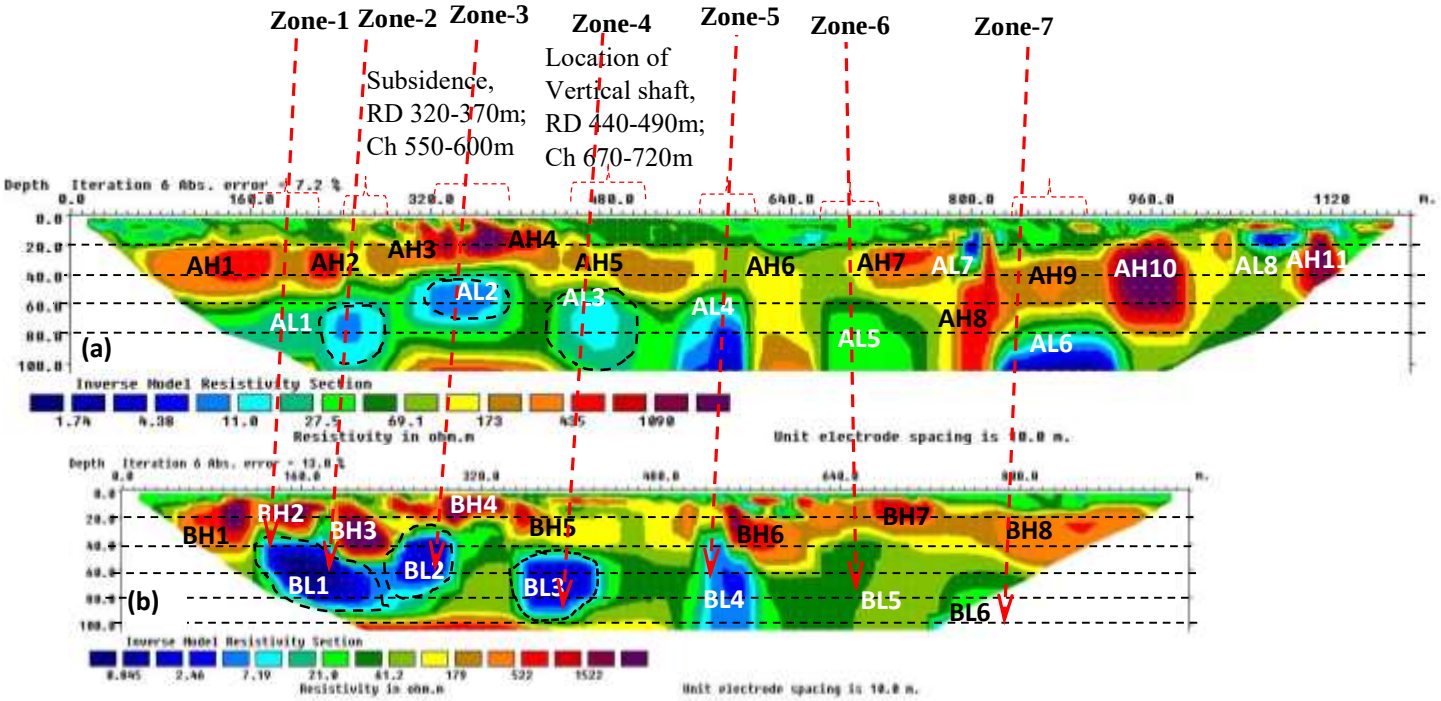

Figure 3. 2D geo-electrical sections of Profile AA/ and Profile BB/. Profile AA/ is 5 m below the Profile BB/ parallel to Thaparnagar- Mugma rail line. Profile BB/ was selected between two parallel rail lines running from Thaparnagar to Mugma. Profile BB/ is of only 950m as a railway-over-bridge on Khudia River was after RD950m.

Summary:

- Profile AA/ is 5 m below the Profile BB/ parallel to Thaparnagar- Mugma rail line. Profile BB/ was selected between two parallel rail lines running from Thaparnagar to Mugma. Profile BB/ is of only 950m as a railway-over-bridge on Khudia River was after RD950m.
- Profile AA/ lies between Reference Chanage : Ch230m (RD0) - Ch1420m (RD1190).
- Profile BB/ lies between Reference Chanage : Ch270m (RD0) - Ch1220m (RD950).
- Total eight low resistivity (~1-10 ohm-m) features (AL1-AL8) have been delineated from Profile AA/ .
- Total ten relatively high resistivity (~170-1500 Ohm-m) features (AH1-AH10) have been delineated from Profile AA/.
- Total five low resistivity (~1-10 ohm-m) features (BL1-BL5) have been delineated from Profile BB/.
- Total ten relatively high resistivity (~170-1500 Ohm-m) features (BH1-BH10) have been delineated from Profile BB/.
- A layer of relatively high resistivity (~170-1500 Ohm-m) with depth varying from 50-55m has been observed in Profile AA/.
- A layer of relatively high resistivity (~170-1500 Ohm-m) with depth varying from 50-55m has been observed in Profile AA/.
- AL1 is linked to BL1 and is associated with Zone-2.
- AL2 is linked to BL2 and is associated with Zone-3.
- AL3 is linked to BL3 and is associated with Zone-4.

- AL4 is linked to BL4 and is associated with Zone-5.
- AL5 is linked to BL5 and is associated with Zone-6.
- AL6 is linked to BL6 and is associated with Zone-7.
- High resistivity features (AH1-AH10 and BH1-BH10) are possibly associated with compact/dry / high-resistive formation.
- Low resistivity features (AL1-AL8 and BL1-BL5) are possibly associated with water saturated rockmass/ water filled gallery resulted from coal mining activity.
- All the inferred galleries resulted in low resistivity features (AL1-AL8 and BL1-BL5) are lying in the depth range of 40m to 100m. These inferred gallery zone may be stable presently due to relatively thick overlying rockmass. However, these locations covering Zone-1 to 7 may produce some subsidence due natural wear and tear process or any other natural/ man made activities.
- Some of these zone need to verify through drilling
- Based on the drilling data some additional geophysical data will be collected for further detail study.

MPL

Ref No - MPL /FY 21/21-03/005 Date-2[1] March, 2021

To,
The Sr Divisional Commercial Manager.
Eastern Railway, Asansol.

Sub: Allotment of ALPHA & NUMERICAL Code to MPL Railway Siding taking off from Thaparnagar (CH: 241.87) & Mugma (CH: 236.53) Railway Station of Asansol division for handling of coal rakes.

Ref: Approved Copy of DPR Letter No-TW 535/430/Pt/Kolkata - 30-03-2010

Dear Sir,

With reference to subject as mentioned above we would like to inform you that we have completed construction work of MPL Railway siding which is taking off from Thaparnagar & Mugma Railway station. For last mile connectivity CRS application has been processed by the office of Divisional Railway Manager Asansol. After getting CRS approval connectivity work will be taken up.

We would request you to arrange for allotment of ALPHA & NUMERICAL Code for MPL Railway Siding at the earliest for handling of coal rakes.

Warm Regards,

(C B Singh)
Head – Special Project

Dated: 12th May, 2021

OFFICE MEMORANDUM

Sub: Time-extension in Scheduled Commissioning Date of Renewable Energy (RE) Projects considering disruption due to the second surge of COVID-19

1. Reference is invited to this Ministry's O.M. No. 283/18/2020-GRID SOLAR dated 13.08.2020, providing for a blanket time-extension of 5 (five) months for Renewable Energy (RE) projects on account of COVID-19 and the associated lockdown. Vide subsequent clarifications of even no. dated 09.02.2021 and 30.03.2021 it was communicated that further time-extension beyond 5 (five) months can be granted by implementing agencies in exceptional cases. However, for any time-extension totalling beyond 6 (six) months, a reference shall be made to MNRE.

2. Representations have again been received in the Ministry for seeking time-extension on the grounds that there has been resurgence of COVID-19, leading to several States/UTs issuing instructions restricting mobility of people.

3. In partial modification to MNRE's earlier O.M. dated 30th March 2021, the total time-extension on account of first wave of COVID-19 shall be restricted to 6 (six) months, including the 5 (five) months blanket time-extension already granted by MNRE. No further time-extension shall be considered on this account.

4. Requests for time-extension on account of resurgence of COVID-19 and subsequent issuance of instructions by States/UTs restricting mobility of people have been carefully examined in the Ministry. It is noted that while there are no Central Government instructions for a countrywide lockdown, since beginning of April 2021 several States/UTs have taken various measures like night curfew, imposition of section 144, weekend lockdown, etc which may have affected RE projects. As a measure of relief to RE projects so that they can deal with difficulties arising out of the restrictions imposed on account of the second COVID-19 surge, it has been decided that RE projects, being implemented through Implementing Agencies designated by the MNRE or under various schemes of the MNRE, having their Scheduled Commissioning Date (SCD) on or after 1st April 2021 will be eligible to claim time-extension for completion of their project activities, provided such time-extensions are not used as a ground for claiming termination of Power Purchase Agreement (PPA) or for claiming any increase in the project cost. The actual quantum of time-extension shall be decided in due course depending on the COVID-19 related developments that take place in the coming weeks.

5. In view of above, the undersigned is directed to state that:

a) RE projects, being implemented through Implementing Agencies designated by the MNRE or under various schemes of the MNRE, having their Scheduled Commissioning Date (SCD) on or after 1st April 2021 after considering the time extension mentioned at Para-3 above, can apply to the concerned implementing agency for claiming time-extension in project commissioning.

b) While applying for such time-extension, RE developers shall undertake that the time-extension shall not be used as a ground for claiming termination of Power Purchase Agreement (PPA) or for claiming any increase in the project cost, including Interest During Construction (IDC) or upward revision of tariff.

c) If the conditions above are satisfied, then no other supporting documents will be required for granting time-extension.

d) On receipt of an application for time-extension, implementing agency shall not initiate any coercive action on the project for recovery of penalty on delayed commissioning, till the time-extension request is decided upon.

e) Within the extended time provided for commissioning, intermediate milestones of RE projects, scheduled for completion on or after 1st April 2021 after considering the time extension mentioned at Para-3 above, shall also be commensurately extended.

f) Developers shall pass on the benefit of time-extension to other stakeholders down the value chain including EPC contractors, material/ equipment suppliers, OEMs, etc.

6. As stated earlier, the quantum of time extension to be granted in above manner will be notified separately by the MNRE.

7. This issues with the approval of Hon'ble Minister (NRE & Power).

Dated: 29th June, 2021

OFFICE MEMORANDUM

Sub: Time-extension in Scheduled Commissioning Date of Renewable Energy (RE) Projects considering disruption due to the second surge of COVID-19

1. Reference is invited to this Ministry's O.M. No. 283/18/2020-GRID SOLAR dated 12th May, 2021, providing for a mechanism for claiming time-extension, on account of second surge of COVID-19, for RE projects, being implemented through Implementing Agencies designated by MNRE or under various schemes of MNRE and having their Scheduled Commissioning Date (SCD) on or after 1st April, 2021.

2. It was also provided that the quantum of time-extension to be granted in this manner will be notified separately by MNRE.

3. In this regard it has been noted that with the improvement in the COVID-19 situation in the country, many States/UTs have begun the process of unlocking. Broadly, the period of disruption due to second surge of COVID-19 seems to be from 1st April, 2021 to 15th June, 2021.

4. It has also been noted that activities related to RE projects are covered under essential activities, and are allowed to continue even during the lockdown situations.

5. However, in order to facilitate the ease of doing business and as a measure of relief to RE projects so that they can deal with difficulties arising out of the restrictions imposed on account of the second COVID-19 surge, it has been decided that the entire period of disruption i.e. 1st April, 2021 to 15th June, 2021 (both dates inclusive), can be allowed as time-extension to RE projects, being implemented through Implementing Agencies designated by the MNRE or under various schemes of MNRE, following the process stated in MNRE's O.M. No. 283/18/2020-GRID SOLAR dated 12.05.2021.

6. This issues with approval of Hon'ble Minister (NRE & Power).

Dated: 15th September, 2021

OFFICE MEMORANDUM

Sub: Time Extension in Scheduled Commissioning Date of Renewable Energy (RE) Projects considering disruption due to second surge of COVID-19: Clarification – reg.

Ref: (i) MNRE's O.M. of even no. dated 12.05.2021
(ii) MNRE's O.M. of even no. dated 29.06.2021

1. On account of First Wave of COVID-19 in 2020 and the consequent nation-wide lockdown, based on the directions of Ministry of Finance, MNRE vide its O.M. of even no. dated 13.08.2020, had granted a blanket time-extension of 5 months without any pre-requisite conditions attached to such extension.

2. During the 2nd wave of COVID-19 in 2021, there was no nation-wide lockdown and conditions of restriction in movement of goods/ people and other similar hardships, varied from place to place. There were no directions issued from Ministry of Finance to provide any time-extension. Despite that, to facilitate RE projects, a time-extension of 2.5 months (corresponding to the period from 1st April, 2021 to 15th June, 2021), was granted by MNRE in respect of 2nd wave of COVID-19 in 2021, vide OMs dated 12.05.2021 and 29.06.2021, subject to the condition that the RE developer desirous of seeking such time-extension (2.5 months on account of 2nd wave of COVID-19) shall give an undertaking that the said time-extension (of 2.5 months) shall not be used as a ground for claiming termination of Power Purchase Agreement (PPA) or for claiming any increase in the project cost, including Interest During Construction (IDC) or upward revision of tariff.

3. Subsequently, it was pointed out to MNRE that many RE Project Developers are in dilemma that on submission of aforesaid undertaking, they will have to relinquish their right to claim reimbursement under change-in-law provision under the PPA and MNRE was requested to provide clarity on this issue.

4. The aforesaid request has been examined in MNRE and following is hereby clarified:

   a) The time-extension given vide MNRE's OMs dated 12.05.2021 and 29.06.2021, referred at (i) and (ii) above respectively, is an out-of-contract concession extended by MNRE to facilitate Renewable Energy projects. This time-extension is optional and can be claimed by Renewable Energy Project Developers/ EPC

contractors provided they do not claim any increase in project cost on account of this time extension of 2.5 months. This increase in project cost includes any possible impact due to any change-in-law event which would not have been there had this optional time-extension was not claimed.

b) RE developers shall have the option of not claiming the time-extension as per MNRE's O.M.s dated 12.05.2021 and 29.06.2021 referred at (i) and (ii) above respectively, but approaching the appropriate forum as per their respective PPAs, for claiming appropriate time-extension as may be admissible.

5. These issues with the approval of Hon'ble Minister (NRE & Power).

2. The compliance of Commission's observations, for which Railway has given compliance in their compliance letter, must be ensured.
3. Railway shall expedite the process for construction of ROB for closure of LC No.7.
4. Railway shall process for replacement of 1 in 8.5 Turn-Outs by 1 in 12. 10 kmph speed restriction shall be ensured while negotiating 1 in 8.5 Turn-Out having straight switches.
5. Rly shall ensure that there is no infringement to IRSOD.
6. Dispensation shall be obtained under GR 3.04(1) & 3.47.
7. Arrangement shall be made to release Crank handle after a time delay of 120 sec., in case both the VDU becomes inoperative.
8. FAT, SAT, TSAA & OEM Certificates shall be submitted. SAT test shall be recorded in Data-logger.
9. All signaling gears status including Relay Room/Hut door closer switch shall be monitored and logged in Data logger with networking.
10. In terms of Railway Boards' letter no.2015/Sig/A/Fire/Pt dated 08.11.2016, 'Automatic fire detection and alarm system shall be provided.

10.5.21

Contd to Page-2

No. CRS/ER/ASN/TNW/EI/106 Date: 10.05.2021.

Contd from Page-1

11. A yard diagram showing Points and Signals with proper font size shall be displayed in front of SM to facilitate the on-duty Panel operator to manually operate the point in case both the VDU becomes defective.
12. A history sheet of changes in application logic from FAT to execution version need to be jointly signed by competent officers of OEM & Railways which shall be a part of completion drawings.
13. Visibility of newly erected signals shall be certified by 'signal sighting committee'. The actual visibility distance shall be mentioned.
14. All crew, Guards & Gatemen shall be adequately counselled regarding the change in Signalling system and the location of Signals and their assurance obtained.

मैं इस निर्माण कार्य के यात्रियों के परिवहन के लिये खोले जाने से पहले निरीक्ष्यण करने का इरादा नहीं रखता हूँ। जब कार्य पूरा हो जायेगा तब इसे संरक्षा प्रमाणपत्र के आधार पर खोला जा सकता है (अपने पत्र के तीसरे पैराग्राफ को देखने की कृपा करे), जो सीधे मेरे पास अबिलम्ब भेज दिया जाय। *I do not propose to inspect the work prior to its opening for the carriage of passengers, when ready, it may be opened on Safety Certificate (Vide paragraph 3 of your letter) which would be submitted to me direct without any delay*

ANNEXURE P/8H

Notes taken by Sr. DEE/TRD/ASN during Inspection of newly constructed OHE on Maithon Power Limited Siding taking-off with "Y"-connection from Taparagar & Mugma Stations on 18.08.2021.

The following observations were noticed during the Inspection :

1. All trees enroute which are situated near the OHE wire and can fall on it must be trimmed or cut to avoid any unforeseen OHE breakdown.
2. Anti-theft Jumpers have not been provided at so many locations and only 02 Nos. Anti-theft Jumpers have been provided instead of 03 Nos. at some locations. It has also been found that spacing of Anti-theft Jumper in the entire siding is not proper. Out of 03 Nos. of Anti-theft Jumpers, first Jumper should be provided within 1.5 mtrs from the catenary ending clamps of anchor location and balance two Jumpers should be provided at equal distance on the balance length of the span.
3. Bracket Tubes of cantilever assembly needs to be replaced by new one due to less projection at Loc. Nos. MPL-4/18, MPL-5/6, MPL-5/20 & MPL-8/19.
4. Balance weight Guide Tubes are missing at so many locations. It should be ensured to be there in straight form so that it can not obstruct its free movement and to avoid swinging of the balance weights.
5. OHE mast leaned at Loc. No. MPL-9/12 needs to be corrected or new mast to be provided.
6. Implantation of some OHE masts cross checked and found more than 2.50 mtrs against Standard Implantation of 2.36 mtrs for Siding Lines as per Rly. Board's L/No. 2002/RE/161/11 dtd. 10.08.2007. Implantation of the following masts in between Line Nos.- 2 & 3 inside MPL Plant measured as below.

Loc. No.	Front Implantation	Reverse Implantation
MPL-11/9	3.20 Mtrs.	2.65 Mtrs
MPL-11/10	3.19 Mtrs	2.65 Mtrs

7. Balance weights at some locations found in higher side and the X & Y values needs to be adjusted as per the Tension-Temperature Chart. Temperature marking at 5^0C, 35^0C & 55^0C is to be done on the face of all ATD masts.
8. Several balance weights in the section found rusted or not painted. All balance weights should be painted by two coats of Aluminium Paint.
9. SED parameters to be written on the face of all masts by Black Enamel Paint over Golden Yellow base Paint.
10. All types of missing bonds are to be provided and exposed Bonds should be provided all around two coats of paint to colour Grass Green, Shade-218 conformig to IS : 5 for protection against corrosion.
11. Duplicate earth connection needs to be provided on each traction rail at the In-Motion Weigh Bridge for continuity of traction rails as the rails of In-motion Weigh Bridge are isolated from the remaining system.

Sr. Divisional Electrical Engineer/TRD
Eastern Railway,
Asansol

Sub: Sanction of EIG for 25 KV AC 1-Phase charging of newly erected traction OHE on the following Lines of M/s Maithon Power Ltd. Siding (MPL) at Maithon taking off with 'Y' connection from Thapamagar & Mugma Stations in STN-PKA GC Section: (i) Line-1 from Loc-241/20A to 01/25 (1751.76 Mts.), (ii) Line-2 from 04/04 to 01/05 (697.05 Mts.), (iii) En99 Siding Line from Loc-1001 to 1009A (400.43 Mtrs.), (iv) JNC UP / DN Line from Loc-01/25 to 04/09 (1349.50 Mtrs.) (v) Mugma Siding Line from Loc- 03/01 to 03/24 (630.50 Mtrs.), (vi) MPL UP/DN Line from Loc-04/09 to 10/21 (6592.00 Mtrs.), (vii) RCD Line No.-1 from Loc-11/04 to 11/21 (819.00 Mtrs.), (viii) RCD Line No.-2 from Loc-11/01 to 12/16 (1323.00 Mtrs.), (ix) RCD Line No - 3 from Loc-10/21 to 12/15 (1355.00 (Mtrs.), (x) RCD Line No -4 from Loc-14/65 to 11/06 (977.50 Mtrs.), (xi) RCD Line No -5 from Loc-15/03 to 11/03 (882.00 Mtrs.), (xii) MGR Line No.-1 with Track Hopper from Loc-12/15 to 14/55 (2741.21 Mtrs.) & (xiii) MGR Line No.-2 from Loc-14/12 to 14/65 (603.89 Mtrs.) with 02 Nos. Auxiliary Transformers in Dist - Dhanbad, Jharkhand in Asansol Division of Eastern Railway [TKM 20.52]

Ref: Your letter No. ACOW/60/Pt-IV/257 dt. 16.08.2021.

Sanction is hereby accorded for 25 KV AC, 1-Phase energisation on regular measure of completed OHE of new Railway Siding at M/s Maithon Power Ltd. (MPL) at Maithon taking-off with 'Y'-connection from Thapamagar & Mugma Stations in STN-PKA GC Section with 02 Nos. Auxiliary Transformers of Asansol Division of Eastern Railway subject to the following conditions:-

1. Feeding arrangement for energisation on 25 KV AC shall be done as per write up duly signed by Sr.DEE/TRD/ASN.
2. Continuity and insulation resistance values of newly erected OHE shall be checked at the time of energisation and result to be sent to HQ.
3. Ensure Earthing & Bonding as per Code for Bonding & Earthing (Appendix II of ACTM Vol. II Pt. II). It should be done before energizing the OHE on 25 KV AC.
4. Energisation of the section shall be carried out as per relevant RDSO/ACTM/ Railway Board's instructions issued from time to time and taking all safety precautions accordingly.
5. After charging of OHE on 25 KV, information to this effect to be issued to all concerned.

JOINT NOTE OF LOCO TRAIL

TNW – MPL Siding Line

Place – TNW

Date – 03 – Sept – 2021

Joint note in connection with electric engine trial run on track for MPL siding line from Thaparnagar To MPL siding line inside plant including MGR via Hopper line on dated:- 03/09/2021

Engine No- Elect/L/Engg No.33179 WAG-9 HC, Kazipet

Loco Pilot:- Sri D .Hazara & Sri Arun Kumar- 4 Both ASN

ALP:- Sri Victor Ray/ASN

Time:- E/L/Engg No. 33179 Crossed from UP GC TNW To MPL line no. 1 at 14:05 HR

Arrived on line no. 3 inside plant at 15:00 HR, finally left plant at 17:25 & arrived MPL line no. 2 at TNW at 18:10 hr.

We the undersign on engine trial run on track from MPL siding line at TNW To MPL siding line inside plant including all 5 lines with MGR line via track hopper line inside plant & Eggg siding line at the maximum speed of 15 KMPH.

Observation from TRD side :-

1. ATJ not provided LOC MPL- 6/1, 5/12, 5/11, 4/16, — done
2. Out of run dropper not provided LOC MPL- 12/13 To 35, 13/70 To 69 — done
3. BKT insulator broken LOC MPL – 10/08 — done
4. STG adjustment required MPL- 1/14 (+45) MPL- 1/31 (+40), MPL- 2/05 (+45), MPL- 2/07 (+40) — done
5. CATENARY clip loose- LOC 11/08 To 56, 11/57 - 07 — done
6. Required anti wind- LOC MPL – 11/08 , 11/15, 11/18, 11/24, 11/27, 11/60 MPL – 15/39 To 37 — done
7. Contact Wire robbing LOC MPL- 11/60 - 62 — done
8. Contact Wire twist LOC MPL- 11/62 – 63 — done
9. AT jumper required set right LOC MPL – 11/59 — done
10. Switch jumper spark notice LOC MPL- 4/07 — done
11. All isolator power block working limit board not provided — done
12. Electric engine stop board at buffer end at engineering siding &unwired turnout caution board buffer line, at near girder Br/5, y-junction in-plant- Line-4 — done
13. Nomenclature plate for km post not provided from MPL 14/2A To 14/22 & also SED not marked on mast at same LOC — done.
14. Tree trimming required MPL- 3/25, engineering siding MPL- 13/6 To13/65 — done
15. Out of run prospering required at Loc- MPL-13/70 -69, MPL-12/33-35. — done

Observation from TI/GC side :-

1. Nomenclature plate not-available at home signal no. S/2 and starter sig no. S/5 of Y Junction cabin & also not available SH-113 inside plant — Completed
2. Facility for lighting arrangement to be provided at MPL siding lines at TNW & all 5 lines inside plant as not available — Shall be Completed by due co
3. One path way to be provided parallel to track at MPL siding lines at TNW & all 5 lines inside plant — shall be done as per feasibility
4. One path way is required beside bridge no. 5 over Khudia River. It will be very helpful at the time of any incident at this location MPL- 01/22 – MPL 01/25. — work done

03/9/21

5. Tipper dumper passing Location through track surface inside plant in between mast no. 12/09 To 12/10, 13/64 To 13/66 & just after exist of track hopper ch.km 14100 To 14200. the Location to be closed for safe train operation. — ~~Closed~~ Completed
6. All points & signals to be locked towards movement of track which is not fit inside plant (wharf line). — Completed

Observation from CLI side:-

1. Sharp Curve – throughout Section TNW -MPL siding. — As per drawing.
2. Throughout Gradient – 1 in 150 (15Kmph Section Speed). — As per Drawing
3. Stop Board – at Hopper — Completed
4. Siding interlocking gate in necessary (2nos – Near track hopper & Stn. Building) — Shall be maintained by deployed person dedicatedly 2x2
5. Check rail Heel Block Cleaning — Completed.
6. Turnout board to be provided at TNW — Completed.
7. TNW Engg. Siding Electric Stop Board to be provided. — Completed

Observation from SSE/P-WAY/KAO side :-

1. TNW – Sleeper at Platform to be removed — Completed
2. MPL – 0 / 11-13 / Miss Alignment — Completed
3. MPL - 0 / 13 -14 / Sag to attained. — Completed
4. MPL – 1/ 1-3 / Ballasting Required. Br 5
5. MPL –11-15 / Low Cess and Ballast required.
6. MPL – Curve No. 6 Outer side ballast to be Checked, if required to be rectified. — Completed
7. MPL – 3 / 24-25 Tree trimming is required. — Completed
8. MPL – 3 / 17-18 -Miss Alignment and Low cess, Cess to be repaired. — Junction
9. MPL – 5 / 8-11 – Cess repairing required. Completed
10. MPL – 5 / 12-15 - Cess repairing required.
11. MPL – 5 / 19 -21 – Jointing & Ballast required. —
12. MPL – 6 / 1-3 – Miss Alignment track — Completed
13. MPL – 6 / 7-17 – Low Cess - Less Ballast – Ballasting Required. —
14. MPL – 7 / 11 -15 – Transition of Curve to be / Versine to be checked / Cess Repair work. — Completed
15. MPL – 7 / 17 -21 – Cess repairing to be done.
16. MPL – 7 / 17 -28 – Cess repairing to be done / Ballast required.
17. MPL – 8 / 5-7 – Low cess and Less Ballast.
18. MPL – 8 / 17 -21 – Ballast deficiency.
19. MPL – Ch. 8100 to Ch.8500 – Low Cess & Repair work required.
20. MPL - 9 /9-18 –Check XL and track parameter. — Completed
21. MPL – 9 /21-13 –Unevenness & Sag found , to be rectified. Completed
22. MPL - 10 / Hywa LC gate - Check rail to be clean siding urgently. Completed
23. MPL - 10 / 18 -21 – Ballasting and Packing required.
24. MPL - 10 / 7-9 –Alignment to be checked. — Completed
25. In hopper line – Water logging to be clean and side drain required for avoid water logging. — done
26. MPL-13/13-15-Stone to be removed nearby track due land slide portion. — Completed shall be
27. Hopper Line and MPL-13/59-66-Water logging and required and drainage required. — ~~Completed~~
28. Trolley Refugee is not found throughout the section, it my advice to provide at at least at 200mtr interval apart. — Feasibility shall be explored Completed
29. Br.no.6 – Path way/Man refuge required to be provided. Feasibility
30. MPL – 13 /13-15 - Side slope failure (Stone) to be removed.
31. Gradient sign painted on concrete pillar was observed at following location from movements TNW To MPL
    1: 150 (Rise) LOC MPL – 04/13.

DY SSE/P-Way/KAO 03/09/21

CMI/P/KAO (CLI Side)

Approved

LOC MPL- 7/13 1: 235 (Rise)
1:200 (Rise) from MPL- 07/20
1:150 (Rise) MPL- 7/25.
1:150 MPL- 08/20.
1:215 (Rise) MPL- 09/14.
1:150 (Rise) MPL- 09/19

Conclusion,

All Observation should be rectified & to be verified from our side for safe movement of traffic, Engine trail Max Speed train is 10 to 15kmph found satisfactory.

Joint Note of Loco Trail TNW-MPL siding line Conducted on 03.09.2021

Dear Sir,

With reference to above subject and above references, we are here by submitting the status of observations mentioned in the Joint Inspection Note dt 03.09.2021 as per attached Annexure-I, wherein most of the observations have already been attended barring a few where we are evaluating the feasibility of the suggestions and its implementation.

We have also attached Joint Note: OHE/TRD Fit Certificate (MPL Siding) dt 18/09/2021 as per Annexure-II for your ready reference.

We request your kind review of the same and accord your acceptance.

Warm Regards,

From,
For Maithon Power Limited

11/10/2021
(Dinesh Gangwal)
Head-MPL Railway Project

JOINT NOTE

Ref: joint note dated 03/09/2021 in connection with electric engine trial run on track for MPL siding line from Thaparnager to MPL siding line inside plant including MGR via hopper line given MPL and L&T to comply .

We the undersigned on observation compliances given (as below) after engine trial run on 01/09/21 on track from Thaparnager siding line at Thapernager to MPL siding line inside plant including all five line with MGR line via track hopper return line.

Observation from TI/GC side:-

1. Nomenclature plate not available at home signal no. S/2 and starter sig no. S/5 of Y Junction cabin & also not available SH-113 inside plant -complied
2. Facility for lighting arrangement to be provided at MPL siding lines at TNW & all 5 lines inside plant as not available- not complied
3. One path way to be provided parallel to track at MPL siding lines at TNW & all 5 lines inside plant -Not complied .
4. One path way is required beside bridge no. 6 over Khudia River. It will be very helpful at the time of any incident at this location MPL- 01/22 – MPL 01/25.-Not complied
5. Tipper dumper passing Location through track surface inside plant in between mast no. 12/09 To 12/10, 13/64 To 13/66 & just after exist of track hopper ch.km 14100 To 14200. The Location to be closed for safe train operation-Compliance as below .
   I) Lifting barrier was provided at km12/09-12/10 But withought gate lodge . gate lodge to be provided and should be inter locked.
   II) Only sliding gate is provided at 13/64-66.Continer will be provided for manning. It should be interlocked.
   iii) Lifting barrier was provided at km14100 to 14200. The same will be closed permanently when train operation will start
6. All points & signals to be locked towards movement of track which is not fit inside plant (wharf line).Not complied.

Observation from CLI side:-

1. Sharp Curve – throughout Section TNW -MPL siding.-As per ESP
2. Throughout Gradient – 1 in 150 (15Kmph Section Speed).As per ESP
3. Stop Board – at Hopper-complied
4. Siding interlocking gate in necessary (2nos – Near track hopper & Stn. Building)
   I) Only sliding gate is provided at 13/64-66.Continer will be provided for manning. It should be interlocked.
   i) Lifting barrier was provided at km14100 to 14200. The same will be closed permanently when train operation will start
5. Check rail Heel Block Cleaning-complied will be done in regular basis.
6. Turnout board to be provided at TNW and inside plant-Not complied.
7. TNW Engg. Siding Electric Stop Board to be provided. Not complied.

Sub: Commissioning of MPL Siding (MMMT) – Migrating to "Gati Shakti Multi-Model Cargo Terminal (GCT Policy-2021)" and First Coal Rake Receipt.

Respected Sir,

Please accept our heartiest congratulations for commissioning of the very first private railway siding under the recently introduced "Gati Shakti Multi-Model Cargo Terminal (GCT Policy-2021)". Maithon Power Limited takes pride in becoming the first siding to get notified under GCT-2021 policy and successfully commissioning the siding with first rake receipt on 10th March 2022.

The commissioning of MPL siding has been made possible with joint effort of MPL project team and Asansol Division over the last few years and indeed is an event to be cherished for times to come. Henceforth, we will be able to receive coal on a sustainable and environment friendly manner, thereby contributing to the cause of reduction in carbon emission for our company and Nation at large.

Your gracious presence along with senior officers of Asansol Division during receipt of first Rake at MPL Siding (MMMT) on 10th March 2022 made it an even more joyous and memorable event for us.

We are thankful for all the support provided by Eastern Railway Kolkata & Asansol Division to achieve this milestone and look forward for continued association with Asansol Division and Eastern Railway.

Thanking You.

Yours faithfully,
For **Maithon Power Limited**

ANNEXURE P/8R

Minutes of the Meeting held on 24.11.21 with M/s MPL, regarding commissioning of Private siding at Thaparnagar station.

Members present:

Eastern Railway
1. Sri Arun Arora, GM
2. Sri U.K.Bal, PCOM
3. Sri S. Majumdar, PCCM
4. Sri P. N.Sharma, DRM/ASN (on VC)
5. Sri S. Biswas, CTPM
6. Sri R.Gupta, CE(P & D)
7. Sri A. Upadhyaya, Dy. CCM/FM

M/s MPL.
1. Sri R.Jha, CEO
2. Sri. D.K.Gongwal, Head/Rly.Project
3. Sri. S.H.Pandey, Chief OSMS

PCOM welcomed all the members present in the meeting and apprised them that the meeting has been convened for discussion on the issue of completion of pending works related to the commissioning of MPL siding at Thaparnagar/Mugma.

1. PCOM mentioned that, besides some maintenance job on the track, 11 major works have to be undertaken in Phase-I of which 9 no. of works have been completed and the other 2 works i.e.(i) provision of wagon Tippler & (ii) provision of another loop line at up side of Mugma station is still pending.

   He also mentioned that some observations related to track repairing and yard lighting, as mentioned in joint note, sent by the Division are yet to be complied by MPL.

2. DRM/ASN stated that connectivity of the siding from Mugma end has been recently established. He acknowledged that the deficiencies, as mentioned in joint note, are minor which could be complied within a very short time.

3. CEO/MPL mentioned that due to rocky soil, installation of Wagon Tippler at the in-plant yard could not be feasible. Arrangement has been made for unloading of BOXN wagons at the wharf, manually, in the in-plant yard. At present the coal rakes meant for power plant is being unloaded on wharf at Damagoria siding manually. By deputing additional manpower, BOXN rakes can be unloaded within scheduled time.

5. PCOM mentioned that there is a limited supply of BOBR rakes in the circuit while BOXN rakes are available for supply. Mostly BOXN rakes are being supplied in the power plants located in this Railway. There is no guarantee from Railway for supply of only BOBR rakes to the Power Plant.

(9)

6. MPL authorities present in the meeting mentioned that1500 trucks are regularly plying on the village road for supply of coal to the power plant and thereby creating pollution in the surrounding area. Villagers are protesting to stop it immediately.

7. CTPM asked about the undertaking given about construction of One loop line at Mugma station. On reply MPL authorities mentioned that earlier maximum quantity of coal linkage was scheduled from BCCL sources and small volume from ECL sources. But in the present scenario, coal rakes meant for the plant are all sourced from BCCL, so there is no need of the proposed loop at Up side of Mugma station.

8. General Manager was kind enough to address the meeting. He mentioned that there is no provision in the Policy framed by RB to issue provisional notification for opening the siding pending some works. In the instant case since Ph-II, Ph-III works are not coming in recent times, the siding may be opened once completion certificate for Ph-I works is issued by Division. He also mentioned that at present 7 hrs is needed for unloading of open wagons at Damagoria siding and 2hrs detention occurs in every rake beyond free time. In absence of Wagon Tippler, there will be huge demurrage charge for MPL to pay.

   He advised MPL authorities to write to DRM giving reasons for delay in completion of Ph-I work and also deviation from project report with proper justification. Division after examination of the issue, would forward it to HQ for getting dispensation of Railway Board. Once dispensation is issued from Railway Board, the issue will be suitably appreciated.

Sub: Commissioning of MPL Siding- Issue of Siding Notification

Ref:
1. Approval of ESP vide PCE/ER/KKK's Letter no. W (1)400/4/Maithon Right Bank/DPR dated-08/07/10
2. ER CFTM letter no. TW.535/439/Pt.II dated 05.02.18
3. Meeting at ER HQ on 24/11/2021 held at Kolkata

Dear Sir,

This is to inform you that 2x525 Power Plant has been set up by Maithon Power Limited (MPL), a Joint venture company between DVC & Tata Power. This power plant has been set up on the right bank of the river Barakar in the Nirsa-cum-chirkunda Block of Dhanbad district, Jharkhand at a road distance of about 7.5 KM North of GT Road and 9/10 Km North of Thaparnagar/Mugma Station (these Railway Stations are in Asansol Division under jurisdiction of Eastern Railway) on the Howrah-New Delhi Grand Chord line of Indian Railways. This is first Power Plant set up on Public Private partnership (PPP) model and both the units are commissioned and supplying power to WBPDCL, DVC, TPDDL & KSEB since commissioning of the plant in (Unit#1/Unit#2 in the year 2011 and 2012 respectively).

As per approved DPR and ESP/Drawings, work of Railway infrastructure has been taken up by the company in the year 2010 onwards primarily to complete the activities planned under Phase-I and shown in attached key plan. We have faced many challenges during the execution of the project mainly issues related to land acquisition wherein land has been acquired under the provision of linear acquisition by District Land acquisition officer (DLAO), Dhanbad (Jharkhand) and execution of licensing for Railway land for stage-I and Stage-II. Though notification has been issued by GoJ in 2008 and acquisition has been started by making necessary payments to identified awardees, many irregularities has been noticed in the process, for which MPL has approached Hon'ble High Court Ranchi (Jharkhand) in 2016 for review of awards and necessary changes in award made; same was implemented by District authorities in the year 2018-19 and further work on project has been taken up. In case of Railway land, licensing of land has been executed for Phase-I of stage-I in 2014 and Stage-II in 2017, activities has been taken up by the company in that portion of Railway line subsequently.

We extend our gratitude and sincere thanks to entire team of Eastern Railway Head Quarter and Asansol division for the support extend during the execution of the project and various checks/inspections for readiness of siding. Now entire stretch of Railway line as per Phase-I is ready for Operation (except

MPL
MAITHON POWER LIMITED

installation of Wagon Tippler & additional loop line at Mugma), awaiting Notification for siding for which a formal request has been submitted by the company.

Based on readiness of siding following checks/clearance has been obtained by the company:

Sl. No.	Description	Date of Completion	Remarks
1	CRS Sanction	10/05/2021	Ref CRS/ER/ASN/TNW/EI/106 dt 10.05.2021
2	Track Fitness Certificate	04/06/2021	
3	OHE Checking	18/08/2021	
4	Diesel Loco Trial	30/08/2021	
5	EIG Clearance & EOL Agreement	31/08/2021	
6	25 KV OHE Charging	01/09/2021	
7	Electric Loco Trial	03/09/2021	
8	Calibration of Inline Motion Weighbridge by Test wagon	16/09/2021	
9	Alpha Numeric Code & Siding Notification and Placement of Rake	Awaiting	

The Present status of Phase-I work scope is as below

Sl. No.	Scope Of Work	Present Status	Remarks
1	Y Connection at Thaparnagar	Completed	
2	Two (2) Loop lines at Thaparnagar	Completed	
3	New EI cabin at Thaparnagar	Completed	
4	Y Junction cabin on Pvt. Land	Completed	
5	Five (5) R&D lines in In-Plant-Yard	Completed	
6	Bulb arrangement in In-Plant-Yard	Completed	
7	1 Track Hopper	Completed	
8	1 Unloading Wharf for unloading BOX N wagon	Completed	
9	1 Wagon Tippler	Balance	Dispensation requested -Wharf arrangement has been made ready as per PCE's DRG no. D-13-2020 for Unloading of BOX N
10	Y Connection from Mugma end	Completed	
11	One Loop line at Mugma on Upside	Balance	Dispensation requested

It is evident from above tables for readiness checks for siding and status of work, the siding is ready for immediate operation and accordingly MPL has submitted request for issuance of Siding Notification to start

MPL
MAITHON POWER LIMITED

the receipt of Rake to meet its requirement of coal (approx. 4.2 Million MT/Year) and dispatch of Ash (having a potential of 2 Millon MT/Year). This will also provide Railway by way of Revenue through freight charges (approx. 160-200 Crs/year) through inward receipt of Coal and incremental revenue through outward movement of Ash (for which company has installed Two nos. of Bagging units near Ash Silo).

In this regard existing infrastructure has been Jointly checked by the division and minor maintenance issues were reported which were left unattended due to siding not in operation. We assure you to set right all the issues within next fortnight before the train operation starts. Thereafter a regular maintenance process will be undertaken by MPL for which necessary contract has already been placed and agency has been mobilized at site.

On getting the notification, we shall immediately start receipt of Rake directly to the plant (which is presently being done through Road mode since commissioning of Units) in a sustainable & environment friendly manner, which is crucial for the plant's continuous operation. We assure you that present infrastructure is ready to handle requisite rakes based on In-built redundancy to unload BOBRN Rakes in Track hopper and BOXN Rakes at Unloading Wharf.

Our humble request for issuance of Notification shall be considered on priority based on readiness of Railway Infrastructure of Phase-I as detailed above (except Wagon Tippler & Mugma Loop Line for which Dispensation is being requested).

Dispensation for Wagon Tippler & Mugma Loop line:

We also request for consideration of Dispensation for requirement of Wagon Tippler & Additional loop line at Mugma Station based on following:

Wagon Tippler:

MPL has prepared DPR at the time of inception of project after getting allocation of coal through CIL; wherein a total coal Quantity of 4.864 MT per annum for 2x525 MW units (MPL has also made provision of further expansion of plant by installing 2x660 MW units and accordingly land acquisition and other arrangement were made, in this case incremental coal requirement of 6.24 MT has been envisaged). However formal FSA with CIL's subsidiaries has been made, wherein FSA for 1.659 MT/Year coal supply was made with BCCL and 1.975 MT/Year was made with CCL, totaling 3.634 MT/Year under FSA and balance quantity is being procured under E-auction and other available options.

The present provision of Track hopper is designed for evacuation of coal@2000 MT/hr and ready to unload BOBRN Rakes & its immediate evacuation by stacking at stacker-reclaimer/coal Bunkers. Company has also made arrangement for unloading of BOXN Rakes at WHARF (same shall be used for unloading of coal and for dispatch of Ash from the plant), thus offering redundancy of handling of all types of Rakes in the plant.

In addition, as per present arrangement of coal receipt by Rake at Damagoria (and other nearby siding) shall be utilized till In-Plant operation of coal unloading at Track hopper and/or Wharf stabilizes.

MPL
MAITHON POWER LIMITED

In this regard MPL has already applied and permission has been received from CFTM vide letter TW.535/439/Pt.II dated 05.02.18 for construction of unloading Wharf for unloading of BOXN rakes.

So far as detention of rakes is concerned, we are presently able to unload rakes at Damagoria siding within 7 hrs. Normally the delay is on account of Bunching/Wharf not cleared by earlier unloaded coal due to transportation requirement of approx. 25 KM from Damagoria to MPL plant. When BOXN will be unloaded inside our plant, we will be able to clear Wharf and made it ready for receipt of next Rake.

With mixing of BOBRN rakes & BOXN rakes, the bunching problem will also be taken care of hence we are fully optimistic of rake unloading within 5 hrs of stipulated time.

However, if due to any unavoidable circumstances, any demurrage is applicable, MPL agrees to pay the same.

All the facilities required for unloading of rakes, redundancy of operations and other operational requirements has been made by the company, and installation of wagon tippler is not required and not possible at this juncture, we request Dispensation to the requirement of Wagon Tippler (which was part of DPR approved in 2010).

Mugma Loop Line:

In DPR, at Mugma Up loop line is proposed with the assumption that coal rakes are coming from ECL i.e. Mugma side; however after our Fuel Supply Agreement (FSA) was signed with BCCL and CCL which is valid till the year 2030 and 2032 respectively. So, we will be receiving our coal rakes only from Thaparnagar end. Even in future, Aforesaid FSA shall be extended with BCCL & CCL for ensuring coal supply for plant operation.

Therefore, the entire rake movement shall be on downside of Pradhankhunta to Sitarampur section. Hence, up loop line will not be required by MPL in future.

Therefore, the requirement of Mugma Up loop line may please be Dispensed with at present. In case in future it will be required for use of MPL, MPL agrees to undertake the works.

It is pertinent to mention that since the start of plant operation in 2011 onwards, coal requirement to the plant and disposal of Ash from the plant is being carried out through Road mode (due to non-availability of Railway Infrastructure) posing great risk to the plant's sustainable operation and hazards. Since plant has implemented the work scope required for operation of siding along with all the arrangement required for connectivity with Thaparnagar & Mugma Station and arrangement of coal unloading in Track hopper (for BOBRN Rakes) and at WHARF line (for BOXN Rakes), a formal Notification for Siding and Dispensation of above two requirements shall be considered.

MAITHON POWER LIMITED

Thanking You.

Yours faithfully,
For Maithon Power Limited

Ramesh Jha

Divisional Railway Manager's Office
Eastern Railway, Asansol

No.G/DRM/ASN/MPL/2021 Asansol, 3rd December,2021

Pr. Chief Operations Manager,
Eastern Railway, Kolkata.

Pr. Chief Commercial Manager,
Eastern Railway, Kolkata.

Sub: Commissioning of MPL siding.
Ref: i)MPL's letter No. MPL/FY22/21-11/015 dt 26.11.2021.
ii)Meeting at ER HQ on 24.11.2021
iii) This office letter No TPM/215/New Siding/2002 dt 3.11.21

As discussed in the meeting at Eastern Railway, Headquarter on 24.11.2021, CEO/MPL has requested the division for issue of notification clarifying various issues discussed during the meeting.

The details have been examined thoroughly and observations of division are as below:-

The present status of Phase-I work scope is as below:-

Sl.	Scope of Work	Present Status	Remarks
1.	Y Connection at Thaparnagar	Completed	
2.	Two (2) Loop lies at Thaparnagar	Completed	
3.	New EI cabin at Thaparnagar	Completed	
4.	Y junction cabin on Pvt. Land	Completed	
5.	Five(5) R&D lines in In-Plant Yard	Completed	
6.	Bulb arrangement In –Plant Yard.	Completed	
7.	1 Track Hopper	Completed	
8.	1 Unloading Wharf for unloading BOX N wagon	Completed	
9.	1 Wagon Tippler	Balance	Discussed in Para-a
10.	Y connection from Mugma end	Completed	
11.	One Loop line at Mugma on upside	Balance	Discussed in Para-b

Para (a) – 1 Wagon Tippler - M/s MPL have stated that the coal requirement has to be met by BCCL & CCL as per their Fuel Supply Agreement. As tied up with Dhanbad Division they are to get BOBR rakes having bottom discharge for which facilities have been created at MPL. BOX N rakes unloading facility has been created by a concrete wharf with manual unloading. MPL is also using Damagoria siding for unloading of BOX N rakes which they will continue to utilize for BOX N rakes for some time till the system of receiving coal inside the plant gets stabilized.

In view of this it is presumed that coal unloading inside the plant can be handled through BOBR rakes and if one or two rake of BOX N comes, that can be handled inside the plant or at Dmaggoria siding. Movement of rakes by the division will not be the problem. Hence the dispensation for not commissioning of wagon tippler may be considered.

Para (b)- **One Loop line at Mugma on upside-** As detailed and discussed that all coal rakes will be coming from Dhanbad and will be in down direction and will directly entered the plant premises from Thaparnagar in down direction. The empty rake can be exited from plant in up direction through Thaparnagar and in down direction from Mugma as both linking are completed. As there is no plan to get coal from ECL or any other sources coming from Sitarampur side, there will not be any need for holding the rake at Mugma for stabling of MPL. Therefore operationally the loop at this juncture is not needed until MPL started to gets coal from Sitarampur side.

The infrastructure inside the plant including track & OHE had been jointly checked and shortcomings noted have been communicated to MPL. MPL has communicated that they are takings steps for rectifying the deficiencies and hope to complete the work in 2 weeks. A joint check will again be conducted by the division with MPL authorities once the defects noticed have been rectified. This will be concluded before actual operation of train is done.

In view of above, the proposal of MPL for issue of notification may please be considered for enhancing rail share of freight and also expected back loading of fly ash from MPL. Issue of modification of approved DPR may please be dealt with appropriately.

P. Sharma

Sub: **Master Circular on 'Gati Shakti Multi-modal Cargo Terminal (GCT)'.**

Ref: (i) Private Siding Policy issued vide Freight Marketing Circular no. 11 of 2016 under Board's letter No. 99/TC(FM)/26/1/Pt. II dated 22.08.2016 and amendments thereof.
(ii) Master Circular on Private Freight Terminal (PFT)/2020/0. Dated 23.06.2020 and amendments thereof.

In order to boost investment from industry in development of additional terminals for handling rail cargos, a new 'Gati-Shakti Multi-modal Cargo Terminal (GCT)' policy has been framed.

All new as well as under-construction / under-approval Cargo Terminals (approved / proposed under 'Private Siding' or Private Freight Terminal policies) shall be covered by this 'Gati-Shakti Multi-Modal Cargo Terminal (GCT)' policy. Existing Siding / Terminals can also migrate to this new GCT policy by submitting request to Division.

Private Siding / Terminal which opt to migrate in GCT policy will need to sign a supplementary Agreement for this purpose. Private Siding / Terminal which do not opt to migrate in new GCT Policy, will continue to be governed by their existing Agreement.

The policy is in supersession of existing Private Siding Policy 2016 (FMC 11 of 2016) and Master Circular on Private Freight Terminal/2020 mentioned under references above.

This issues in consultation with Civil Engineering, Land and Amenities, Traffic Transportation, Mechanical Engineering and Signal Directorates, and with the concurrence of Finance Directorate of Ministry of Railways.

Sub: Policy for 'Gati Shakti Multi-Modal Cargo Terminal'

1. Introduction

1.1 This policy seeks to promote proliferation of new Cargo Terminals and improve existing Cargo Terminals to accelerate the growth in Railways' cargo traffic. All new as well as under-construction/ under-approval Cargo Terminals (approved/ proposed under 'Private Siding' or 'Private Freight Terminal' policies) shall be covered by this 'Gati Shakti Multi-Modal Cargo Terminal (GCT)' policy.

1.2 Existing Cargo Terminals, governed by Private Siding or Private Freight Terminal policies, shall have the option to continue with their existing Agreements, or to migrate to this new GCT policy.

1.2.1 Existing Cargo Terminals can migrate to this new GCT Policy by submitting a request to the Divisional Railway Manager (DRM) of the concerned Division of Railway, after clearing pending Railway dues and withdrawing all pending arbitration cases/ court cases, if any. The provisions of this Policy shall be applicable on such Cargo Terminals from the date the request is approved by the DRM.

1.2.2 Existing Cargo Terminal owners shall be allowed to migrate to this new GCT policy only when all pending Railway dues of all Cargo Terminals belonging to the same owner/ its subsidiaries/ parent company/ sister concerns over Indian Railways are cleared and all pending arbitration cases/ court cases over Indian Railways are withdrawn.

2. Definitions

2.1 The Key Terms used in these policy guidelines have been defined below for correct interpretation and elimination of ambiguities.

i. Act: The Railways Act, 1989, as amended from time to time.

ii. Agreement: Document executed by a Gati Shakti Multi-Modal Cargo Terminal Operator (GCTO) and Railway Administration (RA) setting forth the terms and conditions for operation of a Gati Shakti Multi-Modal Cargo Terminal (GCT).

iii. Authorized Users: Rail users authorized by the GCTO to make use of the facilities at a GCT.

iv. Benchmark Traffic: Traffic (inward plus outward, combined) expected to be handled per annum at Cargo Terminals established fully or partially on Railway land.

v. Cargo Terminal: Terminal where goods are loaded in wagons/ coaching vehicles for transportation over Indian Railway network, and/or unloaded from wagons/ coaching vehicles after being transported over Indian Railway network.

vi. Charging on Through Distance Basis: The system of charging freight up to the buffer end of the siding, instead of levying Siding Charges.

15.12.24

vii. Common User Facility: A facility available for common use of all Rail users without any discrimination including yards/ additional lines/ loop lines at the serving station, crossing station, patch doubling, etc.

viii. Consignee: The person named as consignee in Railway Receipt.

ix. Consignor: The person named in Railway Receipt as consignor, by whom or on whose behalf goods covered by the Railway Receipt are entrusted to a Railway Administration for carriage.

x. EIMWB: Electronic In-motion Weighbridge.

xi. FOIS: Freight Operations Information System.

xii. Gati Shakti Multi-Modal Cargo Terminal Operator (GCTO): The entity constructing and/or managing a Gati Shakti Multi-Modal Cargo Terminal (GCT).

xiii. Good Industry Practices: The practices, methods, techniques, designs, standards, skills, diligence, efficiency, reliability, and prudence which are generally and reasonably expected from a reasonably skilled and experienced operator engaged in the same type of undertaking as envisaged under this Policy, following applicable laws and applicable permits in reliable, safe, economical and efficient manner; and which are expected to result in fulfillment of obligations of operator under the Agreement.

xiv. Over Head Equipment (OHE): Infrastructure and equipment installed to provide electric traction.

xv. Private Freight Terminal (PFT): A terminal notified under Private Freight Terminal (PFT) policy of Indian Railways, to deal with rail-based cargo.

xvi. Private Siding: Privately owned siding constructed by a 'customer' at its own cost for railway cargo services at the premises of its plant, or manufacturing unit, or production unit, or mine, etc, connecting the customer's works with the Railway system.

xvii. 'Railway Administration (RA)' means Divisional Railway Manager (DRM) including Railways' Divisional officers, viz. Senior Divisional Operations Manager (Sr.DOM), Senior Divisional Commercial Manager (Sr.DCM), Senior Divisional Finance Manager (Sr.DFM), Senior Divisional Engineer (Sr.DEN), Senior Divisional Electrical Engineer (Sr.DEE), Senior Divisional Signaling & Telecommunication Engineer (Sr.DSTE), Senior Divisional Mechanical Engineer (Sr.DME), and their representatives.

xviii. Railway Land: Land owned by Railways.

xix. Railway Receipt (RR): The receipt issued by Railway Administration (under section 65 of The Railways Act, 1989) on acceptance of goods and which entitles the consignee to take delivery of the goods at the destination Rail Terminal.

15-12-21

xx. Rake: A train load of wagons with a prescribed composition.

xxi. Take-off point: The Stock Rail Joint of 'last point and crossing' at serving station, through which the rolling stock can be diverted towards a Cargo Terminal.

xxii. Terminal Access Charges: Charges levied by Railways on rail-customers for handling of ***privately-owned*** rakes at 'Railway goods-sheds' and 'Cargo Terminals fully or partially on Railway land' as per the Policy, at the rates prescribed by Railways.

xxiii. Terminal Charges: Charges levied by Railways on rail-customers for handling of ***railway-owned*** rakes at 'Railway goods-sheds' and 'Cargo Terminals fully or partially on Railway land' as well as on rakes at 'Cargo Terminals entirely on non-Railway land' as per the Policy, at the rates prescribed by Railways.

xxiv. TMS: Terminal Management System of FOIS.

3. **Eligibility for GCT Operators (GCTO)**

3.1 The categories of applicants permitted to set-up GCTs, as GCTO, shall be as under:

Category	***Supporting Documents*** *(self-attested copies to be submitted/ uploaded)*
a) Individual/ Sole Proprietorship Firm	1. PAN and TAN
b) Hindu Undivided Family (HUF)	1. PAN 2. Notarized Affidavit declaring that the signatory is the 'Karta' of the HUF and has the authority, power, and consent of other members
c) Partnership Firm	1. PAN and TAN 2. Notarized copy of the Partnership Deed/ Partnership Deed registered with the Registrar 3. Notarized or registered copy of Power of Attorney in favour of the individual to sign on behalf of, and to create liability against the firm
d) Company registered under Companies Act 2013	1. PAN and TAN 2. Memorandum of Association (MoA)/ Articles of Association (AoA) 3. Certificate of Incorporation 4. Notarized or registered copy of Power of Attorney in favour of individual to sign on behalf of, and to create liability against the company 5. Resolution of the Directors of the Company, permitting the company to set up and/or operate a GCT
e) Limited Liability Partnership (LLP)	1. PAN and TAN 2. LLP Agreement 3. Certificate of Incorporation 4. Notarized or registered copy of Power of Attorney in favour of individual to sign on behalf of, and to create liability against the

15.12.21

	LLP
f) Registered Society/ Registered Trust	1. PAN and TAN 2. Certificate of Registration 3. Memorandum of Association of Society/ Trust Deed 4. Rules & Regulations of the Society 5. Notarized or registered copy of Power of Attorney in favour of individual to sign on behalf of, and to create liability against the Society/ Trust
g) Joint venture (JV)/ Consortium	1. JV/ Consortium Agreement 2. Name and authorization of lead member (*Note:* On receipt of approval of Railway Administration for setting-up and/or operation of GCT, JV/Consortium shall have to convert into a legal entity – Firm/ Company/ LLP. Agreement shall be entered into by RA with the above legal entity only.)

4. **Application and Approval Process**

4.1 For the matters pertaining to GCTs, DRM of the concerned Division shall be the Nodal Officer for all issues regarding setting up and/or operation of a GCT. During approval and construction stage for setting up a new GCT, Sr.DOM shall be the co-ordinating officer; and after commissioning of the GCT, Sr.DCM shall be the co-ordinating officer.

4.2 The processing of Application and approval of GCTs shall be in accordance with the time-lines given in Schedules '1' & '2'.

5. **Capital Cost of GCT**

5.1 The GCTO shall bear the entire capital cost of new GCT from the take-off point onwards (to be marked on the Engineering Scale Plan (ESP)) at the serving station.

5.1.1 For the linear connectivity portion of GCT passing through the Railway land, including the land to be acquired by Railway for this purpose under para 17.2 of this policy, only the minimum essential infrastructure of track, OHE and signalling equipment shall be provided at the cost of GCTO (other assets not related to track, signalling, or OHE, if required, shall be constructed by Railway at its own cost). In case of any dispute, the decision of DRM shall be final in this regard.

5.1.2 The ownership of infrastructure including the track, signalling equipment and OHE created on Railway land under para 5.1.1 above shall belong to Railway, even though the capital cost for these shall be borne by the GCTO.

5.1.3 For migration of existing Terminals to this new policy, the GCTO will be required to transfer the ownership of assets (track, OHE and signalling equipment) created on Railway land to Railway free of cost. The cost of up-gradation of assets (if required) to the desired standards, at the time of transfer of ownership to Railway, shall also be borne by the GCTO.

5.2 The capital cost for all common-user traffic facilities (to be marked on the ESP) at the serving station, including Signalling & Telecommunication works,

15-12-21

modification and up-gradation to existing interlocking/ OHE, or electrification in future within the station limit up to take-off point, shall be borne by the Railway.

5.2.1 Zonal Railway shall ensure adequate availability of funds to ensure timely completion of common-user traffic facility works at the serving station, so that commissioning of GCTs is not delayed.

5.3 Maintenance and operation of assets created under para 5.2 above (common-user traffic facilities) at the serving station including staff costs, shall be the responsibility of the Railway.

5.4 The capital expenditure required for augmenting or up-grading the facilities and infrastructure on the connectivity portion from take-off point onwards towards Terminal and within the premises of Terminal shall be borne by the GCTO.

5.5 The connectivity to GCTs shall normally take-off from the existing serving station. However, in case when it is operationally not feasible to provide a connection from an existing serving station, provision of a Block Hut/ Block station (between two existing stations) with required points & crossings may be considered, provided it is operationally feasible. This will be done on the request of GCTO.

5.5.1 In such cases, the entire capital cost of the new Block Hut/ Block station and related infrastructure shall be borne by the GCTO. However, this work will be executed by Railway, and ownership of the same shall remain with the Railway.

5.5.2 However, for new GCTs planned to load one million Tonne or more (outward traffic) per annum, the capital cost of new Block Hut/ Block station will be repaid to the GCTO by Railway.

5.5.2.1 The repayment of capital cost of the new Block Hut/ Block station will be made by Railway through 10% rebate on the outward traffic loaded at the Terminal, till such time the capital cost has been repaid to the GCTO.

5.5.2.2 The repayment of capital cost will be done only if the Terminal achieves the target of loading one million Tonne per annum within two Calendar Years of commissioning (excluding the year of commissioning). For example, if a GCT commissioned during calendar year 2022 achieves one million Tonne loading during calendar year 2024, then the repayment of capital cost of new Block Hut/ Block station (through 10% rebate on outward traffic) shall start from 01st April 2025.

5.5.2.3 This repayment shall be made for the investment made by the GCTO on behalf of Railways. As such, this repayment through freight rebate shall be admissible over and above all other rebates that the GCTO may become eligible for in future.

5.5.2.4 This provision of repayment shall be applicable only for GCTs for which Agreement between RA and GCTO has not been entered into till the date of issue of this Policy.

15.12.21

5.5.3 The cost of operation and maintenance of such Block Hut/ Block station shall be borne by the Railway w.e.f. the date of issue of this policy. However, for existing Terminals (*where PFT/Private Siding Agreement has been entered into between RA and operator before the issue of this Policy*) where cost of operation and maintenance of such Block Huts/ Block stations has already been deposited by the GCTO, there shall be no refund. Further, dues of operation and maintenance cost of Block Hut/ Block station, if any, pending as on the date of issue of this policy shall be payable by GCTO.

6. Security of Assets

6.1 The responsibility of security of railway assets over Railway land shall be of Railways. However, the responsibility of security of railway assets outside Railway Land or on land licensed to GCTO shall be of GCTO.

6.1.1 In case of theft of any railway asset on non-Railway land or railway land licensed to GCTO, the maintenance of which is with Railway, the restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

6.1.2 In case of theft of OHE including OHE on non-Railway land or railway land licensed to GCTO, restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

7. Maintenance of Assets

7.1 Maintenance of assets on Railway land (excluding the Railway land licensed to GCTO), including Track and Signalling Equipment installed on Railway land under para 5.1.1, shall be done by Railway at its own cost.

7.2 Maintenance of OHE from the take-off point onward including inside the Terminal shall be done by Railway at its own cost – as this involves safety of men and equipment, and can also impact rail operations outside the Terminal boundary.

7.3 In addition to above, the maintenance of assets (track, bridges, signalling equipment, etc) on non-Railway land including the land licensed to GCTO, ***outside the Terminal***, may also be done by Railway at its own cost if the GCTO transfers the ownership of these assets to Railway (the ownership of land on which such assets are created shall however continue to be with GCTO). Provided further, this provision shall be applicable only to those GCTs where freight tariff is charged on 'through distance basis.'

7.3.1 In case maintenance of assets, including Track and Signalling Equipment, is being handed over to Railways on migration to this policy by GCTO, the GCTO will ensure that the standards of track and signalling infrastructure being transferred to Railway is in accordance with the prescribed standards for GCTs, as decided by Railways (Annexure 'D'). If any up-gradation/ replacement/ renewal of any infrastructure is required, the GCTO shall bear the cost for the same.

15-12-21

7.3.2 In case of damages to the assets due to accident, etc, the replacement shall be done by Railway. However, if the responsibility of accident, after Enquiry (joint enquiry by representatives of Railway as well as GCTO), is fixed on the GCTO – the GCTO shall have to bear the cost of all the replacements. The decision of the Nodal Officer, i.e. DRM, in this regard shall be final.

7.3.3 In case the damage to assets is due to an external cause (floods, breaches, terrorist activity, etc), the cost of restoration shall be borne by the GCTO.

7.3.4 If the GCTO does not agree to transfer the ownership of assets (track, bridges, signalling equipment, OHE, etc) to Railway or freight tariff is not chargeable 'on through distance basis'; the maintenance of these assets – except OHE – shall continue to be the responsibility of GCTO.

7.3.4.1 Railway shall be entitled to conduct periodic inspections of such GCTs being maintained by the GCTO, for which Inspection Charges will be levied as per the prescribed norms.

7.3.4.2 GCTO may also get the maintenance done through Railway for such Terminals, in which case Maintenance Charges shall also be levied as per the prescribed norms.

7.3.5 The maintenance of GCT yard, including loading/ unloading lines, shall be the sole responsibility of GCTO. Distribution of the responsibility of track has been explained in Schedule '3'.

7.3.6 At such GCTs, Railway shall maintain the signalling equipment till the line-clear/ receipt-despatch arrangement with serving station(s), at its own cost. Maintenance of signalling equipment internal to the Terminal shall be the sole responsibility of the GCTO.

7.4 The cost of all subsequent up-gradations (on account of change of technology, standards, etc) shall be borne by the GCTO.

7.5 Maintenance of all the infrastructure and equipment inside the GCT which are not to be accessed by Railways' rolling-stock, and maintenance of infrastructure required for loading/ unloading (tipplers, hoppers, etc) shall be the responsibility of GCTO.

7.6 Schedule '3' indicates the ownership and responsibility for maintenance of assets for a GCT.

8. **Cost of Electrification**

8.1 In case of new GCT, the entire cost of electrification of the Terminal and the connectivity portion between take off point and GCT, shall be borne by the GCTO.

8.2 While undertaking electrification of main line and serving station by Railways, the electrification of the existing GCT(s) including the rail-line connecting the Terminal(s) shall be undertaken at the Railway's cost.

9. **Handling of Wagons in GCTs:**

15.12.21

9.1 If any damage and deficiencies is caused to railway wagons due to the fault of the GCTO, the damage and deficiency charges shall be raised by Railway and paid by the GCTO as per the extant rules of Railways.

9.2 All tipplers and bulk handling systems used for loading/unloading of Railway wagons shall be provided and commissioned by GCTO at its own cost in accordance with the RDSO's approved specifications. This provision shall however not be applicable on the systems/ equipment installed by GCTO which are not to be used for handling Railway wagons (such as conveyor-belts, JCBs, excavators, etc).

9.2.1 GCTO shall ensure that tipplers, bulk handling systems, and mechanized equipment are operated only by the qualified and experienced staff under adequate supervision.

9.2.2 Such equipment shall be regularly maintained and replaced at the end of their codal life by GCTO at its own cost.

9.2.3 In case of any accident/ derailment inside the Terminal or outside the Terminal up to serving station, Railway will provide Accident Relief Train (ART) initially free of cost. Provided further, if the responsibility of accident/ derailment after enquiry is fixed on the GCTO, ART Charges shall be payable by GCTO as prescribed by Railway from time to time. The due Charges will be deducted from the future payments by Railway to GCTO. However, in case no regular payments are being made by Railway to GCTO, on demand from Railway, the GCTO shall pay ART Charges to Railway without any delay.

9.2.4 The accident enquiry as mentioned in para 9.2.3 above shall be conducted jointly by the representatives of Railway and GCTO to be nominated by DRM and GCTO respectively. The accepting authority of Enquiry Report shall be DRM, whose decision shall be final and binding on GCTO.

10. **C&W Maintenance Facilities**

10.1 Normally C&W facilities shall not be constructed at GCTs.

10.2 However, if C&W facilities are operationally required at any GCT as per the extant instructions, only one-time capital cost for setting-up these facilities shall be borne by the GCTO. Operational costs, including staff cost and material cost (for Railway-owned stock), shall however be borne by the Railway.

10.3 For GCTs dealing with POL and other hazardous material, specialized facilities inside the Terminal as well as in Railway yard (if required) shall be developed by the GCTO at its own cost, and shall be maintained by GCTO to ensure that no untoward incident/ accident takes place at such facilities.

11. **Authorized Users**

11.1 GCTO shall inform Railway about the authorized rail users of the GCT before notification, so that they may be incorporated in the TMS module of FOIS.

15.12.21

11.2 If the GCTO desires to add more rail users subsequently, GCTO shall inform Railway at least seven (07) working days in advance, to enable incorporation of such rail users in FOIS.

12. Commodities Permitted

12.1 Unless otherwise specified by Indian Railway, a GCT shall be permitted to book and handle all traffic – including coal and coke, which shall be as per the guidelines of 'preferential traffic schedule' issued by Ministry of Railways from time to time.

13. Engine-on-Load (EOL) Scheme

13.1 All new GCTs shall be set up on 'charging on through distance basis,' as per the instructions contained in Rates Master Circular on 'Freight on Through Distance Basis issued on 24.09.2014 (placed as Annexure 'A'), as modified from time to time.

13.2 All new GCTs charged on through distance basis shall be governed by the Engine-on-Load policy (FM Circular No.05 of 2013 dated 07.03.2013), as modified from time-to-time.

13.2.1 Railway may permit commissioning of a new GCT on non-EOL basis with the approval of DRM, if Engine-on-Load scheme is not operationally feasible.

14. Charging of Commercial Staff

14.1 No cost of commercial staff will be charged from the GCTO w.e.f the date of issue of this policy. However, for existing Terminals (*where PFT/ Private Siding Agreement has already entered into between RA and operator before the issue of this Policy*) where cost of commercial staff has already been deposited by the GCTO, there shall be no refund. Further, dues of commercial staff cost pending, if any, as on the date of issue of this policy shall be payable by GCTO.

15. Provision of Weighbridge

15.1 All GCTs planning to deal with outward cargo (loading) shall have a provision of Electronic In-motion Weighbridge (EIMWB) at a suitable location inside the Terminal. The EIMWB shall comply with OIML (International Organization of Legal Metrology) document (available at https://www.oiml.org/en/files/pdf r/r106-2-e12.pdf) and the latest RDSO specifications.

15.1.1 Provision of EIMWB shall not be essential for GCTs dealing with inward cargo (unloading) only.

15.1.2 If a GCT without an EIMWB plans to start loading, the GCTO shall make arrangement for provision of an EIMWB as per the provisions of the Policy. DRM, in consultation with CFTM of the Railway, may, however permit loading at a GCT (if operationally feasible) – by nominating an alternative Railway weighbridge for weighment of rakes, awaiting installation of EIMWB, for a period of up to six months at a time from the date of start of such loading, duly recording the reasons for the same.

15.12.21

15.2 GCTO shall bear the cost of procurement (inclusive of the requisite warranty and a post-warranty comprehensive Annual Maintenance Contract (AMC) till the end of codal life), installation, and replacement of the EIMWB at the end of its codal life. GCTO shall also bear the cost of weighbridge house, weighbridge siding, and related infrastructure.

15.3 GCTO shall get the weighbridge certified by the Weights & Measures department of the state government, and shall comply with all the applicable statutory and legal requirements.

15.3.1 The weighbridge, after testing and certification by the Weights and Measures department of the state government, shall be sealed by their personnel in presence of GCTO's and Railway's representatives. This seal shall be broken, if required, only in the presence of the personnel of Weights and Measures department and Railway's representative.

15.4 GCTO shall bear the cost of manpower to operate the EIMWB, and the cost for its linking with FOIS.

15.5 RR will be issued on the basis of weighment within a GCT as per the extant instructions provided vide Rates Master Circular/Weighment/2019/0 dated 25.07.2019 and other applicable instructions of Railways (enclosed as Annexure 'B'), as modified from time to time.

15.6 No extra free-time will be provided for weighment at an EIMWB inside a GCT.

15.7 A nominated Senior Section Engineer/Carriage & Wagon (SSE/C&W) shall conduct periodic inspections (once in a fortnight) of the weighbridge to ensure that it is being operated as per the prescribed norms and procedures. In addition, frequent joint inspection by Sr.DME/Carriage &Wagon and Sr.DCM, or by officers nominated by them, shall be conducted and inspection notes issued – preferably once in three months. These inspections shall be conducted to ensure that EIMWBs are being operated as per the prescribed norms and procedures, and shall not necessarily include testing of EIMWBs using test wagons.

15.7.1 DRM or Sr.DME/C&W or Sr.DCM may order surprise inspection or testing of any weighbridge to check for its proper functioning or calibration.

15.8 For the purpose of mandatory testing of EIMWB, test-wagons shall be provided by Railway on payment of Haulage Charges. These Haulage Charges shall be levied for the actual distance travelled or 100 km, whichever is less.

15.8.1 In cases where there is more than one weighbridge located within a GCT, the Haulage Charges as per para 15.8 above shall be levied for the 'first weighbridge,' and shall be levied @25% of the charges for the 'first weighbridge' for other weighbridges inside the Terminal.

15.8.2 For random surprise testing by Railway, test-wagons will be provided for without levying Haulage Charges or any other charges.

15.8.3 Railway shall try to ensure availability of 'test wagon-sets' in the vicinity of all GCTs, so that there is no delay in arranging these wagons for testing.

15-12-21

15.9 If any overloading is detected in the outward traffic the same will have to be unloaded/ re-adjusted at the Terminal itself – for which no extra free-time will be provided.

15.10 Whenever the EIMWB goes out of order, it shall be put right by the GCTO within three days, failing which a penalty of Rs 4,000/- per day or part thereof for the next ten days, and Rs 8,000/- per day or part thereof thereafter, shall be imposed.

15.11 Under exceptional circumstances, if it becomes essential to install the EIMWB of a GCT either partially or wholly on Railway land not licensed to GCTO (on account of operational and technical constraints), permission for the same may be given by the DRM. Location of such an EIMWB shall be decided by Sr.DOM, in consultation with Sr.DCM, Sr.DEN & Sr.DME.

15.11.1 All terms and conditions applicable on EIMWB inside a GCT shall also be applicable on an EIMWB installed by GCTO on such land. However, Railway will be the executing agency for installation, operation, and maintenance of such EIMWBs.

15.11.2 Cost of the comprehensive AMC and manpower to operate such EIMWB shall be borne by the GCTO.

15.11.3 Railway will be free to weigh rakes other than those of the concerned GCT at such EIMWB.

15.12 Railway may permit weight-o-meter/ pre-weighbin system of weighment in GCT on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager, keeping in view the requirement and to avoid any manipulation of weighment data.

15.12.1 Such equipment shall be certified by Weights & Measures department, and should also meet all extant statutory provisions and policy guidelines.

15.12.2 The system should have proper locking/ sealing arrangement to avoid any tampering with the system including software. The 'admin' control should rest with the Railways.

15.12.3 One-to-one correspondence between Weight-o-meter discharge and corresponding wagon shall be maintained by GCTO.

15.12.4 A procedure order for normal operations covering precautions to be taken to ensure that wagons are empty before loading and periodical test weighing of this system shall be maintained by GCTO.

15.12.5 The system should have interface with FOIS to avoid any error in data capture during transmission.

15.13 GCTO may also be permitted to install an alternative means of weighment of wagons, which should have accuracy level at least equal to that of EIMWB and should ensure weighment within the time taken by EIMWB.

15.13.1 GCTO shall submit request for such alternative means of weighment, along with all the necessary documents, which may be permitted by

15.12.21

Railway on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager.

15.13.2 GCTO shall be responsible for getting the proposed means of weighment of wagons certified by Legal Metrology/ Weights & Measures department, and also for ensuring its proper upkeep and maintenance at its own cost.

16. **Installation of FOIS and TMS**

16.1 FOIS and TMS with limited access as prescribed by Indian Railways shall be installed at the GCT – at the cost of GCTO. All RRs will be prepared through TMS. Complete maintenance of FOIS and TMS will be done by Railway at its own cost.

16.1.1 Cost of replacement of FOIS and TMS equipment, at the end of their codal life, shall be borne by the GCTO.

17. **General Conditions**

17.1 Applicant/ GCTO will be solely responsible for – (a) arranging/ acquiring/ ownership/ lease/ licensing of non-Railway land for the development of GCT; (b) all statutory and non-statutory clearances from other government departments and statutory bodies; and (c) payment of all charges, taxes/ GST, surcharges, cess, levies, etc, related to transportation and handling of cargo.

17.2 For GCTs being developed entirely on non-Railway land, the portion of land required for linear connectivity of GCT with the serving Railway station may be acquired by Railway Administration on the specific request of applicant/ GCTO and at the cost of the applicant/GCTO, under the 'Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013'/ 'The Railway Act, 1989'.

17.2.1 An estimate of the cost of the land, prepared by Railway Administration in consultation with the Land Acquisition Officer, will be presented to the applicant, who shall deposit the amount before any further action is initiated for the acquisition of land. The applicant shall also agree to pay on demand such excess cost, if any, as may be incurred for the acquisition of this land.

17.2.1.1 The applicant shall also agree to compensate Railway if any extra cost is incurred by Railway arising out of such acquisition, even after commissioning of the Terminal.

17.2.2 Ownership of the land so acquired will vest with Railway, and the applicant for the Terminal shall have no right or claim thereto.

17.2.3 The entire cost of Railway infrastructure to be developed on such portion of acquired land will be borne by the GCTO, however the ownership of assets so created on such land will rest with Railway. Railway will reserve the right to grant connectivity to other Gati Shakti Cargo Terminal(s) taking off from the track passing over this land.

15.12.21

17.3 Unless otherwise mentioned in this policy, all 'Commercial and Operating rules' as applicable for a goods-shed for booking, supply and delivery of goods shall be applicable at GCTs.

17.4 The GCTO shall be responsible for clearance of all Railway dues, including demurrage charges, accrued within the GCT.

17.5 The cost of electricity/ diesel consumed by Railway locomotives shall be borne by Railway.

17.6 The GCTO shall provide at his own cost the level-crossings and ROB/ RUB/ LHSs for safe passage of trains as well as road vehicles, as per requirement and prescribed norms.

17.6.1 All level-crossings have to be provided with requisite infrastructure (gate-post, gate-lodge, etc) and have to be manned by GCTO at its own cost.

17.6.1.1 If the level-crossing becomes due for interlocking, the cost of interlocking shall be borne by the GCTO.

17.6.2 Maintenance of level-crossings falling on the track being maintained by Railway shall be done by Railway at its own cost; while maintenance of level-crossings falling on the track being maintained by the GCTO shall be done by GCTO (as illustrated in Section III of Schedule '3').

17.7 Railway shall reserve the right to grant connectivity to another GCT(s) from the portion of track on Railway land as well as from the portion of track which is being maintained (and assets are owned) by Railway. For the sake of clarity, Railway may permit connectivity to another Terminal from the connectivity portion of a Terminal – (i) on Railway land where the assets are owned and maintained by Railway; and (ii) on non-Railway land where the ownership of assets has been transferred to Railway by the GCTO, and the assets are maintained by Railway though the land is owned by the GCTO. This provision shall be applicable on Railway land for all GCTs; and on non-Railway land for all new GCTs, as well as on existing Terminals who decide to migrate to this Policy and transfer the ownership of assets on their land to Railway.

18. Agreement

18.1 An Agreement for GCT shall be signed before the issue of commercial notification and operation of the GCT by Railway. Sr.DCM of the concerned Division shall be the signatory of the Agreement.

18.2 For existing Terminals migrating to this Policy, the period of Supplementary Agreement (to be signed as per the provisions of this Policy) shall be co-terminus with the existing Agreement.

19. Dispute Resolution

19.1 In case of any dispute arising in the interpretation of the Policy, the decision of DRM will be final and binding.

15.12.21

19.2 Conciliation: All disputes and differences of any kind whatsoever arising out of or in connection with the construction and operations of GCT shall be referred by the GCTO to Railway Administration through 'Notice of Dispute.' RA shall, within 30 days after receipt of the 'Notice of Dispute,' notify the name of conciliator(s) to the GCTO. The Conciliator(s) shall assist the parties to reach an amicable settlement in an independent and impartial manner within the terms of Agreement. If the parties reach agreement on a settlement of the dispute, they shall draw up and sign a written Settlement Agreement duly signed by Railway's representative (Sr.DCM), GCTO and conciliator(s). When the settlement agreement is signed, it shall be final and binding on the parties. The conciliators shall be paid fee as fixed by Ministry of Railways time to time, which shall be shared equally by the parties.

19.2.1 The parties shall not initiate, during the conciliation proceedings, any reference to arbitral or judicial proceedings in respect of a dispute that is the subject matter of the conciliation proceedings.

19.2.2 The conciliation shall be carried out as per 'The Arbitration and Conciliation Act, 1996' and the proceedings shall be terminated as per Section 76 of the above Act.

19.3 Arbitration: If the dispute is not settled through Conciliation (as mentioned in para 19.2), it shall be decided by reference to arbitration. Arbitration shall be carried out as per provisions available for arbitration in Indian Railways General Conditions of Contract 2020 for works contracts, as amended from time to time.

20. Termination of the Agreement

20.1 Subject to the provisions in the Agreement, Railway Administration may terminate the Agreement with a GCTO operating a GCT in the event of any serious irregularity committed by the GCTO. This may include any grave breach of the terms and conditions of the Agreement, any default by GCTO, violation of The Railway Act, 1989, or commission of an unlawful act which is not in-line with Good Industry Practices.

20.2 Before terminating the Agreement, RA shall first issue a Show Cause Notice, informing GCTO to submit representation within 30 days. If no response is received, or if the response of GCTO is not satisfactory, a written Notice of Termination specifying a grace period of 180 days shall be given to the GCTO, by Sr.DCM with the approval of DRM. However, if no reply to the Notice for Termination is received within 180 days of the issue of Notice for Termination, the Agreement with GCTO will stand terminated and the same shall be communicated by Sr.DCM to GCTO. No termination payment shall be made by RA to the GCTO.

20.2.1 If the GCTO submits a reply within 180 days, RA will take further course of action on the merit of the case.

20.3 The GCTO will also have the right to terminate the Agreement by giving a notice of 180 days to the Railway Administration in the event of any difficulty faced by the GCTO in smooth functioning of the Terminal for reasons attributable to

15.12.21

Railway as laid down in this policy, or for any other reason internal to the GCTO. No termination payment shall be asked by Railway from GCTO.

20.4 Any dispute arising out of this Agreement will be resolved through the Dispute Resolution Mechanism as prescribed under Para 19 of the Policy.

15.12.21

Schedule'1'

Approval Process for Gati Shakti Multi-Modal Cargo Terminal being set-up Entirely on Non-Railway Land

1. For granting approvals to the proposals for setting-up GCT(s) entirely on non-Railway land, there will a standing Committee at each Division, comprising of:

Chairperson:	DRM
Convener:	Sr.DOM
Members:	Sr.DCM
	Sr.DEN/Coordination
	Sr.DEE/Traction Distribution
	Sr.DSTE

The members of the above Committees shall be by designation and in absence of the incumbent, the officer looking after or the link officer shall discharge this function.

2. The applicant will be required to submit application to the DRM through on-line mode, along with Application Fee (non-refundable) of Rupees Twenty Thousand (Rs 20,000/-) only – either on-line or through a Demand Draft in favour of Sr.DFM of the concerned Division. The on-line application shall essentially contain the following details:

   2.1 Details of the applicant – Name and designation of the authorized personnel, along with the details mentioned in para 3.1 of the Policy

   2.2 Concept plan, duly indicating the location and sketch of the proposed Terminal and proposed connectivity with the serving station

   2.3 Traffic projection (including commodities, expected volume per year, expected number of rakes per year, and types of stock to be handled)

3. On receipt of the application, the officials of Engineering, Operating and Signalling departments will conduct a joint survey of the location, and will submit a feasibility report to the DRM, within fifteen (15) days.

4. If providing connectivity to the proposed Terminal is technically and operationally feasible (as per joint location survey), In-principle Approval (IPA) will be granted to the applicant with the approval of DRM – within twenty (20) days of the receipt of the application.

   4.1 The feasibility report shall also indicate the additional common-user traffic facilities required/ to be created at the station (on the basis of traffic projection), and inform the applicant for inclusion of the same in Engineering Scale Plan (ESP).

   4.2 If providing connectivity is technically and/or operationally not feasible, reasons for the same will be communicated to the applicant within twenty (20) days. Applicant can re-submit the proposal with suitable modifications without re-submitting the Application Fee.

5. Within four (04) weeks of the receipt of IPA, the applicant will submit details of the project along with Engineering Scale Plan (ESP) of the serving station/ new Block

15-12-21

Hut/ Block station to the DRM. Details of the project shall also be submitted on-line, which shall consist of:

5.1 Details of the ownership of land (if land is not owned by the applicant, lease-deed should be available)

5.2 Location and details of EIMWB (if required)

5.3 Details of the cargo handling mechanism inside the Terminal (manual, hopper, tippler, etc – as the case may be)

5.4 Standard Layout chosen for the Terminal

5.5 Alignment and L-section of connectivity line from take-off point to GCT including location of bridges, Low-height Subways (LHS), Level-crossings (LC), etc.

6. Various standard layouts will be provided by Railways, and the applicant will be free to choose any of these standard layouts as per his requirements. Applicant may also decide to adopt a different layout, for which the diagram will have to be uploaded on the on-line portal along with details of the project. (Standard layouts are provided as Annexure 'C' of this Policy.)

7. The Standing Committee at the Division will examine the proposed ESP and other details. If the ESP is found acceptable, it will be signed by all members of the Committee and forwarded to Headquarters office for approval of Chief Engineer/Planning & Design (CE/P&D), within two (02) weeks of its receipt.

7.1 If any shortcomings are noticed in the ESP, it will be communicated to the applicant within two (02) weeks for necessary corrections/ alterations. All the objections/ corrections will be communicated in a single instance to obviate the need for repeated corrections/ alterations.

8. ESP will require approval of CE/P&D only in the Zonal Headquarters. As soon as the approved ESP is received in Division office, the applicant will be accorded approval to commence the construction (as per the approved ESP) on submission of Security Deposit as per para 10 below.

9. **Departmental Charges –** No departmental charges will be levied on the applicant.

10. **Security Deposit –**The applicant will be required to submit a Security Deposit of Rs Ten (10) lakh only, which shall be refunded on the date of commercial notification of the GCT.

10.1 In case of non-fulfilment of certain conditions, necessary adjustment shall be made from the security deposit (if required), and the remaining amount shall be refunded.

11. Any changes in ESP, post-approval, shall be permitted only under unavoidable technical consideration, and shall require the approval of the CE/P&D of the Zonal Headquarters.

11.1 Any changes in ESP proposed by the applicant shall be processed as per para 7 & 8 of this Schedule.

15.12.21

12. After the ESP has been approved and the applicant has been given approval to commence construction of the Terminal, Railway will process for preparation and approval of Signalling Interlocking Plan (SIP) and relevant technical drawings (in consultation with the applicant). DRM and Sr.DOM (as Chairperson and Convenor of the Committee respectively) will ensure that this process is completed without any delay.

13. The Railway land to be used for providing connectivity to a GCT (on non-Railway land) shall not be licensed to the GCTO. This land shall remain in the possession and control of Railway, and the infrastructure (track, signalling equipment, and OHE) developed on this land, though funded and constructed by the GCTO, shall also be owned by Railway – as per the provisions of para 5.1.2 & 5.1.3 of this Policy.

    13.1 For the existing Terminals located on non-Railway land where Railway land has been licensed for providing connectivity, the existing Private Siding/ Private Freight Terminal Agreement in between the Operator and Railway shall be modified as per the provisions of this Policy.

14. If the applicant fails to commence construction within six (06) months of the grant of approval, or fails to complete the construction within twenty-four (24) months of the grant of approval, Railway reserves the right to put the approval in 'abeyance,' and reserves the right to approve connectivity for other GCT(s) on the same alignment.

    14.1 If the applicant approaches Railway for reviving the approval kept in 'abeyance,' the request will be considered keeping in view the other approvals granted by Railway in the intervening period. The decision on such a case will be communicated within fifteen (15) days of receipt of such request.

15. For GCTs being developed entirely on non-Railway land, Railway will levy Terminal Charges for each rake handled (as per the applicable guidelines), which will be reimbursed to the GCTO.

    15.1 No Terminal Charges shall be levied on cargo for which GCTO himself is the consignor and/or the consignee.

    15.2 No Terminal Access Charges will be levied for rakes of privately-owned wagons when handled at GCTs built entirely on non-Railway land.

15.12.21

Schedule '2'

Procedure for Gati Shakti Multi-Modal Cargo Terminals to be Set-up 'Entirely/ Partially' on Railway land

1. For setting-up new GCT(s) entirely on Railway land, Division(s) will identify spare-able land parcels, including the operational-cum-technical feasibility for setting-up GCT thereon and potential of traffic.

   1.1 On the basis of potential for traffic, Railway may also identify land parcels where GCT may be constructed partially on Railway land and partially on non-Railway land.

      1.1.1 Such land parcels (where GCT may be created partially on Railway land and partially on non-Railway land) may also be identified/ ear-marked on the basis of requests from prospective Operators, after inviting an Expressions-of-Interest.

2. Division will identify/ determine the minimum infrastructural facilities required at the Terminal on the basis of expected traffic.

   2.1 For GCTs to be developed entirely on Railway land, the size of land parcel should be sufficient for creation of the identified infrastructural facilities.

3. Selection of GCTO shall be made on the basis of open tender. In addition to the conditions mentioned in para 3 of this Policy, the eligibility for participating in tenders for GCTs on Railway land (entirely or partially) shall be as under:

   3.1 Applicant shall have at least two years' experience in manufacturing, transportation, or logistics and related business;

   3.2 Net worth of the applicant shall be at least fifty percent (50%) of the estimated cost of construction (as per the minimum infrastructural facilities determined by the Division);

   3.3 For GCTs planned to be developed partially on Railway land and partially on non-Railway land, the bidder should have acquired the right on land (of sufficient size) contiguous to identified land parcel – either through ownership, or through lease, or through consent-letter(s) from actual land-owner(s) duly indicating their willingness to provide land to the bidder in case the contract is awarded to him.

4. While inviting tender, Railway Administration will clearly specify restricted commodities, if any, which will not be permitted to be handles at the GCT.

5. The Tender Committee shall comprise Sr.DOM/Sr.DCM (convenor), Sr.DFM (finance member), and Sr.DEN (third member). DRM/ADRM shall be the Tender Accepting Authority.

6. Earnest Money for participation shall be 10% of the estimated project cost of the Terminal. For the successful bidder, this Earnest Money shall be converted into Performance Guarantee, while the Earnest Money for unsuccessful bidders shall be refunded.

15.12.21

6.1 The Performance Guarantee shall be refunded in full, six months after the commissioning of the Terminal – subject to clearance of all pending dues of Railway by the GCTO.

6.2 If the successful bidder fails to start or complete the construction of GCT within the stipulated time (including the extensions granted by Competent Authority, if any), the Earnest Money shall be forfeited; and the Railway land shall revert back to Railway on as-is-where-is basis.

7. Two-packet single-stage tendering system shall be adopted. In the first packet, bidders will be evaluated on the following criteria:

7.1 Whether the bidder fulfils the minimum eligibility conditions, as stipulated in para 3 above of this Schedule '2';

7.2 Whether the proposed plan (of GCT) fulfils the minimum infrastructural facilities decided by the Division (which shall be clearly defined by the Division while inviting tenders).

8. All the bidders who fulfil the above criteria shall qualify for opening of the second packet – the financial bid.

9. Bidders will be required to quote the percentage of Terminal Charges and Terminal Access Charges which they will claim from the Railway for all the traffic handled at the Terminal. Eligible bidder asking for the minimum share of Terminal Charges and Terminal Access Charges will be awarded the contract.

9.1 In case of two (or more) eligible bidders quoting the same percentage, contract will be awarded to the bidder planning to invest more capital in the project (as per the first packet).

9.2 In case the planned investment is also same for such bidders, decision to award the contract shall be taken through the draw of lots.

10. For GCTs established entirely or partially on Railway land, Railway will levy Terminal Charges and Terminal Access Charges similar to those being levied on Railway goods-sheds. These Terminal Charges and Terminal Access Charges will be shared with the GCTO according to the quoted bid percentage (as mentioned in para 9 above of this Schedule '2').

11. After issue of the Letter of Allotment, the procedure and time-lines – for submission and approval of ESP and other related activities – in accordance with Schedule'1' shall be followed.

12. Successful bidder shall commence construction within three (03) months of the grant of approval of construction, and complete construction within eighteen (18) months of the grant of approval. If the bidder fails to adhere to the prescribed time-lines, one extension may be granted with the approval of DRM, up to a maximum of three months – considering the merits of the case.

12.1 Under exceptional circumstances beyond the control of the bidder, DRM may grant a further extension of up to six months.

15-12-21

12.2 If the bidder fails to complete the construction even after the lapse of such extensions (para 12&12.1 above), the Agreement will be terminated and Performance Guarantee will be forfeited.

12.3 At the time of cancellation of the Agreement, the Railway land, along with the entire infrastructure developed on it by the bidder, shall revert back to Railway on as-is-where-is basis, without payment of any compensation.

13. The Railway land used for providing connectivity to the Terminal shall remain in possession of Railway, along with the entire infrastructure created on it (as per provisions of para 5.1.2 & 5.1.3 of this Policy).

14. Railway land where GCT is developed partially or wholly on railway land (except for Railway land provided for the connectivity to GCT as mentioned in para 13 of Schedule 1 & 2) will be licensed to GCTO – for which modalities of calculating and levying land license fee shall be as per extant rules/Board's circular on land licensing (2005/LML/18/8 dated 10.02.2005 and 08.6.2005, Annexure-E), as amended from time to time.

15. Responsibility for maintaining the track and signalling equipment shall be as per the provisions of para 7 of this Policy. Responsibility of maintaining loading/ unloading wharf(s), roads, drainage, etc, shall rest with the GCTO.

15.1 GCTO shall also be responsible to ensure that the entire infrastructure of Terminal is properly maintained and is duly upgraded/ replaced at the end of codal life, as per Good Industry Practices.

16. For GCTs constructed fully or partially on Railway land, the GCTO shall be expected to give at least the prescribed annual bench-mark of traffic (outward plus inward combined, in NTKM) to Railway, which shall be commensurate with the value of Railway land earmarked for GCT, as under:

Value of land (as per Schedule '4')	**Bench-mark Traffic** (in NTKM)
Up to Rs 10 crore	200 million
More than Rs 10 crore, &up to Rs 25 crore	500 million
More than Rs 25 crore, &up to Rs 50 crore	1,000 million
More than Rs 50 crore, &up to Rs 100 crore	2,000 million
More than Rs 100 crore	4,000 million

16.1 The Bench-mark Traffic shall be applicable from the Financial Year subsequent to the year of commissioning, and shall be revised at the time of each renewal/ extension of Land Licensing Agreement according to the revised value of land. For example, if a GCT has been commissioned during 2023-24, with the value of Railway land being Rs 20 crore – then the Bench-mark from the years 2024-25 onwards shall be 500 million NTKM. This Bench-mark Traffic shall be revised at the time of every renewal/ extension of Land Licensing Agreement.

15.12.21

16.2 If the GCTO achieves or surpasses the Bench-mark Traffic during any Financial Year, an incentive equal to 5% of the Land License Fee Charges (which be levied as per the provisions of para 14 of this Schedule '2') shall be granted for the next year. For the example given in para 16.1 above, if the GCTO achieves Bench-mark Traffic during 2025-26, then an incentive equal to 5% of Land License Fees (as per the provisions of para 14) shall be granted for the year 2026-27.

17. Subject to the provisions of para 14 of this Schedule '2', GCTO will be free to create infrastructure and/or to provide value-added services/ facilities (such as warehousing, processing, packaging, etc) provided that such infrastructure/ value-added services/ facilities, if created, shall be available to all users of the GCT without discrimination of any sort. GCTO will also have the authority for deciding the user charges/ fees for value-added services/ facilities as per market conditions – without any interference from Railway. However, the use of value-added services/ facilities will be optional and no customer will be forced to use those services or to pay for them. Such value-added services/ facilities shall conform to Good Industry Practices.

17.1 GCTO shall not sub-lease/ sub-license/ mortgage Railway land, and shall not create any third-party encumbrance on Railway land.

17.2 For any value-added service/ facility developed on Railway land, GCTO shall ensure that either the complete inward traffic or the complete outward traffic, for each commodity handled, is transported through Indian Railway system. Railway reserves the right to undertake any inspection of the Terminal to safeguard its interests and to direct the GCTO to discontinue such activities if such activities are detrimental to Railway's cargo business, failing which the Agreement may be terminated. For avoidance of doubt, such termination will be treated as default by the GCTO.

17.3 The responsibility of obtaining all statutory and environmental clearances for such value-added services, if required, shall rest solely with the GCTO. Any violation of statutory compliance will invite merit for termination clause of the Agreement on GCTO's default. Any liability/ default created by such violation will be the sole responsibility of the GCTO, and Railway will not be responsible for this.

18. GCTO shall use Railway land for activities related to Railway cargo business only. If the GCTO indulges in any commercial activity not related to Railway cargo business on Railway land or fail to adhere to the provisions of para 17, 17.1, 17.2 & 17.3 of this Schedule '2', the Agreement for GCT may be terminated without any compensation/ termination payment to the GCTO. For avoidance of doubt, such termination will be treated as default by the GCTO. In case of any dispute whether any activity is related to Railway cargo business or not, the decision of the nodal officer (i.e. DRM) shall be final and binding on the GCTO.

19. The GCT located completely or partially on Railway land will remain a common-user facility, and GCTO shall ensure non-discriminatory access for all rail-customers/ potential customers to such Terminals. The GCTO will not prevent any rail-customer/ potential customer from accessing the Terminal (provided the facilities for handling their cargo exists at the terminal). Road access to the GCT will not be blocked by the GCTO.

15-12-24

20. GCTO will have the permission to expand the Terminal further by acquiring/ leasing the adjacent non-Railway land. However, any such acquisition/ leasing of additional land will have to be managed by the GCTO through his own resources. Railway will not charge any Land License Fees for the additional land acquired by the GCTO.

    20.1 In such cases, the levy of Terminal Charges and Terminal Access Charges – and their sharing with the GCTO – will continue as before as per the decided principle.

21. Railway land shall be licensed to the GCTO and the GCT Agreement shall be signed for five (05) years, which shall be renewed/ extended in blocks of five (05) years at a time, up to maximum of 35 years, provided any of the provisions of the Agreement and/or Policy has not been violated by the GCTO. If the Agreement is not renewed, GCTO will be required to hand-over Railway land back to Railway along with the entire infrastructure created on it, on as-is-where-is basis and without any legal or financial liabilities on either side.

22. A joint team (comprising of Sr.DOM, Sr.DCM, Sr.DEN, Sr.DSTE & Sr.DEE/TRD) shall inspect the GCT at least once a year to ensure that there is no breach of Agreement or policy provisions by the GCTO. In addition, inspections may also be conducted by Railway officials as per the provisions of para 17.2 and 18 of Schedule '2' of this Policy. If any breach/ violation on part of the GCTO is detected during these inspections, Railway shall take action as per para 20 of the Policy.

15.12.21

Schedule '3'

I. Ownership and maintenance of assets for Gati Shakti Multi-Modal Cargo Terminals

(as per the provisions of para 5 &7 of the Policy; para 13 of Schedule '1' of the Policy; and para 13, 14, 15 of Schedule '2' of the Policy)

A) For Gati Shakti Cargo Terminals entirely on non-Railway land:

a. New Terminals:

Type/ location of asset	***Ownership and responsibility for maintenance***
Common-user traffic facilities at the station	*Ownership of land* – Railway *Ownership of assets* – Railway *Maintenance* – Railway
Connectivity portion on Railway land (*including the land acquired by Railway on behalf of TO, as per para 16.2 of the Policy*)	*Ownership of land* – Railway *Ownership of assets* – Railway (construction cost borne by GCTO) *Maintenance* – Railway*
Connectivity portion on non-Railway land	*Ownership of land* – GCTO *Ownership of assets* – Railway (construction cost borne by GCTO; ownership transfer to Railway) *Maintenance* – Railway*
Terminal yard, including loading/ unloading lines	*Ownership of land* – GCTO *Ownership of assets* – GCTO *Maintenance* – GCTO

b. Existing Terminals on migration to the new Policy:

Type/ location of asset	***Ownership and responsibility for maintenance***
Common-user traffic facilities at the station	*Ownership of land* – Railway *Ownership of assets* – Railway *Maintenance* – Railway
Connectivity portion on Railway land	*Ownership of land* – Railway *Ownership of assets* – Railway (construction cost borne by GCTO; upgraded by GCTO, and ownership transfer to Railway) *Maintenance* – Railway*
Connectivity portion on non-Railway land	*Ownership of land* – GCTO If ownership of assets transferred to Railway: *Ownership of assets* – Railway (construction cost borne by GCTO; upgraded by GCTO, and ownership transfer to Railway) *Maintenance* – Railway* If ownership of assets not transferred: *Ownership of assets* – GCTO *Maintenance* – GCTO
Terminal yard, including loading/ unloading lines	*Ownership of land* – GCTO *Ownership of assets* – GCTO *Maintenance* – GCTO

Rathi 15-12-21

B) *For Gati Shakti Cargo Terminals Fully or partially on Railway land:*

a. *New Terminals:*

Type/ location of asset	***Ownership and responsibility for maintenance***
Common-user traffic facilities at the station	*Ownership of land* – Railway *Ownership of assets* – Railway *Maintenance* – Railway
Connectivity portion on Railway land	*Ownership of land* – Railway *Ownership of assets* – Railway (construction cost borne by GCTO) *Maintenance* – Railway*
Terminal yard, including loading/ unloading lines	On Railway land: *Ownership of land* – Railway (Land License Fee applicable) *Ownership of assets* – GCTO *Maintenance* – GCTO On non-Railway land: *Ownership of land* – GCTO *Ownership of assets* – GCTO *Maintenance* – GCTO

b. *Existing Terminals (Sidings of PSUs on Railway land, and existing Assisted Sidings) on migration to the new Policy:*

Type/ location of asset	***Ownership and responsibility for maintenance***
Common-user traffic facilities at the station	*Ownership of land* – Railway *Ownership of assets* – Railway *Maintenance* – Railway
Connectivity portion on Railway land	*Ownership of land* – Railway *Ownership of assets* – Railway (construction cost borne by GCTO; upgraded by GCTO, and ownership transfer to Railway) *Maintenance* – Railway*
Terminal yard, including loading/ unloading lines	On Railway land: *Ownership of land* – Railway (Land License Fee/ Land Lease Charges applicable, as per the License/ Lease Agreement prevailing before migration to this new Policy) *Ownership of assets* – GCTO *Maintenance* – GCTO On non-Railway land: *Ownership of land* – GCTO *Ownership of assets* – GCTO *Maintenance* – GCTO

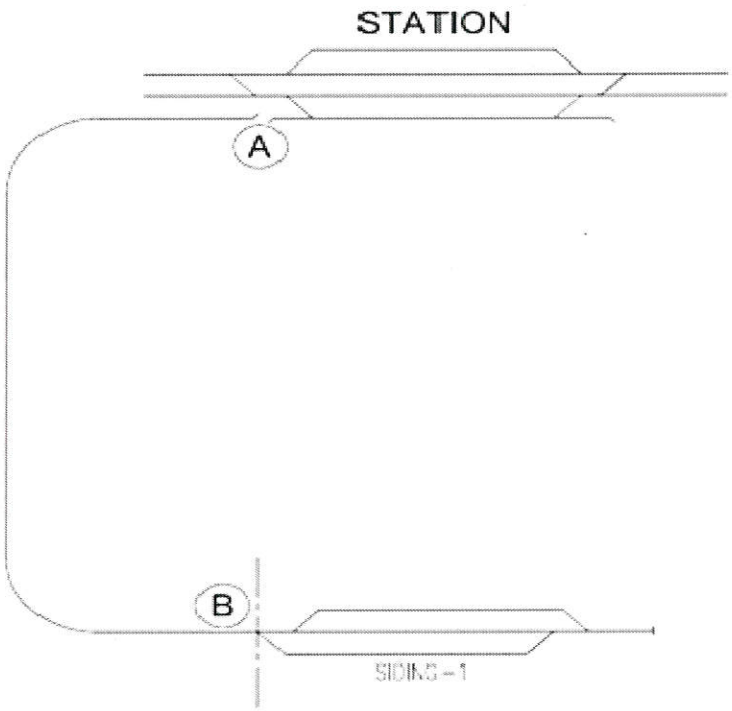
Notes: (1) Railway reserves the right to grant connectivity to other GCT(s) from the connectivity portion, where assets are owned and maintained by Railway (marked with '*' in above tables).

(2) For the sake of clarity, the distribution of responsibility for maintenance is explained in the illustrations provided in Section II of this Schedule.

15.12.21

II. Distribution of the responsibility of maintenance of assets

Illustration-1:



Single Gati Shakti Cargo Terminal taking-off from a serving station

'A' – Take-off point

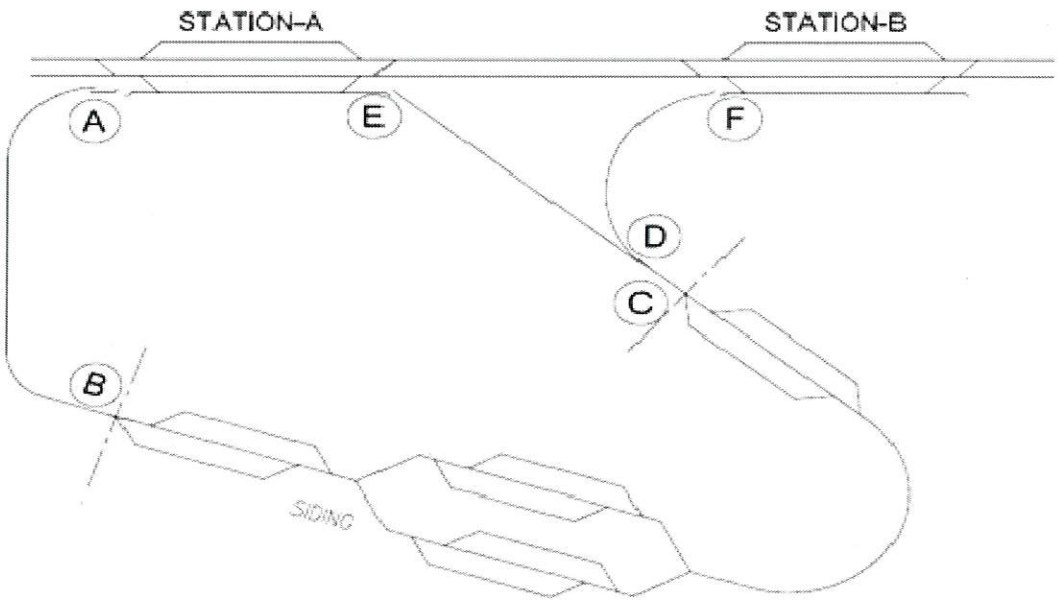
'B' – Starting point of the yard (of Terminal)

section A–B: To be maintained by Railway

beyond B: To be maintained by GCTO

15-12-24

Illustration-2:



Single Gati Shakti Cargo Terminal connected to two stations, with a Y-connection

'A' & 'E' – Take-off points from first station

'F' – Take-off point from second station

'B' – Starting point of the yard (of Terminal)

'C' – End point of the yard (of Terminal)

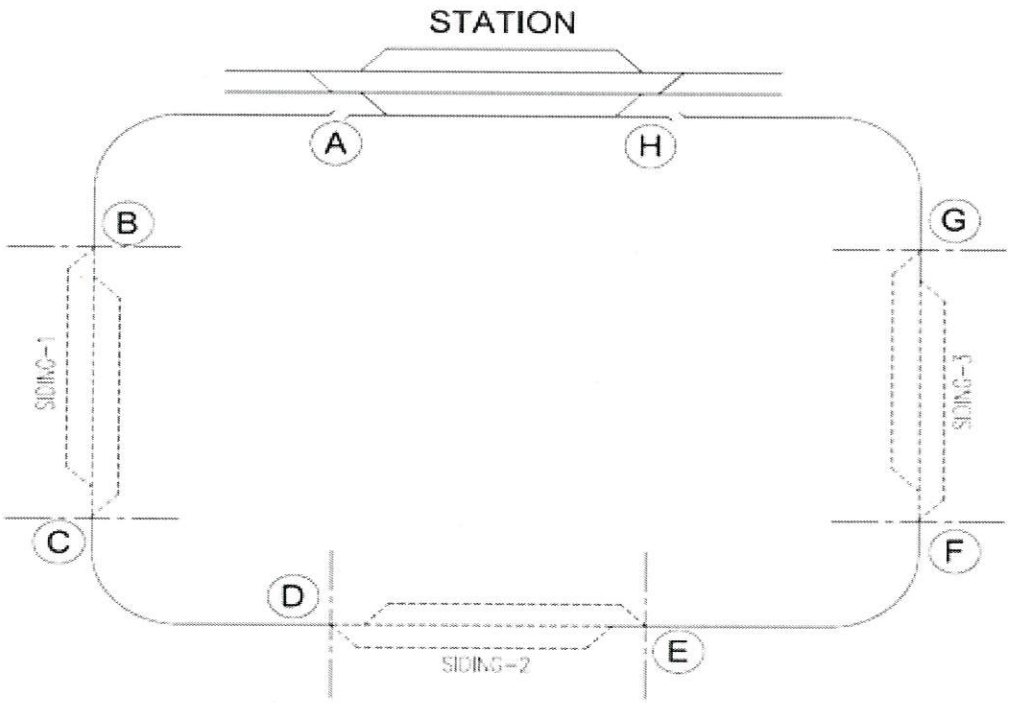
'D–F' – 'Y'-connection

sections A–B, C–D–E, & D–F: To be maintained by Railway

section B–C: To be maintained by GCTO

15.12.24

Illustration-3:



Multiple Gati Shakti Cargo Terminals connected sequentially from a station (or to two stations)

'A–B', 'C–D', 'E–F', & 'G–H' – Track sections providing connectivity

'B–C' – Yard of Siding-1

'D–E' – Yard of Siding-2

'F–G' – Yard of Siding-3

sections A–B, C–D, E–F, &G–H: To be maintained by Railway

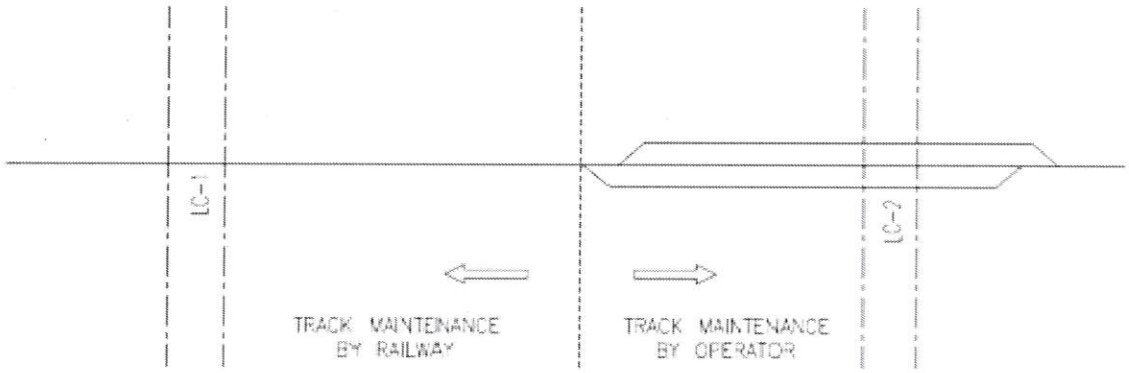
section B–C: To be maintained by first GCTO

section D–E: To be maintained by second GCTO

section F–G: To be maintained by third GCTO

15.12.21

III. Allocation of responsibility for maintenance of level-crossing (as per provisions of para 17.6 of the Policy)



Level Crossing-1 (LC-1): on the track being maintained by Railway

Responsibility for maintenance: with Railway

Responsibility for manning: with GCTO

Level Crossing-2 (LC-2): on the track being maintained by the GCTO

Responsibility for maintenance: with GCTO

Responsibility for manning: with GCTO

15.12.21

Annexure –A

GOVERNMENT OF INDIA/BHARAT SARKAR
MINISTRY OF RAILWAYS/RAIL MANTRALAYA
(RAILWAY BOARD)

No.TC-I/2014/214/3 **New Delhi, dt. 24.09.2014**

General Manager
All Zonal Railways

Sub: System of Charging Freight on Through Distance Basis in case of sidings

Ref: Board's letters/Circulars under reference:

1	No.TC-I/87/214/2 dt.13.03.1987
2	No.TC-I/87/214/2 dt.13.04.1987

11	No.2007/TC-1/302/1Pt.E dt.23.06.2010
12	No.TCR/2043/2008/3 dt.10.08.2009

The guidelines regarding system of charging freight on through distance basis are stipulated in various Board's letters/Rates Circulars as mentioned above. It has been decided to issue a Rates Master Circular on the subject by duly consolidating all guidelines.

Accordingly, the relevant provisions figuring in the above mentioned Board's letters/circulars have been drawn out and consolidated guidelines on the subject matter are enclosed herewith. All other provisions of the above-mentioned Board's letters/Rates Circulars (and as amended from time to time) holds good.

This issues with the concurrence of Finance Dte. of Ministry of Railways.

(Aashima Mehrotra)
Director, Traffic Commercial(Rates)
Railway Board

Sub: Charging Freight on Through Distance Basis in case of sidings

1.0 Applicability

1.1 The system of charging freight on through distance basis shall be extended to all block rakes going into the siding directly or indirectly with the engine pulling or pushing, provided (a) there is no detention to engines except for change of ends and (b) no separate shunting staff is required exclusively for this purpose.

(refer Board's letters No.TC-I/87/214/14 dt.21.10.1993 and No.TC-I/99/214/11 dt.09.05.2003)

1.2 The system of charging freight on through distance basis is also permitted in case a rake originate from or terminate in the exchange/peripheral yard provided by the siding holder, subject to fulfillment of criteria (a) & (b) of Para 1.1 above. Railway will notify such sidings/yards as 'independent booking points' based on the afore-mentioned criteria.

(refer Board's letter No.TC-I/87/214/2 dt.01.05.1987 and Board's letter No.TC-I/87/214/14 dt.21.10.1993)

1.3 'Block Rake', used herein, is a generic term implying a rake which moves as a train from an originating station to the destination station without any re-marshalling of wagons during the journey except for detaching sick wagons. Block rake will also include a rake loaded from one originating station/point to a combination of two or three destination points or a rake loaded from a combination of two originating points to a single destination.

(refer Board's letters No.TCR/1644/2002/2 dt.10.03.2003 and No.TC-I/99/214/11 dt.09.05.2003)

1.4 So long as a rake originates/terminates from/to an independent booking point, freight charges may be levied on through distance basis irrespective of whether reception/dispatch is done on signals or without signals.

(refer Board's letter No.TC-I/87/214/2 dt.15.05.1987)

1.5 In cases where one or more wagons originally forming a part of a rake charged on through distance basis to independent booking point, get detached and are received at the destination separately in the siding/yard as piecemeal, Siding Charge should not be levied for such wagons.

(refer Board's letter No.TC-I/87/214/14 dt.21.10.1993)

15.12.14

1.6 System of charging freight on through distance is also allowed in following situations:

(a) When empties which are brought to the serving station are dropped at the serving station and the power is used for other work and the empties are subsequently sent into the siding by some other power.

(b) Loads cleared from the siding by one power upto the serving station are stabled at the serving station and the power is used for clearance of some other loads and thereafter another engine comes and clears the stock (brought from the siding) towards destination station.

(refer Board's letter No.TC-I/87/214/2 dt.01.02.1994)

2.0 Non-applicability:

The system of charging freight on through distance basis is not allowed in following situations:

(a) When inward rake coming on electric power upto the serving station are subsequently taken by diesel power into the siding

(b) When outward rake moved by diesel power upto the serving station from the siding are subsequently moved by electric power.

(c) In case of piecemeal traffic, which are other than block rakes.

(refer Board's letters No.TC-I/87/214/2 dt.01.02.1994 and No.TC-I/99/214/11 dt.09.05.2003)

3.0 Calculation of Freight

3.1 Freight for a block rake shall be calculated on through distance basis at either trainload or wagonload class rate, as the case may be. Trainload class rate is granted if trainload class rate is notified for the commodity and the governing conditions are fulfilled.

(refer Board's letter No.TC-I/99/214/11 dt.20.02.2001 and No.TC-I/99/214/11 dt.09.05.2003)

3.2 In case of piecemeal traffic to siding notified as independent booking point, the chargeable freight is the freight for distance from/to the serving station plus Siding Charge computed on the basis of average trip time and All India Shunting/Train Engine Hour Cost.

(refer Board's letters No.TC-I/98/214/4 dt.28.04.1999)

4.0 Methodology for calculation of distance

4.1 The distance will be notified without reference to the serving station. However, while calculating the distance, the distance upto the buffer end/farthest point of the siding/exchange yard/peripheral yard should be taken into account.

(refer Board's letter No.TC-I/87/214/14 dt.21.10.1993)

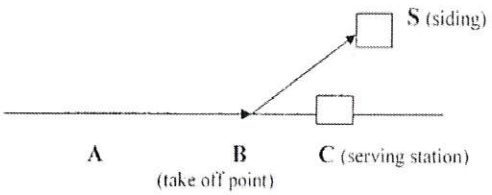
4.2 Where identifiable buffer end is not available, freight charges are to be levied upto the farthest point of the yard/siding.

(refer Board's letter No.TC-I/87/214/2 dt.13.04.1987)

4.3 Chargeable distance would be calculated in terms of Rule 125 of Goods Tariff. However, calculation of chargeable distance from the siding to the take off point or vice versa should be on the basis of actual pattern of movement and not with reference to the serving station concept (refer Illustrations given below). The chargeable distance based on this methodology for such sidings may be notified in the Rates Branch System (RBS) for correct charging of freight.

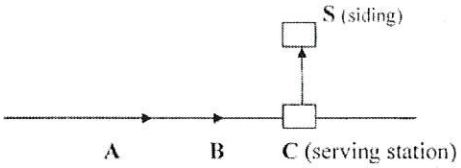
(refer Board's letter TC-I/98/214/4 dt.28.04.1999 and No.TCR/2043/2008/3 dt.10.08.2009)

Illustration No.1



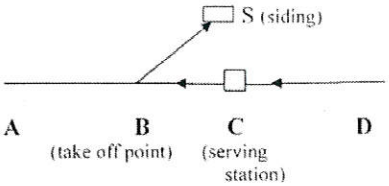
In this case traffic is coming from side A which is a local or junction station. C is the serving station and the B is the take off point lying between A and C. Traffic goes to the siding S without being dealt with at serving station C. In this case, the chargeable distance will be equal to distance upto A plus distances from A to B and from B to S. Distance upto A may be calculated from junction/local distance table and from A to B & B to S may be calculated in consultation with Civil Engineering Department.

Illustration No.2



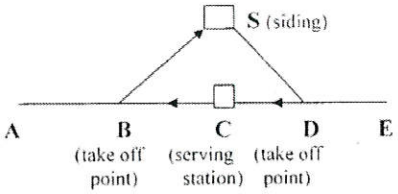
In this case, traffic coming from side A and goes to siding S via the serving station C without being dealt at C. In this case, chargeable distance will be equal to distance upto serving station plus distance from station C to siding S.

Illustration No.3



The traffic coming from side D which is a junction station passes through serving station C and goes to siding via B, the take off point. The chargeable distance will be equal to distance upto C plus distances from C to B and from B to siding S.

Illustration No.4

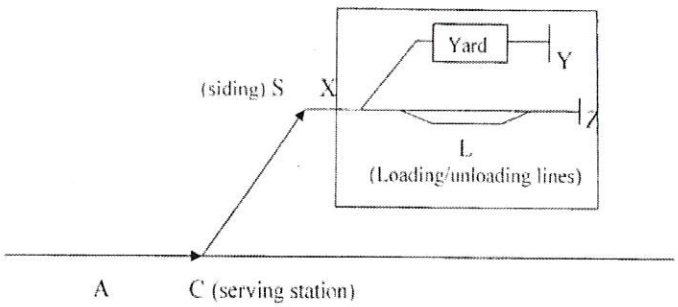


In this case, traffic is coming from station E and B & D are two take off points on both side of the serving station C. However, if due to some problem in DS route for which siding owner is responsible, the traffic goes via C and B to siding S, the chargeable distance will be equal to distance upto E plus distances from E to C, C to B and B to S. However, if the route

DS is closed due to Railway's problem, the chargeable distance will be equal to distance upto E plus distances from E to D and D to siding S.

Illustration No.5

Case: If a rake cannot be placed directly on loading/unloading lines due to restrictions in movement of loco in sidings (for instance, those dealing with POL and container traffic) and the rake is moved to a yard first and then after engine reversal, the rake is pulled back for placement in the siding.



L denotes loading/unloading lines, Y is the buffer end of yard, X is common entry point for both yard & loading/unloading lines and Z is buffer end of siding.

In this case, traffic is coming from side A and goes to siding S via serving station C without being dealt with at C. As the rake cannot be placed directly on loading/unloading lines, the rake coming from serving station is taken to the yard first, then engine is reversed and pulled beyond entry point for placement on loading/unloading lines. Here, the rake had to travel extra distance from the entry point to the yard and back. Here, the chargeable distance will be equal to distance upto serving station C plus distances from C to X and X to Z plus twice the distance between X and Y.

5.0 Accountal of traffic:

Once a siding has been declared as an independent booking point, accountal of both trainload traffic and piecemeal traffic can be done there.

(refer Board's letter No.TC-I/87/214/2 dt.15.05.1987)

Sub: Exemption from mandatory weighment(100%) in case of HR/CR Sheet and other steel consignment
Ref: Rates Master Circular/Weighment/2019/0 and amendments thereto

One of the Zonal Railways has requested to permit exemption from mandatory weighment(100%) in case of HR/CR Sheet and other Steel consignment which are weighed on certified Mil-Scale even if they do not bear any marking of Central Excise and/or Customs Deptt. as permitted in case of HR/CR coil.

The matter has been examined and it has been decided to permit exemption from mandatory weighment(100%) in case of HR/CR Sheet and other Steel consignment which are weighed on certified Mil-Scale, by modifying second sub-para of Para 3.2 of Rates Master Circular/Weighment/2019/0, as under:

Existing Guidelines	Revised Guidelines
However, HR Coil and CR coil consignments weighed on certified Mill-scale even if they do not bear any marking of Central Excise and/or Customs Deptt., need not be subject to mandatory 100% weighment at EIMWBs only when they are loaded as a pure rake of HR coil or CR coil or mixed rake of HR coil and CR coil provided that weight of the consignment is stenciled on each coil and it also bears a label with remarks *"Weighed on the Mill Scales certified by the Weights and Measures Department which is accepted for the SRP(Self Removal Procedure) by Central Excise and/or Customs Deptt. and all the statutory purposes"*. The label	However, HR Coil, CR Coil, HR Sheet, CR Sheet and other steel consignment weighed on certified Mill-scale, even if they do not bear any marking of Central Excise and/or Customs Deptt., need not be subject to mandatory (100%) weighment at EIMWBs when they are loaded with above-mentioned commodity as a pure rake or mixed rake, provided that weight of the consignment is stenciled on each coil/sheet/steel consignment and it also bears a label with remarks *"Weighed on the Mill Scales certified by the Weights and Measures Department which is accepted for the SRP(Self Removal Procedure) by Central Excise and/or Customs Deptt. and all the statutory purposes"*. The label should bear the name of company,

Sub: Detention Charge and Punitive Charge
Ref: Rates Master Circular/Weighment/2019/0

Please refer to Para 4.3.3(iii) of Rates Master Circular/Weighment/2019/0 regarding Detention Charge and Punitive Charge.

2. The matter has been reviewed and it has been decided to revise the guidelines regarding Detention Charge and Punitive Charge, as given below-

Condition	**Weighment on weighbridge at originating point** (associate weighbridge located at loading point itself or serving station of the siding)	**Weighment on weighbridge at other than originating point** (associate weighbridge/alternate associate weighbridge not located at loading point itself or serving station of siding; en-route weighbridge; weighbridge at destination point)
EXISTING GUIDELINES	Detention Charge @Rs.5000/- for 'each overloaded wagon'	Detention Charge @Rs.5000/- for each overloaded wagon is <u>not</u> leviable.
REVISED GUIDELINES	Detention Charge @Rs.5000/- for overloaded wagon is <u>not</u> leviable.	**No change**
EXISTING GUIDELINES	<u>Punitive charge</u> No punitive charge is leviable if the customer carries out load adjustment at the originating station itself.	<u>Punitive Charge</u> Punitive Charge for overloading should be levied for the entire distance to be travelled by the train hauling the wagon from the originating station to the destination point, irrespective of the point of load adjustment.

16.09.20

16.09.2020

15.12.2

REVISED GUIDELINES	**No change**	Punitive Charge On detection of overloading at other than originating point, if customer carries out load adjustment at such point, Punitive Charge shall be levied for the distance travelled by the train hauling the wagon from the originating station to the load adjustment point.

3. A copy of Notification dated 16th September 2020 regarding "Railways (Punitive charges for overloading of wagon) (Amendment) Rules, 2020" is enclosed. The link of published notification in e-gazette (www.egazette.nic.in) will be provided on www.indianrailways.gov.in in due course.

4. All other extant guidelines will continue to apply unchanged.

This issues in consultation with Traffic Transportation directorate and with the concurrence of Finance directorate of Ministry of Railways.

NOTIFICATION

New Delhi, the 16th September, 2020

G.S.R. ….. (E).- In exercise of the powers conferred by sub-section(1) read with clause(d) of sub-section(2) of section 87 of the Railways Act, 1989 (24 of 1989), the Central Government hereby makes the following rules further to amend the Railways (Punitive charges for overloading of wagon) Rules, 2012, namely:-

1. (1) These rules may be called the Railways (Punitive charges for overloading of wagon) (Amendment) Rules, 2020.
   (2) They shall come into force on the date of their publication in the Official Gazette.

2. In the Railways(Punitive charges for overloading of wagon) Rules, 2012, in rule 3, after the proviso, following proviso shall be inserted, namely :-

   "Provided further that on detection of overloading at other than originating point, if customer carries out load adjustment at such point, Punitive charge shall be levied for the distance travelled by the train hauling the wagon from the originating station to the load adjustment point."

Please refer to Board's Circulars and letters under reference regarding weighment of wagons/rake, exemption from weighment, designed tare weight of wagons, procedure to deal with overloaded wagon(s) and levy of Detention Charge etc.

It has been decided to issue comprehensive guidelines on the subject at one place. Accordingly, relevant provisions figuring in the above mentioned Board's letters/circulars and in force as on date have been drawn out and consolidated guidelines on the subject are enclosed herewith.

All concerned may be advised to follow the guidelines scrupulously.

This issues with the concurrence of Finance Dte. of Ministry of Railways.

	Designed tare weight of wagons		17

Sub: Weighment of wagons/rake, Exemption from weighment, Designed Tare Weight of wagons, Procedure to deal with overloaded wagon(s) and levy of Detention Charge etc.

1.0 PROCEDURE FOR WEIGHMENT

1.1 WEIGHMENT OF RAKE/WAGONS AND ISSUE OF RR

1.1.1 All traffic loaded from any terminals are required to be weighed at weighbridges invariably. PCCM of Zonal Railways will monitor strict compliance of extant instructions regarding weighment of wagons.

1.1.2 PCOM of each Railway will notify the Associate weighbridge(s) at which rakes loaded at each loading point for each stream are required to be weighed and advise the same to all Zonal Railways and Board's office. Approval of the PCOM of the concerned Zonal Railway should be taken if the Associate weighbridge lies in other Zonal Railway. Weighbridges which have been planned or are being planned, but are yet to be installed may also be notified. Weighment of loading done at stations served by these weighbridges till these become operational, will be done at an alternate weighbridge only if it is operationally not inconvenient as certified by PCOM of the Railway.

1.1.3 PCOM of each Railway will also notify Alternate Associate Weighbridge where weighment will be done if the Associate weighbridge is defective and advise the same to all Zonal Railways and Board's office. Approval of the PCOM of the concerned Zonal Railway should be taken if the Alternate Associate weighbridge lies in other Zonal Railway. Weighbridges which have been planned or are being planned, but are yet to be installed may also be notified.

1.1.4 A reliable means of communication should be set up between the Associate and Alternate Associate weighbridges and the corresponding loading point for communicating results of the weighment to the loading point.

1.1.5 Means of communication mentioned above could be a FAX to begin with. Eventually, it has to be upgraded to inter-system communication between the weighbridge and the TMS module of FOIS. FOIS will provide TMS terminal at every weighbridge location. Railway should advise the commissioning of communication system at the weighbridge station, immediately after its commissioning. However, if FOIS terminal is provided at the weighbridge station but interface between weighbridge and TMS is not developed, weighbridge staff should enter the weighment of wagons/rake manually in the TMS module of FOIS provided at weighbridge station.

1.1.6 FOIS will develop an interface between the weighbridge and TMS so that the weighment information is directly transmitted from weighbridge to the TMS system.

1.1.7 Loading point will prepare Vehicle Guidance(VG) in duplicate duly indicating the wagon No., CC, Tare, Consignor, Consignee etc. and will hand over to the guard. This will be ensured by Station Supervisor/Goods Supervisor of the concerned loading point.

1.1.8 The guards of the train will hand over one copy of Vehicle Guidance(VG) to weighbridge clerk at weighment point. The weighbridge clerk will weigh the wagons duly indicating all the records of CC, Tare etc. The result of the weighment should be communicated to the loading point.

1.1.9 Weighment information from the Associate weighbridge location will be furnished to the loading point immediately.

1.1.10 **Issue of RR:** RR should be prepared in terms of modified Paras 1451(c) and 1451(d) of IRCM (Vol. II), which are given as under:

"1451(c): There should be no undue delay in the issue of Railway Receipts to consignors. Railway Receipts should normally be made over to the consignor within 24 hours from loading of the consignment. Concerned DCM/Sr. DCM of the loading points may however permit issuance of Railway Receipt not later than 48 hours from the time of completion of loading of goods to ensure that Railway Receipt is prepared on actual weighment details. If it is not possible to make over Railway Receipt within the above period as per actual weighment details, Railway Receipt should be prepared on the basis of Sender's Weight."

"1451(d): However, in case of continuous Bank Holidays, force majeure conditions etc., DRM may allow further extension of time for issue of RR up to the next working day of the bank through a written authority."

1.1.11 In case of weighment points where FOIS terminal is not provided or out of order, feeding of data of weighment of rakes in nearby FOIS terminals, preferably on same division, should be ensured.

1.1.12 An endorsement will be made in the RR indicating whether it has been prepared on the basis of sender's weight or actual weighment.

1.1.13 Punitive charges for overloading, if any, should be realized at the originating point itself and it should be mentioned in RR that rake has been weighed and all the charges including punitive charges collected. There should be indication in FOIS against this train that it has been weighed. Re-weighment of such wagons/rakes at en-route/destination should normally not be done.

1.1.14 Since the information regarding weighment of the rake will be available in FOIS, the divisional control will ensure that all those rakes, which have not been weighed earlier, are positively weighed. Similarly, the rakes, which have been weighed earlier, should be reweighed only under special instructions of an authority not lower than DRM or under the instructions from officers of Vigilance department (SAG and above).

1.1.15 There may be cases where despite the weighbridge being functional, it is not possible to communicate the actual weighment details due to defective/failed communication network. In such cases, the concerned Railway will continue to issue RR on sender's weight and take necessary remedial measure. All concerned may be advised to ensure that the details of weighment, including those done at en-route weighbridge and re-weighment done under special instructions, shall be entered in TMS module of FOIS. Based on these weighment details, outstanding, if any, shall be recovered.

1.1.16 PCCM of Zonal Railway should monitor the cases of issue of RR on sender's weight. DRMs, PCCMs, PCMEs and GMs should monitor defective weighbridges and put them right at the earliest.

1.1.17 If there are any loading points from which loaded rakes cannot be weighed at any weighbridge, the concerned Railway will advise Railway Board accordingly and continue to issue RR on sender's weight.

1.1.18 Weighment of rakes/wagons at Associate Weighbridge/Alternate Associate Weighbridge shall be treated as weighment at forwarding station for all purpose.

1.2 Weighment of traffic which cannot be weighed on the loading Railway's weighbridges due to loading station being close to Zonal inter-change point

1.2.1 Streams of traffic, which cannot be weighed on the loading Railway's in-motion weighbridges even after commissioning of planned/proposed in-motion weighbridges due to loading stations being close to the zonal inter-change point, should be weighed on the adjoining Railway's first in-motion weighbridge after the interchange point.

1.2.2 For this, a separate joint circular may be issued signed by the CFTM, CRSE and CTE of both Railways concerned, covering all such streams of traffic. It will be the responsibility of GM of the loading Railway to get this joint circular issued.

1.3 Speed restriction from loading point to first available weighbridge

1.3.1 In case a rake is not weighed on a weighbridge after loading due to defective weighbridge or any other reason, it should be weighed at the next available weighbridge.

1.3.2 The rake will be moved at normal speed from loading point to first available weighbridge. In case a rake is not weighed on the first available weighbridge after loading due to defective weighbridge or any other reason and it is weighed at next available weighbridge, then speed restriction of 40kmph or less as decided by the Railway concerned is to be followed from first weighbridge point to next available weighbridge where weighment is done.

1.4 Weighment of container trains

1.4.1 Weighment of container rake is mandatory. The procedure of weighment given in Para 1.1 above are also applicable for container trains. Zonal Railways are advised that the extant instructions to weigh container trains may be followed scrupulously.

1.4.2 Zonal Railways shall notify the weighbridge associated with every loading point for weighment of container trains and lay down the procedure order for realization of Haulage Charge and Punitive Charge for overloading, if any.

1.5 Weighment of traffic loaded at ports

All traffic loaded from any terminals including ports are required to be weighed at weighbridges invariably. Railways should ensure that the instructions to weigh all traffic loaded at ports are being followed scrupulously. If not, the Railway should furnish the reasons for not weighing outward traffic from ports and the action plan for installation of weighbridges and weighment of such traffic.

1.6 Weighment of Molasses, edible oils, Caustic Soda and Coal Tar

1.6.1 The weighment of Molasses, edible oils, Caustic Soda and Coal Tar should be done through dip measurement method. For this following guidelines may be followed:

1.6.2 The density (specific gravity) of molasses is standardized as **1.5.** SCR to prepare calibration chart for all the wagons being used for loading of molasses and circulate the same to all Zonal Railways.

1.6.3 The density (specific gravity) of edible oils is standardized as **0.925.** The calibration chart available for FO/TDO (POL product) is to be used for edible oils also to determine the actual weight of the consignment.

1.6.4 The standardized specific gravity of Caustic Soda lye should be taken as **1.53.** SCR to prepare calibration chart for all the wagons being used for loading of Caustic Soda Lye and circulate the same to all Zonal Railways.

1.6.5 The standardized specific gravity of Coal Tar should be taken as **1.20. SER** shall prepare calibration chart for all the wagons being used for loading of Coal Tar at 25°c subject to a maximum of PCC for the wagon and circulate the same to all Zonal Railways.

1.6.6 Dip measurement should be done only when wagons are in stationary condition.

1.6.7 Zonal Railways should obtain an undertaking from the customer at the time of loading that density(specific gravity) of Molasses, edible oil, Caustic Soda and Coal Tar being loaded is not more than what has been prescribed above.

1.6.8 Zonal Railways will periodically check the densities of Molasses, edible oils and Caustic Soda and Coal Tar loaded in tank wagons. Such periodicity should not be more than three months. If the density is found higher than those mentioned above, Board should be apprised immediately.

2.0 DISCREPANCIES FOUND ON WEIGHMENT/RE-WEIGHMENT

2.1 Differences between the invoiced weight of a wagon (RR issued on sender's weight basis) and the weight of first weighment may be neglected if the difference does not exceed 1(one) percent of the gross weight and in such cases invoiced weight will continue to be chargeable weight. If the weight of first weighment is more than invoiced weight and difference exceeds the limit as mentioned above, the weight of first weighment at weighbridge will be the chargeable weight and necessary Punitive Charge, if applicable shall be realized as per extant rule. If the weight of first weighment is less than the invoiced weight, the invoiced weight will be the chargeable weight.

2.2 Difference between the weight of second weighment of consignment in a wagon at en-route/destination and the weight of first weighment at forwarding/en-route, may be neglected if the difference does not exceed 2(two) percent of the gross weight and in such cases weight of first weighment will continue to be chargeable weight. If the variation between weight of second weighment and weight of first weighment is more than 2(two) percent, the weight of second weighment will be the chargeable weight *(irrespective of the fact that weight of second weighment is less or more than the weight of first weighment)* subject to minimum of Permissible Carrying Capacity of the concerned wagon and necessary Punitive Charge, if applicable, shall be realized as per extant rules.

2.3 In case of second weighment, where both invoiced weight and weight of first weighment are available, the chargeable weight determined at the time of first weighment in terms of Para 2.1 above, will be taken into account for the comparison with results of second weighment.

2.4 In case of three or more sets of weighment details are available, the chargeable weight determined at the time of last but one weighment in terms of Para 2.1 and/or Para 2.2 above, will be taken into account for the comparison with results of last re-weighment.

3.0 EXEMPTION FROM WEIGHMENT

3.1 Commodities loaded in standard bags of uniform size

(a) All consignments loaded in standard bags of uniform size is exempted from mandatory weighment at the weighbridges with a proviso that at least 5% of rakes should be subjected to weighment. This implies that wagons loaded with commodities like cement, food grains, fertilizers, sugar etc. (in standard bags of uniform size) are exempted from weighment. The term 'standard bags of uniform size' denotes all bags of standard size bags which are filled uniformly. While booking such consignment, the customer will give a written undertaking in the forwarding note stating that the bags are standard bags

of uniform size filled with uniform weight of commodity. However, the consignment loaded in non-standard bags or in loose conditions should continue to be subjected to 100%weighment, as per extant guidelines.

(b) Random surprise checks should be conducted by Vigilance and Commercial Departments for rakes of bagged consignments. Orders for such checks should be given by Vigilance Officer in JAG grade and higher and by Commercial Officers in SAG and higher in addition to DRMs and GMs.

(c) In case of dispute regarding Punitive Charge for overloading in respect of consignments loaded in standard sized bags, the number of bags in the wagons detected to be overloaded may be counted and the average weight of a bag determined by weighing a few bags on random basis at the destination point in the presence of the representatives of the consignor/consignee and two gazetted Railway Officers(out of which one should be from Commercial/Operating Department and the second should be randomly selected from any other department). Punitive Charge already raised may be revised based on the estimated payload determined in this manner with the approval of Sr. DCM of the Division of the destination point.

3.1.1 Container rake loaded with containers carrying standard bags of uniform size

Dispensation from mandatory (100%) weighment may be permitted in the case of container rake loaded with containers carrying 'standard bags of uniform size'. While booking, the operator will give a written undertaking in the forwarding note that the 'bags in the containers are standard bags of uniform size filled with uniform weight of commodity'. It may be ensured that no commodity in any form other than standard bags of uniform size is loaded in the rake. Random surprise weighment at EIMWBs may be conducted by Vigilance and/or Commercial Departments for container rakes of bagged consignment. Orders for such checks should be given by Vigilance Officer in SAG grade and higher and by Commercial Officers in SAG and higher, in addition to DRMs and GMs.

3.2 HR Coil and other Steel Consignments

HR Coil and other Steel Consignments which have been pre-weighed on certified mill-scales prior to getting loaded in Railway wagons and bear marking of Central Excise and/or Customs Department need not be subject to mandatory 100% weighment at EIMWBs. However, 5% of wagons loaded with such consignments may be weighed by way of sample checks.

However, HR Coil and CR coil consignments weighed on certified Mill-scale even if they do not bear any marking of Central Excise and/or Customs Deptt., need not be subject to mandatory 100% weighment at EIMWBs only when they are loaded as a pure rake of HR coil or CR coil or mixed rake of HR coil and CR coil provided that weight of the consignment is stenciled on each coil and it also bears a label with remarks *"Weighed on the Mill Scales certified by the Weights and Measures Department which is accepted for the SRP(Self Removal Procedure) by Central Excise and/or Customs Deptt.*

and all the statutory purposes". The label should bear the name of company, manufacturing unit, name of weighing station/point, signature and stamp of the person authorized by the company to certify weighment with date. The customer will also provide the wagon-wise details of weight of the each coil loaded in a wagon to the goods clerk.

Goods clerk shall verify the weighment data submitted at the time of loading with the data submitted to the Central Excise and/or Customs Deptt. every month. Such verification shall be done for atleast 10% of the wagons loaded in a month. In case of any discrepancy in a wagon, then weight of entire rake will be taken into consideration for levying Punitive Charge as per extant guidelines. The punitive charge regimen will be the same that is applicable on a rake found overloaded after weighment at originating point but has not undergone load adjustment at the originating point itself. If overloading is detected, it shall lead to immediate withdrawal of exemption from weighment and rakes shall be subjected to weighment at EIMWB as per norms.

3.3 Containerized Import traffic

Exemption from mandatory(100%) weighment in case of containerized Import traffic is permitted to following container train operators(CTOs) subject to the fulfillment of conditions given below-

Name of CTOs

- Container Corporation of India Ltd.
- Gateway Rail Freight Ltd.
- Distribution Logistics Infrastructure Pvt. Ltd.
- Adani Logistics Ltd.
- International Cargo Terminals & Infrastructure Pvt. Ltd
- Hind Terminals Pvt. Ltd.
- India Infrastructure & Logistics Pvt. Ltd.
- Pristine Mega Logistics Park Pvt. Ltd.

Conditions

(1) CTOs shall submit electronically, through Electronic Data Interchange (EDI), the train summary as well as the associated Sub Manifest Transshipment Permit (SMTP) in case of Import traffic. SMTPs (in XML format) shall separately be obtained directly by FOIS from Customs through EDI. Mapping of the containers as mentioned in SMTPs with the containers loaded in the relevant rake shall be done by FOIS. In case SMTP details are not captured through EDI and goods clerk feeds them manually, the rake should be weighed by the Railway.

(2) TMS shall prepare Railway Receipt (RR)/charge only as per weighment details received from Customs through EDI so as to rule out the technical possibility of any modification in weighment details of each container when received in TMS.

(3) FOIS/CRIS shall monitor preparation of RR in case of containerized import traffic of above CTOs and furnish its feedback.

3.4 Petroleum/Metallurgical coke

Dispensation from mandatory(100%) weighment of wagon/rake loaded with Petroleum Coke and/or Metallurgical Coke may be permitted with a proviso that at least 5% of rakes should be subjected to weighment. While permitting this exemption, it may be ensured that no commodity in any form other than these commodities is loaded in the wagon/rake. However, on request of consignor, Zonal Railways may permit weighment of Petroleum Coke and/or Metallurgical Coke by levying Detention Charge @ Demurrage (*for detention of rake for additional time used, if any*) and Shunting Charge (*for usage of Railway loco, if any*) for such weighment. This permission may be given with the personal approval of PCCM and PCOM, with due consideration to operational feasibility, among other factors.

3.5 Chuni and De-oiled Cake (DOC)

Chuni and De-oiled Cake (DOC) when loaded in covered wagons/rake may be exempted from mandatory (100%) weighment. While permitting this exemption, it may be ensured that no commodity in any form other than these commodities is loaded in the wagons/rake. Further, if Zonal Railway feels that any commodity needs exemption from mandatory (100%) weighment, they may conduct loadability trials and furnish their report/recommendation for consideration of Board.

4.0 DESIGNED TARE WEIGHT OF WAGONS, PROCEDURE TO DEAL WITH WAGON(S) FOUND OVERLOADED AFTER WEIGHMENT AND LEVY OF DETENTION CHARGE ETC.

4.1 (a) **Design Tare Weight** – Designed tare weight of the wagons should be taken as the benchmark for reckoning of overloading in any wagon. Details of designed tare weight of different types of wagon are given in the Annexure.

(b) Zonal Railways should prepare detailed operating procedure to ensure that whenever wagons are found to be abnormally overloaded beyond permitted limits at the originating point, load adjustment of such wagons is done at the originating point itself. However, if load adjustment is not feasible at originating point due to operational constraints, railway administration may permit load adjustment at nearby suitable location. The wagons shall be carried at a restricted speed upto such point where excess quantity may be unloaded or alternatively wagons are detached.

4.2 Detailed procedure should be issued by the General Manager of Zonal Railways for dealing with overloaded wagons found on rakes that are weighed en-route. For example, such wagons may be carried at a restricted speed upto a point where excess quantity may be unloaded or alternatively wagon detached. As overloading in wagon(s) affects safety, Zonal Railways are advised to take all necessary remedial measures to obviate instances of overloading.

4.3 Guidelines regarding levy of Detention Charge etc.

Condition	Weighment on weighbridge at originating point (associate weighbridge located at loading point itself or serving station of the siding)	Weighment on weighbridge at other than originating point (associate weighbridge/alternate associate weighbridge not located at loading point itself or serving station of siding; en-route weighbridge; weighbridge at destination point)
(i) No overloading	If a rake is detained for weighment and eventually no overloading is detected, no Detention Charge should be levied. Punitive Charge is also not leviable.	
(ii) Marginal overloading	If weighment reveals marginal overloading (not requiring detachment of wagon/wagons or load adjustment), Punitive Charge as applicable will be levied and no Detention Charge will accrue.	
(iii) Gross overloading *(continued)*	In cases of gross overloading (where load adjustment/detachment has to be resorted to), the applicable charges are detailed below:	
	Detention Charge – Detention Charge are not waivable and shall be levied as follows:	
	1.Detention Charge @Rs.5000/- for 'each overloaded wagon' plus	1.Detention Charge @Rs.5000/- for overloaded wagon is not leviable.
	2.Charges for the detention of the rake **Situation(a)- when load adjustment is carried out at weighment point itself** 'Charges for detention of the rake' shall be levied from the time of completion of weighment to the time of completion of load adjustment/detachment. It will be calculated at the prevailing rate of Demurrage Charge on entire group of wagons in the rake. **Situation(b)- when load adjustment is carried out at nearby location due to operational constraints at weighment point** 'Charges for detention of the rake' shall be levied for actual transit time (from weighment point to load adjustment point) or two hours, whichever is less, plus the duration of load adjustment (i.e. from the time of placement of rake for load adjustment to the time of completion of load adjustment/detachment). Charges for detention of the rake will be calculated at the prevailing rate of Demurrage Charge on entire group of wagons in the rake.	

Condition	Weighment on weighbridge at originating point	Weighment on weighbridge at other than originating point
Gross overloading	Punitive Charge No punitive charge is leviable if the customer carries out load adjustment at the originating station itself.	Punitive Charge Punitive Charge for overloading should be levied for the entire distance to be travelled by the train hauling the wagon from the originating station to the destination point, irrespective of the point of load adjustment.
	Punitive Charge The wagons that had undergone load adjustment should be randomly re-weighed. The identification of rakes for random weighment should be done by PCCM in consultation with PCOM. If overloading is detected in the wagon(s) that had undergone load-adjustment, Punitive Charge of one lakh rupees per wagon shall be levied.	
	Shunting Charge If railway locomotive is utilized for load adjustment of overloaded wagons, Shunting Charge will be levied as per extant guidelines.	
	Wharfage Charge Wharfage Charge is leviable at off-loading points for the usage of Railway's wharf as per extant guidelines.	
	Charges for unloading If overloaded goods are unloaded by Railways during load adjustment, charges for such unloading should also be recovered.	

4.4 If party request for dispatch of offloaded consignment, such off loaded consignment is to be treated as fresh consignment and freight will be charged for such dispatch.

4.5 **Computation of Engine Haulage Charge and Wagon Detention Charge in case of colliery sidings located far away from the weighment point where overloaded wagon(s) have to be sent back to the collieries for adjustment after weighment:**

(i) Railway should make maximum efforts for adjustment of overloaded wagon at the weighment point itself or at a subsequent point and Detention Charge may be levied as per extant rules.

(ii) In case where it is inevitable to send back detached overloaded wagon(s) to the loading/adjustment point for adjustment of load in wagon and the remaining rake is moved to destination then the following methodology will be adopted for calculation of Engine Haulage Charge and Wagon Detention Charge:

13

Engine Haulage Charge: If Railway loco is utilized for sending back the overloaded wagon/wagons to the loading/adjustment point for load adjustment, Engine Haulage Charge will be levied for the actual time required in hauling such wagons from weighment point to the loading/adjustment point. In case Railway loco is specifically brought from other station, then Engine Haulage Charge will be levied for the entire time period for bringing the Railway loco from that station to the loading/adjustment point. Engine Haulage Charge will be calculated on the basis of cost per Engine Hour and time period as mentioned above subject to a minimum of one hour.

Wagon Detention Charge: It will be levied on the entire rake from the time of completion of first weighment to the time of release of balance rake for onward journey after detachment of overloaded wagons. In addition, Detention Charge will also be levied on detached overloaded wagons from the time of detachment to the completion of load adjustment/final weighment. The Wagon Detention Charge is not waivable.

4.6 **Guidelines in case of container traffic**

(i) In case of container traffic, Punitive Charge for overloading will be levied as per extant rules notified in Gazette Notification from time to time. For this purpose, notified PCC of container wagons as notified from time to time will be taken into account.

(ii) In case of containers, Haulage Charge is levied per container basis whereas weighment will be per wagon basis carrying one or more containers. Also it will not be possible to weigh each and every container during weighment en-route. Therefore, for the purpose of calculation of punitive charge, the excess weight detected after weighment will be uniformly distributed on all the containers loaded on the wagon.

(iii) In case, when Punitive Charges are to be levied at the highest Class rate, the highest Class as mentioned in Goods Tariff may be taken into account for calculation. Presently, the highest Class to be reckoned for the purpose of charging punitive charges for overloading is Class 200.

(iv) In case, when Punitive Charge is leviable at the freight rate applicable to that commodity, freight applicable to that commodity for the purpose of levying Punitive Charges for overloading will be calculated as under:-

(a) For containers loaded with commodity other than notified commodity, freight applicable to that commodity will be calculated as - "Freight Rate/tonne = Haulage Rate per TEU for 'above 31T'/31tonne"

(b) For containers loaded with notified commodity (for which Haulage Charge is levied on the basis of Container Class Rate), freight rate applicable to that commodity will be the Container Class Rate applicable to that commodity. However, in case of wagon loaded with containers consisting of different notified commodities, Punitive Charge for overloading will be levied on the basis of highest Container Class Rate of the commodity which is loaded on that wagon.

Further, if a wagon is loaded with the container which contains notified commodities and other container contains commodity other than notified, then Punitive Charge for overloading will be levied on the basis of Container Class Rate of the notified commodity.

4.7 Rules regarding Punitive Charge for overloading

(a) List of gazette notification

Railways (Punitive Charges for overloading of wagon) Rules and amendments thereof notified from time to time vide Gazette Notifications are listed below. Link of the same are available on e-Gazette and also on IR website.

- GSR 570(E) dated.17th July, 2012
- GSR 898(E) dated17th December, 2012
- G.S.R.550(E) dated 10th July, 2015
- G.S.R.278(E) dated 26th March, 2018
- G.S.R.1205(E) dated 14th December, 2018

(b) Extant provisions regarding collection

Extant provisions regarding collection of Punitive Charge/railway dues as stipulated in Railways Act 1989 and Indian Railway Commercial Manual are reproduced below:

Railways Act 1989

"73 Punitive charge for overloading a wagon - Where a person loads goods in a wagon beyond its permissible carrying capacity as exhibited under sub-section (2) or sub-section (3), or notified under subsection (4), of section 72, a railway administration may, in addition to the freight and other charges, recover from the consignor, the consignee or the endorsee, as the case may be, charges by way of penalty at such rates, as may be prescribed, before the delivery of the goods...."

IRCM Vol-II

"1820. Recovery of railway dues before delivery of goods- Before delivery of goods, it should be seen that all railway dues and other charges have been paid."

5.0 Integration of weighbridge with FOIS – Procedure to capture weighment details in TMS/FOIS and modification thereof after load adjustment of overloaded wagon

Presently, where weighbridge are not linked with FOIS, wagon-wise weighment details are manually fed by Goods clerk in TMS/FOIS on the basis of weighment sheet generated from weighbridge. After load adjustment, if any, the weighment data is modified based on the load adjustment memo submitted by the customer.

In the case of integration of weighbridge with FOIS, following procedure shall be followed –

1. The weighment details of wagon(s) recorded by weighbridge shall be captured and digitally transferred in TMS/FOIS without any manual intervention.

2. In case overloading is detected at originating station/weighbridge location and if customer carries out load adjustment at originating station itself as per extant policy, before preparation of RR –

   i) the Weighment Sheet generated at weighbridge shall continue to be made available to customer for purpose of carrying out load adjustment and preparation of load adjustment memo.

   ii) A provision shall be made in TMS to enable the TMS user/Goods clerk to modify the 'net weight of wagon after load adjustment' in the TMS/FOIS on basis of 'load adjustment memo'. A separate field provided in TMS/FOIS for entry of modified weight will be distinct from the 'weighment details captured automatically from weighbridge'. RRs shall be prepared on basis of modified weighment details fed by TMS user, if any. Load adjustment memo number, date of weighment and weighbridge location shall also be captured in TMS/FOIS for all such cases of load adjustment.

   iii) Both the weighment details, one received from weighbridge and that entered post load adjustment by TMS user, shall remain available and visible in TMS/FOIS.

   iv) Original weighment details received from weighbridge, modified weighment details, 'Load adjustment memo' and concerned RRs shall be tagged to each other in TMS, and shall remain available for checks in form of MIS reports.

   v) FOIS shall generate MIS report for such RRs with viewing rights to TMS users.

   vi) Load Adjustment Memo and Weighment Sheet shall be attached with the copy of RR retained at originating station for record.

3. All other terms and condition shall remain unchanged.

4. Checks will be conducted to ensure that integration of weighbridge is working satisfactorily during joint inspection of weighbridge by Sr. Scale/JA grade officer of the division as per extant procedure, and modification therein from time to time.

Annexure – E

GOVERNMENT OF INDIA
MINISTRY OF RAILWAYS
RAILWAY BOARD

No.2005/LML/18/8 New Delhi, 8 06.05

The General Managers,
All Indian Railways & Productions Units.

Subject: **Policy on licensing of railway land for commercial plots etc (Master Circular).**

Ref:- **Board's letter of even number dated 10.02.05**

In partial modification of Board's letter referred to above, Para 3 may be read as under:-

3. Rates of licence fee

Licence fee of plots will continue to be fixed as a percentage of the land value, determined as per the procedure detailed in para-5 below. For period prior to 1.4.1995, the license fee will be governed in terms of Board's letter No.83/W2/LM/18/87 dated 17.9.1985. For subsequent periods, the percentage would be as under:-

Item No.	Types of Plots	Annual Licence Fee as a Percentage of Land Value(from 1.4.95 to 31.3.04 in terms of Boards letter dated 29.8.95)	Annual Licence Fee as a Percentage of Land Value(from 1.4.04 onwards in terms of Board's letter dated 24.3.04)
(a)	Railway related activities such as City Booking offices, Out Agencies etc.	6%	6%
(b)	Ordinary Commercial Plots – without structures	6%	6%
(c)	Ordinary Commercial Plots – with temporary structures for stacking/storing (i) Covered area (ii) Open area	7 ½% for the whole area	(i) 7 ½% (ii) 6 %
(d)	Steel Yards / Coal Dumps. Bulk Oil Installations etc.	10%	7 ½%
(e)	Land used to lay private sidings	6%	6%
(f)	Shops / Retail Depots etc.	20%	10%

15.12.21

Other terms and conditions remain unchanged.

This issues with the concurrence of finance directorate of Ministry of Railways.

(Desh Ratan Gupta)
Director(Land and Amenities)
Railway Board.

No. 2005/LML/18/8 New Delhi, Dated 8 -06-05.

Unique No- 2005/LML/

GOVERNMENT OF INDIA
MINISTRY OF RAILWAYS
(RAILWAY BOARD)

No. 2005/LML/18/8 New Delhi, dt. 10.01.2005

The General Managers,
All Indian Railways & Productions Units

Sub: Policy on licensing of railway land for commercial plots etc.(Master Circular)

Ref: Board's letter No. 83/WII/LM/18/87dt. 29.8.1995

Policy guidelines for commercial licensing of Railway land last issued vide Board's letter No.83/W2/LM/18/87 dated 29.8.1995 in super-session of the earlier policy directives, have been amended from time to time. With a view to bring all such policy instructions under one umbrella, it has been decided to issue a Master Circular combining all the instructions issued so far on the subject. Henceforth, Railways should quote only the present letter for any further reference.

2.0 General

2.1 Leasing of land is not permitted except in cases where it is specifically approved by the Railway Board. Lands for the purpose of commercial use should be given on licensing basis only. In this connection, Board's letter No. 82/W2/LM/18/116 dt. 22.11.1982 may please be referred to.

2.2 Temporary licensing of railway land to private individuals for the purpose of setting up shops, commercial offices, vending stalls, clinics etc. not connected with the Railway working was stopped in terms of Board's letter No. 80/W2/18/0/A dt. 7.6.1984. This ban will continue. In exceptional cases, where such licensing may have to be done with the prior approval of the Board, licence fee must be fixed by resorting to public auction/open tenders for getting the maximum revenue.

2.3 Licensing of ordinary commercial plots connected with Railway working, as indicated in para-3 below will be done with the personal approval of General Manager in consultation with FA&CAO. The periodical review may, however, be approved by DRM on the recommendation of Committee of Divisional Heads of Engineering, Commercial and Finance Departments.

2.4 Licenses of existing licencees, not connected with the Railway working as mentioned in Para 3 (f) below may, however, be renewed from time to time so

-1-

15.12.21

5.0 ... not an ... licensing

long as the land is not required by Railway for its own purpose but on new terms and conditions indicated in this letter.

2.5 In each case of licensing, proper agreement must be executed between the Railway Administration and the licencees before the licencee is given possession of the land/plot. This must be strictly followed and for any violation of these instructions, the official handing over land before the execution of agreement, shall be held personally responsible by the Railway Administration.

3. Rates of licence fee

3.1 Licence fee of plots will continue to be fixed as a percentage of the land value, determined as per the procedure detailed in para-5 below. The percentage applicable w.e.f 1.4.04 to various types of plots will be as under:

Item No.	Types of Plots	Annual Licence Fee as a Percentage of Land Value
(a)	Railway related activities such as City Booking offices, Out Agencies etc.	6%
(b)	Ordinary Commercial Plots – without structures	6%
(c)	Ordinary Commercial Plots – with temporary structures for stacking/storing (i) Covered area (ii) Open area	 (i) 7 ½% (ii) 6 %
(d)	Steel Yards / Coal Dumps. Bulk Oil Installations etc.	7 ½%
(e)	Land used to lay private sidings	6%
(f)	Shops / Retail Depots etc.	10%

4.0 Formation of a Standing Committee

4.1 A Standing Committee of three HODs will be set up at the Headquarters of each Zonal Railway and other Railway Units. The Standing Committee consisting of CE, CCM and FA&CAO shall examine fresh cases connected with railway working as indicated in Para 3 (a) to (e) and submit its recommendations to G.M. for approval.

4.2 The periodical review will, however, be done by DRM on the recommendations of Divisional Heads of Engineering., Commercial and Finance Departments. The Committee will review annually whether the traffic commitments by the licensees of the commercial plots have actually materialised

15.12.24

or not and in case of any deviation, initiate suitable corrective action including de-licensing and vacation as necessary.

5.0 Fixing of land value

5.1 A market value would however, be required to be taken to serve as a base value for working out rental fee payable. This shall be fixed on the basis of the land value of the surrounding area as on 1.1.1985, as determined from the Revenue Authorities and/or from the following:

(a): Evaluation of Town Planning Department;
(b): Actuals as per PWD and CPWD transactions;
(c): Actual Transactions, as per documents filed in the Office of the Sub-Registrar;
(d) Value of land as assessed by professional evaluators of the State and Central Governments;

5.2 **The land value as worked out shall be increased every year on the 1st of** April, starting from 1.4.1986, at the rate of 10% over the previous year's land value to arrive at the land value for the following year based on which the annual licence, fee shall be fixed. **From 1.4.2004 onwards, the land value shall be increased at the rate of 7% every year over the previous year's value.**

5.3 However, for fresh cases of licensing of plots, for any purpose(s) defined in Para 3.1 (a) to (e) above, the licence fee shall be fixed after obtaining the current value of land. In very rare cases where it is not possible to obtain the current cost (reasons for which should be brought on record), the updated cost based on 1.1.1985 land price should be adopted.

However, for the Metropolitan towns of Mumbai, Kolkata, Delhi, and Chennai if the HODs' Committee feel that the land rates are widely varying within the City, two or more rates can be utilised for that city. Using this method, arrears of collection of license fee on this account should not be allowed to accumulate.

6.0 Minimum licence fee

6.1 The minimum licence fee in respect of plots covered under this letter should be Rs. 1000/- per annum. For the purpose of determining the minimum license fee, the maximum size of a plot shall be taken as 100 sq. metres. For instance, in case licensing of a plot measuring 250 sq. metres is involved, the minimum license fee chargeable shall be relevant to three plots of 100 sq.m metres each and will work out to Rs. 3000 per annum.

7.0 Revision of licence fee

7.1 As the notional land value will increase by 7% over the previous year's land value as mentioned in Para 5.2 above, the licence fee will automatically go up by 7% over the previous year's fee from the first of April every year. Suitable provisions, with the Schedule of payment due, may be incorporated in the Agreement.

15.12.21

7.2 The termination/renewal date of the Agreement should always be the end of the Financial year so that there is no confusion and a better watch is kept on renewals.

8.0 Powers of licensing and renewal

8.1 Fresh cases of licensing of plots connected with Railway working and mentioned at (a) to (e) of Para 3 above will be approved by GM, on recommendation of the HOD's Committee. As regards plots mentioned at (f) of Para 3, viz. shops, retail oil depots etc., as already stated, the existing ban on fresh licensing for purposes unconnected with Railway working, will continue. Renewal of licences of railway land not connected with Railway working given under para 3 (f) can be done at G.M's level with Finance concurrence.

9.0 Security Deposit and Liquidated Damages

9.1 Instructions contained in para 1025, 1026 and 1027 of the Indian Railways Code for the Engineering Department (1999 Edition) should continue to be strictly followed and any violation of these instructions should be viewed seriously.

10.0 Settlement of pending case:

10.1 The revised instructions would become effective with effect from 1.4.2004. It has also been decided to withdraw the retrospective effect of orders dated 29-8-1995. Thus, the orders of August 1995 would be made applicable for the period 1995-96 onwards and not for the earlier period i.e. from 1-4-1986 to 31-3-1995. Any recovery already effected for the period between 1-4-1986 to 31-3-1995 need not be refunded in cash but should be adjusted against future payments due from the concerned party. Arrears of land licence fee may be recovered in easy instalments.

10.2 In cases pending in Courts of Law, the Law Officer of the Railway should be consulted before arriving at a settlement.

11.0 Having included their provisions in the master circular, the earlier circulars on the subject Nos.

i 83/W2/LM/18/87 dt. 24.3.04

ii 83/W2/LM/18/87 dt. 29.8.95

iii 83/W2/LM/18/87 (Vol. II) dt. 14.3.01

iv 83/LML/18/87 (Vol.II) dt. 5.11.01

v 83/W2/LM/18/87 (Vol.II) dt. 28.4.04

15.12.21

vi 01/LML/18/58 dated 23.9.02, stand withdrawn.

This issues with the concurrence of the Finance Directorate of the Ministry of Railways.

Railway Board is in receipt of the letters under reference, vide which Railway has sought clarification on Private Siding Policy regarding modification in DPRs of ongoing proposals where DPR was approved prior to issuance of FM Circular no. 11 of 2016.

In this regard, it may please be noted that a Master circular on 'Gati Shakti Multi-Modal Cargo Terminal (GCT) policy has been issued vide letter No. 2021/TC(FM)/18/23 dated 15.12.2021. As per Para 1.1 of this new GCT policy, all new as well as under-construction / under-approval Cargo Terminals (approved / proposed under the 'Private Siding' or ' Private Freight Terminal' policies) shall be covered by the GCT policy.

It may further be noted that the GCT policy has no provision of Detailed Project Report (DPR). Further action regarding notification and commissioning of the Terminal may be taken as per the provisions of paras 10.1, 11 & 11.1 of 'Schedule-1' of the policy.

Sub: **Standard Agreements for Gati Shakti Multi-Modal Cargo Terminals (GCTs)**

Ref: (i) Master Circular on "Gati Shakti Multi-Modal Cargo Terminal-2021" issued vide letter no. 2021/TC(FM)/18/23 dated 15.12.2021
(ii) Railway Board's letter no. 2021/TC(FM)/18/23 –Part (3) dated 07.03.2022.

The policy guidelines on "**Gati Shakti Multi-Modal Cargo Terminal (GCT)**" were issued under GCT Master Circular 2021 vide Railway Board's letter No. 2021/TC(FM)/18/23 dated 15.12.2021. As per provision contained in Para 18.1 of GCT Master Circular, an agreement for GCT shall be signed before the issue of commercial notification and operation of the GCT by Railway.

In this connection, standard agreement copies viz. **(i)** For GCT on Private Land and **(ii)** For GCT - entirely / partially on Railway Land, have been enclosed, duly vetted by legal directorate.

Accordingly, Zonal Railways may take immediate action for signing of Agreements in respect of GCTs that were initially notified on the basis of comprehensive notifications in terms of guidelines quoted vide Railway Board letter mentioned under ref-(ii) above.

Further, following instructions must be ensured while signing of Agreement-

(i) It may be ensured whosoever executes the present Agreement for an on behalf of the President of India is authorized to do so and his name and designation is correctly mentioned in the opening Para as well as in the Signature Clause at the time of actual execution of the same.

(ii) It may also be ensured that whosoever executes the present Agreement for an on behalf of the Second Party is authorized to do so and his name and designation is correctly mentioned in the opening Para as well as in the Signature Clause at the time of actual execution of the same.

07/07/2022

(iii) In addition to this, the name and full address of the witnesses representing to the parties should also be mentioned in the Signature Clause at the time of execution of the document under reference.

(iv) Blank spaces in the draft agreement, if any, should be filled with appropriate / proper wordings according to their requirements before actual execution of the same.

The Standard Agreements enclosed herewith are issued with the approval of Rates, Traffic Transportation, Mechanical Engineering, Civil Engineering, Land & Amenities and Legal Directorates and with the concurrence of Finance Directorate of the Ministry of Railways.

Please acknowledge receipt of this letter.

Model Agreement for 'Gati-Shakti Rail Multi-modal Cargo Terminal' built entirely on private land'

_____Railway

This **Agreement** is made and executed at ……..on this ……. Day of ……., 20…….

BY AND BETWEEN

THE PRESIDENT OF INDIA acting through (incorporate name and designation of the officer authorized under Article 299(1) of the Constitution) having its office at ……. (hereinafter referred to as "**The Railway Administration**" which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the One Part;

AND

……. [hereinafter referred to as **("Applicant or GCTO")*** which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the Other Part.

WHEREAS The Applicant is desirous of having a Cargo Terminal laid by the Railway Administration at _____ from the _____station yard of the _____ _ Railway taking off from Kilometer No. _____ between_____ station and_____ station of the Railway as shown in red and green on the plan bearing CE's No. _____ hereto annexed for the purpose of carrying on the Applicant's business in the Applicant's premises situated at _____ _ District _____

AND WHEREAS the Railway Administration is willing to lay the said cargo terminal for the said Applicant upon and subject to the terms and conditions hereinafter set forth.

NOW, Therefore, this Agreement witnesseth as follows:

1. **Interpretation**: In these presents, unless the context otherwise requires, the following Words and Expressions have the meaning and shall be interpreted as specified, namely-

Words importing the singular number include the plural number and vice versa.

"Person" includes a firm or other association or body of individuals and a Company or other Corporate Body.

"Railway Administration" means and includes the General Manager for the time being of (name of Zonal Railway) Railway and any officer of the (name of Zonal Railway) Railway authorized by any such General Manager to deal with any matters, with which these presents are concerned.

"Applicant" means the person named as party hereto of the other part and includes in the case of a firm or other association or body of individuals, the individual person or persons for the time being and from time to time constituting the association or body and, In the case of a company, corporation or body corporate the Successor in business of interest, such company, corporation or body corporate for the time being.

07/07/2022

"Works" means the premises belonging to or occupied or used by the Applicant which are connected with the (name of the Zonal Railway) Railway system by the terminal herein before mentioned,

"Undertaking" includes all land, railway lines, works, buildings, engines, rolling stock and other movable or immovable property now or at any time hereafter forming part of or pertaining to the (name of the Zonal Railway) Railway system as now or hereafter constituted and all engines and rolling stock (whether belonging to the _____ Railway system or not) passing over such system.

"Cargo Terminal" Includes the Railway track connecting the Applicant's works with the Railway system, as hereinafter agreed to be constructed by the Railway Administration and all branches and extensions thereof which may hereafter be constructed by the Applicant or by the Railway Administration at the Applicant's request and all sleepers, ballast, embankments, bridges, tunnels, signals interlocking and tele-communication equipment gates, buildings and other constructions, erections, works and movable property constructed / erected / made/ provided or used in connection with the said track and also all land whereon or on part whereof the said track and connected things aforesaid are constructed / erected / made / provided or used including land acquired for the purpose thereof as hereinafter provided and land belonging to the Railway Administration and land belonging to or occupied or used by the Applicant.

The Cargo Terminal shall cover only that portion of track network on which Railway rolling stock will ply. The network utilized by the Company/Party for their internal use shall not form part of the Cargo Terminal defined herein."

"Sub-grade Work" includes the construction of embankments, the making of cuttings and the carrying out of other earth work, the construction of bridges (exclusive of girder works), buildings, platforms, tunnels, culverts, drains and openings and laying out of ballast and all other works necessary to permit the laying and construction of railway track of the terminal and generally all works which have to be abandoned, if the terminal be closed.

"Permanent Way Materials" includes girders, rails, sleepers, fastenings, points and crossings, fencings, signaling, interlocking and telecommunication equipment and over-head structure and any other things connected therewith for electric traction and other machinery (except station machinery) and equipments necessary for working the terminal.

"Legal Representative" means any person who is competent to give the Railway Administration a valid discharge in respect of any money or property which may be payable or deliverable to the Applicant and shall include the executor and administrator of a deceased person, a succession certificate holder, the surviving or continuing partners or members in the case of a firm, association or body of individuals, the certificated guardian if a minor's property, the committee of lunatic, the assignee or receiver of an insolvent's estate, the liquidator of a Company, a receiver and any person legally appointed to represent the estate of the Applicant.

* **Note**: Forms Of Description Of The Applicant –

(Where a single person is the Applicant) "and A.B. (insert full name) of (insert address and occupation)"

(Where two or more persons are Joint Applicants), "and A.B. (insert full name) of (insert address and occupation) and C.D.: (insert full name) of (insert address and occupation)".

07/07/2022

(Where a single person trading under a different fee name is the Applicant) "and A.B. (Insert full name) of (insert address and occupation) carrying an business under the name or style of (insert name) at (if the business is carried on at a different address from the address already Inserted then insert such additional address)."

(Where a partnership firm is the Applicant and the names of the partner known), "and A.B. (Full name) and C.D. (full name) carrying on business partnership as (insert nature of business) under the style or firm of (insert name or style of the firm and address).

(Where a partnership firm is the applicant and the names of partners are not known), "and A &Co. (insert name or style of the firm) a partnership firm carrying on business at (insert address) as (insert nature of business)."
(Where an incorporated Company is the Applicant), "A.B. &CO. Ltd. a company incorporated in (Insert country of incorporation (e.g. India, England or elsewhere, as the case may be) and having its registered office at (insert address)" (in the case of a company incorporated elsewhere than in India address) "and its principal office in India at (insert address)".

(Where the Applicant is a joint family governed by the Mitakshara School of Hindu Law), "A.B. (insert full name) for self and as Karta or managing member of the Joint family, governed by the Mitakshara School of Hindu Law, carrying on business under the name or style of (insert name under which the joint family business is carried on) at (Insert address) and C.D.E.F.G.H. etc. (insert full name) being the other adult members of the said Joint family.

2. **<u>Agreement To Construct Gati Shakti Multi-Modal Cargo Terminal</u> (GCT) :**

Subject to the terms and conditions hereinafter contained, the Railway Administration shall at the cost and expense of the Applicant in all respects, construct fully on the land of the Applicant of the said Cargo Terminal, from _____ (length of terminal) Kilometers on _____ (name of portion) Branch as shown in red and green on the plan annexed hereto (bearing CE's No. _____) connecting the Applicant's work known as _____ situated at or near _____ in the District of with the system at or near _____ on _____ Railway.

3. **Capital Cost of GCT**

3.1 The Gati Shakti Cargo Terminal Operator (GCTO) shall bear the entire capital cost of new GCT from the take-off point onwards, as marked on the Engineering Scale Plan (ESP) at the serving station.

3.1.1 For the linear connectivity portion of GCT passing through the Railway land, including the land to be acquired by Railway for this purpose under para 17.2 of the Master Circular on Gati Shakti Multi-modal Cargo Terminal Policy dated 15.12.2021 (**hereinafter referred to as the policy**), GCTO shall provide only the minimum essential infrastructure of track, OHE and signalling equipment at the cost of GCTO (other assets not related to track, signalling, or OHE, if required, shall be constructed by Railway at its own cost). In case of any dispute, the decision of DRM shall be final in this regard.

3.1.2 The ownership of infrastructure including the track, signalling equipment and OHE created on Railway land under para 5.1.1 of the policy shall belong to Railway, even though the capital cost for these shall be borne by the GCTO.

07/07/2022

3.2 The capital cost for all common-user traffic facilities at the serving station (as marked on the ESP), including Signalling & Telecommunication works, modification and up-gradation to existing interlocking/ OHE, or electrification in future within the station limit up to take-off point, shall be borne by the Railway.

3.3 Maintenance and operation of assets created under para 5.2 of the policy (common-user traffic facilities) at the serving station including staff costs, shall be the responsibility of the Railway.

3.4 The capital expenditure required for augmenting or up-grading the facilities and infrastructure on the connectivity portion from take-off point onwards towards Terminal and within the premises of Terminal shall be borne by the GCTO.

3.5 The connectivity to GCTs shall normally take-off from the existing serving station. However, in case when it is operationally not feasible to provide a connection from an existing serving station, provision of a Block Hut/ Block station (between two existing stations) with required points & crossings may be considered, provided it is operationally feasible. This will be done on the request of GCTO.

3.5.1 In such cases, the entire capital cost of the new Block Hut/ Block station and related infrastructure shall be borne by the GCTO. However, this work will be executed by Railway, and ownership of the same shall remain with the Railway.

3.5.2 However, for new GCTs planned to load one million Tonne or more (outward traffic) per annum, the capital cost of new Block Hut/ Block station will be repaid to the GCTO by Railway.

3.5.2.1 The repayment of capital cost of the new Block Hut/ Block station will be made by Railway through 10% rebate on the outward traffic loaded at the Terminal, till such time the capital cost has been repaid to the GCTO. This 10% rebate shall be granted on the normal tariff rate (NTR) of the commodity.

3.5.2.2 The repayment of capital cost as mentioned in para 3.5.2.1 above will be done only if the Terminal achieves the target of loading one million Tonne per annum within two Calendar Years of commissioning (excluding the year of commissioning). For example, if a GCT commissioned during calendar year 2022 achieves one million Tonne loading during calendar year 2024, then the repayment of capital cost of new Block Hut/ Block station (through 10% rebate on outward traffic) shall start from 01st April 2025.

3.5.2.3 This repayment shall be made for the investment made by the GCTO on behalf of Railways. As such, this repayment through freight rebate shall be admissible over and above all other rebates that the GCTO may become eligible for in future.

3.5.2.4 This provision of repayment shall be applicable only for GCTs for which Agreement between RA and GCTO has not been entered into till the date of issue of this Policy. **Further, existing terminals migrating to GCT Policy shall not be eligible for this repayment.**

4. **<u>Sub-Grade Work</u>** :

The sub-grade work, culverts & bridges, drains, pitching & protection work and ballast supply shall be carried out at the cost and expense of the Applicant either by his own agency or by the Railway Administration on his request. When the works or part of them are carried out by the Applicant, the work shall conform to the Railway Administration's drawings and

07/07/2022

specifications and shall be executed under the supervision of Engineering staff of the Railway Administration or under the supervision of Approved Consultant.

5. **Security of Assets**

5.1 The responsibility of security of railway assets over Railway land shall be of Railways. However, the responsibility of security of railway assets outside Railway Land or on land licensed to GCTO shall be of GCTO.

5.1.1 In case of theft of any railway asset on non-Railway land, the maintenance of which is with Railway, the restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

5.1.2 In case of theft of OHE including OHE on non-Railway land, restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

6. **Maintenance of Assets**

6.1 Maintenance of assets on Railway land, including Track and Signalling Equipment installed on Railway land under para 5.1.1 of the policy, shall be done by Railway at its own cost.

6.2 Maintenance of OHE from the take-off point onward including inside the Terminal shall be done by Railway at its own cost – as this involves safety of men and equipment, and can also impact rail operations outside the Terminal boundary.

6.3 In addition to above, the maintenance of assets (track, bridges, signalling equipment, etc) on non-Railway land ***outside the Terminal***, may also be done by Railway at its own cost if the GCTO transfers the ownership of these assets to Railway (the ownership of land on which such assets are created shall however continue to be with GCTO). Provided further, this provision shall be applicable only to those GCTs where freight tariff is charged on 'through distance basis.'

6.3.1 In case maintenance of assets, including Track and Signalling Equipment, is being handed over to Railways on migration to this policy by GCTO, the GCTO will ensure that the standards of track and signalling infrastructure being transferred to Railway is in accordance with the prescribed standards for GCTs, as decided by Railways (as per Annexure 'D' of the policy). If any up-gradation/ replacement/ renewal of any infrastructure is required, the GCTO shall bear the cost for the same.

6.3.2 In case of damages to the assets due to accident, etc, the replacement shall be done by Railway. However, if the responsibility of accident, after Enquiry (joint enquiry by representatives of Railway as well as GCTO), is fixed on the GCTO – the GCTO shall have to bear the cost of all the replacements. The decision of the Nodal Officer, i.e. DRM, in this regard shall be final.

6.3.3 In case the damage to assets is due to an external cause (floods, breaches, terrorist activity, etc), the cost of restoration shall be borne by the GCTO.

6.3.4 If the GCTO does not agree to transfer the ownership of assets (track, bridges, signalling equipment, OHE, etc) to Railway or freight tariff is not chargeable 'on through distance basis'; the maintenance of these assets – except OHE – shall continue to be the responsibility of GCTO.

6.3.4.1 Railway shall be entitled to conduct periodic inspections of such GCTs being maintained by the GCTO, for which Inspection Charges will be levied as per the prescribed norms.

07/07/2022

6.3.4.2 GCTO may also get the maintenance done through Railway for such Terminals, in which case Maintenance Charges shall also be levied as per the prescribed norms.

6.3.5 The maintenance of GCT yard, including loading/ unloading lines, shall be the sole responsibility of GCTO. Distribution of the responsibility of track has been explained in Schedule '3' of the policy.

6.3.6 At such GCTs, Railway shall maintain the signalling equipment till the line-clear/ receipt-despatch arrangement with serving station(s), at its own cost. Maintenance of signalling equipment internal to the Terminal shall be the sole responsibility of the GCTO.

6.4 The cost of all subsequent up-gradations (on account of change of technology, standards, etc) shall be borne by the GCTO.

6.5 Maintenance of all the infrastructure and equipment inside the GCT which are not to be accessed by Railways' rolling-stock, and maintenance of infrastructure required for loading/ unloading (tipplers, hoppers, etc) shall be the responsibility of GCTO.

7. Cost of Electrification

7.1 In case of new GCT, the entire cost of electrification of the Terminal and the connectivity portion between take off point and GCT, shall be borne by the GCTO.

7.2 While undertaking electrification of main line and serving station by Railways, the electrification of the existing GCT(s) including the rail-line connecting the Terminal(s) shall be undertaken at the Railway's cost.

8. Handling of Wagons in GCTs:

8.1 If any damage and deficiencies is caused to railway wagons due to the fault of the GCTO, the damage and deficiency charges shall be raised by Railway and paid by the GCTO as per the extant rules of Railways.

8.2 All tipplers and bulk handling systems used for loading/unloading of Railway wagons shall be provided and commissioned by GCTO at its own cost in accordance with the RDSO's approved specifications. This provision shall however not be applicable on the systems/ equipment installed by GCTO which are not to be used for handling Railway wagons (such as conveyor-belts, JCBs, excavators, etc).

8.2.1 GCTO shall ensure that tipplers, bulk handling systems, and mechanized equipment are operated only by the qualified and experienced staff under adequate supervision.

8.2.2 Such equipment shall be regularly maintained and replaced at the end of their codal life by GCTO at its own cost.

8.2.3 In case of any accident/ derailment inside the Terminal or outside the Terminal up to serving station, Railway will provide Accident Relief Train (ART) initially free of cost. Provided further, if the responsibility of accident/ derailment after enquiry is fixed on the GCTO, ART Charges shall be payable by GCTO as prescribed by Railway from time to time. The due Charges will be deducted from the future payments by Railway to GCTO. However, in case no regular payments are being made by Railway to GCTO, on demand from Railway, the GCTO shall pay ART Charges to Railway without any delay.

8.2.4 The accident enquiry as mentioned in para 9.2.3 above shall be conducted jointly by the representatives of Railway and GCTO to be nominated by DRM and

07/07/2022

GCTO respectively. The accepting authority of Enquiry Report shall be DRM, whose decision shall be final and binding on GCTO.

9. **C&W Maintenance Facilities**

9.1 Normally C&W facilities shall not be constructed at GCTs.

9.2 However, if C&W facilities are operationally required at any GCT as per the extant instructions, only one-time capital cost for setting-up these facilities shall be borne by the GCTO. Operational costs, including staff cost and material cost (for Railway-owned stock), shall however be borne by the Railway.

9.3 For GCTs dealing with POL and other hazardous material, specialized facilities inside the Terminal as well as in Railway yard (if required) shall be developed by the GCTO at its own cost, and shall be maintained by GCTO to ensure that no untoward incident/ accident takes place at such facilities.

10. **Authorized Users**

10.1 GCTO shall inform Railway about the authorized rail users of the GCT before notification, so that they may be incorporated in the TMS module of FOIS.

10.2 If the GCTO desires to add more rail users subsequently, GCTO shall inform Railway at least seven (07) working days in advance, to enable incorporation of such rail users in FOIS.

11. **Commodities Permitted**

11.1 Unless otherwise specified by Indian Railway, a GCT shall be permitted to book and handle all traffic – including coal and coke, which shall be as per the guidelines of 'preferential traffic schedule' issued by Ministry of Railways from time to time.

12. **Engine-on-Load (EOL) Scheme**

12.1 All new GCTs shall be set up on 'charging on through distance basis,' as per the instructions contained in Rates Master Circular on 'Freight on Through Distance Basis issued on 24.09.2014 (Annexure 'A' of the policy), as modified from time to time.

12.2 All new GCTs charged on through distance basis shall be governed by the Engine-on-Load policy (FM Circular No.05 of 2013 dated 07.03.2013), as modified from time-to-time.

12.2.1 Railway may permit commissioning of a new GCT on non-EOL basis with the approval of DRM, if Engine-on-Load scheme is not operationally feasible.

13. **Charging of Commercial Staff**

13.1 No cost of commercial staff will be charged from the GCTO w.e.f the date of issue of this policy. However, for existing Terminals (*where PFT/ Private Siding Agreement has already entered into between RA and operator before the issue of this Policy*) where cost of commercial staff has already been deposited by the GCTO, there shall be no refund. Further, dues of commercial staff cost pending, if any, as on the date of issue of this policy shall be payable by GCTO.

14. **Provision of Weighbridge**

14.1 All GCTs planning to deal with outward cargo (loading) shall have a provision of Electronic In-motion Weighbridge (EIMWB) at a suitable location inside the Terminal. The EIMWB shall comply with OIML (International Organization of Legal Metrology)

07/07/2022

document (available at https://www.oiml.org/en/files/pdf_r/ r106-2-e12.pdf) and the latest RDSO specifications.

14.1.1 Provision of EIMWB shall not be essential for GCTs dealing with inward cargo (unloading) only.

14.1.2 If a GCT without an EIMWB plans to start loading, the GCTO shall make arrangement for provision of an EIMWB as per the provisions of the Policy. DRM, in consultation with CFTM of the Railway, may, however permit loading at a GCT (if operationally feasible) – by nominating an alternative Railway weighbridge for weighment of rakes, awaiting installation of EIMWB, for a period of up to six months at a time from the date of start of such loading, duly recording the reasons for the same.

14.2 GCTO shall bear the cost of procurement (inclusive of the requisite warranty and a post-warranty comprehensive Annual Maintenance Contract (AMC) till the end of codal life), installation, and replacement of the EIMWB at the end of its codal life. GCTO shall also bear the cost of weighbridge house, weighbridge siding, and related infrastructure.

14.3 GCTO shall get the weighbridge certified by the Weights & Measures department of the state government, and shall comply with all the applicable statutory and legal requirements.

14.3.1 The weighbridge, after testing and certification by the Weights and Measures department of the state government, shall be sealed by their personnel in presence of GCTO's and Railway's representatives. This seal shall be broken, if required, only in the presence of the personnel of Weights and Measures department and Railway's representative.

14.4 GCTO shall bear the cost of manpower to operate the EIMWB, and the cost for its linking with FOIS.

14.5 RR will be issued on the basis of weighment within a GCT as per the extant instructions provided vide Rates Master Circular/Weighment/2019/0 dated 25.07.2019 and other applicable instructions of Railways (Annexure 'B' of the policy), as modified from time to time.

14.6 No extra free-time will be provided for weighment at an EIMWB inside a GCT.

14.7 Railway Administration reserves the right to conduct periodic and/or surprise inspections of the operation, functioning and calibration of EIMWB.

14.8 For the purpose of mandatory testing of EIMWB, test-wagons shall be provided by Railway on payment of Haulage Charges. These Haulage Charges shall be levied for the actual distance travelled or 100 km, whichever is less.

14.8.1 In cases where there is more than one weighbridge located within a GCT, the Haulage Charges as per para 14.8 above shall be levied for the 'first weighbridge,' and shall be levied @25% of the charges for the 'first weighbridge' for other weighbridges inside the Terminal.

14.8.2 For random surprise testing by Railway, test-wagons will be provided for without levying Haulage Charges or any other charges.

14.8.3 Railway shall try to ensure availability of 'test wagon-sets' in the vicinity of all GCTs, so that there is no delay in arranging these wagons for testing.

14.9 If any overloading is detected in the outward traffic the same will have to be unloaded/ re-adjusted at the Terminal itself – for which no extra free-time will be provided.

14.10 Whenever the EIMWB goes out of order, it shall be put right by the GCTO within three days, failing which a penalty of Rs 4,000/- per day or part thereof for the next ten days, and Rs 8,000/- per day or part thereof thereafter, shall be imposed.

14.11 Under exceptional circumstances, if it becomes essential to install the EIMWB of a GCT either partially or wholly on Railway land not licensed to GCTO (on account of operational and technical constraints), permission for the same may be given by the

07/07/2022

DRM. Location of such an EIMWB shall be decided by Sr.DOM, in consultation with Sr.DCM, Sr.DEN & Sr.DME.

14.11.1 All terms and conditions applicable on EIMWB inside a GCT shall also be applicable on an EIMWB installed by GCTO on such land. However, Railway will be the executing agency for installation, operation, and maintenance of such EIMWBs.

14.11.2 Cost of the comprehensive AMC and manpower to operate such EIMWB shall be borne by the GCTO.

14.11.3 Railway will be free to weigh rakes other than those of the concerned GCT at such EIMWB.

14.12 Railway may permit weight-o-meter/ pre-weighbin system of weighment in GCT on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager, keeping in view the requirement and to avoid any manipulation of weighment data.

14.12.1 Such equipment shall be certified by Weights & Measures department, and should also meet all extant statutory provisions and policy guidelines.

14.12.2 The system should have proper locking/ sealing arrangement to avoid any tampering with the system including software. The 'admin' control should rest with the Railways.

14.12.3 One-to-one correspondence between Weight-o-meter discharge and corresponding wagon shall be maintained by GCTO.

14.12.4 A procedure order for normal operations covering precautions to be taken to ensure that wagons are empty before loading and periodical test weighing of this system shall be maintained by GCTO.

14.12.5 The system should have interface with FOIS to avoid any error in data capture during transmission.

14.13 GCTO may also be permitted to install an alternative means of weighment of wagons, which should have accuracy level at least equal to that of EIMWB and should ensure weighment within the time taken by EIMWB.

14.13.1 GCTO shall submit request for such alternative means of weighment, along with all the necessary documents, which may be permitted by Railway on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager.

14.13.2 GCTO shall be responsible for getting the proposed means of weighment of wagons certified by Legal Metrology/ Weights & Measures department, and also for ensuring its proper upkeep and maintenance at its own cost.

15. Installation of FOIS and TMS

15.1 FOIS and TMS with limited access as prescribed by Indian Railways shall be installed at the GCT – at the cost of GCTO. All RRs will be prepared through TMS. Complete maintenance of FOIS and TMS will be done by Railway at its own cost.

15.1.1 Cost of replacement of FOIS and TMS equipment, at the end of their codal life, shall be borne by the GCTO.

16. General Conditions

16.1 Applicant/ GCTO will be solely responsible for – (a) arranging/ acquiring/ ownership/ lease/ licensing of non-Railway land for the development of GCT; (b) all statutory and non-statutory clearances from other government departments and statutory bodies; and (c) payment of all charges, taxes/ GST, surcharges, cess, levies, etc, related to transportation and handling of cargo.

16.2 For GCTs being developed entirely on non-Railway land, the portion of land required for linear connectivity of GCT with the serving Railway station may be acquired by Railway Administration on the specific request of applicant/ GCTO and at the cost of

07/07/2022

the applicant/GCTO, under the 'Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013'/ 'The Railway Act, 1989'.

16.2.1 An estimate of the cost of the land, prepared by Railway Administration in consultation with the Land Acquisition Officer, will be presented to the applicant, who shall deposit the amount before any further action is initiated for the acquisition of land. The applicant shall also agree to pay on demand such excess cost, if any, as may be incurred for the acquisition of this land.

16.2.1.1 The applicant shall also agree to compensate Railway if any extra cost is incurred by Railway arising out of such acquisition, even after commissioning of the Terminal.

16.2.2 Ownership of the land so acquired will vest with Railway, and the applicant for the Terminal shall have no right or claim thereto.

16.2.3 The entire cost of Railway infrastructure to be developed on such portion of acquired land will be borne by the GCTO, however the ownership of assets so created on such land will rest with Railway. Railway will reserve the right to grant connectivity to other Gati Shakti Cargo Terminal(s) taking off from the track passing over this land.

16.3 Unless otherwise mentioned in this policy, all 'Commercial and Operating rules' as applicable for a goods-shed for booking, supply and delivery of goods shall be applicable at GCTs.

16.4 The GCTO shall be responsible for clearance of all Railway dues, including demurrage charges, accrued within the GCT. For the sake of clarity, it is explicitly mentioned that demurrage charges will be borne by the GCTO for demurrage occurring on its own private land or occurring on railway land licensed to the GCTO.

16.5 The cost of electricity/ diesel consumed by Railway locomotives shall be borne by Railway.

16.6 The GCTO shall provide at his own cost the level-crossings and ROB/ RUB/ LHSs for safe passage of trains as well as road vehicles, as per requirement and prescribed norms.

16.6.1 All level-crossings have to be provided with requisite infrastructure (gate-post, gate-lodge, etc) and have to be manned by GCTO at its own cost.

16.6.1.1 If the level-crossing becomes due for interlocking, the cost of interlocking shall be borne by the GCTO.

16.6.2 Maintenance of level-crossings falling on the track being maintained by Railway shall be done by Railway at its own cost; while maintenance of level-crossings falling on the track being maintained by the GCTO shall be done by GCTO (as illustrated in Section III of Schedule '3').

16.7 Railway shall reserve the right to grant connectivity to another GCT(s) from the portion of track on Railway land as well as from the portion of track which is being maintained (and assets are owned) by Railway. For the sake of clarity, Railway may permit connectivity to another Terminal from the connectivity portion of a Terminal – (i) on Railway land where the assets are owned and maintained by Railway; and (ii) on non-Railway land where the ownership of assets has been transferred to Railway by the GCTO, and the assets are maintained by Railway though the land is owned by the GCTO. This provision shall be applicable on non-Railway land for all new GCTs, as well as on existing Terminals who decide to migrate to this Policy and transfer the ownership of assets on their land to Railway.

16.8 The Railway land to be used for providing connectivity to a GCT (on non-Railway land) shall not be licensed to the GCTO. This land shall remain in the possession and control of Railway, and the infrastructure (track, signalling equipment, and OHE) developed on this land, though funded and constructed by the GCTO, shall also be owned by Railway – as per the provisions of para 5.1.2 & 5.1.3 of the Policy.

07/07/2022

16.9 For GCTs developed entirely on non-Railway land, Railway will levy Terminal Charges for each rake handled (as per the applicable guidelines), which will be reimbursed to the GCTO.

16.10 No Terminal Charges shall be levied on cargo for which GCTO himself is the consignor and/or the consignee.

16.11 No Terminal Access Charges will be levied for rakes of privately-owned wagons when handled at GCTs built entirely on non-Railway land.

17. Dispute Resolution

17.1 In case of any dispute arising in the interpretation of the Policy, the decision of DRM will be final and binding.

17.2 Conciliation: All disputes and differences of any kind whatsoever arising out of or in connection with the construction and operations of GCT shall be referred by the GCTO to Railway Administration through 'Notice of Dispute.' RA shall, within 30 days after receipt of the 'Notice of Dispute,' notify the name of conciliator(s) to the GCTO. The Conciliator(s) shall assist the parties to reach an amicable settlement in an independent and impartial manner within the terms of Agreement. If the parties reach agreement on a settlement of the dispute, they shall draw up and sign a written Settlement Agreement duly signed by Railway's representative (Sr.DCM), GCTO and conciliator(s). When the settlement agreement is signed, it shall be final and binding on the parties. The conciliators shall be paid fee as fixed by Ministry of Railways time to time, which shall be shared equally by the parties. For other issues related with Conciliation, terms and conditions defined under Indian Railways General Conditions of Contract 2020 may be followed.

17.2.1 The parties shall not initiate, during the conciliation proceedings, any reference to arbitral or judicial proceedings in respect of a dispute that is the subject matter of the conciliation proceedings.

17.2.2 The conciliation shall be carried out as per "The Arbitration and Conciliation Act, 1996 (26 of 1996) or any statutory modifications or re-enactment thereof" and the proceedings shall be terminated as per Section 76 of the above Act.

17.3 Arbitration: If the dispute is not settled through Conciliation (as mentioned in para 17.2), it shall be decided by reference to arbitration. Arbitration shall be carried out as per provisions available for arbitration in Indian Railways General Conditions of Contract 2020 for works contracts, as amended from time to time.

17.4 Governing Law & Jurisdiction: This Agreement is governed by and shall be construed in accordance with the laws of India. In case of any dispute and difference arises, the Court of the place, where Land License Agreement has been made, shall only have the jurisdiction to try such litigation.

18. Termination of the Agreement

18.1 Subject to the provisions in the Agreement, Railway Administration may terminate the Agreement with a GCTO operating a GCT in the event of any serious irregularity committed by the GCTO. This may include any grave breach of the terms and conditions of the Agreement, any default by GCTO, violation of The Railway Act,

07/07/2022

1989, or commission of an unlawful act which is not in-line with Good Industry Practices.

18.2 Before terminating the Agreement, RA shall first issue a Show Cause Notice, informing GCTO to submit representation within 30 days. If no response is received, or if the response of GCTO is not satisfactory, a written Notice of Termination specifying a grace period of 180 days shall be given to the GCTO, by Sr.DCM with the approval of DRM. However, if no reply to the Notice for Termination is received within 180 days of the issue of Notice for Termination, the Agreement with GCTO will stand terminated and the same shall be communicated by Sr.DCM to GCTO. No termination payment shall be made by RA to the GCTO.

18.2.1 If the GCTO submits a reply within 180 days, RA will take further course of action on the merit of the case.

18.3 The GCTO will also have the right to terminate the Agreement by giving a notice of 180 days to the Railway Administration in the event of any difficulty faced by the GCTO in smooth functioning of the Terminal for reasons attributable to Railway as laid down in this policy, or for any other reason internal to the GCTO. No termination payment shall be asked by Railway from GCTO.

18.4 Any dispute arising out of this Agreement will be resolved through the Dispute Resolution Mechanism as prescribed under Para 17 above.

19. ***Power To Stop Traffic And To Terminate Agreement In Certain Events:***

The Railway Administration shall have the absolute right to refuse at any time to allow their rolling stock to go on or be used upon the Terminal or any part or extension thereof and shall also be entitled to determine this Agreement at any time after the happening of any of the following events:

19.1 In the event of the Applicant failing to deposit within the time fixed for the purpose any sum of sums required to be deposited under the provision of these presents or according to any direction of the Railway Administration.

19.2 In the event of the Applicant failing to pay any other sums payable to the Railway Administration under this Agreement or any other changes payable to the Railway administration in respect of the terminal or the use thereof within one month after the due date of payment or in the event of a due date not being specified then within one month after service of a written-demand for payment.

19.3 In the events of the Applicant failing to comply with any requisition of the Railway Administration to remove or repair any defect which in the opinion of the Railway administration may endanger the working and safety of the terminal within such time as shall be fixed by the Railways Administration for the purpose.

19.4 In the events of the Applicant ceasing for a consecutive period of 3 (three) months to use the terminal or any part for extension thereof for the Applicant's own traffic in connection with the Applicant's Works.

19.5 In the event of the Applicant contravening the provision of Clause 15 hereof.

19.6 In the event of the Applicant failing to observe or perform any other obligation on his part herein contained.

19.7 In the event of the terminal becoming dangerous or defective by reason of any act of God or other act or circumstances for which the Railway Administration is not responsible.

19.8 In the event of any branch line, terminal or part or extension thereof, connecting the terminal or any part or extension thereof with the Railway system, becoming dangerous or defective for any reason whatsoever and whether such branch line, terminal part or extension shall belong to the Applicant or to any third person.

07/07/2022

19.9 *In the event of any branch line, terminal or any part or extension thereof connecting the terminal or any part or extension thereof with the Railway system, being closed by the Railway Administration under any powers which the Railway Administration may possess whether by status or by Agreement with third persons or closed by order of the Government of India or any State Government.*

The Applicant shall have no claim whatsoever against the Railway Administration in respect of any refusal by the Railway Administration to allow their rolling stock to go on or be used upon the terminal or any connected Terminal or branch line in any of the aforesaid events.

Provided always that on the happening of any of the events mentioned in sub-Clauses 21.1, 21.2, 21.4, 21.5, 21.6, the Railway Administration shall not exercise the power conferred upon it by this Clause unless 14 (Fourteen) days' previous notice has been given in writing requiring the Applicant to comply with the demand or requisition as the case may be, of the Railway Administration and the Applicant has failed to comply with the Same within the time specified in such notice.

No notice shall be required to be given in the cases specified in the other sub-clauses of this clause.

20. ***Termination of Agreement on Death. Insolvency etc. :***

This agreement may be determined by the Railway Administration without prior notice at any time after the happening of any of the following events:

20.1 *In the event of the death of the Applicant, if he is an individual person.*
20.2 *In the event of a partition of the Joint family properties, if the Applicant is a Joint family governed by the Mitakshara School if Hindu Law.*
20.3 *In the event of dissolution of partners either by act of parties or by order of Court, if the Applicant is a firm or other association or body of individuals.*
20.4 *In the event of dissolution of partners either by act of parties or by order of Court, if the Applicant is a firm or other association or body of individuals.*
20.5 *In the event of Applicant becoming insolvent or going into liquidation either voluntarily or under an order of a competent Court.*
20.6 *In the event of the Applicant's interest in the works becoming wholly or partially vested in some other person.*
20.7 *In the event of the Applicant contravening the provision of Clause 21 hereof.*

21. ***Agreement To Bind Applicant Until Terminated By The Railway Administration***

21.1 *Until terminated by the Railway Administration or unless and until the person or persons in whom the entire rights and interests of the Applicant have vested and with wham the Railway Administration has agreed to enter into a Cargo Terminal Agreement has executed and registered such Agreement in the same form as these presents or in such other form as the Railway Administration may require as provided in Clause 21 hereof, this Agreement shall be binding upon the Applicant and the successors in title or interest of the Applicant in the Applicant's work*

(i) Provided that the Applicant may by giving 6 (six) months' notice to the Railway Administration, discontinue the use of the terminal. In such event, the Applicant shall not be liable for the payment of maintenance and other charges under the Agreement for the period subsequent to the date of expiry of the said notice, but nevertheless all other obligatians under the Agreement shall binding on him.

(ii) Provided further that the Railway Administration has the right without assigning any reason to terminate this Agreement on 6 (six) months' notice.

07/07/2022

22. ***Right To Charge Interest On Money Due Hereunder To The Railway Administration:***
Notwithstanding anything contained in the foregoing Clauses of this Agreement, the Railway Administration shall have the right to charge and recover from the Applicant interest at such rates, as may be fixed by the Railway Administration from time to time on any or all sums payable by the Applicant under the terms thereof, if such sums are not paid within one month from the due date and if no such date is fixed, within one month from the date on which a written demand is made by the railway Administration.

23. ***Right Of Deduction Of Money Due To The Railway Administration***

The Railway Administration shall have the right to deduct from any amount which may become payable by the Railway Administration to the Applicant or to the legal representative of the Applicant any money due from the Applicant to the Railway Administration under these presents or for freight, haulage or other charges or otherwise in connection with the construction, maintenance or working of the terminal.

24. ***Service Of Notices On Applicant:***
The Applicant shall maintain a proper office to which all letters, notices, demands and other communications intended for the Applicant may be sent and every notice, demand or other communication which shall be delivered at or sent by Registered Post to such office shall for all purposes whatsoever be deemed to have been validly and effectively delivered to the Applicant.

25. ***Exercise Of Powers :***
Subject as otherwise provided in this agreement, all notices to be given on behalf of the President of India and all other actions to be taken on his behalf may be given or taken on his behalf by the Railway Administration; the agreement signing authority or his authorized representative.

26. ***Alteration / Variation Of The Agreement:***
Except as hereby provided any verbal or written arrangement or abandoning, varying or supplementing this Agreement or any of the terms hereof shall be deemed conditional and shall not be binding on the railway administration unless and until the same is endorsed on this agreement or incorporated in a formal instrument and signed by the parties hereto and till then the Railway administration shall have the right to repudiate such arrangement.

27. ***Applicant Not To Transfer Rights ;***

27.1 The Applicant shall not be entitled to assign or transfer or subject or permit to be used or enjoyed by any other person in any manner whatsoever any of the rights or benefits conferred upon the Applicant by these presents and any purported assignment transfer or subletting or permission shall be void and of no effect. Provided also that in the event of any other person being permitted by the Railway Administration to use the terminal on the Applicant's request or otherwise, the Applicant shall remain responsible to the Railway Administration for all the charges and obligations under this Agreement.

27.2 Provided, however, that if the Applicant shall desire to transfer the Applicant's Works to any person or if the applicant being a Company shall go into liquidation and such intended transferee or the liquidator of the Company shall desire the use and benefit of the terminal than subject to the under mentioned conditions being complied with the Railway Administration may at its discretion on the written request of the Applicant and of the intended transferee or liquidator made prior to the transfer or within one month after the commencement of the liquidation as the case may be and after production by the transferee of the registered Deed of Transfer of the Applicant's Works pr after proof by the liquidator of this intension to carry on the Company's business for the purpose of

07/07/2022

the liquidation proceedings, allow the transferee or liquidator the use and benefit of the terminal. The conditions above mentioned are the following:

(i) That the liquidator shall be approved by the Railway Administration, but such approval will not unreasonably withheld.

(ii) That the liquidator shall duly sign and register a Cargo Terminal Agreement in the same form as these presents so far as then applicable or in such other form as the Railway Administration may then require.

(iii) That the applicant, Railway Administration and transferee shall duly execute an agreement of assignment as may be prescribed by the Railway Administration.

28. ***Cost of Execution Of Agreement:***
All expenses in drawing up the Agreement and the cost of stamping and registration shall be borne by the TO/Applicant. "Money receipt obtained from the Registration Office should be handed over to the Railways for collection of registered agreement which shall remain in the custody of Railways. Any charges, if levied for collection of registered agreement, shall also be borne by the Applicant.

29. **Agreement period**

The period of Agreement for operation of Gati-shakti Rail Cargo Terminals shall be for a maximum period of 35 years, which can be renewed further according to the rules and procedures applicable at the time of renewal.

30. **Agreement In Force From :**
The agreement shall be deemed to have come into force on and from……..

31. **Head Notes :**
The head notes herein are for the convenience of reference only and shall not affect the construction of these presents.

In WITNESS WHEREOF, the parties to these presents have set and subscribed their respective hands and seals hereunto on the day and year first above written.

Cargo Terminal Agreement-
Reg. No.: _____ For _____ Terminal
At Kilometre: _____ Between Stations _____ and _____

07/07/2022

Model Agreement for Gati Shakti Multi-modal Cargo Terminal (fully/partially) on Railway Land

_____Railway
'Gati-Shakti Rail Multi-modal Cargo Terminal' Agreement

This **Agreement** is made and executed at ……..on this ……. Day of ……., 20…….

BY AND BETWEEN

THE PRESIDENT OF INDIA acting through (incorporate name and designation of the officer authorized under Article 299(1) of the Constitution) having its office at ……. (hereinafter referred to as "**The Railway Administration**" which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the One Part;

AND

……. [hereinafter referred to as **("Applicant or GCTO")*** which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the Other Part.

WHEREAS The Applicant is desirous of having a Cargo Terminal laid by the Railway Administration at _____ from the _____station yard of the _____ Railway taking off from ;Kilometer No. _____ between_____ station and_____ station of the Railway as shown in red and green on the plan bearing CE's No. _____ hereto annexed for the purpose of carrying on the Applicant's business in the Applicant's premises situated at _____ _ District _____

AND WHEREAS the Railway Administration is willing to lay the said cargo terminal for the said Applicant upon and subject to the terms and conditions hereinafter set forth.

NOW, Therefore, this Agreement witnesseth as follows:

1. **Interpretation**: In these presents, unless the context otherwise requires, the following Words and Expressions have the meaning and shall be interpreted as specified, namely-

Words importing the singular number include the plural number and vice versa.

"Person" includes a firm or other association or body of individuals and a Company or other Corporate Body.

"The Railway Administration" means and includes the General Manager for the time being of (name of Zonal Railway) Railway and any officer of the (name of Zonal Railway) Railway authorized by any such General Manager to deal with any matters, with which these presents are concerned.

"The Applicant" means the person named as party hereto of the other part and includes in the case of a firm or other association or body of individuals, the individual person or persons for the time being and from time to time constituting the association or body and, In the case of a company, corporation or body corporate the Successor in business of interest, such company, corporation or body corporate for the time being.

07/07/2022

"Works" means the premises belonging to or occupied or used by the Applicant which are connected with the (name of the Zonal Railway) Railway system by the terminal herein before mentioned,

"Undertaking" includes all land, railway lines, works, buildings, engines, rolling stock and other movable or immovable property now or at any time hereafter forming part of or pertaining to the (name of the Zonal Railway) Railway system as now or hereafter constituted and all engines and rolling stock (whether belonging to the _____ Railway system or not) passing over such system.

"Terminal" Includes the Railway track connecting the Applicant's works with the Railway system, as hereinafter agreed to be constructed by the Railway Administration and all branches and extensions thereof which may hereafter be constructed by the Applicant or by the Railway Administration at the Applicant's request and all sleepers, ballast, embankments, bridges, tunnels, signals interlocking and tele-communication equipment gates, buildings and other constructions, erections, works and movable property constructed / erected / made/ provided or used in connection with the said track and also all land whereon or on part whereof the said track and connected things aforesaid are constructed / erected / made / provided or used including land acquired for the purpose thereof as hereinafter provided and land belonging to the Railway Administration and land belonging to or occupied or used by the Applicant.

The Cargo Terminal shall cover only that portion of track network on which Railway rolling stock will ply. The network utilized by the Company/Party for their internal use shall not form part of the Cargo Terminal defined herein."

"Sub-grade Work" includes the construction of embankments, the making of cuttings and the carrying out of other earth work, the construction of bridges (exclusive of girder works), buildings, platforms, tunnels, culverts, drains and openings and laying out of ballast and all other works necessary to permit the laying and construction of railway track of the terminal and generally all works which have to be abandoned, if the terminal be closed.

"Permanent Way Materials" includes girders, rails, sleepers, fastenings, points and crossings, fencings, signaling, interlocking and telecommunication equipment and over-head structure and any other things connected therewith for electric traction and other machinery (except station machinery) and equipments necessary for working the terminal.

"Legal Representative" means any person who is competent to give the Railway Administration a valid discharge in respect of any money or property which may be payable or deliverable to the Applicant and shall include the executor and administrator of a deceased person, a succession certificate holder, the surviving or continuing partners or members in the case of a firm, association or body of individuals, the certificated guardian if a minor's property, the committee of lunatic, the assignee or receiver of an insolvent's estate, the liquidator of a Company, a receiver and any person legally appointed to represent the estate of the Applicant.

Meaning of other key terms not mentioned above, shall be same as given in para 2 (Definitions) of the Gati Shakti Multi-modal Cargo Terminal Policy issued vide Freight Marketing Master Circular/2021 dated 15.12.2021.

* **Note**: Forms Of Description Of The Applicant –

07/07/2022

(Where a single person is the Applicant) "and A.B. (insert full name) of (insert address and occupation)"

(Where two or more persons are Joint Applicants), "and A.B. (insert full name) of (insert address and occupation) and C.D.: (insert full name) of (insert address and occupation)".

(Where a single person trading under a different fee name is the Applicant) "and A.B. (Insert full name) of (insert address and occupation) carrying an business under the name or style of (insert name) at (if the business is carried on at a different address from the address already Inserted then insert such additional address)."

(Where a partnership firm is the Applicant and the names of the partner known), "and A.B. (Full name) and C.D. (full name) carrying on business partnership as (insert nature of business) under the style or firm of (insert name or style of the firm and address).

(Where a partnership firm is the applicant and the names of partners are not known), "and A &Co. (insert name or style of the firm) a partnership firm carrying on business at (insert address) as (insert nature of business)."
(Where an incorporated Company is the Applicant), "A.B. &CO. Ltd. a company incorporated in (Insert country of incorporation (e.g. India, England or elsewhere, as the case may be) and having its registered office at (insert address)" (in the case of a company incorporated elsewhere than in India address) "and its principal office in India at (insert address)".

(Where the Applicant is a joint family governed by the Mitakshara School of Hindu Law), "A.B. (insert full name) for self and as Karta or managing member of the Joint family, governed by the Mitakshara School of Hindu Law, carrying on business under the name or style of (insert name under which the joint family business is carried on) at (Insert address) and C.D.E.F.G.H. etc. (insert full name) being the other adult members of the said Joint family.

2. **Agreement To Construct Gati Shakti Multi-Modal Cargo Terminal (GCT) :**

Subject to the terms and conditions hereinafter contained, the Railway Administration shall at the cost and expense of the Applicant in all respects, construct partly or fully on the land of the Railway Administration and partly or fully on the land of the Applicant of the said Cargo Terminal, from _____ (length of terminal) Kilometers on _____ (name of portion) Branch as shown in red and green on the plan annexed hereto (bearing CE's No. _____) connecting the Applicant's work known as _____ situated at or near _____ in the District of with the system at or near _____ on _____ Railway.

3. Railway land where GCT is developed partially or wholly on railway land (except for Railway land provided for the connectivity to GCT as mentioned in para 13 of Schedule 1 & 2 of the Gati Shakti Multi-modal Cargo Terminal Policy issued vide Freight Marketing Master Circular/2021 dated 15.12.2021) will be licensed to GCTO – for which modalities of calculating and levying land license fee shall be as per extant rules/Board's circular on land licensing (2005/LML/18/8 dated 10.02.2005 and 08.6.2005), as amended from time to time.

3.1 A separate Land Licensing Agreement shall be executed between the Railway administration and the GCTO as per Annexure

4. **Capital Cost of GCT**

07/07/2022

4.1 The GCTO shall bear the entire capital cost of new GCT from the take-off point onwards, as marked on the Engineering Scale Plan (ESP) at the serving station.

4.1.1 For the linear connectivity portion of GCT passing through the Railway land, GCTO shall provide only the minimum essential infrastructure of track, OHE and signalling equipment at the cost of GCTO (other assets not related to track, signalling, or OHE, if required, shall be constructed by Railway at its own cost). In case of any dispute, the decision of DRM shall be final in this regard.

4.1.2 The ownership of infrastructure including the track, signalling equipment and OHE created on Railway land under para 5.1.1 of Master Circular on Gati Shakti Multi-modal Cargo Terminal Policy dated 15.12.2021 (**hereinafter referred to as the policy**) shall belong to Railway, even though the capital cost for these shall be borne by the GCTO.

4.2 The capital cost for all common-user traffic facilities at the serving station (as marked on the ESP), including Signalling & Telecommunication works, modification and up-gradation to existing interlocking/ OHE, or electrification in future within the station limit up to take-off point, shall be borne by the Railway.

4.3 Maintenance and operation of assets created under para 5.2 of the policy (common-user traffic facilities) at the serving station including staff costs, shall be the responsibility of the Railway.

4.4 The capital expenditure required for augmenting or up-grading the facilities and infrastructure on the connectivity portion from take-off point onwards towards Terminal and within the premises of Terminal shall be borne by the GCTO.

4.5 The connectivity to GCTs shall normally take-off from the existing serving station. However, in case when it is operationally not feasible to provide a connection from an existing serving station, provision of a Block Hut/ Block station (between two existing stations) with required points & crossings may be considered, provided it is operationally feasible. This will be done on the request of GCTO.

4.5.1 In such cases, the entire capital cost of the new Block Hut/ Block station and related infrastructure shall be borne by the GCTO. However, this work will be executed by Railway, and ownership of the same shall remain with the Railway.

4.5.2 However, for new GCTs planned to load one million Tonne or more (outward traffic) per annum, the capital cost of new Block Hut/ Block station will be repaid to the GCTO by Railway.

4.5.2.1 The repayment of capital cost of the new Block Hut/ Block station will be made by Railway through 10% rebate on the outward traffic loaded at the Terminal, till such time the capital cost has been repaid to the GCTO. This 10% rebate shall be granted on the normal tariff rate (NTR) of the commodity.

4.5.2.2 The repayment of capital cost as mentioned in para 4.5.2.1 above will be done only if the Terminal achieves the target of loading one million Tonne per annum within two Calendar Years of commissioning (excluding the year of commissioning). For example, if a GCT commissioned during calendar year 2022 achieves one million Tonne loading during calendar year 2024, then the repayment of capital cost of new Block Hut/ Block station (through 10% rebate on outward traffic) shall start from 01st April 2025.

07/07/2022

4.5.2.3 This repayment shall be made for the investment made by the GCTO on behalf of Railways. As such, this repayment through freight rebate shall be admissible over and above all other rebates that the GCTO may become eligible for in future.

4.5.2.4 This provision of repayment shall be applicable only for GCTs for which Agreement between RA and GCTO has not been entered into till the date of issue of this Policy.

5. **Sub-Grade Work** :

The sub-grade work, culverts & bridges, drains, pitching & protection work and ballast supply shall be carried out at the cost and expense of the Applicant either by his own agency or by the Railway Administration on his request. When the works or part of them are carried out by the Applicant, the work shall conform to the Railway Administration's drawings and specifications and shall be executed under the supervision of Engineering staff of the Railway Administration or under the supervision of Approved Consultant.

6. **Security of Assets**

6.1 The responsibility of security of railway assets over Railway land shall be of Railways. However, the responsibility of security of railway assets outside Railway Land or on land licensed to GCTO shall be of GCTO.

6.1.1 In case of theft of any railway asset on non-Railway land or railway land licensed to GCTO, the maintenance of which is with Railway, the restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

6.1.2 In case of theft of OHE including OHE on non-Railway land or railway land licensed to GCTO, restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

7. **Maintenance of Assets**

7.1 Maintenance of assets on Railway land (excluding the Railway land licensed to GCTO), including Track and Signalling Equipment installed on Railway land under para 5.1.1 of the policy, shall be done by Railway at its own cost.

7.2 Maintenance of OHE from the take-off point onward including inside the Terminal shall be done by Railway at its own cost – as this involves safety of men and equipment, and can also impact rail operations outside the Terminal boundary.

7.3 In addition to above, the maintenance of assets (track, bridges, signalling equipment, etc) on non-Railway land including the land licensed to GCTO, ***outside the Terminal***, may also be done by Railway at its own cost if the GCTO transfers the ownership of these assets to Railway (the ownership of land on which such assets are created shall however continue to be with GCTO). Provided further, this provision shall be applicable only to those GCTs where freight tariff is charged on 'through distance basis.'

7.3.1 In case maintenance of assets, including Track and Signalling Equipment, is being handed over to Railways on migration to this policy by GCTO, the GCTO will ensure that the standards of track and signalling infrastructure being transferred to Railway is in accordance with the prescribed standards for GCTs, as decided by Railways (Annexure 'D' of the policy). If any up-gradation/ replacement/ renewal of any infrastructure is required, the GCTO shall bear the cost for the same.

07/07/2022

7.3.2 In case of damages to the assets due to accident, etc, the replacement shall be done by Railway. However, if the responsibility of accident, after Enquiry (joint enquiry by representatives of Railway as well as GCTO), is fixed on the GCTO – the GCTO shall have to bear the cost of all the replacements. The decision of the Nodal Officer, i.e. DRM, in this regard shall be final.

7.3.3 In case the damage to assets is due to an external cause (floods, breaches, terrorist activity, etc), the cost of restoration shall be borne by the GCTO.

7.3.4 If the GCTO does not agree to transfer the ownership of assets (track, bridges, signalling equipment, OHE, etc) to Railway or freight tariff is not chargeable 'on through distance basis'; the maintenance of these assets – except OHE – shall continue to be the responsibility of GCTO.

7.3.4.1 Railway shall be entitled to conduct periodic inspections of such GCTs being maintained by the GCTO, for which Inspection Charges will be levied as per the prescribed norms.

7.3.4.2 GCTO may also get the maintenance done through Railway for such Terminals, in which case Maintenance Charges shall also be levied as per the prescribed norms.

7.3.5 The maintenance of GCT yard, including loading/ unloading lines, shall be the sole responsibility of GCTO. Distribution of the responsibility of track has been explained in Schedule '3'.

7.3.6 At such GCTs, Railway shall maintain the signalling equipment till the line-clear/ receipt-despatch arrangement with serving station(s), at its own cost. Maintenance of signalling equipment internal to the Terminal shall be the sole responsibility of the GCTO.

7.4 The cost of all subsequent up-gradations (on account of change of technology, standards, etc) shall be borne by the GCTO.

7.5 Maintenance of all the infrastructure and equipment inside the GCT which are not to be accessed by Railways' rolling-stock, and maintenance of infrastructure required for loading/ unloading (tipplers, hoppers, etc) shall be the responsibility of GCTO.

8. Cost of Electrification

8.1 In case of new GCT, the entire cost of electrification of the Terminal and the connectivity portion between take off point and GCT, shall be borne by the GCTO.

8.2 While undertaking electrification of main line and serving station by Railways, the electrification of the existing GCT(s) including the rail-line connecting the Terminal(s) shall be undertaken at the Railway's cost.

9. Handling of Wagons in GCTs:

9.1 If any damage and deficiencies is caused to railway wagons due to the fault of the GCTO, the damage and deficiency charges shall be raised by Railway and paid by the GCTO as per the extant rules of Railways.

9.2 All tipplers and bulk handling systems used for loading/unloading of Railway wagons shall be provided and commissioned by GCTO at its own cost in accordance with the RDSO's approved specifications. This provision shall however not be applicable on the systems/ equipment installed by GCTO which are not to be used for handling Railway wagons (such as conveyor-belts, JCBs, excavators, etc).

07/07/2022

9.2.1 GCTO shall ensure that tipplers, bulk handling systems, and mechanized equipment are operated only by the qualified and experienced staff under adequate supervision.

9.2.2 Such equipment shall be regularly maintained and replaced at the end of their codal life by GCTO at its own cost.

9.2.3 In case of any accident/ derailment inside the Terminal or outside the Terminal up to serving station, Railway will provide Accident Relief Train (ART) initially free of cost. Provided further, if the responsibility of accident/ derailment after enquiry is fixed on the GCTO, ART Charges shall be payable by GCTO as prescribed by Railway from time to time. The due Charges will be deducted from the future payments by Railway to GCTO. However, in case no regular payments are being made by Railway to GCTO, on demand from Railway, the GCTO shall pay ART Charges to Railway without any delay.

9.2.4 The accident enquiry as mentioned in para 9.2.3 above shall be conducted jointly by the representatives of Railway and GCTO to be nominated by DRM and GCTO respectively. The accepting authority of Enquiry Report shall be DRM, whose decision shall be final and binding on GCTO.

10. C&W Maintenance Facilities

10.1 Normally C&W facilities shall not be constructed at GCTs.

10.2 However, if C&W facilities are operationally required at any GCT as per the extant instructions, only one-time capital cost for setting-up these facilities shall be borne by the GCTO. Operational costs, including staff cost and material cost (for Railway-owned stock), shall however be borne by the Railway.

10.3 For GCTs dealing with POL and other hazardous material, specialized facilities inside the Terminal as well as in Railway yard (if required) shall be developed by the GCTO at its own cost, and shall be maintained by GCTO to ensure that no untoward incident/ accident takes place at such facilities.

11. Authorized Users

11.1 GCTO shall inform Railway about the authorized rail users of the GCT before notification, so that they may be incorporated in the TMS module of FOIS.

11.2 If the GCTO desires to add more rail users subsequently, GCTO shall inform Railway at least seven (07) working days in advance, to enable incorporation of such rail users in FOIS.

12. Commodities Permitted

12.1 Unless otherwise specified by Indian Railway, a GCT shall be permitted to book and handle all traffic – including coal and coke, which shall be as per the guidelines of 'preferential traffic schedule' issued by Ministry of Railways from time to time.

13. Engine-on-Load (EOL) Scheme

13.1 All new GCTs shall be set up on 'charging on through distance basis,' as per the instructions contained in Rates Master Circular on 'Freight on Through Distance Basis issued on 24.09.2014 (Annexure 'A' of the policy), as modified from time to time.

13.2 All new GCTs charged on through distance basis shall be governed by the Engine-on-Load policy (FM Circular No.05 of 2013 dated 07.03.2013), as modified from time-to-time.

07/07/2022

13.2.1 Railway may permit commissioning of a new GCT on non-EOL basis with the approval of DRM, if Engine-on-Load scheme is not operationally feasible.

14. Charging of Commercial Staff

14.1 No cost of commercial staff will be charged from the GCTO w.e.f the date of issue of this policy. However, for existing Terminals (*where PFT/ Private Siding Agreement has already entered into between RA and operator before the issue of this Policy*) where cost of commercial staff has already been deposited by the GCTO, there shall be no refund. Further, dues of commercial staff cost pending, if any, as on the date of issue of this policy shall be payable by GCTO.

15. Provision of Weighbridge

15.1 All GCTs planning to deal with outward cargo (loading) shall have a provision of Electronic In-motion Weighbridge (EIMWB) at a suitable location inside the Terminal. The EIMWB shall comply with OIML (International Organization of Legal Metrology) document (available at https://www.oiml.org/en/files/pdf_r/ r106-2-e12.pdf) and the latest RDSO specifications.

15.1.1 Provision of EIMWB shall not be essential for GCTs dealing with inward cargo (unloading) only.

15.1.2 If a GCT without an EIMWB plans to start loading, the GCTO shall make arrangement for provision of an EIMWB as per the provisions of the Policy. DRM, in consultation with CFTM of the Railway, may, however permit loading at a GCT (if operationally feasible) – by nominating an alternative Railway weighbridge for weighment of rakes, awaiting installation of EIMWB, for a period of up to six months at a time from the date of start of such loading, duly recording the reasons for the same.

15.2 GCTO shall bear the cost of procurement (inclusive of the requisite warranty and a post-warranty comprehensive Annual Maintenance Contract (AMC) till the end of codal life), installation, and replacement of the EIMWB at the end of its codal life. GCTO shall also bear the cost of weighbridge house, weighbridge siding, and related infrastructure.

15.3 GCTO shall get the weighbridge certified by the Weights & Measures department of the state government, and shall comply with all the applicable statutory and legal requirements.

15.3.1 The weighbridge, after testing and certification by the Weights and Measures department of the state government, shall be sealed by their personnel in presence of GCTO's and Railway's representatives. This seal shall be broken, if required, only in the presence of the personnel of Weights and Measures department and Railway's representative.

15.4 GCTO shall bear the cost of manpower to operate the EIMWB, and the cost for its linking with FOIS.

15.5 RR will be issued on the basis of weighment within a GCT as per the extant instructions provided vide Rates Master Circular/Weighment/2019/0 dated 25.07.2019 and other applicable instructions of Railways (Annexure 'B' of the policy), as modified from time to time.

15.6 No extra free-time will be provided for weighment at an EIMWB inside a GCT.

15.7 Railway Administration reserves the right to conduct periodic and/or surprise inspections of the operation, functioning and calibration of EIMWB.

15.8 For the purpose of mandatory testing of EIMWB, test-wagons shall be provided by Railway on payment of Haulage Charges. These Haulage Charges shall be levied for the actual distance travelled or 100 km, whichever is less.

07/07/2022

15.8.1 In cases where there is more than one weighbridge located within a GCT, the Haulage Charges as per para 15.8 above shall be levied for the 'first weighbridge,' and shall be levied @25% of the charges for the 'first weighbridge' for other weighbridges inside the Terminal.

15.8.2 For random surprise testing by Railway, test-wagons will be provided for without levying Haulage Charges or any other charges.

15.8.3 Railway shall try to ensure availability of 'test wagon-sets' in the vicinity of all GCTs, so that there is no delay in arranging these wagons for testing.

15.9 If any overloading is detected in the outward traffic the same will have to be unloaded/ re-adjusted at the Terminal itself – for which no extra free-time will be provided.

15.10 Whenever the EIMWB goes out of order, it shall be put right by the GCTO within three days, failing which a penalty of Rs 4,000/- per day or part thereof for the next ten days, and Rs 8,000/- per day or part thereof thereafter, shall be imposed.

15.11 Under exceptional circumstances, if it becomes essential to install the EIMWB of a GCT either partially or wholly on Railway land not licensed to GCTO (on account of operational and technical constraints), permission for the same may be given by the DRM. Location of such an EIMWB shall be decided by Sr.DOM, in consultation with Sr.DCM, Sr.DEN & Sr.DME.

15.11.1 All terms and conditions applicable on EIMWB inside a GCT shall also be applicable on an EIMWB installed by GCTO on such land. However, Railway will be the executing agency for installation, operation, and maintenance of such EIMWBs.

15.11.2 Cost of the comprehensive AMC and manpower to operate such EIMWB shall be borne by the GCTO.

15.11.3 Railway will be free to weigh rakes other than those of the concerned GCT at such EIMWB.

15.12 Railway may permit weight-o-meter/ pre-weighbin system of weighment in GCT on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager, keeping in view the requirement and to avoid any manipulation of weighment data.

15.12.1 Such equipment shall be certified by Weights & Measures department, and should also meet all extant statutory provisions and policy guidelines.

15.12.2 The system should have proper locking/ sealing arrangement to avoid any tampering with the system including software. The 'admin' control should rest with the Railways.

15.12.3 One-to-one correspondence between Weight-o-meter discharge and corresponding wagon shall be maintained by GCTO.

15.12.4 A procedure order for normal operations covering precautions to be taken to ensure that wagons are empty before loading and periodical test weighing of this system shall be maintained by GCTO.

15.12.5 The system should have interface with FOIS to avoid any error in data capture during transmission.

15.13 GCTO may also be permitted to install an alternative means of weighment of wagons, which should have accuracy level at least equal to that of EIMWB and should ensure weighment within the time taken by EIMWB.

15.13.1 GCTO shall submit request for such alternative means of weighment, along with all the necessary documents, which may be permitted by Railway on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager.

15.13.2 GCTO shall be responsible for getting the proposed means of weighment of wagons certified by Legal Metrology/ Weights & Measures department, and also for ensuring its proper upkeep and maintenance at its own cost.

07/07/2022

16. **Installation of FOIS and TMS**

16.1 FOIS and TMS with limited access as prescribed by Indian Railways shall be installed at the GCT – at the cost of GCTO. All RRs will be prepared through TMS. Complete maintenance of FOIS and TMS will be done by Railway at its own cost.

16.1.1 Cost of replacement of FOIS and TMS equipment, at the end of their codal life, shall be borne by the GCTO.

17. **General Conditions**

17.1 Applicant/ GCTO will be solely responsible for – (a) arranging/ acquiring/ownership/ lease/licensing of non-Railway land for the development of GCT; (b) all statutory and non-statutory clearances from other government departments and statutory bodies; and (c) payment of all charges, taxes/GST, surcharges, cess, levies, etc, related to transportation and handling of cargo.

17.2 Unless otherwise mentioned in this policy, all 'Commercial and Operating rules' as applicable for a goods-shed for booking, supply and delivery of goods shall be applicable at GCTs.

17.3 The GCTO shall be responsible for clearance of all Railway dues, including demurrage charges & land license fee, accrued within the GCT. For the sake of clarity, it is explicitly mentioned that demurrage charges will be borne by the GCTO for demurrage occurring on its own private land or occurring on railway land licensed to the GCTO.

17.4 The cost of electricity/ diesel consumed by Railway locomotives shall be borne by Railway.

17.5 The GCTO shall provide at his own cost the level-crossings and ROB/ RUB/ LHSs for safe passage of trains as well as road vehicles, as per requirement and prescribed norms.

17.5.1 All level-crossings have to be provided with requisite infrastructure (gate-post, gate-lodge, etc) and have to be manned by GCTO at its own cost.

17.5.1.1 If the level-crossing becomes due for interlocking, the cost of interlocking shall be borne by the GCTO.

17.5.2 Maintenance of level-crossings falling on the track being maintained by Railway shall be done by Railway at its own cost; while maintenance of level-crossings falling on the track being maintained by the GCTO shall be done by GCTO (as illustrated in Section III of Schedule '3' of the policy).

17.6 Railway shall reserve the right to grant connectivity to another GCT(s) from the portion of track on Railway land as well as from the portion of track which is being maintained (and assets are owned) by Railway. For the sake of clarity, Railway may permit connectivity to another Terminal from the connectivity portion of a Terminal – (i) on Railway land where the assets are owned and maintained by Railway; and (ii) on non-Railway land where the ownership of assets has been transferred to Railway by the GCTO, and the assets are maintained by Railway though the land is owned by the GCTO. This provision shall be applicable on Railway land for all GCTs; and on non-Railway land for all new GCTs, as well as on existing Terminals who decide to migrate to this Policy and transfer the ownership of assets on their land to Railway.

17.7 For GCTs established entirely or partially on Railway land, Railway will levy Terminal Charges and Terminal Access Charges similar to those being levied on Railway goods-sheds. These Terminal Charges and Terminal Access Charges will be shared with the GCTO according to the quoted bid percentage (as mentioned in para 9 above of this Schedule '2').

07/07/2022

17.8 At the time of cancellation / termination / expiry of the Agreement, the Railway land, along with the entire infrastructure developed on it by the bidder, shall revert back to Railway on as-is-where-is basis, without payment of any compensation.

17.9 The Railway land used for providing connectivity to the Terminal shall remain in possession of Railway, along with the entire infrastructure created on it (as per provisions of para 5.1.2 & 5.1.3 of the Policy).

17.10 Railway land where GCT is developed partially or wholly on railway land (except for Railway land provided for the connectivity to GCT as mentioned in para 13 of Schedule 1 & 2) will be licensed to GCTO – for which modalities of calculating and levying land license fee shall be as per extant rules/Board's circular on land licensing (2005/LML/18/8 dated 10.02.2005 and 08.6.2005, Annexure-E of the policy), as amended from time to time.

17.11 Responsibility for maintaining the track and signalling equipment shall be as per the provisions of para 7 of this Policy. Responsibility of maintaining loading/ unloading wharf(s), roads, drainage, etc, shall rest with the GCTO.

17.12 GCTO shall also be responsible to ensure that the entire infrastructure of Terminal is properly maintained and is duly upgraded/ replaced at the end of codal life, as per Good Industry Practices.

17.13 For GCTs constructed fully or partially on Railway land, the GCTO shall be expected to give at least the prescribed annual bench-mark of traffic (outward plus inward combined, in NTKM) to Railway, which shall be commensurate with the value of Railway land earmarked for GCT, as under:-

Value of land	Bench-mark Traffic (in NTKM)
Up to Rs 10 crore	200 million
More than Rs 10 crore, & up to Rs 25 crore	500 million
More than Rs 25 crore, & up to Rs 50 crore	1,000 million
More than Rs 50 crore, & up to Rs 100 crore	2,000 million
More than Rs 100 crore	4,000 million

17.13.1 The Bench-mark Traffic shall be applicable from the Financial Year subsequent to the year of commissioning, and shall be revised at the time of each renewal/ extension of Land Licensing Agreement according to the revised value of land. For example, if a GCT has been commissioned during 2023-24, with the value of Railway land being Rs 20 crore – then the Bench-mark from the years 2024-25 onwards shall be 500 million NTKM. This Bench-mark Traffic shall be revised at the time of every renewal/ extension of Land Licensing Agreement.

17.13.2 If the GCTO achieves or surpasses the Bench-mark Traffic during any Financial Year, an incentive equal to 5% of the Land License Fee (which be levied as per the provisions of para 17.10 above) shall be granted for the next year provided that previous Land License Fee have been paid and there is no outstanding dues in this regard. For the example given in para 17.13.1 above, if the GCTO achieves Bench-mark Traffic during 2025-26, then an incentive equal to 5% of Land License Fees (as per the provisions of para 17.10) shall be granted for the year 2026-27.

07/07/2022

17.14 Subject to the provisions of para 17.10 above, GCTO will be free to create infrastructure and/or to provide value-added services/ facilities (such as warehousing, processing, packaging, etc. provided that such infrastructure/ value-added services/ facilities, if created, shall be available to all users of the GCT without discrimination of any sort. GCTO will also have the authority for deciding the user charges/ fees for value-added services/ facilities as per market conditions – without any interference from Railway. However, the use of value-added services/ facilities will be optional and no customer will be forced to use those services or to pay for them. Such value-added services/ facilities shall conform to Good Industry Practices.

17.14.1 GCTO shall not sub-lease/ sub-license/ mortgage Railway land, and shall not create any third-party encumbrance on Railway land.

17.14.2 For any value-added service/ facility developed on Railway land, GCTO shall ensure that either the complete inward traffic or the complete outward traffic, for each commodity handled, is transported through Indian Railway system. Railway reserves the right to undertake any inspection of the Terminal to safeguard its interests and to direct the GCTO to discontinue such activities if such activities are detrimental to Railway's cargo business, failing which the Agreement may be terminated. For avoidance of doubt, such termination will be treated as default by the GCTO.

17.14.3 The responsibility of obtaining all statutory and environmental clearances for such value-added services, if required, shall rest solely with the GCTO. Any violation of statutory compliance will invite merit for termination clause of the Agreement on GCTO's default. Any liability/ default created by such violation will be the sole responsibility of the GCTO, and Railway will not be responsible for this.

17.15 GCTO shall use Railway land for activities related to Railway cargo business only. If the GCTO indulges in any commercial activity not related to Railway cargo business on Railway land or fail to adhere to the provisions of para 17.14, 17.14.1, 17.14.2 & 17.14.3 above, the Agreement for GCT may be terminated without any compensation/ termination payment to the GCTO. For avoidance of doubt, such termination will be treated as default by the GCTO. In case of any dispute whether any activity is related to Railway cargo business or not, the decision of the nodal officer (i.e. DRM) shall be final and binding on the GCTO.

17.16 The GCT located completely or partially on Railway land will remain a common-user facility, and GCTO shall ensure non-discriminatory access for all rail-customers/ potential customers to such Terminals. The GCTO will not prevent any rail-customer/ potential customer from accessing the Terminal (provided the facilities for handling their cargo exists at the terminal). Road access to the GCT will not be blocked by the GCTO.

17.17 GCTO will have the permission to expand the Terminal further by acquiring/ leasing the adjacent non-Railway land. However, any such acquisition/ leasing of additional land will have to be managed by the GCTO through his own resources. Railway will not charge any Land License Fees for the additional land acquired by the GCTO.

17.17.1 In such cases, the levy of Terminal Charges and Terminal Access Charges – and their sharing with the GCTO – will continue as before as per the decided principle.

17.18 A joint team (comprising of Sr.DOM, Sr.DCM, Sr.DEN, Sr.DSTE & Sr.DEE/TRD) shall inspect the GCT at least once a year to ensure that there is no breach of Agreement or policy provisions by the GCTO. In addition, inspections may also be conducted by Railway officials as per the provisions of para 17.14.2 and 17.15 above.

07/07/2022

18. Dispute Resolution

18.1 In case of any dispute arising in the interpretation of the Policy, the decision of DRM will be final and binding.

18.2 Conciliation: All disputes and differences of any kind whatsoever arising out of or in connection with the construction and operations of GCT shall be referred by the GCTO to Railway Administration through 'Notice of Dispute.' RA shall, within 30 days after receipt of the 'Notice of Dispute,' notify the name of conciliator(s) to the GCTO. The Conciliator(s) shall assist the parties to reach an amicable settlement in an independent and impartial manner within the terms of Agreement. If the parties reach agreement on a settlement of the dispute, they shall draw up and sign a written Settlement Agreement duly signed by Railway's representative (Sr.DCM), GCTO and conciliator(s). When the settlement agreement is signed, it shall be final and binding on the parties. The conciliators shall be paid fee as fixed by Ministry of Railways time to time, which shall be shared equally by the parties. For other issues related with Conciliation, terms and conditions defined under Indian Railways General Conditions of Contract 2020 may be followed.

18.2.1 The parties shall not initiate, during the conciliation proceedings, any reference to arbitral or judicial proceedings in respect of a dispute that is the subject matter of the conciliation proceedings.

18.2.2 The conciliation shall be carried out as per "The Arbitration and Conciliation Act, 1996 (26 of 1996) or any statutory modifications or re-enactment thereof" and the proceedings shall be terminated as per Section 76 of the above Act.

18.3 Arbitration: If the dispute is not settled through Conciliation (as mentioned in para 18.2), it shall be decided by reference to arbitration. Arbitration shall be carried out as per provisions available for arbitration in Indian Railways General Conditions of Contract 2020 for works contracts, as amended from time to time.

18.4 Governing Law & Jurisdiction: This Agreement is governed by and shall be construed in accordance with the laws of India. In case of any dispute and difference arises, the Court of the place, where Land License Agreement has been made, shall only have the jurisdiction to try such litigation.

19. Termination of the Agreement

19.1 Subject to the provisions in the Agreement, Railway Administration may terminate the Agreement with a GCTO operating a GCT in the event of any serious irregularity committed by the GCTO. This may include any grave breach of the terms and conditions of the Agreement, any default by GCTO, violation of The Railway Act, 1989, or commission of an unlawful act which is not in-line with Good Industry Practices.

19.2 Before terminating the Agreement, RA shall first issue a Show Cause Notice, informing GCTO to submit representation within 30 days. If no response is received, or if the response of GCTO is not satisfactory, a written Notice of Termination specifying a grace period of 180 days shall be given to the GCTO, by Sr.DCM with the approval of DRM. However, if no reply to the Notice for Termination is received within 180 days of the issue of Notice for Termination, the Agreement with GCTO will stand terminated and the same shall be communicated by Sr.DCM to GCTO. No termination payment shall be made by RA to the GCTO.

07/07/2022

19.2.1 If the GCTO submits a reply within 180 days, RA will take further course of action on the merit of the case.

19.3 The GCTO will also have the right to terminate the Agreement by giving a notice of 180 days to the Railway Administration in the event of any difficulty faced by the GCTO in smooth functioning of the Terminal for reasons attributable to Railway as laid down in this policy, or for any other reason internal to the GCTO. No termination payment shall be asked by Railway from GCTO.

19.4 Any dispute arising out of this Agreement will be resolved through the Dispute Resolution Mechanism as prescribed under Para 18 above.

20. ***Power To Terminate Agreement, If Traffic Insufficient :***

20.1 Notwithstanding anything contained in the Agreement, the Railway Administration shall be entitled, in the event of the Railway Administration being of the opinion that the Applicant's traffic over the terminal is insufficient to justify the retention of terminal by the Applicant of which the 'Divisional Railway Manager' of the Railway Administration will be the sole judge to terminate this Agreement by giving to the Applicant not less than 6(six) months' notice in writing of the Railway Administration's intention to terminate this Agreement and on the expiry of such notice, this Agreement shall stand terminated.

20.2 The termination of this agreement under the provisions of this Clause shall be without prejudice to any rights of remedies to which the Railway Administration will be entitled to, in respect of any acts, matter or things arising before such termination.

21. ***Power To Close The Portion Of The Terminal Within Railway Land Colored Red In The Annexed Plan Or Work It For Public Traffic :***

21.1 In the event of the Railway Administration deciding in the public interest to close the terminal or any part or extension thereof or to work the terminal or any part or extension thereof for public traffic as part of the railway system (the decision of the Railway being final in this case and the service of the notice as hereinafter stated shall be conclusive evidence of the same) the Railway Administration may terminate this Agreement by giving to the Applicant 6(six) month's previous notice in writing of such decision and on the expiration of such notice this Agreement shall terminate.

22. ***Power To Stop Traffic And To Terminate Agreement In Certain Events:***

The Railway Administration shall have the absolute right to refuse at any time to allow their rolling stock to go on or be used upon the Terminal or any part or extension thereof and shall also be entitled to determine this Agreement at any time after the happening of any of the following events:

22.1 In the event of the Applicant failing to deposit within the time fixed for the purpose any sum of sums required to be deposited under the provision of these presents or according to any direction of the Railway Administration.

22.2 In the event of the Applicant failing to pay any other sums payable to the Railway Administration under this Agreement or any other changes payable to the Railway administration in respect of the terminal or the use thereof within one month after the due date of payment or in the event of a due date not being specified then within one month after service of a written-demand for payment.

22.3 In the events of the Applicant failing to comply with any requisition of the Railway Administration to remove or repair any defect which in the opinion of the Railway

07/07/2022

administration may endanger the working and safety of the terminal within such time as shall be fixed by the Railways Administration for the purpose.

22.4 In the events of the Applicant ceasing for a consecutive period of 3 (three) months to use the terminal or any part for extension thereof for the Applicant's own traffic in connection with the Applicant's Works.

22.5 In the event of the Applicant contravening the provision of Clause 15 hereof.

22.6 In the event of the Applicant failing to observe or perform any other obligation on his part herein contained.

22.7 In the event of the terminal becoming dangerous or defective by reason of any act of God or other act or circumstances for which the Railway Administration is not responsible.

22.8 In the event of any branch line, terminal or part or extension thereof, connecting the terminal or any part or extension thereof with the Railway system, becoming dangerous or defective for any reason whatsoever and whether such branch line, terminal part or extension shall belong to the Applicant or to any third person.

22.9 In the event of any branch line, terminal or any part or extension thereof connecting the terminal or any part or extension thereof with the Railway system, being closed by the Railway Administration under any powers which the Railway Administration may possess whether by status or by Agreement with third persons or closed by order of the Government of India or any State Government.

The Applicant shall have no claim whatsoever against the Railway Administration in respect of any refusal by the Railway Administration to allow their rolling stock to go on or be used upon the terminal or any connected Terminal or branch line in any of the aforesaid events.

Provided always that on the happening of any of the events mentioned in sub-Clauses 22.1, 22.2, 22.4, 22.5, 22.6, the Railway Administration shall not exercise the power conferred upon it by this Clause unless 14 (Fourteen) days' previous notice has been given in writing requiring the Applicant to comply with the demand or requisition as the case may be, of the Railway Administration and the Applicant has failed to comply with the Same within the time specified in such notice.

No notice shall be required to be given in the cases specified in the other sub-clauses of this clause.

23. ***Termination of Agreement on Death. Insolvency etc. :***

This agreement may be determined by the Railway Administration without prior notice at any time after the happening of any of the following events:

23.1 In the event of the death of the Applicant, if he is an individual person.

23.2 In the event of a partition of the Joint family properties, if the Applicant is a Joint family governed by the Mitakshara School if Hindu Law.

23.3 In the event of dissolution of partners either by act of parties or by order of Court, if the Applicant is a firm or other association or body of individuals.

23.4 In the event of dissolution of partners either by act of parties or by order of Court, if the Applicant is a firm or other association or body of individuals.

23.5 In the event of Applicant becoming insolvent or going into liquidation either voluntarily or under an order of a competent Court.

23.6 In the event of the Applicant's interest in the works becoming wholly or partially vested in some other person.

23.7 In the event of the Applicant contravening the provision of Clause 21 hereof.

24. ***Consequence of Termination Under Clauses 19, 20, 21, 22 & 23 :***

*24.1 On termination of this agreement under provisions of Clauses **19, 20, 21, 22 & 23** thereof, the Railway Administration shall be entitled to disconnect from their Railway,*

07/07/2022

the portion of the said terminal within the Railway land (colored red on the said plan) at the cost of the Applicant and take up and remove the same and the appliance connected therewith and dispose of the materials thereof as they may think fit rendering to the Applicant surplus (if any) to arise from such disposal after first defraying and reimbursing there at all costs and expenses on and incidental to such taking up, removal and disposal and all sums owing to them by the applicant under the terms of this Agreement or for freight or carriage.

24.2 Provided always that the Railway Administration shall at all times have lien on the portion of the said terminal within the Railway land (colored red in the said plan) and appliances connected therewith and materials thereof for all sums owing to them from the Applicant under the terms of this agreement or for freight or carriage. The Applicant shall have no claim whatsoever against the Railway Administration in respect of termination of this agreement whether under any of the provisions of those presents or in any manner not provided for by those presents.

25. ***Agreement To Bind Applicant Until Terminated By The Railway Administration***

25.1 Until terminated by the Railway Administration or unless and until the person or persons in whom the entire rights and interests of the Applicant have vested and with wham the Railway Administration has agreed to enter into a Cargo Terminal Agreement has executed and registered such Agreement in the same form as these presents or in such other form as the Railway Administration may require as provided in Clause 21 hereof, this Agreement shall be binding upon the Applicant and the successors in title or interest of the Applicant in the Applicant's work

(i) Provided that the Applicant may by giving 6 (six) months' notice to the Railway Administration, discontinue the use of the terminal. In such event, the Applicant shall not be liable for the payment of maintenance and other charges under the Agreement for the period subsequent to the date of expiry of the said notice, but nevertheless all other obligations under the Agreement shall binding on him.

(ii) Provided further that the Railway Administration has the right without assigning any reason to terminate this Agreement on 6 (six) months' notice.

26. ***Applicant To handover/revert back Railway land along with entire Infrastructure developed on it Within A Month Of Termination***

On termination of this Agreement, Railway land, along with the entire infrastructure developed on it by the bidder, shall revert back to Railway on as-is-where-is basis within a month of termination, without payment of any compensation.

27. ***Right To Charge Interest On Money Due Hereunder To The Railway Administration:***
Notwithstanding anything contained in the foregoing Clauses of this Agreement, the Railway Administration shall have the right to charge and recover from the Applicant interest at such rates, as may be fixed by the Railway Administration from time to time on any or all sums payable by the Applicant under the terms thereof, if such sums are not paid within one month from the due date and if no such date is fixed, within one month from the date on which a written demand is made by the railway Administration.

28. ***Right Of Deduction Of Money Due To The Railway Administration***

The Railway Administration shall have the right to deduct from any amount which may become payable by the Railway Administration to the Applicant or to the legal representative of the

07/07/2022

Applicant any money due from the Applicant to the Railway Administration under these presents or for freight, haulage or other charges or otherwise in connection with the construction, maintenance or working of the terminal.

29. ***Service Of Notices On Applicant:***
The Applicant shall maintain a proper office to which all letters, notices, demands and other communications intended for the Applicant may be sent and every notice, demand or other communication which shall be delivered at or sent by Registered Post to such office shall for all purposes whatsoever be deemed to have been validly and effectively delivered to the Applicant.

30. ***Exercise Of Powers :***
Subject as otherwise provided in this agreement, all notices to be given on behalf of the President of India and all other actions to be taken on his behalf may be given or taken on his behalf by the Railway Administration; the agreement signing authority or his authorized representative.

31. ***Alteration / Variation Of The Agreement:***
Except as hereby provided any verbal or written arrangement or abandoning, varying or supplementing this Agreement or any of the terms hereof shall be deemed conditional and shall not be binding on the railway administration unless and until the same is endorsed on this agreement or incorporated in a formal instrument and signed by the parties hereto and till then the Railway administration shall have the right to repudiate such arrangement.

32. ***Applicant Not To Transfer Rights ;***

32.1 The Applicant shall not be entitled to assign or transfer or subject or permit to be used or enjoyed by any other person in any manner whatsoever any of the rights or benefits conferred upon the Applicant by these presents and any purported assignment transfer or subletting or permission shall be void and of no effect. Provided also that in the event of any other person being permitted by the Railway Administration to use the terminal on the Applicant's request or otherwise, the Applicant shall remain responsible to the Railway Administration for all the charges and obligations under this Agreement.

32.2 Provided, however, that if the Applicant shall desire to transfer the Applicant's Works to any person or if the applicant being a Company shall go into liquidation and such intended transferee or the liquidator of the Company shall desire the use and benefit of the terminal than subject to the under mentioned conditions being complied with the Railway Administration may at its discretion on the written request of the Applicant and of the intended transferee or liquidator made prior to the transfer or within one month after the commencement of the liquidation as the case may be and after production by the transferee of the registered Deed of Transfer of the Applicant's Works pr after proof by the liquidator of this intension to carry on the Company's business for the purpose of the liquidation proceedings, allow the transferee or liquidator the use and benefit of the terminal. The conditions above mentioned are the following:

(i) That the liquidator shall be approved by the Railway Administration, but such approval will not unreasonably withheld.

(ii) That the liquidator shall duly sign and register a Cargo Terminal Agreement in the same form as these presents so far as then applicable or in such other form as the Railway Administration may then require.

07/07/2022

(iii) That the applicant, Railway Administration and transferee shall duly execute an agreement of assignment as may be prescribed by the Railway Administration.

33. ***Cost of Execution Of Agreement:***
All expenses in drawing up the Agreement and the cost of stamping and registration shall be borne by the TO/Applicant. "Money receipt obtained from the Registration Office should be handed over to the Railways for collection of registered agreement which shall remain in the custody of Railways. Any charges, if levied for collection of registered agreement, shall also be borne by the Applicant.

34. **Agreement period**

The period of Agreement shall be signed for five (05) years, which shall be renewed / extended in blocks of five (05) years at a time, provided any of the provisions of the Agreement and / or Policy has not been violated by the GCTO.

35. **Agreement In Force From :**
The agreement shall be deemed to have come into force on and from……..

36. **Head Notes :**
The head notes herein are for the convenience of reference only and shall not affect the construction of these presents.

In WITNESS WHEREOF, the parties to these presents have set and subscribed their respective hands and seals hereunto on the day and year first above written.

Cargo Terminal Agreement-

Reg. No.: _____ For _____ Terminal

At Kilometre: _____ Between Stations _____ and _____

07/07/2022

Land License Agreement

(For Private Terminal)

{Note- This agreement is not to *be used for the cases where Railway Land is given on Lease* to *other government departmentlP5U For such cases, Land Leasing Agreement has to be signed in lieu* of *Land License Agreement in the standard format* of *Zonal Railway}*

This **Land Licensee Agreement** is made and executed at .....on this ..... Day of ....., 20.....

BY AND BETWEEN

THE PRESIDENT OF INDIA acting through (incorporate name and designation of the officer authorized under Article 299(1) of the Constitution) having its office at ..... (hereinafter referred to as "**Licensor**" which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the One Part;

AND

..... [hereinafter referred to as **("Licensee")*** which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the Other Part.

The Licensor and the Licensee are hereinafter collectively referred to as the "Parties" and Individually as a "Party",

WHEREAS,

(A) The Licensor and the Licensee have entered into a Cargo Terminal Agreement, dated ____ _(Agreement No,), wherein the Licensee has agreed to lay the terminal and the Licensor has agreed to provide the land for providing connectivity to the Terminal,

(B) The Licensor is owner of the land described in the Annexure hereunder (the "Site") and now desires to License the Site to the Licensee and the Licensee desires to take on License from the Licensor, the Site for the purpose of connectivity to the terminal,

NOW THEREFORE, In consideration of the promises and covenants herein set forth and for other good and valuable consideration, the receipt, adequacy and legal sufficiency of which are hereby acknowledged, the Parties mutually agree as hereunder-

1, Definitions and Interpretation -

1.1 Definitions:

In this Land License Agreement, the following words and expressions shall, unless repugnant to the context or meaning thereof, have the meaning hereinafter respectively assigned to them:

"Applicable Permits" means all clearances, permits, authorizations, consents and approvals required to be obtained or maintained under applicable laws in connection with the Site and the Terminal during the subsistence of the Land license Agreement;

"Encumbrance" means any encumbrance, such as an easement, right of way, license, mortgage, charge, pledge, lien, hypothecation, pre-emptive right or security interest, assignment, privilege or priority of any kind having the effect of security or other such obligations, whether or not registered and howsoever arising, including by statute or common law;

07/07/2022

"Land License Fee" shall have the meaning set forth in Clause 4.1 of this agreement.

"Site" shall have the meaning set forth in Recital (B); and

"Term" shall have the meaning setforth in Clause 3 of this agreement.

1.2. Interpretations-

In this Land License Agreement, except to the extent that the context requires otherwise:

(a) the Annexure to this Land License Agreement forms part of this Land License Agreement and shall be of full force and effect as though it is expressly set out in the body of this Land License Agreement;

(b) the terms of this Land License Agreement shall be read in consonance with and not in derogation with the terms of Cargo Terminal Agreement;

(c) the words and expressions beginning with capital letters and defined in this Land License Agreement shall have the meaning ascribed thereto herein, and the words and expressions beginning with capital letters used in this Land License Agreement and not defined herein, but defined in the Cargo Terminal Agreement shall, unless repugnant to the context, have the meaning ascribed thereto in the Cargo Terminal Agreement.

2. Grant of License and Possession -

2.1.1 The provisions of this Land License Agreement shall take effect and become binding on the Parties on the date of signing of this Agreement.

2.1.2 In consideration of the Land License Fee and subject to Clause 2.1.3, the Licensor grants on License to the Licensee and the Licensee agrees to accept the License from the Licensor, free from Encumbrances and/or encroachments, of all that piece and parcel of land measuring_____ situated at_____, described in the Annexure and to hold, possess, use and enjoy the Site a*nd/or* any part thereof, in accordance with the provisions of this Land License Agreement.

2.1.3 The Licensor hereby grants and transfers physical possession of the land specified in Annexure and in accordance with the provisions of Clause 4 of the Cargo Terminal Agreement.

3. Term-

3.1 The License granted in pursuance of this Land License Agreement shall be for a period of 5 (five) years from the date of signing of Land License Agreement (the "Term") which shall be renewed / extended in blocks of five (05) years at a time, up to 35 years unless principle GCT agreement is terminated / or the Land License Agreement is terminated prematurely in accordance with Clause 6 hereunder.

3.2 Both the Land License Agreement and the Cargo Terminal Agreement shall be co-terminus with each other.

3.3 The Licensee shall not derive any right, title or interest in the said Site which shall remain property of the Railways all the times. The Licensee only shall have possessory right as a Licensee for ___ years of the said premises in accordance with the terms of the agreement, provided regular and timely payment of land license fee is made.

3.4 Renewal of the Land License Agreement shall be at the sole discretion of the Licensor.

07/07/2022

4. Land License Fee -

4.1 The Licensee shall pay to the Licensor, subject to Clause 4.3, an annual Land License Fee ("Land License Fee") @ 6% of market value of land per annum in terms of Board's circular on land licensing i.e. 2005/LML/18/8 dated 10.02.2005 and 08.06.2005 as amended from time to time.

4.2 The Licensee shall pay the Land License Fee to the Licensor in advance on the first day of April every year and into such account, as may be designated by the Licensor from time to time.

4.3 If the Licensee fails to pay the Land License Fee as aforesaid, the Licensee shall be liable to pay interest for the period of delay calculated at a rate equal to 5% (five percent) above the base interest rate prescribed by State Bank of India.

4.4 Upon failure to pay Land License Fee within a period of 180 days from due date i.e. First day of April every year, Licensor reserves the right to terminate the Land License Agreement in accordance with Clause 19 of GCTO Agreement. However, the same shall not stop Licensor from taking action for recovery of their dues.

5. Use of Site –

5.1 During the Term of this Land License Agreement, the Licensee shall use the Site only for the purpose of terminal.

5.2 The Licensor shall always be at liberty to construct adjoining to the Licensed Site and the Licensee shall not be entitled to raise any objection to ask compensation thereafter on the plea of inconvenience, whatsoever at any point of time.

6. Termination of Land License Agreement –

6.1 This Land License Agreement may be terminated earlier by mutual agreement between the Parties in writing.

6.2 The Land License Agreement shall be co-terminus with the Cargo Terminal agreement. Thus, in the event that the Cargo Terminal Agreement is terminated during the currency thereof, then this Land License Agreement shall be deemed to be terminated without any further notice for termination of Land License Agreement and the Licensor shall be at full liberty to deal with the site in such manner as it deems fit in its sole discretion.

6.3 The Licensor shall have the right to terminate this Land License Agreement on occurrence of anyone or more default(s) by the Licensee as enlisted hereunder:

(a) failure of the Licensee to make payments to the Licensor in accordance with the provisions hereof, where such failure continues for a period of 30 (thirty) days after a written notice from the Licensor:

(b) transfer or assignment of this Land License Agreement or creation of any Encumbrance on the Site, without securing prior written approval of the Licensor;

07/07/2022

(c) use of the Site for any purpose other than the purposes stated under Clause 5 of this Land License Agreement and such breach is not remedied within a period of 60 (Sixty) days after a notice from the Licensor in this behalf; and

(d) Voluntary abandonment by the Licensee of period of 90 (ninety) days or more.

6.4 On expiry of the License Term or early termination of the Land License Agreement, for any reason whatsoever, the site, shall revert back to the Licensor.

6.5 Upon termination under Clauses 4.4, 6.1, 6.2 and 6.3, the Licensor shall have the following additional rights:

(a) The recovery of any unpaid Land License Fee due and payable at the time of termination;

(b) the recovery of any damages, costs, fees and expenses incurred by the Licensor as a result of the breach of the Land License Agreement by the Licensee; and

(c) Any other right or remedy, legal or equitable, that the Licensor is entitled to under applicable laws.

7. Licensee's Obligations and Covenants

Licensee hereby covenants, agrees and represents that:

(a) the Licensee, during the Term of the Land License Agreement, shall pay the Land License Fee in accordance with terms and conditions set out in this Land License Agreement and shall observe and fulfil each of its obligations and covenants set forth herein;

(b) the Licensee shall obtain, at its own cost and expense, all utilities, such as water, electricity etc. from the appropriate authorities;

(c) It shall obtain and keep current all Applicable Permits that may be required under the applicable laws;

(d) it shall pay all taxes, service tax, cess charges, assessments and levies in respect of the Site, which are leviable at any time during the Term of the Land License Agreement;

(e) it shall not create any lien, charge or Encumbrance on the Site, except as permitted in this Land License Agreement, without prior approval of the Licensor;

(f) it shall take all necessary care to keep the premises neat and clean and in sanitary conditions.; and

(g) It shall, after expiry or termination of the Land License Agreement forthwith, the Licensee hand over possession of the land to the Licensor along with entire infrastructure on railway land on as-is-where-is basis in terms of Clause 17.8 of agreement, without any payment / compensation.

a. shall revert back to Railway on as-is-where-is basis, without payment of any compensation.

07/07/2022

8. Stamp Duty and Registration Charges -
Subject to the exemption or waiver, if any, granted by Government or any other authority, the Parties agree that all stamp duties, registration charges and all other local/statutory charges payable In respect of the License contemplated herein shall be to the account of and borne by the Licensee.

9. Indemnities and Limitation of Liability -
The Licensee shall fully indemnify, defend and hold harmless the Licensor, its officers, servants, agents, against any and all suits, proceedings, actions, demands, claims and liabilities, which may be incurred or suffered by the Licensor and which may arise out of or as a result of any of the following causes:

(a) any breach by the Licensee of any of its obligations, covenants, agreements, representations or warranties set forth In this Land License Agreement;

(b) any loss of property, damage to property, personal injury or death occasioned to or suffered by any person, to the extent that the damage to or loss of property or the personal injury or death is caused willfully or negligently by the Licensee; and

(c) any breach, violation or non-compliance by the Licensee of any applicable laws and/or Applicable Permits.

10. Assignment-

The Licensee shall not, without the Licensor's prior written consent, transfer, assign or grant any form of security over any of its rights or obligations under this Land License Agreement.

11. Dispute Resolution -

11.1 The Parties shall use their respective reasonable endeavors to settle any dispute, difference, claim, question or controversy between the Parties arising out of, in connection with or in relation to this Land License Agreement ("Dispute") amicably between themselves through negotiation.

11.2 Any Dispute which the Parties are unable to resolve pursuant to Clause 11.1, within 60 (sixty) days (or such longer period as the Parties may agree) of notice by one Party to the other of the existence of a Dispute, shall be resolved in accordance with the provisions of the Cargo Terminal Agreement.

12. Governing Law -

This Land License Agreement is governed by and shall be construed in accordance with the laws of India. In case of any dispute and difference arises, the Court of the place, where Land License Agreement has been made, shall only have the jurisdiction to try such litigation.

In Witness Whereof The Parties Have Executed And Delivered This Land License Agreement As Of The Day, Month And Year First Above Written.

2. Our DPR January 2010 vide letter TPL/RLY/Maithon/09-10/064 dated 10/01/2010
3. CTPM ER HQ approval of DPR no. TW 535/439 Pt. I dated 29/03/2010

Dear Sir,

MPL has submitted DPR for Railway Siding after approval of feasibility report by Eastern Railway. The Project has been under execution and meanwhile Master Circular on Gati shakti Multi Model Cargo Terminal (GCT Policy 2021) has been issued by Railway Board. We are almost ready with work of siding and will like to migrate to the revised policy of GCT2021 as per Railway Board Guidelines.

However, there are some changes from the earlier DPR submitted and therefore in terms of para 11 and 11.1, we would like to submit our revised ESP for your approval. You are requested to initiate necessary action at your end.

Thanking You.

Yours faithfully,
For Maithon Power Limited

Maithon Power Ltd,
Maithon, Jharkhand.

Sub : Commissioning of MPL siding- Migrating to "Gati Shakti Multi Modal Cargo Terminal" and issuance of Siding Notification

Ref: Your letter No MPL/FY22/22-01/024 dt 27.01.2022

Vide reference above your request for migration to "Gati Shakti Multi Modal Cargo Terminal" (GCT 2021) has been examined. As per the revised policy circular for migration, you are required to :-

1) Submit Rs.10 lakhs as security deposits to Railways.
2) You are advised to clear all dues and certify that no arbitration/court cases are pending as per Para 1.2.1 of GCT Policy 2021.
3) You are also advised to submit your revised ESP for scrutiny by the Division.
4) Once the ESP is approved further necessary action regarding notification of siding can be undertaken.

This is for your information and necessary action please.

2. Our letter no. MPL/FY22/22-01/024 dated 27/01/2022

Dear Sir,

As per your letter dated 27 January 2022, our request for migrating to "Gati Shakti Multi Model Cargo Terminal" has been examined with certain requirements as per revised policy, please find below the compliances:

1. Security Deposit: MPL has transferred Rs 10 lacs to account of FA & CAO/Eastern Railway (SBI Kolkata account no. 306054982120) with transaction no CTQ9479298. Copy of transaction statement is attached for your ready reference.
2. MPL has cleared all dues, also certify that no arbitration/court cases are pending as per Para 1.2.1 of GCT Policy 2021.
3. Three nos. Revised ESP (where changes are envisaged) as per policy guidelines are attached on Tracing paper for your scrutiny and approval as per following details:
   - Yard Arrangement with MPL and DFCCIL Alignment at Thaparnagar Station (Drawing no. MBB/RLY/MPL/TNW/CP/01 dated 25/01/2022 Rev 01
   - Yard Arrangement at Mugma Station (Drawing no. MBB/RLY/MPL/MMU/CP/01 dated 25/01/2022 Rev 00
   - Yard Arrangement at MGR Bulb (Drawing no. MBB/MPL/SH08/MGR-BULB/01 dated 25/01/2022 Rev 00

   Please also consider Approved ESP "Proposed Yard Arrangements at Junction Cabin (Drawing no. TPL/RLY/MAITHON/03 dated 04/12/2009 Rev 03 ALT-1 as part of MPL Siding under GCT policy 2021 for your approval/acceptance.

Request your review & Approval of ESP and further action regarding notification of MPL siding.

Thanking You.

Sub: Commissioning of MPL Siding – Migrating to "Gati Shakti Multi-Model Cargo Terminal" (GCT 2021) – Justification of Revised ESP.

Ref:

1. DRM Asansol Letter no. G/DRM/ASN/MPL/2022 dated 27th January 2022
2. Our letter no. MPL/FY22/22-01/024 dated 27/01/2022
3. Our letter no. MPL/FY 22/ 21-11/015 dated 26th November 2021

Dear Sir,

This has reference of above cited letters and revised ESP submitted for your kind approval, please find below the reasons/constraints for modification of ESP:

1. **Wagon Tippler:**
   As per DPR we have to commission Wagon tripper in plant area. During survey it was observed that the area is having rocky strata. Seeing the actual condition of site, provision of Wagon tripper is technically not feasible.
   All the facilities required for unloading of rakes, redundancy of operations and other operational requirements has been made by the company, and installation of wagon tippler not possible at this juncture, accordingly ESP has been revised.
2. **Mugma Loop Line:**
   Due to financial crunch MPL is not in a position to create this facility. In DPR, at Mugma Up loop line is proposed with the assumption that coal rakes are coming from ECL i.e. Mugma side. Moreover our Fuel Supply Agreement (FSA) was signed with BCCL and CCL up to year 2030 and 2032 respectively. So, we will be receiving our coal rakes only from Thaparnagar end. Therefore, the entire rake movement shall be on downside from Pradhankhunta to Sitarampur section. Therefore, the requirement of Mugma Up loop line may be dispensed with and accordingly ESP has been revised.

Request your review & Approval of ESP and further action regarding notification of MPL siding.
Thanking You.

2. Our letter no. MPL/FY22/22-01/024 dated 27/01/2022
3. Our letter no. MPL/FY 22/ 21-11/015 dated 26th November 2021

Dear Sir,

This has reference of above cited letters and revised ESP submitted for your kind approval, please find below the reasons/constraints for modification of ESP:

1. **Wagon Tippler:**
   The location envisaged initially and mentioned in DPR approved in 2010 for installation of Wagon Tippler is having rocky strata and it was anticipated to install the same prior to start up activities of the power plant, however same was not done due to various issues involved in Railway infrastructure projects.

   Now after commissioning of both the units in 2011/2012 respectively; plant is Generating Power and supplying to its consumers since 2011/2012 onwards. Since the identified location is in the vicinity of Coal conveyor (which is one of the most critical system for feeding coal from coal yard to both the units on continuous basis); it is not possible to install Wagon Tippler at MGR bulb (either at identified location or any alternate location due to running system/space constraints). Thus, under present situation, installation of Wagon Tippler is not possible.

   Moreover, the present provision of Track hopper is designed for evacuation of coal@2000 MT/hr and ready to unload BOBRN Rakes & its immediate evacuation by stacking at stacker-reclaimer/coal Bunkers. Company has also made arrangement for unloading of BOXN Rakes at WHARF (same shall be used for unloading of coal and for dispatch of Ash from the plant), thus offering redundancy of handling of all types of Rakes in the plant.

   All the facilities required for unloading of rakes, redundancy of operations and other operational requirements has been made by the company, and installation of wagon tippler is not required and not possible at this juncture, accordingly ESP has been revised.

MPL
MAITHON POWER LIMITED

2. **Mugma Loop Line:**

   In DPR, at Mugma Up loop line is proposed with the assumption that coal rakes are coming from ECL i.e. Mugma side; however after our Fuel Supply Agreement (FSA) was signed with BCCL and CCL which is valid till the year 2030 and 2032 respectively. So, we will be receiving our coal rakes only from Thaparnagar end. Even in future, Aforesaid FSA shall be extended with BCCL & CCL for ensuring coal supply for plant operation.

   Therefore, the entire rake movement shall be on downside of Pradhankhunta to Sitarampur section. Hence, up loop line will not be required by MPL in future. Therefore, the requirement of Mugma Up loop line is not envisaged and accordingly ESP has been revised.

Request your review & Approval of ESP and further action regarding notification of MPL siding.

Thanking You.

EASTERN ---------- RAILWAY

Private Siding Agreement

MEMORANDUM OF AGREEMENT made this 16th day of FEB / 2022 between The President Of India , acting through the ER Railway Administration (Hereinafter called "The Railway Administration") of the one part and MAITHON POWER LIMITED (Hereinafter called "The Applicant)* of the other part. WHEREAS The applicant is desirous of having a private siding laid by the Railway Administration at MAITHON ---from the THAPARNAGAR ---- station yard of the Eastern Railway taking off from kilometer No.----------between ---------- -station and ----------station of the ----------Railway as shown in red and green on the plan bearing CE's No. ----------hereto annexed for the purpose of carrying on the Applicant's premises situated at P.O - NIRSA District DHANBAD, JHARKHAND - 828205

AND WHEREAS THE Railway Administration is willing to lay the said siding for the said applicant upon and subject to the terms and conditions hereinafter set forth.

MAITHON POWER LTD. MAITHON

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

Introduction

1.1 This policy seeks to promote proliferation of new Cargo Terminals and improve existing Cargo Terminals to accelerate the growth in Railways' cargo traffic. All new as well as under-construction/ under-approval Cargo Terminals (approved/ proposed under 'Private Siding' or 'Private Freight Terminal' policies) shall be covered by this 'Gati Shakti Multi-Modal Cargo Terminal (GCT)' policy.

1.2 Existing Cargo Terminals, governed by Private Siding or Private Freight Terminal policies, shall have the option to continue with their existing Agreements, or to migrate to this new GCT policy.

1.2.1 Existing Cargo Terminals can migrate to this new GCT Policy by submitting a request to the Divisional Railway Manager (DRM) of the concerned Division of Railway, after clearing pending Railway dues and withdrawing all pending arbitration cases/ court cases, if any. The provisions of this Policy shall be applicable on such Cargo Terminals from the date the request is approved by the DRM.

1.2.2 Existing Cargo Terminal owners shall be allowed to migrate to this new GCT policy only when all pending Railway dues of all Cargo Terminals belonging to the same owner/ its subsidiaries/ parent company/ sister concerns over Indian Railways are cleared and all pending arbitration cases/ court cases over Indian Railways are withdrawn.

2. Definitions

2.1 The Key Terms used in these policy guidelines have been defined below for correct interpretation and elimination of ambiguities.

i. Act: The Railways Act, 1989, as amended from time to time.

ii. Agreement: Document executed by a Gati Shakti Multi-Modal Cargo Terminal Operator (GCTO) and Railway Administration (RA) setting forth the terms and conditions for operation of a Gati Shakti Multi-Modal Cargo Terminal (GCT).

iii. Authorized Users: Rail users authorized by the GCTO to make use of the facilities at a GCT.

iv. Benchmark Traffic: Traffic (inward plus outward, combined) expected to be handled per annum at Cargo Terminals established fully or partially on Railway land.

v Cargo Terminal: Terminal where goods are loaded in wagons/ coaching vehicles for transportation over Indian Railway network, and/or unloaded from wagons/ coaching vehicles after being transported over Indian Railway network.

vi Charging on Through Distance Basis: The system of charging freight up to the buffer end of the siding, instead of levying Siding Charges

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

vii. Common User Facility: A facility available for common use of all Rail users without any discrimination including yards/ additional lines/ loop lines at the serving station, crossing station, patch doubling, etc.

viii. Consignee: The person named as consignee in Railway Receipt.

ix. Consignor: The person named in Railway Receipt as consignor, by whom or on whose behalf goods covered by the Railway Receipt are entrusted to a Railway Administration for carriage.

x. EIMWB: Electronic In-motion Weighbridge.

xi. FOIS: Freight Operations Information System.

xii. Gati Shakti Multi-Modal Cargo Terminal Operator (GCTO): The entity constructing and/or managing a Gati Shakti Multi-Modal Cargo Terminal (GCT).

xiii. Good Industry Practices: The practices, methods, techniques, designs, standards, skills, diligence, efficiency, reliability, and prudence which are generally and reasonably expected from a reasonably skilled and experienced operator engaged in the same type of undertaking as envisaged under this Policy, following applicable laws and applicable permits in reliable, safe, economical and efficient manner; and which are expected to result in fulfillment of obligations of operator under the Agreement.

xiv. Over Head Equipment (OHE): Infrastructure and equipment installed to provide electric traction.

xv. Private Freight Terminal (PFT): A terminal notified under Private Freight Terminal (PFT) policy of Indian Railways, to deal with rail-based cargo.

xvi. Private Siding: Privately owned siding constructed by a 'customer' at its own cost for railway cargo services at the premises of its plant, or manufacturing unit, or production unit, or mine, etc, connecting the customer's works with the Railway system.

xvii. 'Railway Administration (RA)' means Divisional Railway Manager (DRM) including Railways' Divisional officers, viz. Senior Divisional Operations Manager (Sr.DOM), Senior Divisional Commercial Manager (Sr.DCM), Senior Divisional Finance Manager (Sr.DFM), Senior Divisional Engineer (Sr.DEN), Senior Divisional Electrical Engineer (Sr.DEE), Senior Divisional Signaling & Telecommunication Engineer (Sr.DSTE), Senior Divisional Mechanical Engineer (Sr.DME), and their representatives.

xviii. Railway Land: Land owned by Railways.

xix. Railway Receipt (RR): The receipt issued by Railway Administration (under section 65 of The Railways Act, 1989) on acceptance of goods and which entitles the consignee to take delivery of the goods at the destination Rail Terminal.

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manage
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

xx. Rake: A train load of wagons with a prescribed composition.

xxi. Take-off point: The Stock Rail Joint of 'last point and crossing' at serving station, through which the rolling stock can be diverted towards a Cargo Terminal.

xxii. Terminal Access Charges: Charges levied by Railways on rail-customers for handling of ***privately-owned*** rakes at 'Railway goods-sheds' and 'Cargo Terminals fully or partially on Railway land' as per the Policy, at the rates prescribed by Railways.

xxiii. Terminal Charges: Charges levied by Railways on rail-customers for handling of ***railway-owned*** rakes at 'Railway goods-sheds' and 'Cargo Terminals fully or partially on Railway land' as well as on rakes at 'Cargo Terminals entirely on non-Railway land' as per the Policy, at the rates prescribed by Railways.

xxiv. TMS: Terminal Management System of FOIS.

3. **Eligibility for GCT Operators (GCTO)**

3.1 The categories of applicants permitted to set-up GCTs, as GCTO, shall be as under:

Category	*Supporting Documents* *(self-attested copies to be submitted/ uploaded)*
a) Individual/ Sole Proprietorship Firm	1. PAN and TAN
b) Hindu Undivided Family (HUF)	1. PAN 2. Notarized Affidavit declaring that the signatory is the 'Karta' of the HUF and has the authority, power, and consent of other members
c) Partnership Firm	1. PAN and TAN 2. Notarized copy of the Partnership Deed/ Partnership Deed registered with the Registrar 3. Notarized or registered copy of Power of Attorney in favour of the individual to sign on behalf of, and to create liability against the firm
d) Company registered under Companies Act 2013	1. PAN and TAN 2. Memorandum of Association (MoA)/ Articles of Association (AoA) 3. Certificate of Incorporation 4. Notarized or registered copy of Power of Attorney in favour of individual to sign on behalf of, and to create liability against the company 5. Resolution of the Directors of the Company, permitting the company to set up and/or operate a GCT
e) Limited Liability Partnership (LLP)	1. PAN and TAN 2. LLP Agreement 3. Certificate of Incorporation 4. Notarized or registered copy of Power of Attorney in favour of individual to sign on behalf of, and to create liability against the

MAITHON POWER LTD.

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

	LLP
f) Registered Society/ Registered Trust	1. PAN and TAN 2. Certificate of Registration 3. Memorandum of Association of Society/ Trust Deed 4. Rules & Regulations of the Society 5. Notarized or registered copy of Power of Attorney in favour of individual to sign on behalf of, and to create liability against the Society/ Trust
g) Joint venture (JV)/ Consortium	1. JV/ Consortium Agreement 2. Name and authorization of lead member (*Note:* On receipt of approval of Railway Administration for setting-up and/or operation of GCT, JV/Consortium shall have to convert into a legal entity – Firm/ Company/ LLP. Agreement shall be entered into by RA with the above legal entity only.)

4. **Application and Approval Process**

4.1 For the matters pertaining to GCTs, DRM of the concerned Division shall be the Nodal Officer for all issues regarding setting up and/or operation of a GCT. During approval and construction stage for setting up a new GCT, Sr.DOM shall be the co-ordinating officer; and after commissioning of the GCT, Sr.DCM shall be the co-ordinating officer.

4.2 The processing of Application and approval of GCTs shall be in accordance with the time-lines given in Schedules '1' & '2'.

5. **Capital Cost of GCT**

5.1 The GCTO shall bear the entire capital cost of new GCT from the take-off point onwards (to be marked on the Engineering Scale Plan (ESP)) at the serving station.

5.1.1 For the linear connectivity portion of GCT passing through the Railway land, including the land to be acquired by Railway for this purpose under para 17.2 of this policy, only the minimum essential infrastructure of track, OHE and signalling equipment shall be provided at the cost of GCTO (other assets not related to track, signalling, or OHE, if required, shall be constructed by Railway at its own cost). In case of any dispute, the decision of DRM shall be final in this regard.

5.1.2 The ownership of infrastructure including the track, signalling equipment and OHE created on Railway land under para 5.1.1 above shall belong to Railway, even though the capital cost for these shall be borne by the GCTO.

5.1.3 For migration of existing Terminals to this new policy, the GCTO will be required to transfer the ownership of assets (track, OHE and signalling equipment) created on Railway land to Railway free of cost. The cost of up-gradation of assets (if required) to the desired standards, at the time of transfer of ownership to Railway, shall also be borne by the GCTO.

5.2 The capital cost for all common-user traffic facilities (to be marked on the ESP) at the serving station, including Signalling & Telecommunication works,

MAITHON POWER LTD.

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

modification and up-gradation to existing interlocking/ OHE, or electrification in future within the station limit up to take-off point, shall be borne by the Railway.

5.2.1 Zonal Railway shall ensure adequate availability of funds to ensure timely completion of common-user traffic facility works at the serving station, so that commissioning of GCTs is not delayed.

5.3 Maintenance and operation of assets created under para 5.2 above (common-user traffic facilities) at the serving station including staff costs, shall be the responsibility of the Railway.

5.4 The capital expenditure required for augmenting or up-grading the facilities and infrastructure on the connectivity portion from take-off point onwards towards Terminal and within the premises of Terminal shall be borne by the GCTO.

5.5 The connectivity to GCTs shall normally take-off from the existing serving station. However, in case when it is operationally not feasible to provide a connection from an existing serving station, provision of a Block Hut/ Block station (between two existing stations) with required points & crossings may be considered, provided it is operationally feasible. This will be done on the request of GCTO.

5.5.1 In such cases, the entire capital cost of the new Block Hut/ Block station and related infrastructure shall be borne by the GCTO. However, this work will be executed by Railway, and ownership of the same shall remain with the Railway.

5.5.2 However, for new GCTs planned to load one million Tonne or more (outward traffic) per annum, the capital cost of new Block Hut/ Block station will be repaid to the GCTO by Railway.

5.5.2.1 The repayment of capital cost of the new Block Hut/ Block station will be made by Railway through 10% rebate on the outward traffic loaded at the Terminal, till such time the capital cost has been repaid to the GCTO.

5.5.2.2 The repayment of capital cost will be done only if the Terminal achieves the target of loading one million Tonne per annum within two Calendar Years of commissioning (excluding the year of commissioning). For example, if a GCT commissioned during calendar year 2022 achieves one million Tonne loading during calendar year 2024, then the repayment of capital cost of new Block Hut/ Block station (through 10% rebate on outward traffic) shall start from 01st April 2025.

5.5.2.3 This repayment shall be made for the investment made by the GCTO on behalf of Railways. As such, this repayment through freight rebate shall be admissible over and above all other rebates that the GCTO may become eligible for in future.

5.5.2.4 This provision of repayment shall be applicable only for GCT's for which Agreement between RA and GCTO has not been entered into till the date of issue of this Policy.

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manage
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

5.5.3 The cost of operation and maintenance of such Block Hut/ Block station shall be borne by the Railway w.e.f. the date of issue of this policy. However, for existing Terminals (*where PFT/Private Siding Agreement has been entered into between RA and operator before the issue of this Policy*) where cost of operation and maintenance of such Block Huts/ Block stations has already been deposited by the GCTO, there shall be no refund. Further, dues of operation and maintenance cost of Block Hut/ Block station, if any, pending as on the date of issue of this policy shall be payable by GCTO.

6. **Security of Assets**

6.1 The responsibility of security of railway assets over Railway land shall be of Railways. However, the responsibility of security of railway assets outside Railway Land or on land licensed to GCTO shall be of GCTO.

6.1.1 In case of theft of any railway asset on non-Railway land or railway land licensed to GCTO, the maintenance of which is with Railway, the restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

6.1.2 In case of theft of OHE including OHE on non-Railway land or railway land licensed to GCTO, restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

7. **Maintenance of Assets**

7.1 Maintenance of assets on Railway land (excluding the Railway land licensed to GCTO), including Track and Signalling Equipment installed on Railway land under para 5.1.1, shall be done by Railway at its own cost.

7.2 Maintenance of OHE from the take-off point onward including inside the Terminal shall be done by Railway at its own cost – as this involves safety of men and equipment, and can also impact rail operations outside the Terminal boundary.

7.3 In addition to above, the maintenance of assets (track, bridges, signalling equipment, etc) on non-Railway land including the land licensed to GCTO, ***outside the Terminal***, may also be done by Railway at its own cost if the GCTO transfers the ownership of these assets to Railway (the ownership of land on which such assets are created shall however continue to be with GCTO). Provided further, this provision shall be applicable only to those GCTs where freight tariff is charged on 'through distance basis.'

7.3.1 In case maintenance of assets, including Track and Signalling Equipment, is being handed over to Railways on migration to this policy by GCTO, the GCTO will ensure that the standards of track and signalling infrastructure being transferred to Railway is in accordance with the prescribed standards for GCTs, as decided by Railways (Annexure 'D'). If any up-gradation/ replacement/ renewal of any infrastructure is required, the GCTO shall bear the cost for the same.

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

7.3.2 In case of damages to the assets due to accident, etc, the replacement shall be done by Railway. However, if the responsibility of accident, after Enquiry (joint enquiry by representatives of Railway as well as GCTO), is fixed on the GCTO – the GCTO shall have to bear the cost of all the replacements. The decision of the Nodal Officer, i.e. DRM, in this regard shall be final.

7.3.3 In case the damage to assets is due to an external cause (floods, breaches, terrorist activity, etc), the cost of restoration shall be borne by the GCTO.

7.3.4 If the GCTO does not agree to transfer the ownership of assets (track, bridges, signalling equipment, OHE, etc) to Railway or freight tariff is not chargeable 'on through distance basis'; the maintenance of these assets – except OHE – shall continue to be the responsibility of GCTO.

7.3.4.1 Railway shall be entitled to conduct periodic inspections of such GCTs being maintained by the GCTO, for which Inspection Charges will be levied as per the prescribed norms.

7.3.4.2 GCTO may also get the maintenance done through Railway for such Terminals, in which case Maintenance Charges shall also be levied as per the prescribed norms.

7.3.5 The maintenance of GCT yard, including loading/ unloading lines, shall be the sole responsibility of GCTO. Distribution of the responsibility of track has been explained in Schedule '3'.

7.3.6 At such GCTs, Railway shall maintain the signalling equipment till the line-clear/ receipt-despatch arrangement with serving station(s), at its own cost. Maintenance of signalling equipment internal to the Terminal shall be the sole responsibility of the GCTO.

7.4 The cost of all subsequent up-gradations (on account of change of technology, standards, etc) shall be borne by the GCTO.

7.5 Maintenance of all the infrastructure and equipment inside the GCT which are not to be accessed by Railways' rolling-stock, and maintenance of infrastructure required for loading/ unloading (tipplers, hoppers, etc) shall be the responsibility of GCTO.

7.6 Schedule '3' indicates the ownership and responsibility for maintenance of assets for a GCT.

8. **Cost of Electrification**

8.1 In case of new GCT, the entire cost of electrification of the Terminal and the connectivity portion between take off point and GCT, shall be borne by the GCTO.

8.2 While undertaking electrification of main line and serving station by Railways, the electrification of the existing GCT(s) including the rail-line connecting the Terminal(s) shall be undertaken at the Railway's cost.

9. **Handling of Wagons in GCTs:**

MAITHON POWER LTD. MAITHON

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

9.1 If any damage and deficiencies is caused to railway wagons due to the fault of the GCTO, the damage and deficiency charges shall be raised by Railway and paid by the GCTO as per the extant rules of Railways.

9.2 All tipplers and bulk handling systems used for loading/unloading of Railway wagons shall be provided and commissioned by GCTO at its own cost in accordance with the RDSO's approved specifications. This provision shall however not be applicable on the systems/ equipment installed by GCTO which are not to be used for handling Railway wagons (such as conveyor-belts, JCBs, excavators, etc).

9.2.1 GCTO shall ensure that tipplers, bulk handling systems, and mechanized equipment are operated only by the qualified and experienced staff under adequate supervision.

9.2.2 Such equipment shall be regularly maintained and replaced at the end of their codal life by GCTO at its own cost.

9.2.3 In case of any accident/ derailment inside the Terminal or outside the Terminal up to serving station, Railway will provide Accident Relief Train (ART) initially free of cost. Provided further, if the responsibility of accident/ derailment after enquiry is fixed on the GCTO, ART Charges shall be payable by GCTO as prescribed by Railway from time to time. The due Charges will be deducted from the future payments by Railway to GCTO. However, in case no regular payments are being made by Railway to GCTO, on demand from Railway, the GCTO shall pay ART Charges to Railway without any delay.

9.2.4 The accident enquiry as mentioned in para 9.2.3 above shall be conducted jointly by the representatives of Railway and GCTO to be nominated by DRM and GCTO respectively. The accepting authority of Enquiry Report shall be DRM, whose decision shall be final and binding on GCTO.

10. **C&W Maintenance Facilities**

10.1 Normally C&W facilities shall not be constructed at GCTs.

10.2 However, if C&W facilities are operationally required at any GCT as per the extant instructions, only one-time capital cost for setting-up these facilities shall be borne by the GCTO. Operational costs, including staff cost and material cost (for Railway-owned stock), shall however be borne by the Railway.

10.3 For GCTs dealing with POL and other hazardous material, specialized facilities inside the Terminal as well as in Railway yard (if required) shall be developed by the GCTO at its own cost, and shall be maintained by GCTO to ensure that no untoward incident/ accident takes place at such facilities.

11. **Authorized Users**

11.1 GCTO shall inform Railway about the authorized rail users of the GCT before notification, so that they may be incorporated in the TMS module of FOIS.

MAITHON POWER LTD.

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

11.2 If the GCTO desires to add more rail users subsequently, GCTO shall inform Railway at least seven (07) working days in advance, to enable incorporation of such rail users in FOIS.

12. **Commodities Permitted**

12.1 Unless otherwise specified by Indian Railway, a GCT shall be permitted to book and handle all traffic – including coal and coke, which shall be as per the guidelines of 'preferential traffic schedule' issued by Ministry of Railways from time to time.

13. **Engine-on-Load (EOL) Scheme**

13.1 All new GCTs shall be set up on 'charging on through distance basis,' as per the instructions contained in Rates Master Circular on 'Freight on Through Distance Basis issued on 24.09.2014 (placed as Annexure 'A'), as modified from time to time.

13.2 All new GCTs charged on through distance basis shall be governed by the Engine-on-Load policy (FM Circular No.05 of 2013 dated 07.03.2013), as modified from time-to-time.

13.2.1 Railway may permit commissioning of a new GCT on non-EOL basis with the approval of DRM, if Engine-on-Load scheme is not operationally feasible.

14. **Charging of Commercial Staff**

14.1 No cost of commercial staff will be charged from the GCTO w.e.f the date of issue of this policy. However, for existing Terminals (*where PFT/ Private Siding Agreement has already entered into between RA and operator before the issue of this Policy*) where cost of commercial staff has already been deposited by the GCTO, there shall be no refund. Further, dues of commercial staff cost pending, if any, as on the date of issue of this policy shall be payable by GCTO.

15. **Provision of Weighbridge**

15.1 All GCTs planning to deal with outward cargo (loading) shall have a provision of Electronic In-motion Weighbridge (EIMWB) at a suitable location inside the Terminal. The EIMWB shall comply with OIML (International Organization of Legal Metrology) document (available at https://www.oiml.org/en/files/pdf_r/r106-2-e12.pdf) and the latest RDSO specifications.

15.1.1 Provision of EIMWB shall not be essential for GCTs dealing with inward cargo (unloading) only.

15.1.2 If a GCT without an EIMWB plans to start loading, the GCTO shall make arrangement for provision of an EIMWB as per the provisions of the Policy. DRM, in consultation with CFTM of the Railway, may, however permit loading at a GCT (if operationally feasible) – by nominating an alternative Railway weighbridge for weighment of rakes, awaiting installation of EIMWB, for a period of up to six months at a time from the date of start of such loading, duly recording the reasons for the same.

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

15.2 GCTO shall bear the cost of procurement (inclusive of the requisite warranty and a post-warranty comprehensive Annual Maintenance Contract (AMC) till the end of codal life), installation, and replacement of the EIMWB at the end of its codal life. GCTO shall also bear the cost of weighbridge house, weighbridge siding, and related infrastructure.

15.3 GCTO shall get the weighbridge certified by the Weights & Measures department of the state government, and shall comply with all the applicable statutory and legal requirements.

15.3.1 The weighbridge, after testing and certification by the Weights and Measures department of the state government, shall be sealed by their personnel in presence of GCTO's and Railway's representatives. This seal shall be broken, if required, only in the presence of the personnel of Weights and Measures department and Railway's representative.

15.4 GCTO shall bear the cost of manpower to operate the EIMWB, and the cost for its linking with FOIS.

15.5 RR will be issued on the basis of weighment within a GCT as per the extant instructions provided vide Rates Master Circular/Weighment/2019/0 dated 25.07.2019 and other applicable instructions of Railways (enclosed as Annexure 'B'), as modified from time to time.

15.6 No extra free-time will be provided for weighment at an EIMWB inside a GCT.

15.7 A nominated Senior Section Engineer/Carriage & Wagon (SSE/C&W) shall conduct periodic inspections (once in a fortnight) of the weighbridge to ensure that it is being operated as per the prescribed norms and procedures. In addition, frequent joint inspection by Sr.DME/Carriage &Wagon and Sr.DCM, or by officers nominated by them, shall be conducted and inspection notes issued – preferably once in three months. These inspections shall be conducted to ensure that EIMWBs are being operated as per the prescribed norms and procedures, and shall not necessarily include testing of EIMWBs using test wagons.

15.7.1 DRM or Sr.DME/C&W or Sr.DCM may order surprise inspection or testing of any weighbridge to check for its proper functioning or calibration.

15.8 For the purpose of mandatory testing of EIMWB, test-wagons shall be provided by Railway on payment of Haulage Charges. These Haulage Charges shall be levied for the actual distance travelled or 100 km, whichever is less.

15.8.1 In cases where there is more than one weighbridge located within a GCT, the Haulage Charges as per para 15.8 above shall be levied for the 'first weighbridge,' and shall be levied @25% of the charges for the 'first weighbridge' for other weighbridges inside the Terminal.

15.8.2 For random surprise testing by Railway, test-wagons will be provided for without levying Haulage Charges or any other charges.

15.8.3 Railway shall try to ensure availability of 'test wagon-sets' in the vicinity of all GCTs, so that there is no delay in arranging these wagons for testing.

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

15.9 If any overloading is detected in the outward traffic the same will have to be unloaded/ re-adjusted at the Terminal itself – for which no extra free-time will be provided.

15.10 Whenever the EIMWB goes out of order, it shall be put right by the GCTO within three days, failing which a penalty of Rs 4,000/- per day or part thereof for the next ten days, and Rs 8,000/- per day or part thereof thereafter, shall be imposed.

15.11 Under exceptional circumstances, if it becomes essential to install the EIMWB of a GCT either partially or wholly on Railway land not licensed to GCTO (on account of operational and technical constraints), permission for the same may be given by the DRM. Location of such an EIMWB shall be decided by Sr.DOM, in consultation with Sr.DCM, Sr.DEN & Sr.DME.

15.11.1 All terms and conditions applicable on EIMWB inside a GCT shall also be applicable on an EIMWB installed by GCTO on such land. However, Railway will be the executing agency for installation, operation, and maintenance of such EIMWBs.

15.11.2 Cost of the comprehensive AMC and manpower to operate such EIMWB shall be borne by the GCTO.

15.11.3 Railway will be free to weigh rakes other than those of the concerned GCT at such EIMWB.

15.12 Railway may permit weight-o-meter/ pre-weighbin system of weighment in GCT on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager, keeping in view the requirement and to avoid any manipulation of weighment data.

15.12.1 Such equipment shall be certified by Weights & Measures department, and should also meet all extant statutory provisions and policy guidelines.

15.12.2 The system should have proper locking/ sealing arrangement to avoid any tampering with the system including software. The 'admin' control should rest with the Railways.

15.12.3 One-to-one correspondence between Weight-o-meter discharge and corresponding wagon shall be maintained by GCTO.

15.12.4 A procedure order for normal operations covering precautions to be taken to ensure that wagons are empty before loading and periodical test weighing of this system shall be maintained by GCTO.

15.12.5 The system should have interface with FOIS to avoid any error in data capture during transmission.

15.13 GCTO may also be permitted to install an alternative means of weighment of wagons, which should have accuracy level at least equal to that of EIMWB and should ensure weighment within the time taken by EIMWB.

15.13.1 GCTO shall submit request for such alternative means of weighment, along with all the necessary documents, which may be permitted by

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

Railway on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager.

15.13.2 GCTO shall be responsible for getting the proposed means of weighment of wagons certified by Legal Metrology/ Weights & Measures department, and also for ensuring its proper upkeep and maintenance at its own cost.

16. **Installation of FOIS and TMS**

16.1 FOIS and TMS with limited access as prescribed by Indian Railways shall be installed at the GCT – at the cost of GCTO. All RRs will be prepared through TMS. Complete maintenance of FOIS and TMS will be done by Railway at its own cost.

16.1.1 Cost of replacement of FOIS and TMS equipment, at the end of their codal life, shall be borne by the GCTO.

17. **General Conditions**

17.1 Applicant/ GCTO will be solely responsible for - (a) arranging/ acquiring/ ownership/ lease/ licensing of non-Railway land for the development of GCT; (b) all statutory and non-statutory clearances from other government departments and statutory bodies; and (c) payment of all charges, taxes/ GST, surcharges, cess, levies, etc, related to transportation and handling of cargo.

17.2 For GCTs being developed entirely on non-Railway land, the portion of land required for linear connectivity of GCT with the serving Railway station may be acquired by Railway Administration on the specific request of applicant/ GCTO and at the cost of the applicant/GCTO, under the 'Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013'/ 'The Railway Act, 1989'.

17.2.1 An estimate of the cost of the land, prepared by Railway Administration in consultation with the Land Acquisition Officer, will be presented to the applicant, who shall deposit the amount before any further action is initiated for the acquisition of land. The applicant shall also agree to pay on demand such excess cost, if any, as may be incurred for the acquisition of this land.

17.2.1.1 The applicant shall also agree to compensate Railway if any extra cost is incurred by Railway arising out of such acquisition, even after commissioning of the Terminal.

17.2.2 Ownership of the land so acquired will vest with Railway, and the applicant for the Terminal shall have no right or claim thereto.

17.2.3 The entire cost of Railway infrastructure to be developed on such portion of acquired land will be borne by the GCTO, however the ownership of assets so created on such land will rest with Railway. Railway will reserve the right to grant connectivity to other Gati Shakti Cargo Terminal(s) taking off from the track passing over this land.

MAITHON POWER LTD. MAITHON

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

17.3 Unless otherwise mentioned in this policy, all 'Commercial and Operating rules' as applicable for a goods-shed for booking, supply and delivery of goods shall be applicable at GCTs.

17.4 The GCTO shall be responsible for clearance of all Railway dues, including demurrage charges, accrued within the GCT.

17.5 The cost of electricity/ diesel consumed by Railway locomotives shall be borne by Railway.

17.6 The GCTO shall provide at his own cost the level-crossings and ROB/ RUB/ LHSs for safe passage of trains as well as road vehicles, as per requirement and prescribed norms.

17.6.1 All level-crossings have to be provided with requisite infrastructure (gate-post, gate-lodge, etc) and have to be manned by GCTO at its own cost.

17.6.1.1 If the level-crossing becomes due for interlocking, the cost of interlocking shall be borne by the GCTO.

17.6.2 Maintenance of level-crossings falling on the track being maintained by Railway shall be done by Railway at its own cost; while maintenance of level-crossings falling on the track being maintained by the GCTO shall be done by GCTO (as illustrated in Section III of Schedule '3').

17.7 Railway shall reserve the right to grant connectivity to another GCT(s) from the portion of track on Railway land as well as from the portion of track which is being maintained (and assets are owned) by Railway. For the sake of clarity, Railway may permit connectivity to another Terminal from the connectivity portion of a Terminal – (i) on Railway land where the assets are owned and maintained by Railway; and (ii) on non-Railway land where the ownership of assets has been transferred to Railway by the GCTO, and the assets are maintained by Railway though the land is owned by the GCTO. This provision shall be applicable on Railway land for all GCTs; and on non-Railway land for all new GCTs, as well as on existing Terminals who decide to migrate to this Policy and transfer the ownership of assets on their land to Railway.

18. **Agreement**

18.1 An Agreement for GCT shall be signed before the issue of commercial notification and operation of the GCT by Railway. Sr.DCM of the concerned Division shall be the signatory of the Agreement.

18.2 For existing Terminals migrating to this Policy, the period of Supplementary Agreement (to be signed as per the provisions of this Policy) shall be co-terminus with the existing Agreement.

19. **Dispute Resolution**

19.1 In case of any dispute arising in the interpretation of the Policy, the decision of DRM will be final and binding.

MAITHON POWER LTD. MAITHON

वरिष्ठ मंडल वाणिज्य प्रबंधक
Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

19.2 Conciliation: All disputes and differences of any kind whatsoever arising out of or in connection with the construction and operations of GCT shall be referred by the GCTO to Railway Administration through 'Notice of Dispute.' RA shall, within 30 days after receipt of the 'Notice of Dispute,' notify the name of conciliator(s) to the GCTO. The Conciliator(s) shall assist the parties to reach an amicable settlement in an independent and impartial manner within the terms of Agreement. If the parties reach agreement on a settlement of the dispute, they shall draw up and sign a written Settlement Agreement duly signed by Railway's representative (Sr.DCM), GCTO and conciliator(s). When the settlement agreement is signed, it shall be final and binding on the parties. The conciliators shall be paid fee as fixed by Ministry of Railways time to time, which shall be shared equally by the parties.

19.2.1 The parties shall not initiate, during the conciliation proceedings, any reference to arbitral or judicial proceedings in respect of a dispute that is the subject matter of the conciliation proceedings.

19.2.2 The conciliation shall be carried out as per 'The Arbitration and Conciliation Act, 1996' and the proceedings shall be terminated as per Section 76 of the above Act.

19.3 Arbitration: If the dispute is not settled through Conciliation (as mentioned in para 19.2), it shall be decided by reference to arbitration. Arbitration shall be carried out as per provisions available for arbitration in Indian Railways General Conditions of Contract 2020 for works contracts, as amended from time to time.

20. **Termination of the Agreement**

20.1 Subject to the provisions in the Agreement, Railway Administration may terminate the Agreement with a GCTO operating a GCT in the event of any serious irregularity committed by the GCTO. This may include any grave breach of the terms and conditions of the Agreement, any default by GCTO, violation of The Railway Act, 1989, or commission of an unlawful act which is not in-line with Good Industry Practices.

20.2 Before terminating the Agreement, RA shall first issue a Show Cause Notice, informing GCTO to submit representation within 30 days. If no response is received, or if the response of GCTO is not satisfactory, a written Notice of Termination specifying a grace period of 180 days shall be given to the GCTO, by Sr.DCM with the approval of DRM. However, if no reply to the Notice for Termination is received within 180 days of the issue of Notice for Termination, the Agreement with GCTO will stand terminated and the same shall be communicated by Sr.DCM to GCTO. No termination payment shall be made by RA to the GCTO.

20.2.1 If the GCTO submits a reply within 180 days, RA will take further course of action on the merit of the case.

20.3 The GCTO will also have the right to terminate the Agreement by giving a notice of 180 days to the Railway Administration in the event of any difficulty faced by the GCTO in smooth functioning of the Terminal for reasons attributable to

Sr. Divisional Commercial Manager
पूर्व रेलवे, आसनसोल
Eastern Railway, Asansol

Railway as laid down in this policy, or for any other reason internal to the GCTO. No termination payment shall be asked by Railway from GCTO.

20.4 Any dispute arising out of this Agreement will be resolved through the Dispute Resolution Mechanism as prescribed under Para 19 of the Policy.

Sub: Provisional Opening of the GCT of M/s. Mithon Power Limited served by Thaparnagar station over Asansol Division.

With effect from 23.02.2022, the GCT of M/s. Mithon Power Ltd. served by Thaparnagar station over Asansol division of this Railway is declared provisionally open as an independent booking point for dealing with inward traffic of Coal and outward traffic of Fly Ash booked in train/wagon load when consigned to/from the above GCT.

Freight charge will be levied on Through Distance basis by adding an additional distance of 14.93 kms. from the serving station, Thaparnagar.

Necessary particulars of the GCT for booking of traffic are given as under:-

Name of the siding	Name of the serving Stn.	Alphabetical code of the siding	Numerical code of the siding	Distance to be added from the serving station to the farthest buffer end of the siding
Maithon Power Limited Sdg	Thaparnagar (TNW)	MMMT	02120735	14.93 kms

The GCT will work as per instructions contained in Master Circular on 'Gati Shakti Multi-modal Cargo Terminal (GCT)' dated 15.12.2021 and its amendments and the clauses of the GCT Agreement. The GCT will be operated on EOL and Round the Clock basis. In case Rly. engine is utilized inside the GCT, shunting charges will be leviable as per extant rules. Compliance of all Commercial formalities must be ensured.

All other charges as leviable to the traffic of the GCT as per the provisions of Railway rules and guidelines in force from time to time should be recovered accordingly.

All instructions of State Pollution Control Board should be adhered to.

All concerned to please note and act accordingly.

Necessary addition should be made in All India Alphabetical list of Stations/Sidings & RBS data as well.

This issues with the approval of the Competent Authority.

Sub:- Master Circular on "Gati Shakti Multi-Modal Cargo Terminal" – Instructions regarding Issue of Notification.

A Master circular on 'Gati Shakti Multi-Modal Cargo Terminal (GCT) policy' has been issued vide letter No. 2021/TC(FM)/18/23 dated 15.12.2021. As per Para 1.1 of this new GCT policy, all new as well as under-construction / under-approval Cargo Terminals (approved / proposed under the 'Private Siding' or ' Private Freight Terminal' policies) shall be covered by the GCT policy.

2. It may further be noted that the as per provision of para no. 18.1 of GCT policy an agreement for GCT shall be signed before the issue of commercial notification and operation of the GCT by Railway.

3. In this regard, references have been received from Zonal Railways regarding issued faced in signing of agreement for the GCTs ready for commissioning after 15.12.2021 --on account of non availability of any standard agreement.

4. Standard Agreement is under the process of finalization and approval. Therefore it is requested that the commissioning of new Terminals shall not be delayed on account of non-availability of standard agreement; and Zonal Railways may notify new Terminals by issuing comprehensive Notifications having details of the relevant provisions of the GCT policy.

However, this arrangement shall be ***ad-interim*** for an initial period of 03 months or till finalization of standard agreement, whichever is earlier.

Sub: Commissioning of MPL Siding (MMMT) – Migrating to "Gati Shakti Multi-Model Cargo Terminal (GCT Policy-2021)" and First Coal Rake Receipt.

Respected Sir,

Please accept our heartiest congratulations for commissioning of the very first private railway siding under the recently introduced "Gati Shakti Multi-Model Cargo Terminal (GCT Policy-2021)". Maithon Power Limited takes pride in becoming the first siding to get notified under GCT-2021 policy and successfully commissioning the siding with first rake receipt on 10th March 2022.

The commissioning of MPL siding has been made possible with joint effort of MPL project team and Asansol Division over the last few years and indeed is an event to be cherished for times to come. Henceforth, we will be able to receive coal on a sustainable and environment friendly manner, thereby contributing to the cause of reduction in carbon emission for our company and Nation at large.

Your gracious presence along with senior officers of Asansol Division during receipt of first Rake at MPL Siding (MMMT) on 10th March 2022 made it an even more joyous and memorable event for us.

We are thankful for all the support provided by Eastern Railway Kolkata & Asansol Division to achieve this milestone and look forward for continued association with Asansol Division and Eastern Railway.

Thanking You.

Yours faithfully,
For **Maithon Power Limited**

Model Agreement for 'Gati-Shakti Rail Multi-modal Cargo Terminal' built entirely on private land'

_____Railway

This **Agreement** is made and executed at ……..on this ……. Day of ……., 20…….

BY AND BETWEEN

THE PRESIDENT OF INDIA acting through (incorporate name and designation of the officer authorized under Article 299(1) of the Constitution) having its office at ……. (hereinafter referred to as "**The Railway Administration**" which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the One Part;

AND

……. [hereinafter referred to as **("Applicant or GCTO")*** which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the Other Part.

WHEREAS The Applicant is desirous of having a Cargo Terminal laid by the Railway Administration at _____ from the _____station yard of the _____ _ Railway taking off from Kilometer No. _____ between_____ station and_____ station of the Railway as shown in red and green on the plan bearing CE's No. _____ hereto annexed for the purpose of carrying on the Applicant's business in the Applicant's premises situated at _____ _ District _____

AND WHEREAS the Railway Administration is willing to lay the said cargo terminal for the said Applicant upon and subject to the terms and conditions hereinafter set forth.

NOW, Therefore, this Agreement witnesseth as follows:

1. **Interpretation**: In these presents, unless the context otherwise requires, the following Words and Expressions have the meaning and shall be interpreted as specified, namely-

Words importing the singular number include the plural number and vice versa.

"Person" includes a firm or other association or body of individuals and a Company or other Corporate Body.

"Railway Administration" means and includes the General Manager for the time being of (name of Zonal Railway) Railway and any officer of the (name of Zonal Railway) Railway authorized by any such General Manager to deal with any matters, with which these presents are concerned.

"Applicant" means the person named as party hereto of the other part and includes in the case of a firm or other association or body of individuals, the individual person or persons for the time being and from time to time constituting the association or body and, In the case of a company, corporation or body corporate the Successor in business of interest, such company, corporation or body corporate for the time being.

07/07/2022

"Works" means the premises belonging to or occupied or used by the Applicant which are connected with the (name of the Zonal Railway) Railway system by the terminal herein before mentioned,

"Undertaking" includes all land, railway lines, works, buildings, engines, rolling stock and other movable or immovable property now or at any time hereafter forming part of or pertaining to the (name of the Zonal Railway) Railway system as now or hereafter constituted and all engines and rolling stock (whether belonging to the _____ Railway system or not) passing over such system.

"Cargo Terminal" Includes the Railway track connecting the Applicant's works with the Railway system, as hereinafter agreed to be constructed by the Railway Administration and all branches and extensions thereof which may hereafter be constructed by the Applicant or by the Railway Administration at the Applicant's request and all sleepers, ballast, embankments, bridges, tunnels, signals interlocking and tele-communication equipment gates, buildings and other constructions, erections, works and movable property constructed / erected / made/ provided or used in connection with the said track and also all land whereon or on part whereof the said track and connected things aforesaid are constructed / erected / made / provided or used including land acquired for the purpose thereof as hereinafter provided and land belonging to the Railway Administration and land belonging to or occupied or used by the Applicant.

The Cargo Terminal shall cover only that portion of track network on which Railway rolling stock will ply. The network utilized by the Company/Party for their internal use shall not form part of the Cargo Terminal defined herein."

"Sub-grade Work" includes the construction of embankments, the making of cuttings and the carrying out of other earth work, the construction of bridges (exclusive of girder works), buildings, platforms, tunnels, culverts, drains and openings and laying out of ballast and all other works necessary to permit the laying and construction of railway track of the terminal and generally all works which have to be abandoned, if the terminal be closed.

"Permanent Way Materials" includes girders, rails, sleepers, fastenings, points and crossings, fencings, signaling, interlocking and telecommunication equipment and over-head structure and any other things connected therewith for electric traction and other machinery (except station machinery) and equipments necessary for working the terminal.

"Legal Representative" means any person who is competent to give the Railway Administration a valid discharge in respect of any money or property which may be payable or deliverable to the Applicant and shall include the executor and administrator of a deceased person, a succession certificate holder, the surviving or continuing partners or members in the case of a firm, association or body of individuals, the certificated guardian if a minor's property, the committee of lunatic, the assignee or receiver of an insolvent's estate, the liquidator of a Company, a receiver and any person legally appointed to represent the estate of the Applicant.

* **Note**: Forms Of Description Of The Applicant –

(Where a single person is the Applicant) "and A.B. (insert full name) of (insert address and occupation)"

(Where two or more persons are Joint Applicants), "and A.B. (insert full name) of (insert address and occupation) and C.D.: (insert full name) of (insert address and occupation)".

07/07/2022

(Where a single person trading under a different fee name is the Applicant) "and A.B. (Insert full name) of (insert address and occupation) carrying an business under the name or style of (insert name) at (if the business is carried on at a different address from the address already Inserted then insert such additional address)."

(Where a partnership firm is the Applicant and the names of the partner known), "and A.B. (Full name) and C.D. (full name) carrying on business partnership as (insert nature of business) under the style or firm of (insert name or style of the firm and address).

(Where a partnership firm is the applicant and the names of partners are not known), "and A &Co. (insert name or style of the firm) a partnership firm carrying on business at (insert address) as (insert nature of business)."
(Where an incorporated Company is the Applicant), "A.B. &CO. Ltd. a company incorporated in (Insert country of incorporation (e.g. India, England or elsewhere, as the case may be) and having its registered office at (insert address)" (in the case of a company incorporated elsewhere than in India address) "and its principal office in India at (insert address)".

(Where the Applicant is a joint family governed by the Mitakshara School of Hindu Law), "A.B. (insert full name) for self and as Karta or managing member of the Joint family, governed by the Mitakshara School of Hindu Law, carrying on business under the name or style of (insert name under which the joint family business is carried on) at (Insert address) and C.D.E.F.G.H. etc. (insert full name) being the other adult members of the said Joint family.

2. **<u>Agreement To Construct Gati Shakti Multi-Modal Cargo Terminal</u> (GCT) :**

Subject to the terms and conditions hereinafter contained, the Railway Administration shall at the cost and expense of the Applicant in all respects, construct fully on the land of the Applicant of the said Cargo Terminal, from _____ (length of terminal) Kilometers on _____ (name of portion) Branch as shown in red and green on the plan annexed hereto (bearing CE's No. _____) connecting the Applicant's work known as _____ situated at or near _____ in the District of with the system at or near _____ on _____ Railway.

3. **Capital Cost of GCT**

3.1 The Gati Shakti Cargo Terminal Operator (GCTO) shall bear the entire capital cost of new GCT from the take-off point onwards, as marked on the Engineering Scale Plan (ESP) at the serving station.

3.1.1 For the linear connectivity portion of GCT passing through the Railway land, including the land to be acquired by Railway for this purpose under para 17.2 of the Master Circular on Gati Shakti Multi-modal Cargo Terminal Policy dated 15.12.2021 (**hereinafter referred to as the policy**), GCTO shall provide only the minimum essential infrastructure of track, OHE and signalling equipment at the cost of GCTO (other assets not related to track, signalling, or OHE, if required, shall be constructed by Railway at its own cost). In case of any dispute, the decision of DRM shall be final in this regard.

3.1.2 The ownership of infrastructure including the track, signalling equipment and OHE created on Railway land under para 5.1.1 of the policy shall belong to Railway, even though the capital cost for these shall be borne by the GCTO.

07/07/2022

3.2 The capital cost for all common-user traffic facilities at the serving station (as marked on the ESP), including Signalling & Telecommunication works, modification and up-gradation to existing interlocking/ OHE, or electrification in future within the station limit up to take-off point, shall be borne by the Railway.

3.3 Maintenance and operation of assets created under para 5.2 of the policy (common-user traffic facilities) at the serving station including staff costs, shall be the responsibility of the Railway.

3.4 The capital expenditure required for augmenting or up-grading the facilities and infrastructure on the connectivity portion from take-off point onwards towards Terminal and within the premises of Terminal shall be borne by the GCTO.

3.5 The connectivity to GCTs shall normally take-off from the existing serving station. However, in case when it is operationally not feasible to provide a connection from an existing serving station, provision of a Block Hut/ Block station (between two existing stations) with required points & crossings may be considered, provided it is operationally feasible. This will be done on the request of GCTO.

3.5.1 In such cases, the entire capital cost of the new Block Hut/ Block station and related infrastructure shall be borne by the GCTO. However, this work will be executed by Railway, and ownership of the same shall remain with the Railway.

3.5.2 However, for new GCTs planned to load one million Tonne or more (outward traffic) per annum, the capital cost of new Block Hut/ Block station will be repaid to the GCTO by Railway.

3.5.2.1 The repayment of capital cost of the new Block Hut/ Block station will be made by Railway through 10% rebate on the outward traffic loaded at the Terminal, till such time the capital cost has been repaid to the GCTO. This 10% rebate shall be granted on the normal tariff rate (NTR) of the commodity.

3.5.2.2 The repayment of capital cost as mentioned in para 3.5.2.1 above will be done only if the Terminal achieves the target of loading one million Tonne per annum within two Calendar Years of commissioning (excluding the year of commissioning). For example, if a GCT commissioned during calendar year 2022 achieves one million Tonne loading during calendar year 2024, then the repayment of capital cost of new Block Hut/ Block station (through 10% rebate on outward traffic) shall start from 01st April 2025.

3.5.2.3 This repayment shall be made for the investment made by the GCTO on behalf of Railways. As such, this repayment through freight rebate shall be admissible over and above all other rebates that the GCTO may become eligible for in future.

3.5.2.4 This provision of repayment shall be applicable only for GCTs for which Agreement between RA and GCTO has not been entered into till the date of issue of this Policy. **Further, existing terminals migrating to GCT Policy shall not be eligible for this repayment.**

4. **<u>Sub-Grade Work</u>** :

The sub-grade work, culverts & bridges, drains, pitching & protection work and ballast supply shall be carried out at the cost and expense of the Applicant either by his own agency or by the Railway Administration on his request. When the works or part of them are carried out by the Applicant, the work shall conform to the Railway Administration's drawings and

07/07/2022

specifications and shall be executed under the supervision of Engineering staff of the Railway Administration or under the supervision of Approved Consultant.

5. **Security of Assets**

5.1 The responsibility of security of railway assets over Railway land shall be of Railways. However, the responsibility of security of railway assets outside Railway Land or on land licensed to GCTO shall be of GCTO.

5.1.1 In case of theft of any railway asset on non-Railway land, the maintenance of which is with Railway, the restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

5.1.2 In case of theft of OHE including OHE on non-Railway land, restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

6. **Maintenance of Assets**

6.1 Maintenance of assets on Railway land, including Track and Signalling Equipment installed on Railway land under para 5.1.1 of the policy, shall be done by Railway at its own cost.

6.2 Maintenance of OHE from the take-off point onward including inside the Terminal shall be done by Railway at its own cost – as this involves safety of men and equipment, and can also impact rail operations outside the Terminal boundary.

6.3 In addition to above, the maintenance of assets (track, bridges, signalling equipment, etc) on non-Railway land ***outside the Terminal***, may also be done by Railway at its own cost if the GCTO transfers the ownership of these assets to Railway (the ownership of land on which such assets are created shall however continue to be with GCTO). Provided further, this provision shall be applicable only to those GCTs where freight tariff is charged on 'through distance basis.'

6.3.1 In case maintenance of assets, including Track and Signalling Equipment, is being handed over to Railways on migration to this policy by GCTO, the GCTO will ensure that the standards of track and signalling infrastructure being transferred to Railway is in accordance with the prescribed standards for GCTs, as decided by Railways (as per Annexure 'D' of the policy). If any up-gradation/ replacement/ renewal of any infrastructure is required, the GCTO shall bear the cost for the same.

6.3.2 In case of damages to the assets due to accident, etc, the replacement shall be done by Railway. However, if the responsibility of accident, after Enquiry (joint enquiry by representatives of Railway as well as GCTO), is fixed on the GCTO – the GCTO shall have to bear the cost of all the replacements. The decision of the Nodal Officer, i.e. DRM, in this regard shall be final.

6.3.3 In case the damage to assets is due to an external cause (floods, breaches, terrorist activity, etc), the cost of restoration shall be borne by the GCTO.

6.3.4 If the GCTO does not agree to transfer the ownership of assets (track, bridges, signalling equipment, OHE, etc) to Railway or freight tariff is not chargeable 'on through distance basis'; the maintenance of these assets – except OHE – shall continue to be the responsibility of GCTO.

6.3.4.1 Railway shall be entitled to conduct periodic inspections of such GCTs being maintained by the GCTO, for which Inspection Charges will be levied as per the prescribed norms.

07/07/2022

6.3.4.2 GCTO may also get the maintenance done through Railway for such Terminals, in which case Maintenance Charges shall also be levied as per the prescribed norms.

6.3.5 The maintenance of GCT yard, including loading/ unloading lines, shall be the sole responsibility of GCTO. Distribution of the responsibility of track has been explained in Schedule '3' of the policy.

6.3.6 At such GCTs, Railway shall maintain the signalling equipment till the line-clear/ receipt-despatch arrangement with serving station(s), at its own cost. Maintenance of signalling equipment internal to the Terminal shall be the sole responsibility of the GCTO.

6.4 The cost of all subsequent up-gradations (on account of change of technology, standards, etc) shall be borne by the GCTO.

6.5 Maintenance of all the infrastructure and equipment inside the GCT which are not to be accessed by Railways' rolling-stock, and maintenance of infrastructure required for loading/ unloading (tipplers, hoppers, etc) shall be the responsibility of GCTO.

7. Cost of Electrification

7.1 In case of new GCT, the entire cost of electrification of the Terminal and the connectivity portion between take off point and GCT, shall be borne by the GCTO.

7.2 While undertaking electrification of main line and serving station by Railways, the electrification of the existing GCT(s) including the rail-line connecting the Terminal(s) shall be undertaken at the Railway's cost.

8. Handling of Wagons in GCTs:

8.1 If any damage and deficiencies is caused to railway wagons due to the fault of the GCTO, the damage and deficiency charges shall be raised by Railway and paid by the GCTO as per the extant rules of Railways.

8.2 All tipplers and bulk handling systems used for loading/unloading of Railway wagons shall be provided and commissioned by GCTO at its own cost in accordance with the RDSO's approved specifications. This provision shall however not be applicable on the systems/ equipment installed by GCTO which are not to be used for handling Railway wagons (such as conveyor-belts, JCBs, excavators, etc).

8.2.1 GCTO shall ensure that tipplers, bulk handling systems, and mechanized equipment are operated only by the qualified and experienced staff under adequate supervision.

8.2.2 Such equipment shall be regularly maintained and replaced at the end of their codal life by GCTO at its own cost.

8.2.3 In case of any accident/ derailment inside the Terminal or outside the Terminal up to serving station, Railway will provide Accident Relief Train (ART) initially free of cost. Provided further, if the responsibility of accident/ derailment after enquiry is fixed on the GCTO, ART Charges shall be payable by GCTO as prescribed by Railway from time to time. The due Charges will be deducted from the future payments by Railway to GCTO. However, in case no regular payments are being made by Railway to GCTO, on demand from Railway, the GCTO shall pay ART Charges to Railway without any delay.

8.2.4 The accident enquiry as mentioned in para 9.2.3 above shall be conducted jointly by the representatives of Railway and GCTO to be nominated by DRM and

07/07/2022

GCTO respectively. The accepting authority of Enquiry Report shall be DRM, whose decision shall be final and binding on GCTO.

9. **C&W Maintenance Facilities**

9.1 Normally C&W facilities shall not be constructed at GCTs.

9.2 However, if C&W facilities are operationally required at any GCT as per the extant instructions, only one-time capital cost for setting-up these facilities shall be borne by the GCTO. Operational costs, including staff cost and material cost (for Railway-owned stock), shall however be borne by the Railway.

9.3 For GCTs dealing with POL and other hazardous material, specialized facilities inside the Terminal as well as in Railway yard (if required) shall be developed by the GCTO at its own cost, and shall be maintained by GCTO to ensure that no untoward incident/ accident takes place at such facilities.

10. **Authorized Users**

10.1 GCTO shall inform Railway about the authorized rail users of the GCT before notification, so that they may be incorporated in the TMS module of FOIS.

10.2 If the GCTO desires to add more rail users subsequently, GCTO shall inform Railway at least seven (07) working days in advance, to enable incorporation of such rail users in FOIS.

11. **Commodities Permitted**

11.1 Unless otherwise specified by Indian Railway, a GCT shall be permitted to book and handle all traffic – including coal and coke, which shall be as per the guidelines of 'preferential traffic schedule' issued by Ministry of Railways from time to time.

12. **Engine-on-Load (EOL) Scheme**

12.1 All new GCTs shall be set up on 'charging on through distance basis,' as per the instructions contained in Rates Master Circular on 'Freight on Through Distance Basis issued on 24.09.2014 (Annexure 'A' of the policy), as modified from time to time.

12.2 All new GCTs charged on through distance basis shall be governed by the Engine-on-Load policy (FM Circular No.05 of 2013 dated 07.03.2013), as modified from time-to-time.

12.2.1 Railway may permit commissioning of a new GCT on non-EOL basis with the approval of DRM, if Engine-on-Load scheme is not operationally feasible.

13. **Charging of Commercial Staff**

13.1 No cost of commercial staff will be charged from the GCTO w.e.f the date of issue of this policy. However, for existing Terminals (*where PFT/ Private Siding Agreement has already entered into between RA and operator before the issue of this Policy*) where cost of commercial staff has already been deposited by the GCTO, there shall be no refund. Further, dues of commercial staff cost pending, if any, as on the date of issue of this policy shall be payable by GCTO.

14. **Provision of Weighbridge**

14.1 All GCTs planning to deal with outward cargo (loading) shall have a provision of Electronic In-motion Weighbridge (EIMWB) at a suitable location inside the Terminal. The EIMWB shall comply with OIML (International Organization of Legal Metrology)

07/07/2022

document (available at https://www.oiml.org/en/files/pdf_r/ r106-2-e12.pdf) and the latest RDSO specifications.

14.1.1 Provision of EIMWB shall not be essential for GCTs dealing with inward cargo (unloading) only.

14.1.2 If a GCT without an EIMWB plans to start loading, the GCTO shall make arrangement for provision of an EIMWB as per the provisions of the Policy. DRM, in consultation with CFTM of the Railway, may, however permit loading at a GCT (if operationally feasible) – by nominating an alternative Railway weighbridge for weighment of rakes, awaiting installation of EIMWB, for a period of up to six months at a time from the date of start of such loading, duly recording the reasons for the same.

14.2 GCTO shall bear the cost of procurement (inclusive of the requisite warranty and a post-warranty comprehensive Annual Maintenance Contract (AMC) till the end of codal life), installation, and replacement of the EIMWB at the end of its codal life. GCTO shall also bear the cost of weighbridge house, weighbridge siding, and related infrastructure.

14.3 GCTO shall get the weighbridge certified by the Weights & Measures department of the state government, and shall comply with all the applicable statutory and legal requirements.

14.3.1 The weighbridge, after testing and certification by the Weights and Measures department of the state government, shall be sealed by their personnel in presence of GCTO's and Railway's representatives. This seal shall be broken, if required, only in the presence of the personnel of Weights and Measures department and Railway's representative.

14.4 GCTO shall bear the cost of manpower to operate the EIMWB, and the cost for its linking with FOIS.

14.5 RR will be issued on the basis of weighment within a GCT as per the extant instructions provided vide Rates Master Circular/Weighment/2019/0 dated 25.07.2019 and other applicable instructions of Railways (Annexure 'B' of the policy), as modified from time to time.

14.6 No extra free-time will be provided for weighment at an EIMWB inside a GCT.

14.7 Railway Administration reserves the right to conduct periodic and/or surprise inspections of the operation, functioning and calibration of EIMWB.

14.8 For the purpose of mandatory testing of EIMWB, test-wagons shall be provided by Railway on payment of Haulage Charges. These Haulage Charges shall be levied for the actual distance travelled or 100 km, whichever is less.

14.8.1 In cases where there is more than one weighbridge located within a GCT, the Haulage Charges as per para 14.8 above shall be levied for the 'first weighbridge,' and shall be levied @25% of the charges for the 'first weighbridge' for other weighbridges inside the Terminal.

14.8.2 For random surprise testing by Railway, test-wagons will be provided for without levying Haulage Charges or any other charges.

14.8.3 Railway shall try to ensure availability of 'test wagon-sets' in the vicinity of all GCTs, so that there is no delay in arranging these wagons for testing.

14.9 If any overloading is detected in the outward traffic the same will have to be unloaded/ re-adjusted at the Terminal itself – for which no extra free-time will be provided.

14.10 Whenever the EIMWB goes out of order, it shall be put right by the GCTO within three days, failing which a penalty of Rs 4,000/- per day or part thereof for the next ten days, and Rs 8,000/- per day or part thereof thereafter, shall be imposed.

14.11 Under exceptional circumstances, if it becomes essential to install the EIMWB of a GCT either partially or wholly on Railway land not licensed to GCTO (on account of operational and technical constraints), permission for the same may be given by the

07/07/2022

DRM. Location of such an EIMWB shall be decided by Sr.DOM, in consultation with Sr.DCM, Sr.DEN & Sr.DME.

14.11.1 All terms and conditions applicable on EIMWB inside a GCT shall also be applicable on an EIMWB installed by GCTO on such land. However, Railway will be the executing agency for installation, operation, and maintenance of such EIMWBs.

14.11.2 Cost of the comprehensive AMC and manpower to operate such EIMWB shall be borne by the GCTO.

14.11.3 Railway will be free to weigh rakes other than those of the concerned GCT at such EIMWB.

14.12 Railway may permit weight-o-meter/ pre-weighbin system of weighment in GCT on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager, keeping in view the requirement and to avoid any manipulation of weighment data.

14.12.1 Such equipment shall be certified by Weights & Measures department, and should also meet all extant statutory provisions and policy guidelines.

14.12.2 The system should have proper locking/ sealing arrangement to avoid any tampering with the system including software. The 'admin' control should rest with the Railways.

14.12.3 One-to-one correspondence between Weight-o-meter discharge and corresponding wagon shall be maintained by GCTO.

14.12.4 A procedure order for normal operations covering precautions to be taken to ensure that wagons are empty before loading and periodical test weighing of this system shall be maintained by GCTO.

14.12.5 The system should have interface with FOIS to avoid any error in data capture during transmission.

14.13 GCTO may also be permitted to install an alternative means of weighment of wagons, which should have accuracy level at least equal to that of EIMWB and should ensure weighment within the time taken by EIMWB.

14.13.1 GCTO shall submit request for such alternative means of weighment, along with all the necessary documents, which may be permitted by Railway on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager.

14.13.2 GCTO shall be responsible for getting the proposed means of weighment of wagons certified by Legal Metrology/ Weights & Measures department, and also for ensuring its proper upkeep and maintenance at its own cost.

15. **Installation of FOIS and TMS**

15.1 FOIS and TMS with limited access as prescribed by Indian Railways shall be installed at the GCT – at the cost of GCTO. All RRs will be prepared through TMS. Complete maintenance of FOIS and TMS will be done by Railway at its own cost.

15.1.1 Cost of replacement of FOIS and TMS equipment, at the end of their codal life, shall be borne by the GCTO.

16. **General Conditions**

16.1 Applicant/ GCTO will be solely responsible for – (a) arranging/ acquiring/ ownership/ lease/ licensing of non-Railway land for the development of GCT; (b) all statutory and non-statutory clearances from other government departments and statutory bodies; and (c) payment of all charges, taxes/ GST, surcharges, cess, levies, etc, related to transportation and handling of cargo.

16.2 For GCTs being developed entirely on non-Railway land, the portion of land required for linear connectivity of GCT with the serving Railway station may be acquired by Railway Administration on the specific request of applicant/ GCTO and at the cost of

07/07/2022

the applicant/GCTO, under the 'Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013'/ 'The Railway Act, 1989'.

16.2.1 An estimate of the cost of the land, prepared by Railway Administration in consultation with the Land Acquisition Officer, will be presented to the applicant, who shall deposit the amount before any further action is initiated for the acquisition of land. The applicant shall also agree to pay on demand such excess cost, if any, as may be incurred for the acquisition of this land.

16.2.1.1 The applicant shall also agree to compensate Railway if any extra cost is incurred by Railway arising out of such acquisition, even after commissioning of the Terminal.

16.2.2 Ownership of the land so acquired will vest with Railway, and the applicant for the Terminal shall have no right or claim thereto.

16.2.3 The entire cost of Railway infrastructure to be developed on such portion of acquired land will be borne by the GCTO, however the ownership of assets so created on such land will rest with Railway. Railway will reserve the right to grant connectivity to other Gati Shakti Cargo Terminal(s) taking off from the track passing over this land.

16.3 Unless otherwise mentioned in this policy, all 'Commercial and Operating rules' as applicable for a goods-shed for booking, supply and delivery of goods shall be applicable at GCTs.

16.4 The GCTO shall be responsible for clearance of all Railway dues, including demurrage charges, accrued within the GCT. For the sake of clarity, it is explicitly mentioned that demurrage charges will be borne by the GCTO for demurrage occurring on its own private land or occurring on railway land licensed to the GCTO.

16.5 The cost of electricity/ diesel consumed by Railway locomotives shall be borne by Railway.

16.6 The GCTO shall provide at his own cost the level-crossings and ROB/ RUB/ LHSs for safe passage of trains as well as road vehicles, as per requirement and prescribed norms.

16.6.1 All level-crossings have to be provided with requisite infrastructure (gate-post, gate-lodge, etc) and have to be manned by GCTO at its own cost.

16.6.1.1 If the level-crossing becomes due for interlocking, the cost of interlocking shall be borne by the GCTO.

16.6.2 Maintenance of level-crossings falling on the track being maintained by Railway shall be done by Railway at its own cost; while maintenance of level-crossings falling on the track being maintained by the GCTO shall be done by GCTO (as illustrated in Section III of Schedule '3').

16.7 Railway shall reserve the right to grant connectivity to another GCT(s) from the portion of track on Railway land as well as from the portion of track which is being maintained (and assets are owned) by Railway. For the sake of clarity, Railway may permit connectivity to another Terminal from the connectivity portion of a Terminal – (i) on Railway land where the assets are owned and maintained by Railway; and (ii) on non-Railway land where the ownership of assets has been transferred to Railway by the GCTO, and the assets are maintained by Railway though the land is owned by the GCTO. This provision shall be applicable on non-Railway land for all new GCTs, as well as on existing Terminals who decide to migrate to this Policy and transfer the ownership of assets on their land to Railway.

16.8 The Railway land to be used for providing connectivity to a GCT (on non-Railway land) shall not be licensed to the GCTO. This land shall remain in the possession and control of Railway, and the infrastructure (track, signalling equipment, and OHE) developed on this land, though funded and constructed by the GCTO, shall also be owned by Railway – as per the provisions of para 5.1.2 & 5.1.3 of the Policy.

07/07/2022

16.9 For GCTs developed entirely on non-Railway land, Railway will levy Terminal Charges for each rake handled (as per the applicable guidelines), which will be reimbursed to the GCTO.

16.10 No Terminal Charges shall be levied on cargo for which GCTO himself is the consignor and/or the consignee.

16.11 No Terminal Access Charges will be levied for rakes of privately-owned wagons when handled at GCTs built entirely on non-Railway land.

17. Dispute Resolution

17.1 In case of any dispute arising in the interpretation of the Policy, the decision of DRM will be final and binding.

17.2 Conciliation: All disputes and differences of any kind whatsoever arising out of or in connection with the construction and operations of GCT shall be referred by the GCTO to Railway Administration through 'Notice of Dispute.' RA shall, within 30 days after receipt of the 'Notice of Dispute,' notify the name of conciliator(s) to the GCTO. The Conciliator(s) shall assist the parties to reach an amicable settlement in an independent and impartial manner within the terms of Agreement. If the parties reach agreement on a settlement of the dispute, they shall draw up and sign a written Settlement Agreement duly signed by Railway's representative (Sr.DCM), GCTO and conciliator(s). When the settlement agreement is signed, it shall be final and binding on the parties. The conciliators shall be paid fee as fixed by Ministry of Railways time to time, which shall be shared equally by the parties. For other issues related with Conciliation, terms and conditions defined under Indian Railways General Conditions of Contract 2020 may be followed.

17.2.1 The parties shall not initiate, during the conciliation proceedings, any reference to arbitral or judicial proceedings in respect of a dispute that is the subject matter of the conciliation proceedings.

17.2.2 The conciliation shall be carried out as per "The Arbitration and Conciliation Act, 1996 (26 of 1996) or any statutory modifications or re-enactment thereof" and the proceedings shall be terminated as per Section 76 of the above Act.

17.3 Arbitration: If the dispute is not settled through Conciliation (as mentioned in para 17.2), it shall be decided by reference to arbitration. Arbitration shall be carried out as per provisions available for arbitration in Indian Railways General Conditions of Contract 2020 for works contracts, as amended from time to time.

17.4 Governing Law & Jurisdiction: This Agreement is governed by and shall be construed in accordance with the laws of India. In case of any dispute and difference arises, the Court of the place, where Land License Agreement has been made, shall only have the jurisdiction to try such litigation.

18. Termination of the Agreement

18.1 Subject to the provisions in the Agreement, Railway Administration may terminate the Agreement with a GCTO operating a GCT in the event of any serious irregularity committed by the GCTO. This may include any grave breach of the terms and conditions of the Agreement, any default by GCTO, violation of The Railway Act,

07/07/2022

1989, or commission of an unlawful act which is not in-line with Good Industry Practices.

18.2 Before terminating the Agreement, RA shall first issue a Show Cause Notice, informing GCTO to submit representation within 30 days. If no response is received, or if the response of GCTO is not satisfactory, a written Notice of Termination specifying a grace period of 180 days shall be given to the GCTO, by Sr.DCM with the approval of DRM. However, if no reply to the Notice for Termination is received within 180 days of the issue of Notice for Termination, the Agreement with GCTO will stand terminated and the same shall be communicated by Sr.DCM to GCTO. No termination payment shall be made by RA to the GCTO.

18.2.1 If the GCTO submits a reply within 180 days, RA will take further course of action on the merit of the case.

18.3 The GCTO will also have the right to terminate the Agreement by giving a notice of 180 days to the Railway Administration in the event of any difficulty faced by the GCTO in smooth functioning of the Terminal for reasons attributable to Railway as laid down in this policy, or for any other reason internal to the GCTO. No termination payment shall be asked by Railway from GCTO.

18.4 Any dispute arising out of this Agreement will be resolved through the Dispute Resolution Mechanism as prescribed under Para 17 above.

19. ***Power To Stop Traffic And To Terminate Agreement In Certain Events:***

The Railway Administration shall have the absolute right to refuse at any time to allow their rolling stock to go on or be used upon the Terminal or any part or extension thereof and shall also be entitled to determine this Agreement at any time after the happening of any of the following events:

19.1 In the event of the Applicant failing to deposit within the time fixed for the purpose any sum of sums required to be deposited under the provision of these presents or according to any direction of the Railway Administration.

19.2 In the event of the Applicant failing to pay any other sums payable to the Railway Administration under this Agreement or any other changes payable to the Railway administration in respect of the terminal or the use thereof within one month after the due date of payment or in the event of a due date not being specified then within one month after service of a written-demand for payment.

19.3 In the events of the Applicant failing to comply with any requisition of the Railway Administration to remove or repair any defect which in the opinion of the Railway administration may endanger the working and safety of the terminal within such time as shall be fixed by the Railways Administration for the purpose.

19.4 In the events of the Applicant ceasing for a consecutive period of 3 (three) months to use the terminal or any part for extension thereof for the Applicant's own traffic in connection with the Applicant's Works.

19.5 In the event of the Applicant contravening the provision of Clause 15 hereof.

19.6 In the event of the Applicant failing to observe or perform any other obligation on his part herein contained.

19.7 In the event of the terminal becoming dangerous or defective by reason of any act of God or other act or circumstances for which the Railway Administration is not responsible.

19.8 In the event of any branch line, terminal or part or extension thereof, connecting the terminal or any part or extension thereof with the Railway system, becoming dangerous or defective for any reason whatsoever and whether such branch line, terminal part or extension shall belong to the Applicant or to any third person.

07/07/2022

19.9 *In the event of any branch line, terminal or any part or extension thereof connecting the terminal or any part or extension thereof with the Railway system, being closed by the Railway Administration under any powers which the Railway Administration may possess whether by status or by Agreement with third persons or closed by order of the Government of India or any State Government.*

The Applicant shall have no claim whatsoever against the Railway Administration in respect of any refusal by the Railway Administration to allow their rolling stock to go on or be used upon the terminal or any connected Terminal or branch line in any of the aforesaid events.

Provided always that on the happening of any of the events mentioned in sub-Clauses 21.1, 21.2, 21.4, 21.5, 21.6, the Railway Administration shall not exercise the power conferred upon it by this Clause unless 14 (Fourteen) days' previous notice has been given in writing requiring the Applicant to comply with the demand or requisition as the case may be, of the Railway Administration and the Applicant has failed to comply with the Same within the time specified in such notice.

No notice shall be required to be given in the cases specified in the other sub-clauses of this clause.

20. ***Termination of Agreement on Death. Insolvency etc. :***

This agreement may be determined by the Railway Administration without prior notice at any time after the happening of any of the following events:

20.1 *In the event of the death of the Applicant, if he is an individual person.*
20.2 *In the event of a partition of the Joint family properties, if the Applicant is a Joint family governed by the Mitakshara School if Hindu Law.*
20.3 *In the event of dissolution of partners either by act of parties or by order of Court, if the Applicant is a firm or other association or body of individuals.*
20.4 *In the event of dissolution of partners either by act of parties or by order of Court, if the Applicant is a firm or other association or body of individuals.*
20.5 *In the event of Applicant becoming insolvent or going into liquidation either voluntarily or under an order of a competent Court.*
20.6 *In the event of the Applicant's interest in the works becoming wholly or partially vested in some other person.*
20.7 *In the event of the Applicant contravening the provision of Clause 21 hereof.*

21. ***Agreement To Bind Applicant Until Terminated By The Railway Administration***

21.1 *Until terminated by the Railway Administration or unless and until the person or persons in whom the entire rights and interests of the Applicant have vested and with wham the Railway Administration has agreed to enter into a Cargo Terminal Agreement has executed and registered such Agreement in the same form as these presents or in such other form as the Railway Administration may require as provided in Clause 21 hereof, this Agreement shall be binding upon the Applicant and the successors in title or interest of the Applicant in the Applicant's work*

(i) Provided that the Applicant may by giving 6 (six) months' notice to the Railway Administration, discontinue the use of the terminal. In such event, the Applicant shall not be liable for the payment of maintenance and other charges under the Agreement for the period subsequent to the date of expiry of the said notice, but nevertheless all other obligatians under the Agreement shall binding on him.

(ii) Provided further that the Railway Administration has the right without assigning any reason to terminate this Agreement on 6 (six) months' notice.

07/07/2022

22. ***Right To Charge Interest On Money Due Hereunder To The Railway Administration:***
Notwithstanding anything contained in the foregoing Clauses of this Agreement, the Railway Administration shall have the right to charge and recover from the Applicant interest at such rates, as may be fixed by the Railway Administration from time to time on any or all sums payable by the Applicant under the terms thereof, if such sums are not paid within one month from the due date and if no such date is fixed, within one month from the date on which a written demand is made by the railway Administration.

23. ***Right Of Deduction Of Money Due To The Railway Administration***

The Railway Administration shall have the right to deduct from any amount which may become payable by the Railway Administration to the Applicant or to the legal representative of the Applicant any money due from the Applicant to the Railway Administration under these presents or for freight, haulage or other charges or otherwise in connection with the construction, maintenance or working of the terminal.

24. ***Service Of Notices On Applicant:***
The Applicant shall maintain a proper office to which all letters, notices, demands and other communications intended for the Applicant may be sent and every notice, demand or other communication which shall be delivered at or sent by Registered Post to such office shall for all purposes whatsoever be deemed to have been validly and effectively delivered to the Applicant.

25. ***Exercise Of Powers :***
Subject as otherwise provided in this agreement, all notices to be given on behalf of the President of India and all other actions to be taken on his behalf may be given or taken on his behalf by the Railway Administration; the agreement signing authority or his authorized representative.

26. ***Alteration / Variation Of The Agreement:***
Except as hereby provided any verbal or written arrangement or abandoning, varying or supplementing this Agreement or any of the terms hereof shall be deemed conditional and shall not be binding on the railway administration unless and until the same is endorsed on this agreement or incorporated in a formal instrument and signed by the parties hereto and till then the Railway administration shall have the right to repudiate such arrangement.

27. ***Applicant Not To Transfer Rights ;***

27.1 The Applicant shall not be entitled to assign or transfer or subject or permit to be used or enjoyed by any other person in any manner whatsoever any of the rights or benefits conferred upon the Applicant by these presents and any purported assignment transfer or subletting or permission shall be void and of no effect. Provided also that in the event of any other person being permitted by the Railway Administration to use the terminal on the Applicant's request or otherwise, the Applicant shall remain responsible to the Railway Administration for all the charges and obligations under this Agreement.

27.2 Provided, however, that if the Applicant shall desire to transfer the Applicant's Works to any person or if the applicant being a Company shall go into liquidation and such intended transferee or the liquidator of the Company shall desire the use and benefit of the terminal than subject to the under mentioned conditions being complied with the Railway Administration may at its discretion on the written request of the Applicant and of the intended transferee or liquidator made prior to the transfer or within one month after the commencement of the liquidation as the case may be and after production by the transferee of the registered Deed of Transfer of the Applicant's Works pr after proof by the liquidator of this intension to carry on the Company's business for the purpose of

07/07/2022

the liquidation proceedings, allow the transferee or liquidator the use and benefit of the terminal. The conditions above mentioned are the following:

(i) That the liquidator shall be approved by the Railway Administration, but such approval will not unreasonably withheld.

(ii) That the liquidator shall duly sign and register a Cargo Terminal Agreement in the same form as these presents so far as then applicable or in such other form as the Railway Administration may then require.

(iii) That the applicant, Railway Administration and transferee shall duly execute an agreement of assignment as may be prescribed by the Railway Administration.

28. ***Cost of Execution Of Agreement:***
All expenses in drawing up the Agreement and the cost of stamping and registration shall be borne by the TO/Applicant. "Money receipt obtained from the Registration Office should be handed over to the Railways for collection of registered agreement which shall remain in the custody of Railways. Any charges, if levied for collection of registered agreement, shall also be borne by the Applicant.

29. **Agreement period**

The period of Agreement for operation of Gati-shakti Rail Cargo Terminals shall be for a maximum period of 35 years, which can be renewed further according to the rules and procedures applicable at the time of renewal.

30. **Agreement In Force From :**
The agreement shall be deemed to have come into force on and from……..

31. **Head Notes :**
The head notes herein are for the convenience of reference only and shall not affect the construction of these presents.

In WITNESS WHEREOF, the parties to these presents have set and subscribed their respective hands and seals hereunto on the day and year first above written.

For and on behalf of

Cargo Terminal Agreement-
Reg. No.: _____ For _____ Terminal
At Kilometre: _____ Between Stations _____ and _____

07/07/2022

Model Agreement for Gati Shakti Multi-modal Cargo Terminal (fully/partially) on Railway Land

_____Railway
'Gati-Shakti Rail Multi-modal Cargo Terminal' Agreement

This **Agreement** is made and executed at ……..on this ……. Day of ……., 20…….

BY AND BETWEEN

THE PRESIDENT OF INDIA acting through (incorporate name and designation of the officer authorized under Article 299(1) of the Constitution) having its office at ……. (hereinafter referred to as "**The Railway Administration**" which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the One Part;

AND

……. [hereinafter referred to as **("Applicant or GCTO")*** which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the Other Part.

WHEREAS The Applicant is desirous of having a Cargo Terminal laid by the Railway Administration at _____ from the _____station yard of the _____ Railway taking off from ;Kilometer No. _____ between_____ station and_____ station of the Railway as shown in red and green on the plan bearing CE's No. _____ hereto annexed for the purpose of carrying on the Applicant's business in the Applicant's premises situated at _____ _ District _____

AND WHEREAS the Railway Administration is willing to lay the said cargo terminal for the said Applicant upon and subject to the terms and conditions hereinafter set forth.

NOW, Therefore, this Agreement witnesseth as follows:

1. **Interpretation**: In these presents, unless the context otherwise requires, the following Words and Expressions have the meaning and shall be interpreted as specified, namely-

Words importing the singular number include the plural number and vice versa.

"Person" includes a firm or other association or body of individuals and a Company or other Corporate Body.

"The Railway Administration" means and includes the General Manager for the time being of (name of Zonal Railway) Railway and any officer of the (name of Zonal Railway) Railway authorized by any such General Manager to deal with any matters, with which these presents are concerned.

"The Applicant" means the person named as party hereto of the other part and includes in the case of a firm or other association or body of individuals, the individual person or persons for the time being and from time to time constituting the association or body and, In the case of a company, corporation or body corporate the Successor in business of interest, such company, corporation or body corporate for the time being.

07/07/2022

"Works" means the premises belonging to or occupied or used by the Applicant which are connected with the (name of the Zonal Railway) Railway system by the terminal herein before mentioned,

"Undertaking" includes all land, railway lines, works, buildings, engines, rolling stock and other movable or immovable property now or at any time hereafter forming part of or pertaining to the (name of the Zonal Railway) Railway system as now or hereafter constituted and all engines and rolling stock (whether belonging to the _____ Railway system or not) passing over such system.

"Terminal" Includes the Railway track connecting the Applicant's works with the Railway system, as hereinafter agreed to be constructed by the Railway Administration and all branches and extensions thereof which may hereafter be constructed by the Applicant or by the Railway Administration at the Applicant's request and all sleepers, ballast, embankments, bridges, tunnels, signals interlocking and tele-communication equipment gates, buildings and other constructions, erections, works and movable property constructed / erected / made/ provided or used in connection with the said track and also all land whereon or on part whereof the said track and connected things aforesaid are constructed / erected / made / provided or used including land acquired for the purpose thereof as hereinafter provided and land belonging to the Railway Administration and land belonging to or occupied or used by the Applicant.

The Cargo Terminal shall cover only that portion of track network on which Railway rolling stock will ply. The network utilized by the Company/Party for their internal use shall not form part of the Cargo Terminal defined herein."

"Sub-grade Work" includes the construction of embankments, the making of cuttings and the carrying out of other earth work, the construction of bridges (exclusive of girder works), buildings, platforms, tunnels, culverts, drains and openings and laying out of ballast and all other works necessary to permit the laying and construction of railway track of the terminal and generally all works which have to be abandoned, if the terminal be closed.

"Permanent Way Materials" includes girders, rails, sleepers, fastenings, points and crossings, fencings, signaling, interlocking and telecommunication equipment and over-head structure and any other things connected therewith for electric traction and other machinery (except station machinery) and equipments necessary for working the terminal.

"Legal Representative" means any person who is competent to give the Railway Administration a valid discharge in respect of any money or property which may be payable or deliverable to the Applicant and shall include the executor and administrator of a deceased person, a succession certificate holder, the surviving or continuing partners or members in the case of a firm, association or body of individuals, the certificated guardian if a minor's property, the committee of lunatic, the assignee or receiver of an insolvent's estate, the liquidator of a Company, a receiver and any person legally appointed to represent the estate of the Applicant.

Meaning of other key terms not mentioned above, shall be same as given in para 2 (Definitions) of the Gati Shakti Multi-modal Cargo Terminal Policy issued vide Freight Marketing Master Circular/2021 dated 15.12.2021.

* **Note**: Forms Of Description Of The Applicant –

07/07/2022

(Where a single person is the Applicant) "and A.B. (insert full name) of (insert address and occupation)"

(Where two or more persons are Joint Applicants), "and A.B. (insert full name) of (insert address and occupation) and C.D.: (insert full name) of (insert address and occupation)".

(Where a single person trading under a different fee name is the Applicant) "and A.B. (Insert full name) of (insert address and occupation) carrying an business under the name or style of (insert name) at (if the business is carried on at a different address from the address already Inserted then insert such additional address)."

(Where a partnership firm is the Applicant and the names of the partner known), "and A.B. (Full name) and C.D. (full name) carrying on business partnership as (insert nature of business) under the style or firm of (insert name or style of the firm and address).

(Where a partnership firm is the applicant and the names of partners are not known), "and A &Co. (insert name or style of the firm) a partnership firm carrying on business at (insert address) as (insert nature of business)."
(Where an incorporated Company is the Applicant), "A.B. &CO. Ltd. a company incorporated in (Insert country of incorporation (e.g. India, England or elsewhere, as the case may be) and having its registered office at (insert address)" (in the case of a company incorporated elsewhere than in India address) "and its principal office in India at (insert address)".

(Where the Applicant is a joint family governed by the Mitakshara School of Hindu Law), "A.B. (insert full name) for self and as Karta or managing member of the Joint family, governed by the Mitakshara School of Hindu Law, carrying on business under the name or style of (insert name under which the joint family business is carried on) at (Insert address) and C.D.E.F.G.H. etc. (insert full name) being the other adult members of the said Joint family.

2. **Agreement To Construct Gati Shakti Multi-Modal Cargo Terminal (GCT) :**

Subject to the terms and conditions hereinafter contained, the Railway Administration shall at the cost and expense of the Applicant in all respects, construct partly or fully on the land of the Railway Administration and partly or fully on the land of the Applicant of the said Cargo Terminal, from _____ (length of terminal) Kilometers on _____ (name of portion) Branch as shown in red and green on the plan annexed hereto (bearing CE's No. _____) connecting the Applicant's work known as _____ situated at or near _____ in the District of with the system at or near _____ on _____ Railway.

3. Railway land where GCT is developed partially or wholly on railway land (except for Railway land provided for the connectivity to GCT as mentioned in para 13 of Schedule 1 & 2 of the Gati Shakti Multi-modal Cargo Terminal Policy issued vide Freight Marketing Master Circular/2021 dated 15.12.2021) will be licensed to GCTO – for which modalities of calculating and levying land license fee shall be as per extant rules/Board's circular on land licensing (2005/LML/18/8 dated 10.02.2005 and 08.6.2005), as amended from time to time.

3.1 A separate Land Licensing Agreement shall be executed between the Railway administration and the GCTO as per Annexure

4. **Capital Cost of GCT**

07/07/2022

4.1 The GCTO shall bear the entire capital cost of new GCT from the take-off point onwards, as marked on the Engineering Scale Plan (ESP) at the serving station.

4.1.1 For the linear connectivity portion of GCT passing through the Railway land, GCTO shall provide only the minimum essential infrastructure of track, OHE and signalling equipment at the cost of GCTO (other assets not related to track, signalling, or OHE, if required, shall be constructed by Railway at its own cost). In case of any dispute, the decision of DRM shall be final in this regard.

4.1.2 The ownership of infrastructure including the track, signalling equipment and OHE created on Railway land under para 5.1.1 of Master Circular on Gati Shakti Multi-modal Cargo Terminal Policy dated 15.12.2021 (**hereinafter referred to as the policy**) shall belong to Railway, even though the capital cost for these shall be borne by the GCTO.

4.2 The capital cost for all common-user traffic facilities at the serving station (as marked on the ESP), including Signalling & Telecommunication works, modification and up-gradation to existing interlocking/ OHE, or electrification in future within the station limit up to take-off point, shall be borne by the Railway.

4.3 Maintenance and operation of assets created under para 5.2 of the policy (common-user traffic facilities) at the serving station including staff costs, shall be the responsibility of the Railway.

4.4 The capital expenditure required for augmenting or up-grading the facilities and infrastructure on the connectivity portion from take-off point onwards towards Terminal and within the premises of Terminal shall be borne by the GCTO.

4.5 The connectivity to GCTs shall normally take-off from the existing serving station. However, in case when it is operationally not feasible to provide a connection from an existing serving station, provision of a Block Hut/ Block station (between two existing stations) with required points & crossings may be considered, provided it is operationally feasible. This will be done on the request of GCTO.

4.5.1 In such cases, the entire capital cost of the new Block Hut/ Block station and related infrastructure shall be borne by the GCTO. However, this work will be executed by Railway, and ownership of the same shall remain with the Railway.

4.5.2 However, for new GCTs planned to load one million Tonne or more (outward traffic) per annum, the capital cost of new Block Hut/ Block station will be repaid to the GCTO by Railway.

4.5.2.1 The repayment of capital cost of the new Block Hut/ Block station will be made by Railway through 10% rebate on the outward traffic loaded at the Terminal, till such time the capital cost has been repaid to the GCTO. This 10% rebate shall be granted on the normal tariff rate (NTR) of the commodity.

4.5.2.2 The repayment of capital cost as mentioned in para 4.5.2.1 above will be done only if the Terminal achieves the target of loading one million Tonne per annum within two Calendar Years of commissioning (excluding the year of commissioning). For example, if a GCT commissioned during calendar year 2022 achieves one million Tonne loading during calendar year 2024, then the repayment of capital cost of new Block Hut/ Block station (through 10% rebate on outward traffic) shall start from 01st April 2025.

07/07/2022

4.5.2.3 This repayment shall be made for the investment made by the GCTO on behalf of Railways. As such, this repayment through freight rebate shall be admissible over and above all other rebates that the GCTO may become eligible for in future.

4.5.2.4 This provision of repayment shall be applicable only for GCTs for which Agreement between RA and GCTO has not been entered into till the date of issue of this Policy.

5. **Sub-Grade Work** :

The sub-grade work, culverts & bridges, drains, pitching & protection work and ballast supply shall be carried out at the cost and expense of the Applicant either by his own agency or by the Railway Administration on his request. When the works or part of them are carried out by the Applicant, the work shall conform to the Railway Administration's drawings and specifications and shall be executed under the supervision of Engineering staff of the Railway Administration or under the supervision of Approved Consultant.

6. **Security of Assets**

6.1 The responsibility of security of railway assets over Railway land shall be of Railways. However, the responsibility of security of railway assets outside Railway Land or on land licensed to GCTO shall be of GCTO.

6.1.1 In case of theft of any railway asset on non-Railway land or railway land licensed to GCTO, the maintenance of which is with Railway, the restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

6.1.2 In case of theft of OHE including OHE on non-Railway land or railway land licensed to GCTO, restoration shall be done by Railway but the cost of such restoration shall be borne by the GCTO.

7. **Maintenance of Assets**

7.1 Maintenance of assets on Railway land (excluding the Railway land licensed to GCTO), including Track and Signalling Equipment installed on Railway land under para 5.1.1 of the policy, shall be done by Railway at its own cost.

7.2 Maintenance of OHE from the take-off point onward including inside the Terminal shall be done by Railway at its own cost – as this involves safety of men and equipment, and can also impact rail operations outside the Terminal boundary.

7.3 In addition to above, the maintenance of assets (track, bridges, signalling equipment, etc) on non-Railway land including the land licensed to GCTO, ***outside the Terminal***, may also be done by Railway at its own cost if the GCTO transfers the ownership of these assets to Railway (the ownership of land on which such assets are created shall however continue to be with GCTO). Provided further, this provision shall be applicable only to those GCTs where freight tariff is charged on 'through distance basis.'

7.3.1 In case maintenance of assets, including Track and Signalling Equipment, is being handed over to Railways on migration to this policy by GCTO, the GCTO will ensure that the standards of track and signalling infrastructure being transferred to Railway is in accordance with the prescribed standards for GCTs, as decided by Railways (Annexure 'D' of the policy). If any up-gradation/ replacement/ renewal of any infrastructure is required, the GCTO shall bear the cost for the same.

07/07/2022

7.3.2 In case of damages to the assets due to accident, etc, the replacement shall be done by Railway. However, if the responsibility of accident, after Enquiry (joint enquiry by representatives of Railway as well as GCTO), is fixed on the GCTO – the GCTO shall have to bear the cost of all the replacements. The decision of the Nodal Officer, i.e. DRM, in this regard shall be final.

7.3.3 In case the damage to assets is due to an external cause (floods, breaches, terrorist activity, etc), the cost of restoration shall be borne by the GCTO.

7.3.4 If the GCTO does not agree to transfer the ownership of assets (track, bridges, signalling equipment, OHE, etc) to Railway or freight tariff is not chargeable 'on through distance basis'; the maintenance of these assets – except OHE – shall continue to be the responsibility of GCTO.

7.3.4.1 Railway shall be entitled to conduct periodic inspections of such GCTs being maintained by the GCTO, for which Inspection Charges will be levied as per the prescribed norms.

7.3.4.2 GCTO may also get the maintenance done through Railway for such Terminals, in which case Maintenance Charges shall also be levied as per the prescribed norms.

7.3.5 The maintenance of GCT yard, including loading/ unloading lines, shall be the sole responsibility of GCTO. Distribution of the responsibility of track has been explained in Schedule '3'.

7.3.6 At such GCTs, Railway shall maintain the signalling equipment till the line-clear/ receipt-despatch arrangement with serving station(s), at its own cost. Maintenance of signalling equipment internal to the Terminal shall be the sole responsibility of the GCTO.

7.4 The cost of all subsequent up-gradations (on account of change of technology, standards, etc) shall be borne by the GCTO.

7.5 Maintenance of all the infrastructure and equipment inside the GCT which are not to be accessed by Railways' rolling-stock, and maintenance of infrastructure required for loading/ unloading (tipplers, hoppers, etc) shall be the responsibility of GCTO.

8. Cost of Electrification

8.1 In case of new GCT, the entire cost of electrification of the Terminal and the connectivity portion between take off point and GCT, shall be borne by the GCTO.

8.2 While undertaking electrification of main line and serving station by Railways, the electrification of the existing GCT(s) including the rail-line connecting the Terminal(s) shall be undertaken at the Railway's cost.

9. Handling of Wagons in GCTs:

9.1 If any damage and deficiencies is caused to railway wagons due to the fault of the GCTO, the damage and deficiency charges shall be raised by Railway and paid by the GCTO as per the extant rules of Railways.

9.2 All tipplers and bulk handling systems used for loading/unloading of Railway wagons shall be provided and commissioned by GCTO at its own cost in accordance with the RDSO's approved specifications. This provision shall however not be applicable on the systems/ equipment installed by GCTO which are not to be used for handling Railway wagons (such as conveyor-belts, JCBs, excavators, etc).

07/07/2022

9.2.1 GCTO shall ensure that tipplers, bulk handling systems, and mechanized equipment are operated only by the qualified and experienced staff under adequate supervision.

9.2.2 Such equipment shall be regularly maintained and replaced at the end of their codal life by GCTO at its own cost.

9.2.3 In case of any accident/ derailment inside the Terminal or outside the Terminal up to serving station, Railway will provide Accident Relief Train (ART) initially free of cost. Provided further, if the responsibility of accident/ derailment after enquiry is fixed on the GCTO, ART Charges shall be payable by GCTO as prescribed by Railway from time to time. The due Charges will be deducted from the future payments by Railway to GCTO. However, in case no regular payments are being made by Railway to GCTO, on demand from Railway, the GCTO shall pay ART Charges to Railway without any delay.

9.2.4 The accident enquiry as mentioned in para 9.2.3 above shall be conducted jointly by the representatives of Railway and GCTO to be nominated by DRM and GCTO respectively. The accepting authority of Enquiry Report shall be DRM, whose decision shall be final and binding on GCTO.

10. C&W Maintenance Facilities

10.1 Normally C&W facilities shall not be constructed at GCTs.

10.2 However, if C&W facilities are operationally required at any GCT as per the extant instructions, only one-time capital cost for setting-up these facilities shall be borne by the GCTO. Operational costs, including staff cost and material cost (for Railway-owned stock), shall however be borne by the Railway.

10.3 For GCTs dealing with POL and other hazardous material, specialized facilities inside the Terminal as well as in Railway yard (if required) shall be developed by the GCTO at its own cost, and shall be maintained by GCTO to ensure that no untoward incident/ accident takes place at such facilities.

11. Authorized Users

11.1 GCTO shall inform Railway about the authorized rail users of the GCT before notification, so that they may be incorporated in the TMS module of FOIS.

11.2 If the GCTO desires to add more rail users subsequently, GCTO shall inform Railway at least seven (07) working days in advance, to enable incorporation of such rail users in FOIS.

12. Commodities Permitted

12.1 Unless otherwise specified by Indian Railway, a GCT shall be permitted to book and handle all traffic – including coal and coke, which shall be as per the guidelines of 'preferential traffic schedule' issued by Ministry of Railways from time to time.

13. Engine-on-Load (EOL) Scheme

13.1 All new GCTs shall be set up on 'charging on through distance basis,' as per the instructions contained in Rates Master Circular on 'Freight on Through Distance Basis issued on 24.09.2014 (Annexure 'A' of the policy), as modified from time to time.

13.2 All new GCTs charged on through distance basis shall be governed by the Engine-on-Load policy (FM Circular No.05 of 2013 dated 07.03.2013), as modified from time-to-time.

07/07/2022

13.2.1 Railway may permit commissioning of a new GCT on non-EOL basis with the approval of DRM, if Engine-on-Load scheme is not operationally feasible.

14. Charging of Commercial Staff

14.1 No cost of commercial staff will be charged from the GCTO w.e.f the date of issue of this policy. However, for existing Terminals (*where PFT/ Private Siding Agreement has already entered into between RA and operator before the issue of this Policy*) where cost of commercial staff has already been deposited by the GCTO, there shall be no refund. Further, dues of commercial staff cost pending, if any, as on the date of issue of this policy shall be payable by GCTO.

15. Provision of Weighbridge

15.1 All GCTs planning to deal with outward cargo (loading) shall have a provision of Electronic In-motion Weighbridge (EIMWB) at a suitable location inside the Terminal. The EIMWB shall comply with OIML (International Organization of Legal Metrology) document (available at https://www.oiml.org/en/files/pdf_r/ r106-2-e12.pdf) and the latest RDSO specifications.

15.1.1 Provision of EIMWB shall not be essential for GCTs dealing with inward cargo (unloading) only.

15.1.2 If a GCT without an EIMWB plans to start loading, the GCTO shall make arrangement for provision of an EIMWB as per the provisions of the Policy. DRM, in consultation with CFTM of the Railway, may, however permit loading at a GCT (if operationally feasible) – by nominating an alternative Railway weighbridge for weighment of rakes, awaiting installation of EIMWB, for a period of up to six months at a time from the date of start of such loading, duly recording the reasons for the same.

15.2 GCTO shall bear the cost of procurement (inclusive of the requisite warranty and a post-warranty comprehensive Annual Maintenance Contract (AMC) till the end of codal life), installation, and replacement of the EIMWB at the end of its codal life. GCTO shall also bear the cost of weighbridge house, weighbridge siding, and related infrastructure.

15.3 GCTO shall get the weighbridge certified by the Weights & Measures department of the state government, and shall comply with all the applicable statutory and legal requirements.

15.3.1 The weighbridge, after testing and certification by the Weights and Measures department of the state government, shall be sealed by their personnel in presence of GCTO's and Railway's representatives. This seal shall be broken, if required, only in the presence of the personnel of Weights and Measures department and Railway's representative.

15.4 GCTO shall bear the cost of manpower to operate the EIMWB, and the cost for its linking with FOIS.

15.5 RR will be issued on the basis of weighment within a GCT as per the extant instructions provided vide Rates Master Circular/Weighment/2019/0 dated 25.07.2019 and other applicable instructions of Railways (Annexure 'B' of the policy), as modified from time to time.

15.6 No extra free-time will be provided for weighment at an EIMWB inside a GCT.

15.7 Railway Administration reserves the right to conduct periodic and/or surprise inspections of the operation, functioning and calibration of EIMWB.

15.8 For the purpose of mandatory testing of EIMWB, test-wagons shall be provided by Railway on payment of Haulage Charges. These Haulage Charges shall be levied for the actual distance travelled or 100 km, whichever is less.

07/07/2022

15.8.1 In cases where there is more than one weighbridge located within a GCT, the Haulage Charges as per para 15.8 above shall be levied for the 'first weighbridge,' and shall be levied @25% of the charges for the 'first weighbridge' for other weighbridges inside the Terminal.

15.8.2 For random surprise testing by Railway, test-wagons will be provided for without levying Haulage Charges or any other charges.

15.8.3 Railway shall try to ensure availability of 'test wagon-sets' in the vicinity of all GCTs, so that there is no delay in arranging these wagons for testing.

15.9 If any overloading is detected in the outward traffic the same will have to be unloaded/ re-adjusted at the Terminal itself – for which no extra free-time will be provided.

15.10 Whenever the EIMWB goes out of order, it shall be put right by the GCTO within three days, failing which a penalty of Rs 4,000/- per day or part thereof for the next ten days, and Rs 8,000/- per day or part thereof thereafter, shall be imposed.

15.11 Under exceptional circumstances, if it becomes essential to install the EIMWB of a GCT either partially or wholly on Railway land not licensed to GCTO (on account of operational and technical constraints), permission for the same may be given by the DRM. Location of such an EIMWB shall be decided by Sr.DOM, in consultation with Sr.DCM, Sr.DEN & Sr.DME.

15.11.1 All terms and conditions applicable on EIMWB inside a GCT shall also be applicable on an EIMWB installed by GCTO on such land. However, Railway will be the executing agency for installation, operation, and maintenance of such EIMWBs.

15.11.2 Cost of the comprehensive AMC and manpower to operate such EIMWB shall be borne by the GCTO.

15.11.3 Railway will be free to weigh rakes other than those of the concerned GCT at such EIMWB.

15.12 Railway may permit weight-o-meter/ pre-weighbin system of weighment in GCT on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager, keeping in view the requirement and to avoid any manipulation of weighment data.

15.12.1 Such equipment shall be certified by Weights & Measures department, and should also meet all extant statutory provisions and policy guidelines.

15.12.2 The system should have proper locking/ sealing arrangement to avoid any tampering with the system including software. The 'admin' control should rest with the Railways.

15.12.3 One-to-one correspondence between Weight-o-meter discharge and corresponding wagon shall be maintained by GCTO.

15.12.4 A procedure order for normal operations covering precautions to be taken to ensure that wagons are empty before loading and periodical test weighing of this system shall be maintained by GCTO.

15.12.5 The system should have interface with FOIS to avoid any error in data capture during transmission.

15.13 GCTO may also be permitted to install an alternative means of weighment of wagons, which should have accuracy level at least equal to that of EIMWB and should ensure weighment within the time taken by EIMWB.

15.13.1 GCTO shall submit request for such alternative means of weighment, along with all the necessary documents, which may be permitted by Railway on case-to-case basis, on the joint recommendation of PCOM, PCME, PCE & PCCM and with the personal approval of the General Manager.

15.13.2 GCTO shall be responsible for getting the proposed means of weighment of wagons certified by Legal Metrology/ Weights & Measures department, and also for ensuring its proper upkeep and maintenance at its own cost.

07/07/2022

16. **Installation of FOIS and TMS**

16.1 FOIS and TMS with limited access as prescribed by Indian Railways shall be installed at the GCT – at the cost of GCTO. All RRs will be prepared through TMS. Complete maintenance of FOIS and TMS will be done by Railway at its own cost.

16.1.1 Cost of replacement of FOIS and TMS equipment, at the end of their codal life, shall be borne by the GCTO.

17. **General Conditions**

17.1 Applicant/ GCTO will be solely responsible for – (a) arranging/ acquiring/ownership/ lease/licensing of non-Railway land for the development of GCT; (b) all statutory and non-statutory clearances from other government departments and statutory bodies; and (c) payment of all charges, taxes/GST, surcharges, cess, levies, etc, related to transportation and handling of cargo.

17.2 Unless otherwise mentioned in this policy, all 'Commercial and Operating rules' as applicable for a goods-shed for booking, supply and delivery of goods shall be applicable at GCTs.

17.3 The GCTO shall be responsible for clearance of all Railway dues, including demurrage charges & land license fee, accrued within the GCT. For the sake of clarity, it is explicitly mentioned that demurrage charges will be borne by the GCTO for demurrage occurring on its own private land or occurring on railway land licensed to the GCTO.

17.4 The cost of electricity/ diesel consumed by Railway locomotives shall be borne by Railway.

17.5 The GCTO shall provide at his own cost the level-crossings and ROB/ RUB/ LHSs for safe passage of trains as well as road vehicles, as per requirement and prescribed norms.

17.5.1 All level-crossings have to be provided with requisite infrastructure (gate-post, gate-lodge, etc) and have to be manned by GCTO at its own cost.

17.5.1.1 If the level-crossing becomes due for interlocking, the cost of interlocking shall be borne by the GCTO.

17.5.2 Maintenance of level-crossings falling on the track being maintained by Railway shall be done by Railway at its own cost; while maintenance of level-crossings falling on the track being maintained by the GCTO shall be done by GCTO (as illustrated in Section III of Schedule '3' of the policy).

17.6 Railway shall reserve the right to grant connectivity to another GCT(s) from the portion of track on Railway land as well as from the portion of track which is being maintained (and assets are owned) by Railway. For the sake of clarity, Railway may permit connectivity to another Terminal from the connectivity portion of a Terminal – (i) on Railway land where the assets are owned and maintained by Railway; and (ii) on non-Railway land where the ownership of assets has been transferred to Railway by the GCTO, and the assets are maintained by Railway though the land is owned by the GCTO. This provision shall be applicable on Railway land for all GCTs; and on non-Railway land for all new GCTs, as well as on existing Terminals who decide to migrate to this Policy and transfer the ownership of assets on their land to Railway.

17.7 For GCTs established entirely or partially on Railway land, Railway will levy Terminal Charges and Terminal Access Charges similar to those being levied on Railway goods-sheds. These Terminal Charges and Terminal Access Charges will be shared with the GCTO according to the quoted bid percentage (as mentioned in para 9 above of this Schedule '2').

07/07/2022

17.8 At the time of cancellation / termination / expiry of the Agreement, the Railway land, along with the entire infrastructure developed on it by the bidder, shall revert back to Railway on as-is-where-is basis, without payment of any compensation.

17.9 The Railway land used for providing connectivity to the Terminal shall remain in possession of Railway, along with the entire infrastructure created on it (as per provisions of para 5.1.2 & 5.1.3 of the Policy).

17.10 Railway land where GCT is developed partially or wholly on railway land (except for Railway land provided for the connectivity to GCT as mentioned in para 13 of Schedule 1 & 2) will be licensed to GCTO – for which modalities of calculating and levying land license fee shall be as per extant rules/Board's circular on land licensing (2005/LML/18/8 dated 10.02.2005 and 08.6.2005, Annexure-E of the policy), as amended from time to time.

17.11 Responsibility for maintaining the track and signalling equipment shall be as per the provisions of para 7 of this Policy. Responsibility of maintaining loading/ unloading wharf(s), roads, drainage, etc, shall rest with the GCTO.

17.12 GCTO shall also be responsible to ensure that the entire infrastructure of Terminal is properly maintained and is duly upgraded/ replaced at the end of codal life, as per Good Industry Practices.

17.13 For GCTs constructed fully or partially on Railway land, the GCTO shall be expected to give at least the prescribed annual bench-mark of traffic (outward plus inward combined, in NTKM) to Railway, which shall be commensurate with the value of Railway land earmarked for GCT, as under:-

Value of land	Bench-mark Traffic (in NTKM)
Up to Rs 10 crore	200 million
More than Rs 10 crore, & up to Rs 25 crore	500 million
More than Rs 25 crore, & up to Rs 50 crore	1,000 million
More than Rs 50 crore, & up to Rs 100 crore	2,000 million
More than Rs 100 crore	4,000 million

17.13.1 The Bench-mark Traffic shall be applicable from the Financial Year subsequent to the year of commissioning, and shall be revised at the time of each renewal/ extension of Land Licensing Agreement according to the revised value of land. For example, if a GCT has been commissioned during 2023-24, with the value of Railway land being Rs 20 crore – then the Bench-mark from the years 2024-25 onwards shall be 500 million NTKM. This Bench-mark Traffic shall be revised at the time of every renewal/ extension of Land Licensing Agreement.

17.13.2 If the GCTO achieves or surpasses the Bench-mark Traffic during any Financial Year, an incentive equal to 5% of the Land License Fee (which be levied as per the provisions of para 17.10 above) shall be granted for the next year provided that previous Land License Fee have been paid and there is no outstanding dues in this regard. For the example given in para 17.13.1 above, if the GCTO achieves Bench-mark Traffic during 2025-26, then an incentive equal to 5% of Land License Fees (as per the provisions of para 17.10) shall be granted for the year 2026-27.

07/07/2022

17.14 Subject to the provisions of para 17.10 above, GCTO will be free to create infrastructure and/or to provide value-added services/ facilities (such as warehousing, processing, packaging, etc. provided that such infrastructure/ value-added services/ facilities, if created, shall be available to all users of the GCT without discrimination of any sort. GCTO will also have the authority for deciding the user charges/ fees for value-added services/ facilities as per market conditions – without any interference from Railway. However, the use of value-added services/ facilities will be optional and no customer will be forced to use those services or to pay for them. Such value-added services/ facilities shall conform to Good Industry Practices.

17.14.1 GCTO shall not sub-lease/ sub-license/ mortgage Railway land, and shall not create any third-party encumbrance on Railway land.

17.14.2 For any value-added service/ facility developed on Railway land, GCTO shall ensure that either the complete inward traffic or the complete outward traffic, for each commodity handled, is transported through Indian Railway system. Railway reserves the right to undertake any inspection of the Terminal to safeguard its interests and to direct the GCTO to discontinue such activities if such activities are detrimental to Railway's cargo business, failing which the Agreement may be terminated. For avoidance of doubt, such termination will be treated as default by the GCTO.

17.14.3 The responsibility of obtaining all statutory and environmental clearances for such value-added services, if required, shall rest solely with the GCTO. Any violation of statutory compliance will invite merit for termination clause of the Agreement on GCTO's default. Any liability/ default created by such violation will be the sole responsibility of the GCTO, and Railway will not be responsible for this.

17.15 GCTO shall use Railway land for activities related to Railway cargo business only. If the GCTO indulges in any commercial activity not related to Railway cargo business on Railway land or fail to adhere to the provisions of para 17.14, 17.14.1, 17.14.2 & 17.14.3 above, the Agreement for GCT may be terminated without any compensation/ termination payment to the GCTO. For avoidance of doubt, such termination will be treated as default by the GCTO. In case of any dispute whether any activity is related to Railway cargo business or not, the decision of the nodal officer (i.e. DRM) shall be final and binding on the GCTO.

17.16 The GCT located completely or partially on Railway land will remain a common-user facility, and GCTO shall ensure non-discriminatory access for all rail-customers/ potential customers to such Terminals. The GCTO will not prevent any rail-customer/ potential customer from accessing the Terminal (provided the facilities for handling their cargo exists at the terminal). Road access to the GCT will not be blocked by the GCTO.

17.17 GCTO will have the permission to expand the Terminal further by acquiring/ leasing the adjacent non-Railway land. However, any such acquisition/ leasing of additional land will have to be managed by the GCTO through his own resources. Railway will not charge any Land License Fees for the additional land acquired by the GCTO.

17.17.1 In such cases, the levy of Terminal Charges and Terminal Access Charges – and their sharing with the GCTO – will continue as before as per the decided principle.

17.18 A joint team (comprising of Sr.DOM, Sr.DCM, Sr.DEN, Sr.DSTE & Sr.DEE/TRD) shall inspect the GCT at least once a year to ensure that there is no breach of Agreement or policy provisions by the GCTO. In addition, inspections may also be conducted by Railway officials as per the provisions of para 17.14.2 and 17.15 above.

07/07/2022

18. Dispute Resolution

18.1 In case of any dispute arising in the interpretation of the Policy, the decision of DRM will be final and binding.

18.2 Conciliation: All disputes and differences of any kind whatsoever arising out of or in connection with the construction and operations of GCT shall be referred by the GCTO to Railway Administration through 'Notice of Dispute.' RA shall, within 30 days after receipt of the 'Notice of Dispute,' notify the name of conciliator(s) to the GCTO. The Conciliator(s) shall assist the parties to reach an amicable settlement in an independent and impartial manner within the terms of Agreement. If the parties reach agreement on a settlement of the dispute, they shall draw up and sign a written Settlement Agreement duly signed by Railway's representative (Sr.DCM), GCTO and conciliator(s). When the settlement agreement is signed, it shall be final and binding on the parties. The conciliators shall be paid fee as fixed by Ministry of Railways time to time, which shall be shared equally by the parties. For other issues related with Conciliation, terms and conditions defined under Indian Railways General Conditions of Contract 2020 may be followed.

18.2.1 The parties shall not initiate, during the conciliation proceedings, any reference to arbitral or judicial proceedings in respect of a dispute that is the subject matter of the conciliation proceedings.

18.2.2 The conciliation shall be carried out as per "The Arbitration and Conciliation Act, 1996 (26 of 1996) or any statutory modifications or re-enactment thereof" and the proceedings shall be terminated as per Section 76 of the above Act.

18.3 Arbitration: If the dispute is not settled through Conciliation (as mentioned in para 18.2), it shall be decided by reference to arbitration. Arbitration shall be carried out as per provisions available for arbitration in Indian Railways General Conditions of Contract 2020 for works contracts, as amended from time to time.

18.4 Governing Law & Jurisdiction: This Agreement is governed by and shall be construed in accordance with the laws of India. In case of any dispute and difference arises, the Court of the place, where Land License Agreement has been made, shall only have the jurisdiction to try such litigation.

19. Termination of the Agreement

19.1 Subject to the provisions in the Agreement, Railway Administration may terminate the Agreement with a GCTO operating a GCT in the event of any serious irregularity committed by the GCTO. This may include any grave breach of the terms and conditions of the Agreement, any default by GCTO, violation of The Railway Act, 1989, or commission of an unlawful act which is not in-line with Good Industry Practices.

19.2 Before terminating the Agreement, RA shall first issue a Show Cause Notice, informing GCTO to submit representation within 30 days. If no response is received, or if the response of GCTO is not satisfactory, a written Notice of Termination specifying a grace period of 180 days shall be given to the GCTO, by Sr.DCM with the approval of DRM. However, if no reply to the Notice for Termination is received within 180 days of the issue of Notice for Termination, the Agreement with GCTO will stand terminated and the same shall be communicated by Sr.DCM to GCTO. No termination payment shall be made by RA to the GCTO.

07/07/2022

19.2.1 If the GCTO submits a reply within 180 days, RA will take further course of action on the merit of the case.

19.3 The GCTO will also have the right to terminate the Agreement by giving a notice of 180 days to the Railway Administration in the event of any difficulty faced by the GCTO in smooth functioning of the Terminal for reasons attributable to Railway as laid down in this policy, or for any other reason internal to the GCTO. No termination payment shall be asked by Railway from GCTO.

19.4 Any dispute arising out of this Agreement will be resolved through the Dispute Resolution Mechanism as prescribed under Para 18 above.

20. ***Power To Terminate Agreement, If Traffic Insufficient :***

20.1 Notwithstanding anything contained in the Agreement, the Railway Administration shall be entitled, in the event of the Railway Administration being of the opinion that the Applicant's traffic over the terminal is insufficient to justify the retention of terminal by the Applicant of which the 'Divisional Railway Manager' of the Railway Administration will be the sole judge to terminate this Agreement by giving to the Applicant not less than 6(six) months' notice in writing of the Railway Administration's intention to terminate this Agreement and on the expiry of such notice, this Agreement shall stand terminated.

20.2 The termination of this agreement under the provisions of this Clause shall be without prejudice to any rights of remedies to which the Railway Administration will be entitled to, in respect of any acts, matter or things arising before such termination.

21. ***Power To Close The Portion Of The Terminal Within Railway Land Colored Red In The Annexed Plan Or Work It For Public Traffic :***

21.1 In the event of the Railway Administration deciding in the public interest to close the terminal or any part or extension thereof or to work the terminal or any part or extension thereof for public traffic as part of the railway system (the decision of the Railway being final in this case and the service of the notice as hereinafter stated shall be conclusive evidence of the same) the Railway Administration may terminate this Agreement by giving to the Applicant 6(six) month's previous notice in writing of such decision and on the expiration of such notice this Agreement shall terminate.

22. ***Power To Stop Traffic And To Terminate Agreement In Certain Events:***

The Railway Administration shall have the absolute right to refuse at any time to allow their rolling stock to go on or be used upon the Terminal or any part or extension thereof and shall also be entitled to determine this Agreement at any time after the happening of any of the following events:

22.1 In the event of the Applicant failing to deposit within the time fixed for the purpose any sum of sums required to be deposited under the provision of these presents or according to any direction of the Railway Administration.

22.2 In the event of the Applicant failing to pay any other sums payable to the Railway Administration under this Agreement or any other changes payable to the Railway administration in respect of the terminal or the use thereof within one month after the due date of payment or in the event of a due date not being specified then within one month after service of a written-demand for payment.

22.3 In the events of the Applicant failing to comply with any requisition of the Railway Administration to remove or repair any defect which in the opinion of the Railway

07/07/2022

administration may endanger the working and safety of the terminal within such time as shall be fixed by the Railways Administration for the purpose.

22.4 In the events of the Applicant ceasing for a consecutive period of 3 (three) months to use the terminal or any part for extension thereof for the Applicant's own traffic in connection with the Applicant's Works.

22.5 In the event of the Applicant contravening the provision of Clause 15 hereof.

22.6 In the event of the Applicant failing to observe or perform any other obligation on his part herein contained.

22.7 In the event of the terminal becoming dangerous or defective by reason of any act of God or other act or circumstances for which the Railway Administration is not responsible.

22.8 In the event of any branch line, terminal or part or extension thereof, connecting the terminal or any part or extension thereof with the Railway system, becoming dangerous or defective for any reason whatsoever and whether such branch line, terminal part or extension shall belong to the Applicant or to any third person.

22.9 In the event of any branch line, terminal or any part or extension thereof connecting the terminal or any part or extension thereof with the Railway system, being closed by the Railway Administration under any powers which the Railway Administration may possess whether by status or by Agreement with third persons or closed by order of the Government of India or any State Government.

The Applicant shall have no claim whatsoever against the Railway Administration in respect of any refusal by the Railway Administration to allow their rolling stock to go on or be used upon the terminal or any connected Terminal or branch line in any of the aforesaid events.

Provided always that on the happening of any of the events mentioned in sub-Clauses 22.1, 22.2, 22.4, 22.5, 22.6, the Railway Administration shall not exercise the power conferred upon it by this Clause unless 14 (Fourteen) days' previous notice has been given in writing requiring the Applicant to comply with the demand or requisition as the case may be, of the Railway Administration and the Applicant has failed to comply with the Same within the time specified in such notice.

No notice shall be required to be given in the cases specified in the other sub-clauses of this clause.

23. ***Termination of Agreement on Death. Insolvency etc. :***

This agreement may be determined by the Railway Administration without prior notice at any time after the happening of any of the following events:

23.1 In the event of the death of the Applicant, if he is an individual person.

23.2 In the event of a partition of the Joint family properties, if the Applicant is a Joint family governed by the Mitakshara School if Hindu Law.

23.3 In the event of dissolution of partners either by act of parties or by order of Court, if the Applicant is a firm or other association or body of individuals.

23.4 In the event of dissolution of partners either by act of parties or by order of Court, if the Applicant is a firm or other association or body of individuals.

23.5 In the event of Applicant becoming insolvent or going into liquidation either voluntarily or under an order of a competent Court.

23.6 In the event of the Applicant's interest in the works becoming wholly or partially vested in some other person.

23.7 In the event of the Applicant contravening the provision of Clause 21 hereof.

24. ***Consequence of Termination Under Clauses 19, 20, 21, 22 & 23 :***

*24.1 On termination of this agreement under provisions of Clauses **19, 20, 21, 22 & 23** thereof, the Railway Administration shall be entitled to disconnect from their Railway,*

07/07/2022

the portion of the said terminal within the Railway land (colored red on the said plan) at the cost of the Applicant and take up and remove the same and the appliance connected therewith and dispose of the materials thereof as they may think fit rendering to the Applicant surplus (if any) to arise from such disposal after first defraying and reimbursing there at all costs and expenses on and incidental to such taking up, removal and disposal and all sums owing to them by the applicant under the terms of this Agreement or for freight or carriage.

24.2 Provided always that the Railway Administration shall at all times have lien on the portion of the said terminal within the Railway land (colored red in the said plan) and appliances connected therewith and materials thereof for all sums owing to them from the Applicant under the terms of this agreement or for freight or carriage. The Applicant shall have no claim whatsoever against the Railway Administration in respect of termination of this agreement whether under any of the provisions of those presents or in any manner not provided for by those presents.

25. ***Agreement To Bind Applicant Until Terminated By The Railway Administration***

25.1 Until terminated by the Railway Administration or unless and until the person or persons in whom the entire rights and interests of the Applicant have vested and with wham the Railway Administration has agreed to enter into a Cargo Terminal Agreement has executed and registered such Agreement in the same form as these presents or in such other form as the Railway Administration may require as provided in Clause 21 hereof, this Agreement shall be binding upon the Applicant and the successors in title or interest of the Applicant in the Applicant's work

(i) Provided that the Applicant may by giving 6 (six) months' notice to the Railway Administration, discontinue the use of the terminal. In such event, the Applicant shall not be liable for the payment of maintenance and other charges under the Agreement for the period subsequent to the date of expiry of the said notice, but nevertheless all other obligations under the Agreement shall binding on him.

(ii) Provided further that the Railway Administration has the right without assigning any reason to terminate this Agreement on 6 (six) months' notice.

26. ***Applicant To handover/revert back Railway land along with entire Infrastructure developed on it Within A Month Of Termination***

On termination of this Agreement, Railway land, along with the entire infrastructure developed on it by the bidder, shall revert back to Railway on as-is-where-is basis within a month of termination, without payment of any compensation.

27. ***Right To Charge Interest On Money Due Hereunder To The Railway Administration:***
Notwithstanding anything contained in the foregoing Clauses of this Agreement, the Railway Administration shall have the right to charge and recover from the Applicant interest at such rates, as may be fixed by the Railway Administration from time to time on any or all sums payable by the Applicant under the terms thereof, if such sums are not paid within one month from the due date and if no such date is fixed, within one month from the date on which a written demand is made by the railway Administration.

28. ***Right Of Deduction Of Money Due To The Railway Administration***

The Railway Administration shall have the right to deduct from any amount which may become payable by the Railway Administration to the Applicant or to the legal representative of the

07/07/2022

Applicant any money due from the Applicant to the Railway Administration under these presents or for freight, haulage or other charges or otherwise in connection with the construction, maintenance or working of the terminal.

29. ***Service Of Notices On Applicant:***
The Applicant shall maintain a proper office to which all letters, notices, demands and other communications intended for the Applicant may be sent and every notice, demand or other communication which shall be delivered at or sent by Registered Post to such office shall for all purposes whatsoever be deemed to have been validly and effectively delivered to the Applicant.

30. ***Exercise Of Powers :***
Subject as otherwise provided in this agreement, all notices to be given on behalf of the President of India and all other actions to be taken on his behalf may be given or taken on his behalf by the Railway Administration; the agreement signing authority or his authorized representative.

31. ***Alteration / Variation Of The Agreement:***
Except as hereby provided any verbal or written arrangement or abandoning, varying or supplementing this Agreement or any of the terms hereof shall be deemed conditional and shall not be binding on the railway administration unless and until the same is endorsed on this agreement or incorporated in a formal instrument and signed by the parties hereto and till then the Railway administration shall have the right to repudiate such arrangement.

32. ***Applicant Not To Transfer Rights ;***

32.1 The Applicant shall not be entitled to assign or transfer or subject or permit to be used or enjoyed by any other person in any manner whatsoever any of the rights or benefits conferred upon the Applicant by these presents and any purported assignment transfer or subletting or permission shall be void and of no effect. Provided also that in the event of any other person being permitted by the Railway Administration to use the terminal on the Applicant's request or otherwise, the Applicant shall remain responsible to the Railway Administration for all the charges and obligations under this Agreement.

32.2 Provided, however, that if the Applicant shall desire to transfer the Applicant's Works to any person or if the applicant being a Company shall go into liquidation and such intended transferee or the liquidator of the Company shall desire the use and benefit of the terminal than subject to the under mentioned conditions being complied with the Railway Administration may at its discretion on the written request of the Applicant and of the intended transferee or liquidator made prior to the transfer or within one month after the commencement of the liquidation as the case may be and after production by the transferee of the registered Deed of Transfer of the Applicant's Works pr after proof by the liquidator of this intension to carry on the Company's business for the purpose of the liquidation proceedings, allow the transferee or liquidator the use and benefit of the terminal. The conditions above mentioned are the following:

(i) That the liquidator shall be approved by the Railway Administration, but such approval will not unreasonably withheld.

(ii) That the liquidator shall duly sign and register a Cargo Terminal Agreement in the same form as these presents so far as then applicable or in such other form as the Railway Administration may then require.

07/07/2022

(iii) That the applicant, Railway Administration and transferee shall duly execute an agreement of assignment as may be prescribed by the Railway Administration.

33. ***Cost of Execution Of Agreement:***
All expenses in drawing up the Agreement and the cost of stamping and registration shall be borne by the TO/Applicant. "Money receipt obtained from the Registration Office should be handed over to the Railways for collection of registered agreement which shall remain in the custody of Railways. Any charges, if levied for collection of registered agreement, shall also be borne by the Applicant.

34. **Agreement period**

The period of Agreement shall be signed for five (05) years, which shall be renewed / extended in blocks of five (05) years at a time, provided any of the provisions of the Agreement and / or Policy has not been violated by the GCTO.

35. **Agreement In Force From :**
The agreement shall be deemed to have come into force on and from……..

36. **Head Notes :**
The head notes herein are for the convenience of reference only and shall not affect the construction of these presents.

In WITNESS WHEREOF, the parties to these presents have set and subscribed their respective hands and seals hereunto on the day and year first above written.

Cargo Terminal Agreement-

Reg. No.: _____ For _____ Terminal

At Kilometre: _____ Between Stations _____ and _____

07/07/2022

Land License Agreement

(For Private Terminal)

{Note- This agreement is not to *be used for the cases where Railway Land is given on Lease* to *other government departmentlP5U For such cases, Land Leasing Agreement has to be signed in lieu* of *Land License Agreement in the standard format* of *Zonal Railway}*

This **Land Licensee Agreement** is made and executed at .....on this ..... Day of ....., 20.....

BY AND BETWEEN

THE PRESIDENT OF INDIA acting through (incorporate name and designation of the officer authorized under Article 299(1) of the Constitution) having its office at ..... (hereinafter referred to as "**Licensor**" which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the One Part;

AND

..... [hereinafter referred to as **("Licensee")*** which terms or expression shall, unless excluded by or repugnant to the subject or context, mean and include its successor-in-office, administrators or permitted assignees) of the Other Part.

The Licensor and the Licensee are hereinafter collectively referred to as the "Parties" and Individually as a "Party",

WHEREAS,

(A) The Licensor and the Licensee have entered into a Cargo Terminal Agreement, dated ____ _(Agreement No,), wherein the Licensee has agreed to lay the terminal and the Licensor has agreed to provide the land for providing connectivity to the Terminal,

(B) The Licensor is owner of the land described in the Annexure hereunder (the "Site") and now desires to License the Site to the Licensee and the Licensee desires to take on License from the Licensor, the Site for the purpose of connectivity to the terminal,

NOW THEREFORE, In consideration of the promises and covenants herein set forth and for other good and valuable consideration, the receipt, adequacy and legal sufficiency of which are hereby acknowledged, the Parties mutually agree as hereunder-

1, Definitions and Interpretation -

1.1 Definitions:

In this Land License Agreement, the following words and expressions shall, unless repugnant to the context or meaning thereof, have the meaning hereinafter respectively assigned to them:

"Applicable Permits" means all clearances, permits, authorizations, consents and approvals required to be obtained or maintained under applicable laws in connection with the Site and the Terminal during the subsistence of the Land license Agreement;

"Encumbrance" means any encumbrance, such as an easement, right of way, license, mortgage, charge, pledge, lien, hypothecation, pre-emptive right or security interest, assignment, privilege or priority of any kind having the effect of security or other such obligations, whether or not registered and howsoever arising, including by statute or common law;

07/07/2022

"Land License Fee" shall have the meaning set forth in Clause 4.1 of this agreement.

"Site" shall have the meaning set forth in Recital (B); and

"Term" shall have the meaning setforth in Clause 3 of this agreement.

1.2. Interpretations-

In this Land License Agreement, except to the extent that the context requires otherwise:

(a) the Annexure to this Land License Agreement forms part of this Land License Agreement and shall be of full force and effect as though it is expressly set out in the body of this Land License Agreement;

(b) the terms of this Land License Agreement shall be read in consonance with and not in derogation with the terms of Cargo Terminal Agreement;

(c) the words and expressions beginning with capital letters and defined in this Land License Agreement shall have the meaning ascribed thereto herein, and the words and expressions beginning with capital letters used in this Land License Agreement and not defined herein, but defined in the Cargo Terminal Agreement shall, unless repugnant to the context, have the meaning ascribed thereto in the Cargo Terminal Agreement.

2. Grant of License and Possession -

2.1.1 The provisions of this Land License Agreement shall take effect and become binding on the Parties on the date of signing of this Agreement.

2.1.2 In consideration of the Land License Fee and subject to Clause 2.1.3, the Licensor grants on License to the Licensee and the Licensee agrees to accept the License from the Licensor, free from Encumbrances and/or encroachments, of all that piece and parcel of land measuring_____ situated at_____, described in the Annexure and to hold, possess, use and enjoy the Site a*nd/or* any part thereof, in accordance with the provisions of this Land License Agreement.

2.1.3 The Licensor hereby grants and transfers physical possession of the land specified in Annexure and in accordance with the provisions of Clause 4 of the Cargo Terminal Agreement.

3. Term-

3.1 The License granted in pursuance of this Land License Agreement shall be for a period of 5 (five) years from the date of signing of Land License Agreement (the "Term") which shall be renewed / extended in blocks of five (05) years at a time, up to 35 years unless principle GCT agreement is terminated / or the Land License Agreement is terminated prematurely in accordance with Clause 6 hereunder.

3.2 Both the Land License Agreement and the Cargo Terminal Agreement shall be co-terminus with each other.

3.3 The Licensee shall not derive any right, title or interest in the said Site which shall remain property of the Railways all the times. The Licensee only shall have possessory right as a Licensee for ___ years of the said premises in accordance with the terms of the agreement, provided regular and timely payment of land license fee is made.

3.4 Renewal of the Land License Agreement shall be at the sole discretion of the Licensor.

07/07/2022

4. Land License Fee -

4.1 The Licensee shall pay to the Licensor, subject to Clause 4.3, an annual Land License Fee ("Land License Fee") @ 6% of market value of land per annum in terms of Board's circular on land licensing i.e. 2005/LML/18/8 dated 10.02.2005 and 08.06.2005 as amended from time to time.

4.2 The Licensee shall pay the Land License Fee to the Licensor in advance on the first day of April every year and into such account, as may be designated by the Licensor from time to time.

4.3 If the Licensee fails to pay the Land License Fee as aforesaid, the Licensee shall be liable to pay interest for the period of delay calculated at a rate equal to 5% (five percent) above the base interest rate prescribed by State Bank of India.

4.4 Upon failure to pay Land License Fee within a period of 180 days from due date i.e. First day of April every year, Licensor reserves the right to terminate the Land License Agreement in accordance with Clause 19 of GCTO Agreement. However, the same shall not stop Licensor from taking action for recovery of their dues.

5. Use of Site –

5.1 During the Term of this Land License Agreement, the Licensee shall use the Site only for the purpose of terminal.

5.2 The Licensor shall always be at liberty to construct adjoining to the Licensed Site and the Licensee shall not be entitled to raise any objection to ask compensation thereafter on the plea of inconvenience, whatsoever at any point of time.

6. Termination of Land License Agreement –

6.1 This Land License Agreement may be terminated earlier by mutual agreement between the Parties in writing.

6.2 The Land License Agreement shall be co-terminus with the Cargo Terminal agreement. Thus, in the event that the Cargo Terminal Agreement is terminated during the currency thereof, then this Land License Agreement shall be deemed to be terminated without any further notice for termination of Land License Agreement and the Licensor shall be at full liberty to deal with the site in such manner as it deems fit in its sole discretion.

6.3 The Licensor shall have the right to terminate this Land License Agreement on occurrence of anyone or more default(s) by the Licensee as enlisted hereunder:

(a) failure of the Licensee to make payments to the Licensor in accordance with the provisions hereof, where such failure continues for a period of 30 (thirty) days after a written notice from the Licensor:

(b) transfer or assignment of this Land License Agreement or creation of any Encumbrance on the Site, without securing prior written approval of the Licensor;

07/07/2022

(c) use of the Site for any purpose other than the purposes stated under Clause 5 of this Land License Agreement and such breach is not remedied within a period of 60 (Sixty) days after a notice from the Licensor in this behalf; and

(d) Voluntary abandonment by the Licensee of period of 90 (ninety) days or more.

6.4 On expiry of the License Term or early termination of the Land License Agreement, for any reason whatsoever, the site, shall revert back to the Licensor.

6.5 Upon termination under Clauses 4.4, 6.1, 6.2 and 6.3, the Licensor shall have the following additional rights:

(a) The recovery of any unpaid Land License Fee due and payable at the time of termination;

(b) the recovery of any damages, costs, fees and expenses incurred by the Licensor as a result of the breach of the Land License Agreement by the Licensee; and

(c) Any other right or remedy, legal or equitable, that the Licensor is entitled to under applicable laws.

7. Licensee's Obligations and Covenants

Licensee hereby covenants, agrees and represents that:

(a) the Licensee, during the Term of the Land License Agreement, shall pay the Land License Fee in accordance with terms and conditions set out in this Land License Agreement and shall observe and fulfil each of its obligations and covenants set forth herein;

(b) the Licensee shall obtain, at its own cost and expense, all utilities, such as water, electricity etc. from the appropriate authorities;

(c) It shall obtain and keep current all Applicable Permits that may be required under the applicable laws;

(d) it shall pay all taxes, service tax, cess charges, assessments and levies in respect of the Site, which are leviable at any time during the Term of the Land License Agreement;

(e) it shall not create any lien, charge or Encumbrance on the Site, except as permitted in this Land License Agreement, without prior approval of the Licensor;

(f) it shall take all necessary care to keep the premises neat and clean and in sanitary conditions.; and

(g) It shall, after expiry or termination of the Land License Agreement forthwith, the Licensee hand over possession of the land to the Licensor along with entire infrastructure on railway land on as-is-where-is basis in terms of Clause 17.8 of agreement, without any payment / compensation.

a. shall revert back to Railway on as-is-where-is basis, without payment of any compensation.

07/07/2022

8. Stamp Duty and Registration Charges -
Subject to the exemption or waiver, if any, granted by Government or any other authority, the Parties agree that all stamp duties, registration charges and all other local/statutory charges payable In respect of the License contemplated herein shall be to the account of and borne by the Licensee.

9. Indemnities and Limitation of Liability -
The Licensee shall fully indemnify, defend and hold harmless the Licensor, its officers, servants, agents, against any and all suits, proceedings, actions, demands, claims and liabilities, which may be incurred or suffered by the Licensor and which may arise out of or as a result of any of the following causes:

(a) any breach by the Licensee of any of its obligations, covenants, agreements, representations or warranties set forth In this Land License Agreement;

(b) any loss of property, damage to property, personal injury or death occasioned to or suffered by any person, to the extent that the damage to or loss of property or the personal injury or death is caused willfully or negligently by the Licensee; and

(c) any breach, violation or non-compliance by the Licensee of any applicable laws and/or Applicable Permits.

10. Assignment-

The Licensee shall not, without the Licensor's prior written consent, transfer, assign or grant any form of security over any of its rights or obligations under this Land License Agreement.

11. Dispute Resolution -

11.1 The Parties shall use their respective reasonable endeavors to settle any dispute, difference, claim, question or controversy between the Parties arising out of, in connection with or in relation to this Land License Agreement ("Dispute") amicably between themselves through negotiation.

11.2 Any Dispute which the Parties are unable to resolve pursuant to Clause 11.1, within 60 (sixty) days (or such longer period as the Parties may agree) of notice by one Party to the other of the existence of a Dispute, shall be resolved in accordance with the provisions of the Cargo Terminal Agreement.

12. Governing Law -

This Land License Agreement is governed by and shall be construed in accordance with the laws of India. In case of any dispute and difference arises, the Court of the place, where Land License Agreement has been made, shall only have the jurisdiction to try such litigation.

Eastern Railway
Asansol Division

No: C.4/MPL/Siding Policy/22

Dated 04.08.22.

Maithon Power Limited,
Thaparnagar, Asansol Division.

Sub: Execution of agreement for 'Gati Shakti Multi-modal Cargo Terminal (GCT).
Ref: Railway Board's letter No. 2021/TC(FM)/18/23 – Part (I) dated 07.07.2022.

****

The policy guidelines on GCT were issued under GCT Master Circular 2021 vide Railway Board's letter No. 2021/TC(FM)/18/23 dated 15.12.2021. As per provision contained in Para 18.1 of GCT Master Circular, an Agreement for GCT shall be signed before the issue of commercial notification and operation.

In this regard, MPL authority has executed the agreement. Due to non availability of any Standard Agreement for GCT with this division, existing siding agreement along with GCT rules and regulations, EOL agreement and an undertaking were executed on 16.02.2022. MPL authority has given the undertaking that any further Revision/Edition/Modification of the terms and condition of contract as issued by competent authority (Railway Board / Eastern Railway) shall be binding on M/s Maithon Power Limited.

In this connection, standard agreement for GCT has been sent vide letter under reference above.

As Standard Agreement for GCT has been issued by Railway Board, it is required to execute the standard agreement.

Hence, it is requested to furnish 04 nos. of stamp paper of demonation Rs. 20/- or Rs. 50/- or Rs. 100/- as well as 92 nos. dummy papers (23 x 4) to this office for execution of agreement as per Railway Board's advice as early as possible.

Eastern Railway, Asansol

Saving in Annual Fixed Charges on account of the shifting of Railway capitalization in FY 2021-22

Scenario 1:

1. Capitalization of Railway Claimed in FY 2021-22 with additional IDC of Rs. 2670.24 lakh in FY 2021-22 (i.e. as claimed in the Petition).

Railway Project Capital cost (Rs. Lakh) considering capitalization in FY 2022.

S. No.	Particulars	2019-20	2020-21	2021-22	2022-23	2023-24
1	**2**	**3**	**4**	**5**	**6**	**7**
1	Opening Capital Cost	-	-	-	72511.14	73121.59
2	Add: Addition during the year/period	-	-	65184.48	52.79	-
3	Less: De-capitalisation during the year/period	-	-	-	-	-
4	Add: Undischarge Liability as on 1st April of each year	-	-	-	1680.24	1122.59
5	Less: Undischarge Liability as on end of each year	-	-	1680.24	1122.59	1115.18
6	Add: Normative IDC on Excess Equity Railways			9006.91		
7	Closing Capital Cost	-	-	72511.14	73121.59	73128.99
8	**Average Capital Cost**	**-**	**-**	**36255.57**	**72816.36**	**73125.29**

2. Annual Fixed Charges computed based on above capital cost and norms specified in Tariff Regulations/ claimed in Tariff Petition:

Summary of Annual Fixed Charges (Rs Lakh) in Scenario-1

1	**2**	**5**	**6**	**7**	**8**	**9**
1.1	Depreciation	-	-	1,816.79	3,654.83	3,717.83
1.2	Interest on Loan	-	-	1,889.67	3,844.43	3,914.49
1.3	Return on Equity	-	-	2,042.86	4,102.91	4,120.32
1.4	Interest on Working Capital	-	-	-	-	-
1.5	O&M Expenses	-	-	-	-	-
	Total	**-**	**-**	**5824.72**	**11754.33**	**11928.64**

Scenario 2:

3. Capital cost of Railway Project considering capitalization in FY 2020-21.

Capital cost of Railway Project (Rs. Lakh) considering capitalization in FY 2021.

S. No.	Particulars	2019-20	2020-21	2021-22	2022-23	2023-24
1	**2**	**3**	**4**	**5**	**6**	**7**
1	Opening Capital Cost	-	-	64,954.28	69,840.90	70,451.34
2	Add: Addition during the year/period	-	65,184.48	-	52.79	-
3	Less: De-capitalisation during the year/period	-	-	-	-	-
4	Add: Undischarge Liability as on 1st April of each year	-	-	6,566.87	1,680.24	1,122.59
5	Less: Undischarge Liability as on end of each year	-	6,566.87	1,680.24	1,122.59	1,115.18
6	Add: Normative IDC on Excess Equity Railways		6,336.66	-		
7	Closing Capital Cost	-	64,954.28	69,840.90	70,451.34	70,458.75
8	**Average Capital Cost**	**-**	**32,477.14**	**67,397.59**	**70,146.12**	**70,455.05**

4. Annual Fixed Charges computed based on above capital cost and norms specified in Tariff Regulations/ claimed in Tariff Petition:

Summary of Annual Fixed Charges (Rs Lakh) in Scenario-2

S. No.	Particulars	2019-20	2020-21	2021-22	2022-23	2023-24
1	**2**	**3**	**4**	**5**	**6**	**7**
1.1	Depreciation	-	1,626.62	3,328.76	3,520.80	3,582.07
1.2	Interest on Loan	-	1,764.35	3,389.09	3,443.09	3,485.54
1.3	Return on Equity	-	1,829.96	3,797.58	3,952.45	3,969.86
1.4	Interest on Working Capital	-	73.43	137.91	143.17	165.29
1.5	O&M Expenses	0.00	0.00	0.00	0.00	0.00
	Total	**0.00**	**5294.36**	**10653.34**	**11059.51**	**11202.76**

5. It is noteworthy here to mention that capitalization of Railway Project claimed in FY 2021-22 instead of FY 2020-21 would in-fact reduce the AFC burden of the procures by about 100 Crores between FY 2020-21 and FY 2021-22. The summary of the reduced AFC burden on the procurers has been summarized in the table below:

Capitalization of Railway Project Claimed in FY 22 (In Rs. Lakh)			Capitalization of Railway Project Claimed in FY 21 (In Rs. Lakh)			Reduced AFC Burden (In Rs. Lakh)
2020-21	2021-22	Total	2020-21	2021-22	Total	
1	2	3=1+2	4	5	6=4+5	7=3-6
0.00	5824.72	5824.72	5294.36	10653.34	15947.70	**-10122.98**

6. It may be noted that the delay in capitalization of the Railway Project is mainly due to the reasons beyond the control of the Petitioner as detailed in the Petition. On the basis of the summary of Capital Cost for Railway Project and corresponding Annual Fixed Charges under both the Scenarios provided hereinabove, it is evident that benefit of delayed capitalization by a year is already available with the procurers. As such, it is most humbly prayed that the impact of IDC of Rs. 2670.24 lakh in FY 2021-22 is justified to be considered and hence, may please be allowed.

Dear Sir,

Sub. : Report on Health Survey of Battery Banks of Battery Bank-1&2 of U#2.

This has reference to the visit of undersigned to your Power Plant on 1st Dec.'20 in connection to the above job. Our Observations are as under:

(1) Battery Type : 108YHP29

Location: 220V Battery Bank-I of U#2.
Yr. of Installation: 2010.
Condition of the Battery Bank:

(a) Heavy Corrosion on Positive Strap was noticed in 32 nos.(Sl. No.: 4,6,8,20,25,29,31,,35,45,46,47, 49,51,52,53,54,60,61,63,64,66,67,68,72,75,79,80,83,87,90,94, & 108).
(b) Copper Contamination caused by Strap corrosion was noticed in 24 nos.(Sl. No.: 4,6,25,29,31,45, 46,47,49,52,53,54,60,61,63,64,66,72,75,77,79,80,87 & 90)
(c) Crack on the top lid caused by Strap Corrosion was also noticed in 20 nos.
(d) Corrosion on the Positive Plate was noticed in 33 nos.(Sl. No.4,6,11,12,18,28,31,36,38,39,40,41, 42,45,46,47,52,53,54,57,60,61,63,66,72,75,76,79,87,93,94,98 & 104)

Recommendation: Condition of the Battery Bank is alarming and under present condition, it will not be possible to revive the Battery Bank, hence should be replaced by a new one.

(2) Battery Type : 108YHP29

Location: 220V Battery Bank-II of U#2
Yr. of Installation: 2010
Condition of the Battery Bank:

(a) Heavy Corrosion on Positive Strap was noticed in 17 nos.(Sl. No.: 1,2,3,4,5,6,11,52,57,58,61,64, 71,78,96,97 & 106).
(b) Copper Contamination caused by Strap corrosion was noticed in 10 nos.(Sl.No.:1,2,4,6,52,57,58, 64, 72 & 78).
(c) Crack on the top lid caused by Strap Corrosion was also noticed in 08 nos.
(d) Growth in the Positive Plates was noticed in 20 nos. (Sl.No.: 2,4,5,11,17,27,29,34,38,57,58,64,65, 70, 94, 96, 97,102,104&106).

.....contd.

Recommendation: Condition of the Battery Bank is not satisfactory. Overhauling of the Battery Bank and rectification of the defective cells should be carried out at the earliest.

A record of Voltage and Specific Gravity measured and recorded during Survey is attached for your ready reference.

Yours faithfully

Dear Sir,

Sub. : Report on Health Survey of Battery Banks of Unit#1

Dear Sir,
This has reference to the visit of undersigned to your plant on 1st Dec'20 in connection to the above job. Our Observations are as under:

1. **Battery Type: 108YHP-29**

Location: Unit# 1 Battery Bank- I
Yr. of Installation: 2010
Condition of the Battery Bank:

(a) Corrosion in the Positive Plate and strap was noticed in large number of Cells ((Cell No.6,8, 10, ,16, 17, 23, 29, ,42, 45, 46, 47, 52, 56, 57, 58 ,63, 64,65,69, 75, 76,77,78,86,87,88,91,100,& 107)
(b) Cell no.70 is By-Passed.
(c) Specific Gravity of all cells is low.
(d) The battery bank is in service with very high Float Voltage.

Recommendation: As a immediate precautionary measure Overhauling of the Battery Bank should be carried out, however considering the condition of the Battery Bank, replacement of the same by a new one in near future is required to achieve a trouble free service..

2. **Battery Type : 108 YHP-29**

Location: UNIT #1 Battery Bnak -II
Yr. of Installation: 2010
Condition of the Battery Bank:

(a) The Battery Bank is in Service with very high Float Voltage.
(b) Cell No.108 is By-Passed and Cell No. 3,26,74,95,96 is in deep discharged condition.
(c) Majority of cells in the Battery Bank are lagging marginally

…….contd.

(d) Corrosion in the Positive Plate & Strap was noticed in large number of cells (3, 13, 16,20, 26, 29,30,36, 74, 95,96, 101, 105 & 106)
(e) Float Voltage is very high resulting overcharge of the Battery Bank.

Recommendation: As a immediate precautionary measure Overhauling of the Battery Bank should be carried out, however considering the condition of the Battery Bank, replacement of the same by a new one in near future is required to achieve a trouble free service.

A record of voltage and Specific Gravity measured during inspection is attached for your ready reference. Shall you need any clarification on the above, please feel free to write to us.

Dear Sir,
Sub.: Report on Health Survey of Battery Bank.

This has reference to our telephonic discussion on the above issue and visit of our representative to your plant in connection to the above job on 2nd July'22.

Our Observations are as under:

Battery Type: 110TM100PHDPII
Location: CHP
Yr. of Installation: 2010
Condition of the Battery Bank:

(a) Specific Gravity of Majority of Cells in Service is low.
(b) Growth noticed in Positive Plates and Gr. Bar of majority of Cells.
(c) Bulge noticed in majority of Cells.
(d) Upper portion of majority of Cells is in damaged condition.

Recommendation: The Battery Bank has completed its normal Service life. Present condition of the Battery Bank is alarming and under present condition it will not be possible to revive the Battery Bank, hence should be replaced by a new one at the earliest.

Sub : Life Cycle Report on Installed PLC-HMI System at CHP.

Dear Sir,

With reference to the discussions which we had with you during our visit to your plant regarding life cycle status of installed Rockwell Automation PLC-HMI System in Coal Handling Plant Plant. Based on our system study and assessment, we are enclosing a brief report on major installed software & hardware that needs to be migrated to latest solution **primarily due to obsolescence of Windows XP OS by Microsoft and make the system compatible with latest Windows 10 Prof. operating system.**

We understand the CHP is a critical & a most important part of part of plant process and it needs immediate attention on migration from Windows XP to Windows 10 prof operating system, owing to technological obsolescence. If you require any further clarification / information in regard to the above, please feel free to write us.

Thanking you & assuring you of our best attention & services at all times, we remains,

Yours faithfully
For **EMCONS**

(P.Lakhani)

Rockwell Automation
Recognized System Integrator

Annexure-I

Brief Report on Installed System Software & Major Hardware of CHP that Needs Migration

1.0 Existing System:

Existing installed system is L6x Control Logix Redundant System with System Redundancy Module & 1756 Series of I/O hardware. HMI Software is Factory Talk View Studio as development package & Factory Talk View SE System which are operating on 32 bit Windows XP operating system and its compatible PC hardware. Owing to the technological obsolescence of Windows XP by Microsoft and availability of 64 bit processors for PC, it is becoming increasingly difficult to maintain & troubleshoot the old system hardware's as the latest set of software's have either very restricted or no support for old hardware's., present day hardware does not support Windows XP as OS platform since most of the hardware driver are not available. HMI being the integral & most critical part of CHP operation, it always runs the risk of running in an obsolete & unsupported system. A table of such hardware & software is enclosed at Annexure-II for your reference.

Keeping in view the criticality of the system, we strongly recommend to upgrade the obsolete portion of the system, retaining majority of existing hardware alongwith panels, etc. Since there is not going to be any major hardware or software modification, upgradation work can be carried our in smooth manner in normal planned shutdowns of the plant.

Rockwell Automation
Recognized System Integrator

Annexure-II

LIFE CYCLE STATUS & WINDOWS 10 COMPATIBILITY OF INSTALLED ROCKWELL PLC SOFTWARE & MAJOR HARDWARE FOR CHP					
Sl.No.	**Description**	**Cat. No.**	**Installed Qty.**	**Life Cycle Status**	**Remarks**
A.	**CHP**				
1	CLX PROGRAMMING SOFTWARE, RS LOGIX 5000 WITH NETWORX WORKING ON **32 BIT WINDOWS XP OS**	9324-RLD300NXENE	1	DISCONTINUED FOR WINDOWS XP	Since 32 bit Windows XP operating software is no longer supported by Microsoft & new PCs, it needs to be migrated to 64 bit platform for compatibility with Windows 10 Prof. OS by way of Warranty Renewal.
2	HMI DEVELOPMENT SOFTWARE, FT VIEW STUDIO ON **32 BIT WINDOWS XP OS**	9701-VWSTAENE	1	DISCONTINUED FOR WINDOWS XP	Since 32 bit Windows XP operating software is no longer supported by Microsoft & new PCs, it needs to be migrated to 64 bit platform for compatibility with Windows 10 Prof. OS by way of Warranty Renewal.
3	HMI RUNTIME SOFTWARE, FT VIEW SE 100 DISPLAY ON **32 BIT WINDOWS XP**	9701-VWSB100ENM	2	DISCONTINUED FOR WINDOWS XP	Since 32 bit Windows XP operating software is no longer supported by Microsoft & new PCs, it needs to be migrated to 64 bit platform for compatibility with Windows 10 Prof. OS by way of Warranty Renewal.
4	CONTROLLER WITH 8MB RAM	1756-L63	2	REACHED END OF LIFE	Needs to be migrated to latest L7x platform for compatibility with latest Windows 10 Prof OS
5	SYSTEM REDUNDANCY MODULE	1757-SRM	2	REACHED END OF LIFE	Needs to be migrated to latest L7x platform for compatibility with latest Windows 10 Prof OS
6	REDUNDANCY FIBER CABLE	1757-SRC1	1	ACTIVE MAURE	Needs to be upgraded with 1756-RMC1 for compatibility with upgraded system as its technological requirement.
7	ETHERNET BRIDHE MODULE	1756-ENBT	2	ACTIVE MAURE	Needs to be upgraded with 1756-EN2T for compatibility with upgraded system as its technological requirement.
8	CONTROLNET BRIDGE MODULE (CPU RACK & LOCAL I/O RACKS)	1756-CNBR	5	ACTIVE MAURE	Recommended to be upgraded for I/Os on Ethernet DLR Network & compatibility with upgraded system as its technological requirement.
9	CONTROLNET BRIDGE MODULE (REMOTE I/O RACKS)	1756-CNBR	5	ACTIVE MAURE	Needs to be upgraded for I/Os on Ethernet DLR Network & compatibility with upgraded system as its technological requirement.
10	MODBUS RTU & TCP INTERFACE CONTROLLER	1769-L35CR	2	REACHED END OF LIFE	Needs to be migrated to latest L30ER Controller, retaining the all other interface hardwares for compatibility with latest Windows 10 Prof OS

Dear Sir,

This has reference to your above referred purchase order. We would like to bring to your kind knowledge that it shall not be possible to have seamless communication with Stacker PLC on Ethernet Network as it is an old technology PLC of ABB. Further it shall not be possible to establish Redundant Communication for reliable operation.

Hence we strongly recommend to upgrade the same suitably so as to have smooth communication between CHP and Stacker PLC.

Thanking you and assuring you of our best attention and services at all times, we remain,

Some people who received this message don't often get email from ram.prakash@atlascopco.com. Learn why this is important

[EXTERNAL sender, Exercise caution..!]

Dear sir

We regret for the delay and apologies for the same , Kindly note we are exploring all the possibilities to complete the supply and execute the project.

We have discussed internally and taken the compressor portion alone from present Po under techsol.

Note to convince the technical queries we have selected the option of Soft starter to overcome all the queries. please note we have accepted most of all technical queries of soft starter raised during our technical meeting held at our works in pune on Mar last week along with soft starter vendor.

After submission in wrench we have received additional comments on soft starter which we need discussion for closure. Once we received MDCC for compressor portion we will work with your commercial team in amending the PO taking the compressor portion alone from
Techsol name to Atlas Copco India . Please bear with us by next week we close the above point.

As per PO balance cooling tower and pump which is already supplied, PLC, LT panel, erection shall be keep in Techsol name.

Regarding erection and supply of PLC and LT Panel will discuss with Techsol and come back with final dates by Next week. Please do provide us time till next week before 13Jun 2024.

If required we will have joint meeting to close all the pending points.

Please provide us this additional time and support us will come back after discussing internally with our engineering and finance team also with Tech sol and provide you with our plans and date of completion.

Thanking you and assuring you our best services always

Regards
Ramprakash

Subject: Inordinate Delay of Centrifugal BTG Centrifugal Compressor Project at MPL

Dear Sir,

*Centrifugal Compressor Project for BTG area of MPL is presently **running in 21st.month since placement of PO in September'2022** as against its original date of commissioning in July'2023 delayed by over 11 months and counting. There are many reasons for the delay of this project but one of the prominent reasons is incorrect specification of equipment selection at vendors-end as against the original specification requirement as per PO and this was not limited to few major equipments but for all equipments and even for components level.*

*Even after 21 months from PO placement still three of the major equipments like **Soft-Starter, PLC Panel and LT Panel are still pending for drawing and documents clearing**. In line with the attached latest mail communication, your channel partner **M/s.Techsol had recently requested for specification of LT Panel from MPL after 21 months from PO placement** whereas this document is a part of the original PO copy and had been discussed several times in the past. Situation cannot be worser than the above condition where vendor is asking for resubmission of equipment specification nearly 2 years after awarding of PO, This demonstrate that vendor is very casual, unwilling and still unaware about the basic specification requirement of the equipment to be delivered.*

*Nearly similar case is with PLC Panel, initial drawings and documents submitted on 'Wrench' portal 12 months before (12th.June'2023) after 9 months from date of awarding PO (September'2022). Since then even after several meetings with M/s.Techsol and their sub-vendor, rejection of drawings with comments from Tata Power Corporate Engineering still it is pending at M/s.Techsol end. As far as **latest email received from M/s.Techsol along with PLC documents, none of the points have been complied as against the original specification of PO and its status is remains unchanged in last 12 months**. So even after nearly 2 years of PO placement PLC drawings have not been submitted as per specification and hence not approved, so further approval and subsequent manufacturing, delivery and commissioning timeline cannot be ascertained at this time.*

*Site installation of delivered items has not been started as on date and only Cooling Tower vendor has been recently mobilized. Erection of other supplied items like Cooling Water Pumps and Air-Receiver are still pending and no action has been initiated even after several reminders and requests. **Supply of many C-Class items are pending like structural support materials, pipelines, valves, cables and cable trays etc. which are very important for overall completion of the project and not delivered in last 21 months since PO placement.***

*M/s.Techsol has failed in every aspect and becomes one of the major reasons behind inordinate delay of this project. They are basically a single person organization without any engineering 'back-up and very weak in financial strength. Communication with this vendor is itself a very tedious task and remain un-responsive in all form of communications like phone-call, Whats-app and emails. They are not at-all a **competent vendor to handle such a multi-package oriented, multidimensional project requiring strong co-ordination skill and techno-economical strength**. Whatever drawing and documents submitted by M/s.Techsol in Tata Power 'Wrench' portal most of them gets rejected due to incomplete information, mis-matched specification and incomplete documentation. They are still struggling with understanding of specification of the equipments only, after 21 months of PO award. This for sure this project cannot be completed by M/s.Techsol and need to be immediately taken-over by Atlas-Copco on urgent basis to complete the project in next 3 months timeline.*

Request you to forward your decision in this regard at the earliest.

Regards,
Subhra Sundar Chatterjee

Sub: Current delivery challenge due to global component crisis.

Dear Sir / Madam,

This is with reference to the above-mentioned PO / Contract / WO.

We are issuing this present letter pursuant to clause No. 40.4 & 40.5 read with 40.1 & 39.1 of the GCC to the said PO. There is prevalent ongoing War Risk and political tension in the region where we are dependent for our critical component / raw material supply, which could be deemed as War Risk.

Due to these current geopolitical situations and circumstances which are beyond our reasonable control, GE is facing uncontrollable and huge capacity reduction and severe shortage of essential raw materials & Semi-conductor devices, which are impacting our project execution and thereby resulting in unexpected delay in supplies related to our project.

Despite concerted and diligent efforts taken by GE to handle and manage the delivery situation, impacted by the reason above stated, we find that our approved and proven suppliers are unable to expedite and provide binding delivery dates for the critical materials and components that been awarded for the current project. This is directly impacting our project deliverable to you. This makes reliable planning considerably more difficult, irrespective of the high price demand, and we anticipate that our deliveries could get delayed beyond our project milestones approximately for about 150 days, due to circumstances beyond our control.

Therefore, in light of clauses 40.4 & 40.5, we request you to propose a mutually agreeable solution for the situation on hand.

©COPYRIGHT 2013 GENERAL ELECTRIC COMPANY AND/OR ITS AFFILIATES. All rights reserved.

GE
Power Conversion

GE is continuously working towards improving the situation, however in compliance of our obligation under contract we are issuing this advance intimation.

We are ready to get into a discussion meeting with you at your convenient time and date to arrive at mutually agreeable solution.

Thanks & Best Regards,

Siba Narayan Mohanty.
Lead Project Manager.

[EXTERNAL sender, Exercise caution..!]

Ref: Your PO / Contract Number: 7500001868 Dated: 01.03.2022
Project Details: LCI Drive Control upgrade of ID Fan Motors at MPL

Dear Sir,

This is with reference to the above-mentioned PO. We herewith would like to bring to your kind attention that due to prevailing circumstances beyond GE's reasonable control, caused by severe global shortage of essential raw materials and semi-conductor components, which are adversely impacting our supply chains and thereby resulting in unexpected delay in supplies related to our project execution.

GE is particularly keen in ensuring the use of proven materials and components, in order to provide our customers with the right and reliable solution always. Despite concerted and diligent efforts that GE continues to put in place to handle and manage the delivery situation, we find that our approved and proven suppliers are unable to expedite and provide binding and aligned support on critical materials and components to meet the project lead time due to prevailing marketplace conditions. This is seen to impact our project deliverable as per schedule agreed with you. Reliable planning in the present circumstances is turning considerably difficult, irrespective of factoring in the high price demand, due to these circumstances, which are genuinely beyond our control.

Referring to the meeting discussion with your good team on 20 December 2022, we request you and are willing to agree on an arrangement to accommodate I/C activities during intermediate shutdowns. We will continue to put concerted efforts and aim to minimize the shutdown time. Other details as to planning and schedule can be mutually agreed upon between us hereupon.

Hence, we request your kindly take note of these abnormal circumstances beyond GE's reasonable control and extend the delivery of the above PO till 30th April 2023 without any liability to GE in terms of delay. We assure GE's continued support to manage these circumstances to our best possible extent.

Looking forward for your acknowledgement, consideration and extended support in this regard.

Further to the above, we are ready to get into a discussion meeting with you at your convenient time and date to arrive at mutually agreeable solution.

Thanking You.

Best Regards

Siba Narayan Mohanty.
Lead Project Manager.

ANNEXURE P/14C (COLLY.)

Minutes of the Meeting held on 27.10.2022 regarding the rescheduling of annual overhauling of Unit#I of Maithon Power Ltd

List of Participants	
KSEBL :	M/s.Maithon Power Ltd (MPL)
1.V.R.Hari, IRS,Director(Finance& H RM)	1.Sudip Dash (Head, Commercial & Regulation)
2.Dr.Anand. S.R,Director(T,SO,P & S)	2.Sudhakar Taudon (Chief O &M Services)
3.Viju Rajan John, Chief Engineer(T-SO)	
4.Jayaraj.V, Chief Engineer(Commercial &Tariff)	
5.Rajan. M.P, DyCE(Commercial & TRAC)	
6.Anitha. K, EE, Commercial	
7.Gertrude K. G,AEE,MO (T-SO)	
8.Hiba S, AEE, Commercial	

The meeting commenced at 2:30pm with the Director (Finance & HRM) in Chair and Co-chaired by the Director(T, SO, P & S). The Chair welcomed all the participants to the meeting. The agenda of the meeting was to discuss the rescheduling of annual overhauling of Unit # I of Maithon Power Ltd which is presently scheduled for 45 days from 15.01.2023 to 28.02.2023.

The summer months of the State is from the middle of February to middle of June. During these periods, the power demand is very high and KSEBL is forced to manage summer demands through Medium Term power purchase, short term power purchase and swap proposals in addition to the long term contracts of KSEBL. The Director (T, SO, P & S) pointed out that the long term contracts of KSEBL including the PPA-1 and PPA-2 with Maithon Power Ltd are very valuable and inevitable for KSEBL for meeting the summer demand from middle of February to middle of June. Hence the Chair requested MPL to commence the annual overhauling work of Unit# I, either 15 days before the present scheduled date of 15th January 2023, so that the annual overhauling work can be completed before 15th February 2023, or postpone the work after June 2023.

In response to KSEBL's request, MPL informed that the entire supply chain of the OEM/spares suppliers has been adversely impacted due to the pandemic which

spread over the last two years and hence receiving the requite spares for the annual overhauling before mid-January is impossible. Further delaying the annual overhauling to July 2023 shall have a detrimental effect on the performance and the reliability of the Unit as the last annual overhauling of Unit# I was carried out in February 2021. Under these circumstances, MPL is forced to schedule the annual overhauling of Unit# I for 45 days from 15th January 2023.However, MPL will try to complete the annual overhauling of the Unit at the earliest by February 2023 and also assured that from next financial year onwards, MPL will complete the overhauling of the units within the month of January.

On the matter of imported coal for blending purposes, MPL informed that sufficient domestic coal for power generation is available with MPL and hence at the point of time there is no need of importing coal for blending.

The Chair thanked the representatives of MPL for maintaining a good cordial relationship with KSEBL.

Meeting came to a close at 03:00pm

Director (Finance &HRM), KSEBL

Office of Chairperson
Central Electricity Authority

Consequent to the review meeting chaired by the Hon'ble Minister of Power & NRE to meet the Power demand in the Country on 7 November 2023 at 3.00 PM, the following actions are required to be taken to meet the demand during November 2023 to June 2024:-

(i) CPSUs (NTPC, DVC) need to ensure the availability of coal. Any shortfall in domestic coal needs to be supplemented through import of coal.

[Action: NTPC, DVC, CEA]

(ii) No planned maintenance during March 2024 to May 2024.

[Action: Member(GO&D/CE(GM)/RPCs]

(iii) Forced outage and partial outage to be brought down from around 25 GW to 15 GW. Monitoring for forced outage for early restoration needs to be done periodically. All the generating stations need to be advised to maintain spare parts, so that the restoration can be done quickly.

[Action: Member(GO&D/CE(GM)]

(iv) All Gencos, including IPPs and Central generating stations must be advised to generate at least 85% PLF and maintain full availability on a daily basis. Any surplus power, i.e. the difference between declared capacity and the scheduled capacity, must be sold in the day-ahead market and any remaining quantity not cleared in the day-ahead market, must be sold in RTM.

[Action: Member(GO&D/CE(GM)]

(v) The new units which are getting commissioned in any State or the firm share that the State will be getting from any Central generating stations, needs to be counted in the availability. If State is found to be having surplus power, the power from the unallocated quantity of Central generating stations may be reduced and allocated to other needy States, which is falling short of their capacity.

[Action: Member(GO&D/CE(GM)]

(vi) A State-wise chart may be prepared giving demand of the State, capacity commissioned, power surplus or deficit status, and de-allocation/reallocation from unallocated power of Central generating stations.

[Action: Member(GO&D/CE(GM)]

(vii) The allocation from unallocated quantity to the State is to be made judiciously and given only to the deficit State after the State has utilized

power from their own units or tied-up power from IPPs or Gas based power plants/imported coal based power plants. Unallocated power is to be allocated only to the State which are having deficit. Any surplus in allocated power may be sold by the Central generating stations in the power exchanges.

[Action: Member(GO&D/CE(GM)]

(viii) Measures to be taken in load shifting from evening hours to solar hours – After assessing the capacity addition in solar and wind, advisory may be issued for shifting of all agricultural load or any other load to solar hours.

[Action: Member(GO&D/CE(GM)]

(ix) At present Grid-India has feasibility for monitoring all Inter State generating stations. In order to have implementation of rule which is getting notified, Grid-India must monitor all the power plants, i.e. Inter-State generating stations as well as Intra-State generating stations (State owned generating stations and IPPs) with respect to the declared capacity, scheduled capacity, coal generation, power sold in the power exchanges. Since the data pertaining to declared capacity, actual generation from the generating units of the State are, at present, not available with RLDC and NLDC, arrangements needs to be made to get these information by linking SLDCs to RLDCs. This needs to be completed within 15 days, i.e. by 22 November 2023, by Grid-India.

[Action: Grid-India/Member(GO&D)]

(x) A letter may be written to the States giving advisory to use all the surplus capacity and also sell the surplus capacity in the power exchanges. This will help the other State in meeting the demand ensuring that there is no load shedding, also ensuring financial viability of the generating stations/Discoms, if the power is sold in the power exchanges etc.

[Action: Member(GO&D/CE(GM)]

(xi) Generating companies to take all measures at the earliest and latest by February 2024, so that they are able to declare full generating capacity and ensure that there is no partial outage. Thus all the maintenance work in such plants must be completed latest by February 2024. All the new coal generation capacity must be monitored. A list of such capacities is to be given to Hon'ble Minister of Power & NRE and Secretary(Power) also.

[Action: Member(Thermal)/PCE-II/CE(TP&RM)]

(xii) The performance of newly commissioned coal based generating units is to be monitored.

[Action: Member(Thermal) / CE(OPM)]

(xiii) A meeting may also be held with CMD, BHEL on expeditious completion of balance of plant work or expeditious commissioning of new thermal power stations.

[Action: Member(Thermal)/CE(TPM)]

(xiv) Supply of coal to the power plants needs to be monitored, such that all States get fair amount of coal under a uniform policy. Categorisation of these plants may be done under ICB, pithead plants, non-pithead plants, plants which are getting coal supply from their captive mines. Coal Distribution Policy needs to be worked out and shown to Hon'ble Minister of Power & NRE.

[Action: Member(Thermal)]

(xv) All the solar and wind projects, which are likely to be commissioned during 2023-24 and 2024-25 need to be expedited and monitored every month in CEA. The list is to be obtained from MNRE.

[Action: Member(Plg.) / CE(RPM)]

(xvi) Implementation of time-of-the-day(ToD) tariff also needs to be monitored, which will help in demand shifting. There cannot be a situation wherein there is a load shedding and also some plants are backing down. If such a situation is happening, it must be closely monitored by Grid-India.

[Action: Member(E&C)/Member(GO&D)/Grid-India]

(Ghanshyam Prasad)
Chairperson

ANNEXURE P/15

NATIONAL AMBIENT AIR QUALITY STANDARDS
CENTRAL POLLUTION CONTROL BOARD
NOTIFICATION

New Delhi, the 18th November, 2009

No.B-29016/20/90/PCI-L—In exercise of the powers conferred by Sub-section (2) (h) of section 16 of the Air (Prevention and Control of Pollution) Act, 1981 (Act No. 14 of 1981), and in super session of the Notification No(s). S.O. 384(E), dated 11th April, 1994 and S.O. 935(E), dated 14th October, 1998, the Central Pollution Control Board hereby notify the National Ambient Air Quality Standards with immediate effect, namely:-

NATIONAL AMBIENT AIR QUALITY STANDARDS

S. No.	Pollutant	Time Weighted average	Concentration in Ambient Air		Methods of Measurement
			Industrial, Residential, Rural and Other Area	Ecologically sensitive area (notified by Central Govt.)	
(1)	(2)	(3)	(4)	(5)	(6)
1	Sulphur Dioxide (SO_2), $\mu g/m^3$	Annual*	50	20	• Improved West and Geake • Ultraviolet fluorescence
		24 hours**	80	80	
2	Nitrogen Dioxide (NO_2), $\mu g/m^3$	Annual*	40	30	• Modified Jacob & Hochheiser (Na-Arsenite) • Chemiluminescence
		24 hours**	80	80	
3	Particulate Matter (size less than 10 µm) or $PM_{10}\mu g/m^3$	Annual*	60	60	• Gravimetric • TOEM • Beta attenuation
		24 hours**	100	100	
4	Particulate Matter (size less than 2.5 microns) or $PM_{2.5}$ $\mu g/m^3$	Annual*	40	40	• Gravimetric • TOEM • Beta attenuation
		24 hours**	60	60	
5	Ozone (O_3) $\mu g/m^3$	8 hours **	100	100	• UV photometric • Chemiluminescence • Chemical method
		1 hour **	180	180	
6	Lead (Pb) $\mu g/m^3$	Annual*	0.5	0.5	• ASS / ICP method after sampling on EPM 2000 or equivalent filter paper • ED – XRF using Teflon filter
		24 hours**	1.0	1.0	

(1)	(2)	(3)	(4)	(5)	(6)
7	Carbon Monoxide (CO) mg/m^3	8 hours**	2	2	Non Dispersive Infra RED (NDIR) Spectroscopy
		1 hour**	4	4	
8	Ammonia (NH_3) $\mu g/m^3$	Annual*	100	100	• Chemiluminescence • Indophenol blue method
		24 hours**	400	400	
9	Benzene (C_6H_6) $\mu g/m^3$	Annual*	5	5	• Gas chromatography based continuous analyser • Adsorption and desorption followed by GC analysis
10	Benzo (a) Pyrene (BaP) – particulate phase only ng/m^3	Annual*	1	1	Solvent extraction followed by HPLC / GC analysis
11	Arsenic (As) ng/m^3	Annual*	6	6	AAS / ICP method after sampling on EPM 2000 or equivalent filter paper
12	Nickel (Ni) ng/m^3	Annual*	20	20	AAS / ICP method after sampling on EPM 2000 or equivalent filter paper

***** Annual arithmetic mean of minimum 104 measurements in a year at a particular site taken twice a week 24 hourly at uniform intervals.

****** 24 hourly or 8 hourly or 1 hourly monitored values, as applicable, shall be complied with 98% of the time in a year. 2% of the time, they may exceed the limits but not on two consecutive days of monitoring.

Note: Whenever and wherever monitoring results on two consecutive days of monitoring exceed the limits specified above for the respective category, it shall be considered adequate reason to institute regular or continuous monitoring and further investigation.

June 13, 2018

Dear John,

As a valued Series 5000 Silica/Phosphate Analyzer service customer, we would like to thank you for your continued business and provide you with an update on the status of this instrument. After a long history of production, which ended in 2013, there are now critical components that we can no longer source. These part shortages require that we make some changes to our service offerings.

Because we can no longer offer full repair coverage, the Field Service Partnership is being discontinued. Active Field Service Partnerships with expiration dates prior to October 1, 2018 will be renewed for one more year.

We will continue to supply reagents and maintenance parts, as well as the following service options to help you maintain functionality of your Series 5000 analyzer:

- Preventative Maintenance Partnerships
- Billable repair service on a best-effort basis while part supplies remain

We encourage you to plan for upgrading your Series 5000 analyzer to avoid extended downtime should repair not be possible. If upgrading is an option, Hach would like to support you in this transition by offering a discount on a new analyzer purchased with a service agreement.

Hach 5500sc Silica and Phosphate Analyzers:

- Require only two liters of reagent for 90 days of continuous run time– twice as long as the Series 5000
- Help you avoid downtime with predictive diagnostic tools, including Hach's proprietary Prognosys technology
- Use an improved bottle and cap design for clean, fast, and easy reagent changes
- Allow for easy verification to give you confidence in your readings

10% off a 5500sc Silica or Phosphate Analyzer purchased with a service agreement:
Offer code 8M97EP

Contact your Hach Service Sales team member at 800-227-4224 x6178
or contract_support@hach.com for additional information.

विषय : CEA (Cyber Security in Power Sector) Guidelines, 2021.

CEA is mandated to prepare 'Guidelines on Cyber Security' in Power Sector under the provision of regulation (10) of the Central Electricity Authority (Technical Standards for Connectivity to the Grid) (Amendment) Regulations, 2019. Guidelines on Cyber Security in Power Sector incorporating the cardinal principles has been prepared by CEA. In compliance to the provision of the above regulation, **CEA (Cyber Security in Power Sector) Guidelines, 2021** are issued for compliance by all entities listed in the clause 2.3 (Applicability of the Guidelines) of the guidelines.

Encl: Guidelines on Cyber Security

07/10/21
(V.K Mishra)
Secretary CEA

CEA (Cyber Security in Power Sector) Guidelines, 2021

1.0 Background

1.1 Cyber intrusion attempts and Cyber-attacks in any critical sector are carried out with a malicious intent. In Power Sector it's either to compromise the Power Supply System or to render the grid operation in-secure. Any such compromise, may result in mal-operations of equipments, equipment damages or even in a cascading grid brownout/blackout. The much hyped air gap myth between IT and OT Systems now stands shattered. The artificial air gap created by deploying firewalls between any IT and OT System can be jumped by any insider or an outsider through social engineering. Cyber-attacks are staged through tactics & techniques of Initial Access, Execution, Persistence, Privilege Escalation, Defence Evasion, Command and Control, Exfiltration. After gaining the entry inside the system through privilege escalation, the control of IT network and operations of OT systems can be taken over even remotely by any cyber adversary. The gain of sensitive operational data through such intrusions may help the Nation/State sponsored or non-sponsored adversaries and cyber attackers to design more sinister and advanced cyber-attacks.

1.2 Government of India has set up the Indian Computer Emergency Response Team (CERT-In) for Early Warning and Response to cyber security incidents and to have collaboration at National and International level for information sharing on mitigation of cyber threats. CERT-In regularly issues advisories on safeguarding computer systems and publishes Security Guidelines which are widely circulated for compliances. All Central Government Ministries/ Departments and State/Union Territory Governments have been advised to conduct cyber security audit of their entire Cyber Infrastructure including websites at regular interval through CERT-In empanelled Auditors so as to identify gaps and appropriate corrective actions to be taken in cyber security practices. CERT-In extends supports to enable Responsible Entity in conducting cyber security mock drills and in assessment of their preparation to withstand cyber-attacks. The Responsible Entity must submit Reports of Cyber Audit of cyber security controls, architecture, vulnerability management, network security and periodic cyber security drills to sectoral CERT as well as CERT-In. Team of experts shall review these reports and shortcomings if any in the compliances shall be flagged by them. CERT-In on regular basis also conducts workshops and training programs to enhance Cyber awareness of all Stakeholders.

1.3 Ministry of Power has created 6(six) sectoral CERTs namely Thermal, Hydro, Transmission, Grid Operation, RE and Distribution for ensuring cyber security in Indian Power Sector. Each Sectoral CERT has prepared their sub-sector specific model Cyber Crisis Management Plan(C-CMP) for countering cyber-attacks and cyber terrorism. Each Sectoral CERT has circulated their model C-CMPs for preparation and implementation of organization specific C-CMP by each of their Constituent Utility.

1.4 All Responsible Entities, Service Providers, Equipment Suppliers/Vendors and Consultants engaged in Power Sector are equally responsible for ensuring cyber security of the Indian Power Supply System. They are to act timely upon each threat intelligence,

advisories and other inputs received from authenticated sources, for continuous improvement in their cyber security posture.

1.5 In the current Indian scenario though many cyber security directives and guidelines exists, but none of them are power sector specific. Ministry of Power has directed CEA to prepare Regulation on Cyber Security in Power Sector. And as an interim measures CEA has been directed to issue Guideline on Cyber Security in Power Sector, under the provision of Regulation 10 on Cyber Security in the "Central Electricity Authority (Technical Standards for Connectivity to the Grid) (Amendment) Regulations, 2019".

1.6 The Guidelines on Cyber Security, in the form of Articles written below, requires mandatory Compliance by all Responsible Entities. The Guidelines shall come into effect from the date of issue by Central Electricity Authority, New Delhi.

2.0 Hereby the Guidelines on Cyber Security are drawn in the form of Articles for compliance by the Requester as well as User under the following provision of Regulation 10 on Cyber Security, in the "Central Electricity Authority (Technical Standards for Connectivity to the Grid) (Amendment) Regulations, 2019".

"The requester and the user shall comply with cyber security guidelines issued by the Central Government, from time to time, and the technical standards for communication system in Power Sector laid down by the Authority."

2.1 **Objective of issuing Guideline**:

a) Creating cyber security awareness
b) Creating a secure cyber ecosystem,
c) Creating a cyber-assurance framework,
d) Strengthening the regulatory framework,
e) Creating mechanisms for security threat early warning, vulnerability management and response to security threats,
f) Securing remote operations and services,
g) Protection and resilience of critical information infrastructure,
h) Reducing cyber supply chain risks,
i) Encouraging use of open standards,
j) Promotion of research and development in cyber security,
k) Human resource development in the domain of Cyber Security,
l) Developing effective public private partnerships,
m) Information sharing and cooperation
n) Operationalization of the National Cyber Security Policy

2.2 Within the text of these Articles, '**Responsible Entity'** shall mean all:

a) Transmission Utilities as well as Transmission Licensees,
b) Load despatch centres (State, Regional and National),
c) Generation utilities (Hydro, Thermal, Nuclear, RE),
d) Distribution Utilities
e) Generation Aggregators,
f) Trading Exchanges,
g) Regional Power Committees, and
h) Regulatory Commissions.

2.3 **Applicability:**

All Responsible Entities as well as System Integrators, Equipment Manufacturers, Suppliers/Vendors, Service Providers, IT Hardware and Software OEMs engaged in the Indian Power Supply System.

2.4 **Scope:**

2.4.1 **Control Systems for System Operation and Operation Management.**

a) Grid Control and Management Systems,
b) Power Plant Control Systems,
c) Central Systems used to monitor and control of distributed generation and loads e.g. virtual power plants, storage management, central control rooms for hydroelectric plants, photovoltaic/wind power installations,
d) Systems for fault management and work force management,
e) Metering and measurement management systems,
f) Data archiving systems,
g) Parameterisation, configuration and programming systems,
h) Supporting systems required for operation of the above mentioned systems,

2.4.2 **Communication System.**

a) Routers switches and firewalls,
b) Communication technology-related network components,
c) Wireless digital systems.
d) Control Centre to Control Centre Communications for data exchange on ICCP. **(IEC 61850/60850-5/TASE.2/)**

2.4.3 **Secondary, Automation and Tele control technologies**

a) Control and Automation components,
b) Control and field devices,
c) Tele control devices,
d) Programmable logic controllers / Remote Terminal Units, including digital sensor and actuators elements,
e) Protection devices,
f) Safety components,
g) Digital measurement and metering installations,
h) Synchronisation devices,
i) Excitation Systems,

3.0 Definition of Terms:

1. **Access Management**: shall mean set of policies and procedures of the Responsible Entity for allowing Personnel, devices and IoT to securely perform a broad range of operational, maintenance, and asset management tasks either on site or remotely as laid down in Clause 5.2.5 of IS 16335.
2. **Accreditation:** shall mean the process of verifying that an organisation is capable of conducting the tests and assessments against a product/process that are required to be certified.

3. **Accreditation Body:** shall mean an organisation that has been accredited to verify the credentials and capabilities of the organisations that wish to become a certification body.
4. **Act:** shall mean the Information Technology Act, 2000 (21 of 2000)
5. **Asset**: shall mean anything that has value to the organization.
6. **Certification:** shall mean the process of verifying that a product has been manufactured in conformance with a set of predefined standards and/or regulations by an organisation, that is accredited to conduct the certification process
7. **Certification Body:** shall mean an organisation that has been accredited by an accreditation body to certify products / process against a certification scheme.
8. **Certification Scheme:** shall mean the processes, paperwork, tools, and documentation that define how a product or manufacturer is certified
9. **Chief Information Security Officer:** shall means the designated employee of Senior management level directly reporting to Managing Director/Chief Executive Officer/Secretary of the Responsible Entity, having knowledge of Information Security and related issues, responsible for cyber security efforts and initiatives including planning, developing, maintaining, reviewing and implementation of Information Security Policies
10. **Critical Assets:** shall mean the facilities, systems and equipment which, if destroyed, degraded or otherwise declared unavailable, would affect the reliability or operability of the Power Supply System.
11. **Critical System:** shall mean cyber assets essential to the reliable operation of critical asset. Critical System consists of those cyber assets that have at least one of the following characteristics:
    a) The cyber asset uses a routable protocol to communicate outside the electronic security perimeter.
    b) The cyber asset uses a routable protocol within a control centre.
    c) The cyber asset is dial-up accessible.
12. **Critical Information Infrastructure*:*** shall mean Critical Information Infrastructure as defined in explanation of sub-section (1) of Section 70 of the Act.
13. **Cyber Assets**: shall mean the programmable electronic devices, including the hardware, software and data in those devices that are connected over a network, such as LAN, WAN and HAN.
14. **Cyber Crisis Management Plan:** shall mean a framework for dealing with cyber related incidents for a coordinated, multi-disciplinary and broad-based approach for rapid identification, information exchange, swift response and remedial actions to mitigate and recover from malicious cyber related incidents impacting critical processes.
15. **Cyber Security Breach**: shall mean any cyber incident or cyber security violation that results in unauthorized or illegitimate access or use by a person as well as an entity, of data, applications, services, networks and/or devices through bypass of the underlying cyber security protocols, policies and mechanisms resulting in the compromise of the confidentiality, integrity or availability of data/information maintained in a computer resource or cyber asset.
16. **Cyber Security Incident:** shall mean any real or suspected adverse cyber security event that violates, explicitly or implicitly, cyber security policy of Responsible Entity resulting in unauthorized access, denial of service or disruption, unauthorized use of computer resource for processing or storage of information or changes to data or information

without authorization, leading to harm to the power grid or its critical sub-sectoral elements Generation, Transmission and Distribution.

17. **Cyber Security Policy:** shall mean documented set of business rules and processes for protecting information, computer resources, networks, devices, Industrial Control Systems and other OT resources.
18. **Electronic Security Perimeter:** shall mean the logical border surrounding a network to which the Cyber Systems of Power Supply System are connected using a routable protocol.
19. **Information Security Division:** shall mean a division accountable for cyber security and protection of the Critical System of the Responsible Entity.
20. **Protected System:** shall mean any computer, computer system or computer network of the Responsible Entity notified under section 70 of the Act, in the official gazette by appropriate Government.
21. **Security Architecture:** shall mean a framework and guidance to implement and operate a system using the appropriate security controls with the goal to maintain the system's quality attributes like confidentiality, integrity, availability, accountability and assurance.
22. **Vulnerability:** shall mean intrinsic properties of something resulting in susceptibility to a risk source that can lead to an event with a consequence
23. **Vulnerability Assessment:** shall mean a process of identifying and quantifying vulnerabilities

4.0 Standards

Reference	Description
ISO/IEC 15408	Common Criteria Certification Standard
ISO/IEC 17011	General requirements for accreditation bodies accrediting conformity assessment bodies
ISO/IEC 17025	General requirements for the competence of testing and calibration laboratories
ISO/IEC 21827	Systems Security Engineering - Capability Maturity Model (SSE-CMM)
ISO/IEC 24748-1	Systems and software engineering — Life cycle management — Part 1: Guidelines for life cycle management.
ISO 27001/2	Information Security Management
ISO/ IEC 27019	Information technology — Security techniques — Information Security controls for the energy utility industry
ISO/IEC 61508	Functional Safety of Electrical / Electronic / Programmable Electronic Safety-related Systems
IEC 61850	Communication networks and systems for power utility automation
IEC 62351	Standards for Securing Power System Communications
IEC 62443	Cyber Security for Industrial Control Systems
IS 16335	Power Control Systems – Security Requirements.

CEA (Cyber Security in Power Sector) Guidelines, 2021

Article 1. Cyber Security Policy.

a. Cardinal Principles: The Responsible entity will strictly adhere to following cardinal principles while framing cyber security policy:

i. There is hard isolation of their OT Systems from any internet facing IT system.
ii. May keep only one of their IT systems with internet facing at any of their site/location if required which is isolated from all OT zones and kept in a separate room under the security and control of CISO.
iii. Downloading/Uploading of any data/information from their internet facing IT system is done only through an identifiable whitelisted device followed by scanning of both for any vulnerability/malware as per the SOP laid down and for all such activities digital logs are maintained and retained under the custody of CISO for at least 6 months. The log shall be readily to carry out the forensic analysis if asked by investigation agency.
iv. List of whitelisted IP addresses for each firewall is maintained by CISO and each firewall is configured for allowing communication with the whitelisted IP addresses only.
v. Communication between OT equipment/systems is done through the secure channel preferably of POWERTEL through the fibre optic cable. Security configuration of the communication channel is also to be ensured.
vi. All ICT based equipment/system deployed in infrastructure/system mandatorily CII are sourced from the list of the "Trusted Sources" as and when drawn by MoP/CEA.

b. The Responsible Entity shall be ISO/IEC 27001 certified (including sector specific controls as per ISO/IEC 27019).
c. The Responsible Entity shall have a Cyber Security Policy drawn upon the guidelines issued by NCIIPC.
d. The Responsible Entity shall ensure annual review of their Cyber Security Policy by subject matter expert and changes shall be made therein only after obtaining the due approval from Board of Directors.
e. The process of Access Management for all Cyber Assets owned or under control of the Responsible Entity shall be detailed in the Cyber Security Policy.
f. The Cyber Security Policy shall leverage state-of-art cyber security technologies and relevant processes at multiple layers to mitigate the cyber security risks.
g. The Responsible Entity shall be solely responsible to get Cyber Security Policy implemented through its Information Security Division (ISD).
h. The CISO shall record the reason(s) for exemption required, if any, in case, unable to comply with any of the provision(s) of the Cyber Security Policy. Any exception shall be allowed only after an approval of provisions of compensatory control(s) to mitigate residual cyber security risks.

i. The CISO shall record the exemptions sought in statement of applicability controls, while getting the ISO 27001 certified. All exemptions and its justification need to be in conformance with Cyber Security Policy of the Responsible Entity.
j. The Responsible Entity shall allocate sufficient Annual budget for enhancing cyber security posture, enhanced year over year.
k. The Responsible Entity shall work in collaboration with other Industry Stakeholders as well as Academia to promote R&D activity in the domain of cyber security.
l. The Responsible Entity shall ensure that cyber security issues are taken up as agenda items in their Board meetings once in every three months.

Article 2 Appointment of CISO.

a) The Responsible Entity shall mandatorily appoint a CISO and shall confirm to qualification, if any, **laid** by Quality Council of India (QCI). In absence, the work of CISO shall be looked upon by Alternate CISO. In case qualification for appointment of Alternate CISO has been relaxed for reasons recorded thereof, Alternate CISO has to mandatorily acquire the minimum required cyber security skill sets within six months from the date of his appointment.
b) The Responsible Entity shall regularly update details of CISO and Alternate CISO, with the Sectoral CERT, as well as on ISAC-Power Portal.
c) Roles and Responsibility of CISOs shall be as laid by CERT-In and ring-fenced to ensure cyber security of the Cyber Assets of the Responsible Entity.

Article 3: Identification of Critical Information Infrastructure (CII).

a) The Responsible Entity shall submit to NCIIPC through Sectoral CERT, details of Cyber Assets which uses a routable protocol to communicate outside the Electronic Security Perimeter drawn by the Responsible Entity or a routable protocol within a control centre and dial-up accessible Cyber Assets, within 30 days from the date of their commissioning in the System.
b) The Responsible Entity shall submit details of Critical Business Processes and underlying information infrastructure along with mapped impact and Risk Profile to NCIIPC and shall get their CIIs identified in consultation with NCIIPC. The process of the notification/declaration by Appropriate Government shall follow thereafter.
c) The Responsible Entity shall review their declared/notified CIIs at least once a year to examine changes if any in the functional dependencies, protocols and technologies or upon any change in security architecture. The Responsible Entity shall review their declared/notified CIIs once in every 6 months, in case if NCIIPC has directed them to constitute an Information Security Steering Committee.
d) The Responsible Entity shall ensure that all cyber assets of their identified/notified CIIs are recorded in the asset register and considered for risk assessment as well as for finalization of controls in statement of applicability.

Article 4. Electronic Security Perimeter

a) The Responsible Entity shall identify and document the Electronic Security Perimeter(s) and all Access Points to the perimeter(s).

b) The Responsible Entity shall follow procedure of identifying "Electronic Security Perimeter" in case of distributed and/or hybrid information infrastructure, as per IEC 62443 / IS16335 (as amended from time to time).
c) The Responsible Entity shall ensure that every Critical System resides within an Electronic Security Perimeter.
d) The Responsible Entity shall perform a cyber-Vulnerability Assessment of each electronic Access Points to the Electronic Security Perimeter(s) at least once in every 6 (six) months and/or after any change in Security Architecture.
e) The Responsible Entity shall ensure that all critical, high and medium vulnerabilities identified as a result of cyber Vulnerability Assessment shall be closed and verified for the effective closure.

Article 5. Cyber Security Requirements

a) The Responsible Entity shall have an Information Security Division (ISD), headed by CISO.
b) The Responsible Entity shall ensure that the ISD must be functional on 24x7x365 basis and is manned by sufficient numbers of Engineers having valid certificate of successful completion of course on cyber security of Power Sector from the Training Institutes designated by CEA.
c) The Responsible Entity shall ensure that ISD
   1) has on-boarded Cyber Swachhta Kendra(CSK) of CERT-In, if they have public IPs.
   2) has timely acted upon the advisories, guidelines and directive of NCIIPC, CSK, CERT-In and Sectoral CERTs,
   3) has deployed an Intrusion Detection System and Intrusion Prevention System capable of identifying behavioural anomaly in both IT as well as OT Systems.
   4) shares reports on incident response and targeted malware samples with CERT-In,
   5) updates the firmware/software with the digitally signed OEM validated patches only.
   6) enables only those ports and services that are required for normal operations. In case of any emergency the procedure as laid in Access management be followed.
   7) maintains firewall logs for the last 6 months duration. Firewall logs shall be analysed and all critical and high severity comments shall be addressed for effective closure.
   8) retains document of FAT, SAT test results and report/ certificate of cyber tests carried out for compliance of Government Orders and Cyber Security Audit.*
   9) maintains all cyber logs and cyber forensic records of any incident for at least** 90 days.

      * FAT, SAT must include comprehensive cyber security tests of the component/equipment/system to be delivered/delivered at site.
      ** 90 days from date of the commissioning of the system/recovery from any incident, whichever is later.

d) The Responsible Entity shall routinely audit and test security properties of the Critical System and must act upon, in case if any new vulnerabilities is identified through testing or by the equipment manufacturer.

e) The Responsible Entity shall design a secure architecture for control system appropriate for their process control environment*.
f) All State Load Dispatch Centres(SLDCs) shall comply with the directions issued by the National Load Dispatch Centre(NLDC) as well as Regional Load Dispatch Centres(RLDCs) U/s 29 (1) of the Electricity Act, 2003 to ensure stability and cyber security of grid operation and achieve efficiency in the grid operation. In case of any non-compliance, the Head of SLDC shall be responsible and shall be liable for Penalty as per the provision of CERC/SERC.

*There are so many different types of systems in existence and so many possible solutions, it is important that the selection process ensures that the level of protection is commensurate with the business risk and the Responsible Entity shall not rely on one single security measure for its defence. *(Reference IEC/TR62351-10* Edition1.0 2012-10 *Power systems management and associated information exchange –Data and communications security – Part 10: Security architecture guidelines).*

Article 6 Cyber Risk Assessment and Mitigation Plan

a) The Responsible Entity shall document in their Cyber Security Policy a Cyber Risk Assessment and Mitigation Plans drawn upon the best practises being followed in the Power Sector, and the same shall be approved by Board of Directors.
b) The Cyber Risk Assessment and Mitigation Plans shall clearly define the matrix for assessing the cyber risk of both IT and OT environment and risk acceptance criteria.
c) The Cyber Risk Assessment Plan shall be capable to demonstrate that repeated cyber security risk assessment delivers consistent, valid and comparable results.
d) The review of cyber risk assessment shall be carried out at least once in a Quarter. The actionable of risk treatment and mitigation shall be tracked in this review for their effectiveness.
e) The CISO shall be responsible for implementation and regular review, on the basis of internal and external feedbacks, of the Cyber Risk Assessment and Mitigation Plans.

Article 7 Phasing out of Legacy System

a) As the life cycle of the Power System Equipment/System is longer than that of IT Systems deployed therein, the Responsible Entity shall ensure that all IT technologies in the Power System Equipment/System should have the ability to be upgraded.
b) The Responsible Entity shall ensure that the Information Security Division shall draw the list of all communicable equipments/systems nearing end life or are left without support from OEM. Thereafter CISO shall identify equipment/systems to be phased out from the list drawn, firm up their replacement plan and put up the replacement plan for approval before the Board of Directors.
c) The CISO shall ensure that till equipments/systems nearing end life or left without support from OEM are not replaced, their cyber security is hardened and ensured through additional controls provisioned in consultation with the OEM or alternate Supplier(s)*.
*e.g. Use of CDAC developed AppSamvid and whitelisting of applications installed may be explored across all legacy systems.
d) The Responsible Entity shall document in their Cyber Security Policy a Standard Operating Procedure for safe and secure disposal of outlived or legacy devices.

Article 8. Cyber Security Training.

a) The Responsible Entity shall establish, document, implement, and maintain an annual cyber security training program for personnel having authorized cyber or authorized physical access (unescorted or escorted) to their Critical Systems.
b) The Responsible Entity shall review annually their cyber security training program and shall update it whenever necessary. Annual Review shall record evaluation of the effectiveness of the trainings held.
c) The Responsible Entity shall ensure that Cyber Security training program designed for their IT as well as OT O&M Personnel must include following topics and as per their functional requirements and security concerns additional topics shall be added:
   1) User authentication and authorization.
   2) Cyber Security and Protection mechanisms of IT/OT/ICS Systems.
   3) Introduction to various standards i.e. ISO/IEC:15408, ISO/IEC:24748-1, ISO: 27001, ISO: 27002, ISO 27019, IS 16335, IEC/ISO:62443.
   4) Training on implementation of ISO/IEC 27001 and awareness on IEC 62443.
   5) Vulnerability Assessment in the Critical System.
   6) Monitoring and preserving of electronic logs of access of Critical Assets.
   7) Detecting cyber-attacks on SCADA and ICS systems
   8) The handling of Critical System during cyber crisis.
   9) Action plans and procedures to recover or re-establish normal functioning of Critical Assets and access thereto following a Cyber Security Incident.
   10) Hands on SCADA operation at any of the Regional Load Dispatch Centre.
   11) Handling of risks involved in the procurement of COTS Products.

d) All Personnel engaged in O&M of IT & OT Systems shall mandatorily undergo courses on cyber security of Power Sector from any of the training institute designated by CEA, immediately within 90 days from the notification of CEA Guidelines on Cyber Security in Power Sector.
e) The Responsible Entity shall ensure that none of their newly hired or the current Personnel have access to the Critical System, prior to the satisfactory completion of cyber security training programme from the Training Institutes designated in India, except in specified circumstances such as cyber crisis or an emergency.
f) NPTI in consultation with CEA shall identify and design domain specific courses on Cyber Security for different target groups. The "Governing Board for PSO Training and Certification" shall approve the content, duration etc of these courses and shall review it Annually. NPTI shall conduct these courses at all of their branches on regular basis and shall maintain the list of the Participants successfully completing the course.

Article 9 Cyber Supply Chain Risk Management

a) The Responsible Entity shall ensure that, as and when Ministry of Power, Government of India notifies the Model Contractual Clauses on cyber security, these clauses are included in their every Bid invited for procurement of any ICT based components/equipments/System to be used for Power System.
b) The Responsible Entity shall ensure that all the Communicable Intelligent Equipments and the Service Level Agreements (SLAs) for their Critical Systems shall be sourced from the list of the "Trusted Sources" as and when drawn by MoP/CEA.

c) The Responsible Entity shall ensure that, in case, for the any Communicable Intelligent Devices, if no Trusted Source has been identified, then the successful bidder in compliance with the provisions made in MoP order dated 2.7.2020 and any other relevant MoP order has got the product cyber tested for any kind of embedded malware/Trojan/cyber threat and for adherence to Indian Standards at the designated lab.

d) The Responsible Entity shall ensure that the essential cyber security tests are carried out successfully during FAT, SAT as detailed in **Annexure A.** The equipment/System besides for functionality shall also be tested in the factory for vulnerabilities, design flaws, parts being counterfeit or tainted, so as to minimize problems during on-site-testing and installation. Cyber Security Conformance Testing are to be carried out in the designated Lab as listed in **Annexure-I of MoP Order No. 12/13/2020-T&R dt. 8th June, 2021(Order at Annexure-B).**

e) The Responsible Entity shall ensure that the Equipment/System supplied by the successful bidder shall accompany with a certificate[$, #] obtained by OEM from a certification body accredited to assess devices and process for conformances to IEC 62443-4 standards during design and manufacture. The Responsible Entity shall accept the certificate submitted along with the supplied Equipment/System only if it's in line with the Testing Protocol as notified by Ministry of Power, Government of India, from time to time.

f) The Responsible Entity in compliance to the requirement of Article 9(e) shall also accept, till the setting up of an adequate certification facility in the India, a digitally signed self-declaration of conformance to the IEC 62443-4 standards during design and manufacture of the equipment/system, if submitted by the OEM.

g) The Responsible Entity shall dispose all unserviceable or obsolete Communicable Intelligent Devices as per the procedure laid in their Cyber Risk Assessment and Mitigation Plans which shall be in line with the prevailing best practices.

$ The National & International certification may be specified in the tender for critical systems/sub-systems being procured by the Responsible Entity.

Certification Schemes:
Embedded Device Security Assurance Certification is for an individual product,
System Security Assurance Certification is for a set of products in a system (possibly from different vendors)
Security Development Lifecycle Assurance Certification is for the development processes that a manufacturer uses for developing products.

Article 10 Cyber Security Incident Report and Response Plan

a) The CISO of the Responsible Entity shall report in the formats prescribed by CERT-In, all Cyber Security Incidents, classified as reportable events.

b) Root cause analysis for all reportable events shall be carried out and corrective action taken, so as to ensure that any re-occurrence of such event can be managed with ease.

c) The Responsible Entity shall mandatorily define in their Cyber Security Policy, criteria(s) identified on the basis of impact analysis, for declaring the occurrence of

Cyber Security Incident(s) as a Cyber Crisis in the System owned or controlled by them.

d) The Responsible Entity shall mandatorily designate an Officer along with his/her standby by name and designation and empower them to declare an occurrence of the incident(s) as "Cyber Crisis". The contact details of these Officers shall be updated in the C-CMP within 15 days of changes if any due to transfer or superannuation etc.
e) The CISO shall ensure that during any Cyber Security Incident, ISD monitors and minutely records every details of cyber security events and incidents in both IT as well as the OT System owned or controlled by the Responsible Entity.
f) The CISO shall ensure that each cyber incident is handled strictly as per Cyber Security Incident Response Plan detailed in the latest C-CMP approved by the Board of Directors.
g) The Responsible Entity shall ensure that the efficacy of the Cyber Security Incident Response Plan is tested annually through mock drill(s) carried out, if feasible, as simulation exercise(s) or as table top exercise(s) with wider participation of their employees, in consultation with CERT-In and sectoral CERT. In case if any shortcoming is observed in the Cyber Security Incident Response Plan suitable changes shall be made in it.
h) The Responsible Entity shall ensure that the CISO compiles details of incident detection, incident handling, learnings from each incident and damage claims made if any and shall report to CERT-In as well as upload information on ISAC-Power Portal.

Article 11 Cyber Crisis Management Plan(C-CMP)

a) The Responsible Entity shall prepare a Cyber Crisis Management Plan and submit to their sectoral-CERT for review with intimation to Ministry of Power/CISO-MoP. Responsible Entity shall update their C-CMP on the basis of comments made by sectoral-CERT and then submit for vetting to CERT-In. The C-CMP shall be updated once again to include the observations made by CERT-In before seeking approval of Board of Directors for implementation of C-CMP.
b) The Responsible Entity shall ensure that the C-CMP is reviewed at least annually. The CISO shall ensure that all changes are made in C-CMP only with the due approval of Board of Directors and the changes made in C-CMP have been communicated through a verifiable means to all the concerned Personnel of the Responsible Entity.
c) The CISOs shall be the custodian of all the cyber security related documents including Cyber Crisis Management Plan, Risk Treatment Plan, Statement of Applicability of controls, and compliance to regulator's requirement.
d) The CISO shall be accountable for ensuring enforcement of C-CMP by Information Security Division of the Responsible Entity, during a cyber-crisis, as and when declared by the designated Officer. (refer Article 10(d))

Article 12: Sabotage Reporting%

a) The Responsible Entity shall incorporate procedure for identifying and reporting of sabotage in their Cyber Security Policy within 30 days from issue of the Guidelines, or grant of licence under the appropriate legal provisions to the Responsible Entity.
b) The CISO shall be held liable for non-reporting of identified sabotage(s) as per procedure laid for identifying and reporting of sabotage in the Cyber Security Policy of the Responsible Entity.

c) The CISO shall prepare a detailed report on disturbances or unusual occurrences, identified, suspected or determined to be caused by sabotage in the Critical System of the Responsible Entity, and shall submit the report to the Sectoral CERT as well as to CERT-In within 24 hours of its occurrence.
d) The CISO shall submit to NCIIPC within 24 hours of occurrence the report on every sabotage classified as cyber incidents(s) on "Protected System".
e) The CISO upon occurrence on every sabotage shall take custody of all log records as well as digital forensic records of affected Cyber Assets, Intrusion Detection System, Intrusion Protection System, SIEM and shall preserve them for at least 90 days and shall make them available as and when called upon for investigation by the concerned Agencies.

%Disturbances or unusual occurrences, suspected or determined to be caused by sabotage.
Sabotage e.g. can be a forced intrusion in un-manned/manned facility and taking control of operation of Critical System through a communicating device.

Article 13 Security and Testing of Cyber Assets

a) The Responsible Entity shall ensure security of all in-service phase as well as standby Cyber Assets through regular firmware/Software updates and patching, Vulnerability management, Penetration testing (of combined installations), securing configuration, supplementing security controls. CISO shall maintain details of update version of each firmware and software and their certification if received from OEMs.
b) The Responsible Entity shall carry out regularly Vulnerability Assessment of all Cyber Assets owned or under their control. If a Cyber Asset is found vulnerable to any exploits or upon any patch updates or major configuration changes, then further Penetration Testing may be carried out offline or in a suitably configured laboratory test-bed to determine other vulnerabilities that may have not been identified so far.
c) The Responsible Entity shall specify security requirement and evaluation criteria during each phase of their procurement Process.
d) The Responsible Entity shall ensure that all Cyber Assets being procured shall conform to the type tests as mentioned in the specification for type testing listed in the bid document. Type test reports of tests conducted in NABL accredited Labs or internationally accredited labs (with in last 5 years from the date of bid opening) shall be mandated to be submitted along with bid. In case, the submitted Type Test reports are not as per specification, the re-tests shall be conducted without any cost implication to the Responsible Entity.
e) The Responsible Entity shall ensure that all Communicable devices are tested for communication protocol as per the ISO/IEC/IS standards listed in **MoP Order No. 12/13/2020-T&R dated 8th June, 2021(Annexure-B).**
f) The Responsible Entity shall ensure that all Critical Systems designed with Open Source Software are adequately cyber secured.
g) The Responsible Entity as a best practise upon any incidence of Cyber Security Breach shall carry out cyber security tests at any lab designated for cyber testing by Ministry of Power. These tests shall be similar to Pre Commissioning Security Test and those essential for carrying out Post Incident Forensics Analysis.

Article 14 Cyber Security Audit

a) The Responsible Entity shall implement Information Security Management System (ISMS) covering all its Critical Systems.
b) The Responsible Entity shall through a CERT-In Empanelled Cyber Security OT Auditor shall get their IT as well as OT System audited at least once in every 6 (six) months and shall close all critical and high vulnerabilities within a period of one month and medium as well as low non-conformity before the next audit. Effective closure of all non-conformities shall be verified during the next audit.
c) The Cyber Security Audit shall be as per ISO/IEC 27001 along with sector specific standard ISO/IEC 27019, IS 16335 and other guidelines issued by appropriate Authority if any. These mentioned standards shall be current with all amendments if any and in case if any standard is superseded, the new standard shall be applicable. CISO shall ensure immediate closure of non-conformance, based on the criticality and by means all non-conformances are to be closed before the next audit.
d) The Responsible Entity shall ensure that CISO has all the required systems and documents in place, as mandated by NSCS for base line cyber security audit.

Annexure – A

FAT & SAT

1. During FAT stage, the customer has to verify all types test reports / certificates including Communication protocol and security conformance tests of the devices offered for FAT.
2. FAT of SCADA involves testing as a whole system in the integrated scale down set up. For SCADA, Indian standard IS 15953: 2011 "SCADA System for Power System Applications" provides definition and guidelines for the specification, performance analysis and application of SCADA systems for use in electrical utilities (for transmission & Distribution) including guidance on Tests and inspections.
3. The SAT will be done at customer site as per the SAT document mutually agreed by buyer and supplier. For SAT also, guidance from IS 15953: 2011need to be applied.
4. IEC 61850-10-3 Communication Networks and Systems For Power Utility Automation-Functional testing of IEC 61850 systems (in draft stage - CDTR) covers testing of applications within substations covering

    a. A methodical approach to the verification and validation of a substation solution
    b. The use of IEC 61850 resources for testing in Edition 2.1
    c. Recommended testing practices for different use cases
    d. Definition of the process for testing of IEC 61850 based devices and systems using communications instead of hard wired system interfaces (ex. GOOSE and SV instead of hardwired interfaces)
    e. Use cases related to protection and control functions verification and testing.

    This standard may be used as a guidelines for FAT & SAT for Substation Automation System (SAS) based on IEC 61850.

Annexure - B

Annexure – 1

List of designated laboratories for cyber security conformance testing

Table -A. Field Equipment /Operational Technology (OT)

Sl. No.	Equipment	Communication Protocol Conformance Standards	Protocol Security Conformance Standards	Designated Laboratories
1	Remote Terminal Units (RTUs) & PLCs with IEC communications protocols	IEC 60870-5 -101 / IEC 60870-5 -104 (Test Details Annexure 2)	IEC 60870-5- 7 Security extension & IEC 62351 series (specifically IEC 62351-100 parts 1 & 3) (Test Details Annexure-2	Central Power Research Institute (CPRI), Prof Sir C V Raman Road, Sadashivanagar P O, Bengaluru – 560080, Karnataka
2	Intelligent Electronic Equipment / Numerical Protection Relays / Bay Control Units / Bay Protection Units, Gateways, Transformer Tap controller/ changer, etc. with IEC 61850 communication protocol	IEC 61850 – 5 to IEC 61850 – 10 (Test Details Annexure 2)		CPRI
3	Smart meters with IEC 62056 communication protocols	IEC 62056 series / DLMS & IS 15959 series and IS 16444 series (Test details Annexure 2)	IEC 62056 series / DLMS & IS 15959 series and IS 16444 series (Test Details Annexure 2)	1. CPRI 2. Electrical Research and Development Association (ERDA), ERDA Road, GIDC, Makarpura, Vadodara - 390 010 Gujarat 3. Yadav Measurements Pvt. Ltd. (YMPL) 373-375, RIICO Bhamashah Industrial Area Kaladwas 313003 Udaipur – Rajasthan

Information Technology (IT) Equipment (Main / Backup / Disaster recovery (DR) Control Centre / Substation control centre IT equipment)

All IT products procured /supplied shall have a valid Certificate of Common Criteria as per ISO/IEC 15408 issued by signatories of the Common Criteria Recognition Agreement (CCRA) (www.commoncriteriaportal.org).

Import/procurement/supplied from vendors sourcing from prior reference countries, the Certificate for Common Criteria shall be from Government Laboratories in India according to the IC3S scheme operated by Ministry of Electronics and Information Technology, which is a signatory to CCRA.

https://www.commoncriteria-india.gov.in/

Annexure - 2

Details of tests for various identified products

Remote Terminal Units (RTUs) (Sl. No. 1 of Table – A of Annexure – 1)

Test protocol:

Utilities / manufacturers will submit the sample along with all the required technical documentation for taking up testing to the designated laboratory.

Reference standards

1) IEC 60870-5-101 & IEC 60870-5-104 as applicable

2) IEC 60870-5-7 Telecontrol equipment and systems - Part 5-7: Transmission protocols - Security extensions to IEC 60870-5-101 and IEC 60870-5-104 protocols (applying IEC 62351)

3) IEC 62351-100-1 & IEC 62351-100-3 and other cross referenced standards.

Test cases

Extract from standard (IEC 62351-100-1)

The conformance test cases are divided into four clauses:

- Clause 5: Verification of configuration parameters. This clause contains the configuration parameters affecting the message contents and/or the protocol behaviour.
- Clause 6: Verification of communication. The goal of this clause is to verify that Device Under Test (DUT) is able to implement the security extension messages as described in IEC TS 60870-5-7.
- Clause 7: Verification of procedures. The goal of this clause is to verify that DUT is able to execute the security extension procedures as described in IEC TS 62351-5.
- Clause 8: Test result chart. This clause contains the results of the test cases listed in Clauses 6 and 7 for each supported value of the configuration parameters listed in Clause 5.

The test cases are organized in tables. They are numbered; their numbering syntax is: Subclause number (where the Table is located) + test case number.

In the column 'reference' each test case has a direct reference to IEC TS 62351-5 or IEC TS 60870-5-7 where the clause under test is defined.

Test cases are mandatory depending on the description in the column 'Required'. The following situations are possible:

M= Mandatory test case. The test is referencing a clause that is mandatory in IEC TS 62351-5 or IEC TS 60870-5-7.

Protocol Information Conformance Statement (PICS) x, x = Mandatory test case if the functionality is enabled in the PICS (by marking the applicable check box), with a reference to the section number of the PICS (x.x).

Conformance testing of security extension procedures

The security extension procedures can be summarized as follows:

- User management
- Update key maintenance
- Session key maintenance
- Challenge/Reply authentication
- Aggressive Mode authentication

Extract from standard (IEC 62351-100-3)

IEC 62351-3 defines the requirements related to the authentication/encryption protocol, procedures and methods to be implemented at TCP/IP (transport) level.

The conformance test cases are divided into three clauses:

≠ Clause 5: Verification of configuration parameters. This clause contains the parameters specified by the standards referencing IEC 62351-3 (see IEC 62351-3:2014/AMD1:2018, Clause 7) and affecting the protocol behaviour.

≠ Clause 6: Verification of IEC 62351-3 requirements. The goal of this clause is to verify that DUT is conformant to the requirements of the IEC 62351-3.

≠ Clause 7: Test result chart. This clause contains the results of the test cases listed in Clause 6 for each supported value of the configuration parameters listed in Clause 5.

The test cases are organized in tables. They are numbered, their numbering syntax is: Subclause number (where the table is located) + test case number.

In the column ‘Reference’ each test case has a direct reference to IEC 62351-3 where the clause under test is defined. PICS or Protocol Implementation eXtra Information for Testing (PIXIT) could be found in the “Reference” column for some test cases whenever the execution of the test case shall take into account specific parameter values declared in the PICS or PIXIT of the DUT.

Test cases are mandatory depending on the description in the column ‘Required’. The following situations are possible:

M = Mandatory test case. The test is referencing to a clause that is mandatory in IEC 62351-3.

PICS

or

PIXIT = Mandatory test case if the functionality is enabled in the PICS or PIXIT by marking the applicable check box or declaring the applicable value.

Intelligent Electronic Devices (IEDs) (Sl. No. 2 of Table – A of Annexure – 1)

Utilities / manufacturers will submit the sample along with all the required technical documentation for taking up testing to the designated laboratory.

Reference standards

IEC 61850 series

Specifically IEC 61850-5, IEC 61850-6, IEC 61850-7, IEC 61850-8, IEC 61850-9 and IEC 61850-10

Test cases

Communication protocol conformance as per IEC 61850 -10. This part of standard defines methods and abstract test cases for conformance testing of client, server and sampled values devices used in power utility automation systems, the methods and abstract test cases for conformance testing of engineering tools used in power utility automation systems, and the metrics to be measured within devices according to the requirements defined in IEC 61850-5. Further this part of standard specifies standard techniques for testing of conformance of client, server and sampled value devices and engineering tools, as well as specific measurement techniques to be applied when declaring performance parameters. The use of these techniques will enhance the ability of the system integrator to integrate IEDs easily, operate IEDs correctly, and support the applications as intended.

Smart Meters (Sl. No. 3 of Table – A of Annexure – 1)

Utilities / manufacturers will submit the sample along with all the required technical documentation for taking up testing to the designated laboratory.

IEC 62056 series of standards (Electricity metering data exchange – The DLMS/COSEM suite) specifies details of communication protocol requirements, conformance testing and security requirements. The Part 5-3 (DLMS/COSEM application layer) specifies the DLMS/COSEM application layer in terms of structure, services and protocols for DLMS/COSEM clients and servers, and defines rules to specify the DLMS/COSEM communication profiles. It defines services for establishing and releasing application associations, and data communication services for accessing the methods and attributes of COSEM interface objects, defined in IEC 62056-6-2 using either logical name (LN) or short name (SN) referencing.

Clause 5 and sub clauses specifies security requirements. It cover security concepts, Identification and authentication, Cryptographic algorithms, Cryptographic keys – overview, Key used with symmetric key algorithms, Keys used with public key algorithms and Applying cryptographic protection.

Note: All above referred standards shall be latest with amendments if any at the time of submission of sample(s) for testing.

Annexure – 3

Testing Criteria

1) Supply from Trusted Sources

The sample size shall be as specified by CEA as per the approved criteria for Trusted Vendors

2) Supply from other than trusted vendors

The sample size shall be shall be 5% of the supply lot / ordered quantity (minimum one). The manufacturer shall submit request to the Nodal agency along with vendor's / manufacturer's certifications for supply chain management system practices and secure product development process implementations based on any one or more of standards ISO / IEC 27036, ISO / IEC 20243, IEC 62443 for verification.

After scrutiny of vendor's / manufacturer's certifications the supplier / utilities shall be asked to submit product to the designated laboratory for communication and cyber security conformance testing.

The supply lot shall stand rejected on failure to comply with the test requirements.

3) Supply from prior reference countries

The utility shall obtain prior permission from the Government of India for importing the product / system from prior reference countries.

The sample size shall be shall be 10 % of the supply lot / ordered quantity (minimum one). The manufacturer shall submit request to the Nodal agency along with vendor's / manufacturer's certifications for supply chain management system practices and secure product development process implementations based on any one or more of standards ISO / IEC 27036, ISO / IEC 20243, IEC 62443 for verification.

After scrutiny of vendor's / manufacturer's certifications the supplier / utilities shall be asked to submit product to the designated Government / Government controlled Autonomous laboratory for type tests (Annexure – 4) and communication & cyber security conformance testing.

The supply lot shall stand rejected on failure to comply with the test requirements.

Annexure – 4

Type Tests

Products imported from prior reference countries shall also undergo type testing as per following standards in addition to communication protocol and security conformance testing at the designated Government / Government controlled Autonomous laboratory:

Type test standards for RTUs

1. IEC 60870-1-2:1989 Telecontrol equipment and systems. Part 1: General considerations. Section Two: Guide for specifications.
2. IEC 60870-2-1:1995 Telecontrol equipment and systems - Part 2: Operating conditions - Section 1: Power supply and electromagnetic compatibility.
3. EC 60870-2-2:1996 Telecontrol equipment and systems - Part 2: Operating conditions -Section 2: Environmental conditions (climatic, mechanical and other non-electrical influences).
4. IEC 60870-3:1989 Telecontrol equipment and systems. Part 3: Interfaces (electrical characteristics)

Type test standard for IEDs / Numerical Protection Relays / Bay controls units

1. IEC 61850-3: 2013, Ed. 2 Communication networks and systems for power utility automation – Part 3: General requirements.

Type test standards for Smart meters

1. IS 16444: 2015 AC static direct connected watthour smart meter class 1 and 2 – Specification.
2. IS 16444 Part 2: 2017 AC static transformer operated watthour and var - Hour smart meters, class 0.2 S, 0.5 S and 1.0 S: Part 2 specification transformer operated smart meters.

Note:

1. All above referred standards shall be latest with amendments if any at the time of submission of sample(s) for testing.
2. Type tests generally covers functionality, environmental, mechanical, EMI/ EMC and electrical safety related tests.

Kind attn : **Mr. Prince Kumar Singh- Group Head-C&I Maintenance**
Subject : **Discontinuance notice for Genius Bus Controller and Path forward**

Thank you for the continued patronage over so many years. We understand that your esteemed organization has been using Emerson's (Formerly GE IP) automation technologies and solutions for various critical processes/applications.

GENIUS was the first intelligent, rugged, distributed I/O system for PLC systems. It was introduced in 1985 and was the first with extensive diagnostics and easy setup over a proprietary network. It quickly gained global acceptance in applications such as Oil & Gas, Metal, Power, Mining, Water, etc. Over the years we evolved our I/O offering bringing forward many of the GENIUS capabilities and marrying it with the latest technology and providing advanced functionality in more cost-efficient form factors. Controlling the I/O, the GENIUS Bus Controllers became the standard. Due to technological advances and obsolescence of various components, we declared Genius Bus Controller product family as mature on 1st January 2014. Genius Bus Controller parts are not available for sale anymore as this product has been moved to discontinued stage on 1st October 2017.

Our goal in evolving our technology is protect your investment – whether it is existing wiring, your application logic, etc. Emerson's Intelligent Platforms provides excellent upgrade path for your application to modern technology. We can convert your control, GENIUS LAN, and Genius I/O to multicore high-performance platform with an open protocol **Profinet** over high speed ethernet communication. All local and remote genius LAN can be migrated to open protocol Profinet. We can convert applications ranging from the simple to the highly complex. Minimum downtime, minimum effort, minimum cost – we provide the easiest upgrade path available!
Key Benefits of Migration to **Profinet**:

1. Proven, tested control with advanced security built-in
2. Open standard I/O connectivity with PROFINET over high-speed Ethernet
3. High performance and flexible high availability
4. Programming and data connections are easily transferred into new system
5. Advanced functionality through use of Proficy Machine Edition programming and configuration tools
6. System can be updated in just a few hours and in steps, minimizing downtime
7. High availability systems often can change over without stopping

We strongly recommend you upgrade Genius LAN to open protocol **Profinet** over high speed ethernet communication.

Kind attn : **Mr. Prince Kumar Singh- Group Head-C&I Maintenance**
Subject : **Discontinuance notice for Genius Bus Controller and Path forward**

Thank you for the continued patronage over so many years. We understand that your esteemed organization has been using Emerson's (Formerly GE IP) automation technologies and solutions for various critical processes/applications.

GENIUS was the first intelligent, rugged, distributed I/O system for PLC systems. It was introduced in 1985 and was the first with extensive diagnostics and easy setup over a proprietary network. It quickly gained global acceptance in applications such as Oil & Gas, Metal, Power, Mining, Water, etc. Over the years we evolved our I/O offering bringing forward many of the GENIUS capabilities and marrying it with the latest technology and providing advanced functionality in more cost-efficient form factors. Controlling the I/O, the GENIUS Bus Controllers became the standard. Due to technological advances and obsolescence of various components, we declared Genius Bus Controller product family as mature on 1st January 2014. Genius Bus Controller parts are not available for sale anymore as this product has been moved to discontinued stage on 1st October 2017.

Our goal in evolving our technology is protect your investment – whether it is existing wiring, your application logic, etc. Emerson's Intelligent Platforms provides excellent upgrade path for your application to modern technology. We can convert your control, GENIUS LAN, and Genius I/O to multicore high-performance platform with an open protocol **Profinet** over high speed ethernet communication. All local and remote genius LAN can be migrated to open protocol Profinet. We can convert applications ranging from the simple to the highly complex. Minimum downtime, minimum effort, minimum cost – we provide the easiest upgrade path available!
Key Benefits of Migration to **Profinet**:

1. Proven, tested control with advanced security built-in
2. Open standard I/O connectivity with PROFINET over high-speed Ethernet
3. High performance and flexible high availability
4. Programming and data connections are easily transferred into new system
5. Advanced functionality through use of Proficy Machine Edition programming and configuration tools
6. System can be updated in just a few hours and in steps, minimizing downtime
7. High availability systems often can change over without stopping

We strongly recommend you upgrade Genius LAN to open protocol **Profinet** over high speed ethernet communication.

अधिसूचना

नई दिल्ली, 24 सितम्बर, 2020

का.आ. 3289(अ).—जबकि,1985 की सिविल रिट याचिका 4677, एमसी. मेहता बनाम भारत संघ में पारित दिनांक 10 दिसंबर, 1996 के माननीय उच्चतम न्यायालय के आदेश के माध्यम से इसके दिशा-निर्देशों पर केंद्र सरकार ने भूमि जल प्रबंधन और विकास के विनियमन और नियंत्रण के उद्देश्यों से और कतिपय शक्तियों का प्रयोग करने और उससे संबंधित कतिपय कार्यों को करने के लिए पर्यावरण (संरक्षण) अधिनियम, 1986 (1986 का 29) की धारा 5 के तहत शक्तियों का प्रयोग करने के लिए दिनांक 14 जनवरी, 1997 की अधिसूचना सं.का.आ. 38(अ) के माध्यम से केंद्रीय भूमि जल प्राधिकरण (इसके बाद इसे "प्राधिकरण" के रूप में कहा गया है) गठित किया है।

और जबकि प्राधिकरण उद्योगों, अथवा आधारभूत परियोजनाओं अथवा खनन परियोजनाओं इत्यादि के लिए भूजल निष्कर्षण के लिए "अनापत्ति प्रमाणपत्र" जारी करके भूजल विकास और प्रबंधन को विनियमित करता रहा है और बाइस राज्यों और दो संबंधित संघ शासित क्षेत्रों में, जहां पर भूजल विकास संबंधित राज्य सरकारों तथा संघ शासित प्रशासनों द्वारा विनियमित नहीं किया जा रहा है, समय-समय पर इस संबंध में इसने दिशा-निर्देश तैयार किये थे।

और जबकि, कुछ राज्य सरकारों अथवा, संघ शासित क्षेत्रों ने विधान अधिनियमित किए हैं और भूजल विकास और प्रबंधन को विनियमित करनेकेलिए विनियामक दिशा-निर्देश अथवा आदेश जारी किए हैं।

और जबकि, माननीय राष्ट्रीय हरित अधिकरण, नई दिल्ली ने 2014 की ओ.ए. सं. 204/205/206 में दिनांक 15 अप्रैल 2015 के आदेश के माध्यम से प्राधिकरण को निर्देश जारी किए हैं कि वह सुनिश्चित करें कि ऐसे किसी भी व्यक्ति जो भूजल निष्कर्षण के लिए ट्यूबवेल, अथवा कोई अन्य साधन संचालित कर रहा है, को प्राधिकरण से अनुमति प्राप्त करनी

Authority as the case may be. The entire process of grant of No Objection Certificate shall be online through a web based application system.

Water management plans shall be prepared by all the State Ground Water Authorities/ Organizations for all Over-exploited, Critical and Semi-critical assessment units starting with Over-exploited units. Water management plans shall be reviewed and updated periodically. Water management plans, data on water availability and scarcity and policy framed in this regard shall be placed on the websites of Central Ground Water Authority/ State Ground Water Authority.

1.0 Exemptions from seeking No Objection Certificate:

Following categories of consumers shall be exempted from seeking No Objection Certificate for ground water extraction:

(i) Individual domestic consumers in both rural and urban areas for drinking water and domestic uses.

(ii) Rural drinking water supply schemes.

(iii) Armed Forces Establishments and Central Armed Police Forces establishments in both rural and urban areas.

(iv) Agricultural activities.

(v) Micro and small Enterprises drawing ground water less than 10 cum/day.

1.1 Registration of Drilling Rigs

State / Ut Governments shall be responsible for registering drilling rigs operating within their jurisdiction and for maintaining the database of wells drilled by them. Appropriate link shall be provided in CGWA portal for making the data available to CGWA.

2.0 Drinking & Domestic use for Residential apartments/ Group Housing Societies/ Government water supply agencies in urban areas

For grant of No Objection Certificate for ground water extraction, the project proponent has to furnish the details as per the guidelines issued by the CGWA in proper format as available in CGWA website. No Objection Certificate for new /existing wells shall be granted only in such cases where the local Government water supply agency is unable to supply requisite amount of water in the area.

No Objection Certificate shall be granted subject to the following specific conditions:

i) Installation of Sewage Treatment Plants shall be mandatory for all residential apartments/ Group Housing Societies where ground water requirement is more than 20 m^3/day. The water from Sewage Treatment Plants shall be utilized for toilet flushing, car washing, gardening etc.

ii) The No Objection Certificate shall be valid for a period of five years from the date of issue or till such time local Government water supply is provided to the project area, whichever is earlier. In case the project proponent receives water supply from the concerned local Government Water Supply Agency during the validity of the No Objection Certificate, intimation regarding availability of public water supply shall be sent by the project proponent to CGWA and No Objection Certificate will be cancelled by the Authority. In other cases, the project proponent will apply for renewal of No Objection Certificate, ninety days before the expiry of No Objection Certificate.

iii) Proponents shall be liable to pay ground water abstraction charges for the quantum of ground water proposed to be extracted, as per rates mentioned in Table 5.1.

Documents to be submitted with the application

a) Details of water requirement computed as per National Building Code, 2016 **(Annexure I)**, taking into account recycling/ reuse of treated water for flushing etc.

b) Affidavit on non-judicial stamp paper of Rs. 10/- by the applicant, confirming non/ inadequate availability of public water supply in case of users requiring ground water up to 10 m^3/ day for drinking/ domestic use.

c) Certificate of non-availability of water from local government water supply agency in cases requiring ground water in excess of 10 m^3/ day for drinking/ domestic use. Government water supply agencies

Sub: Request for provision of Direct Drinking Water Line Connection to MPL Township

Respected Sir,

You are kindly aware that Maithon Power Limited (MPL) has constructed its employee township "Anandam" in Area No. 6 of the DVC Colony. The said township is consisting of 96 numbers of residential units. Employees of MPL are residing in the above accommodation along with their family members. The above township have been constructed in 2012 and ever since the employees and families are residing there. The total water requirement of this township is being temporarily met through underground boring water. In view of the Government's present guideline we would like to put up our application for a permanent water supply line from the DVC's water treatment system. We are ready to pay the applicable charges of water as per your standing commercial rates / allied terms and conditions.

This application may please be treated as our formal application for supply of potable water supply to employee-township.

Thanking you,

Yours faithfully,

For Maithon Power Limited

Sub: Request for provision of direct water line connection to MPL Township

Ref: to our earlier communication: - MPL/FY18 /1007-011 Date: - July 14th 2017.

Dear Sir,

This is in continuation of our earlier communication referred above.

In this connection we had detailed discussion with your good office and Depty Chief Engineer (hydro) DVC Maithon, today. As suggested by your good office, we have worked out the total water requirement for our ANANDAM Township as below.

Subject	Quantity	Remarks/ reference
Maximum accommodation	100	(considering no of residential units + accommodation of misc. service providers)
No of average occupancy	4	
Per capita consumption/ day (including mess, Gardening and washing etc.)	200liter/ day	As per the Bureau of Indian Standards, IS: 1172-1993, a minimum water supply of 200 litres per capita per day (lpcd) should be provided for domestic consumption with full flushing systems.
Total (Maximum daily water requirement)	80,000liter/day	(100X4X200)// (May please contact undersigned should any further discussion required on above.)

d) MPL/FY 18/17 07 11 Dated 14th July 2017.

Dear Sir,

Sub: MPL's Request for providing drinking water connection to Employee Township from DVC water treatment plant.

We refer to the above correspondence in the subject issue and latest meeting held in the office of Dy. CE Civil, DVC Maithon attended by MPL team on 28th November 2018.

In this regard we would further inform you that queries raised from DVC side like:

- All the construction related to pump house and pipe laying etc. shall be in the scope of MPL.
- Daily operation and maintenance shall be in the scope of MPL and necessary gate pass to be provided by DVC.
- In case of any damage in existing system the same will be repaired by MPL.
- Total land area involved in this case will be used 1316 m² (1300 meter length and 1 meter width for pipe line & Pump House area 4m X 4m) as ROW for laying of pipe.
- Specification of pumps will be 15 KW 3 phase horizontal centrifugal type with necessary piping, footvalve and priming arrangement etc.

In view of all the above submission we request once again to cordially supporting us in providing the treated water supply to our Township. We once again agree to pay the standard commercial charges of water prevailing in DVC.

Dear Sir,

Subject: MPL's Request for providing drinking water connection to Employee Township from DVC water treatment plant.

We refer to the above correspondence in the subject issue and latest meeting held in the office of Dy. CE Civil, DVC Maithon attended by MPL team on 28th November 2018.

In this regard we would further inform you the following:

- MPL had requested DVC for the supply of drinking water connection at its Township in area no 6 of DVC Colony.
- A detailed project report was prepared and submitted explaining the above project which was found acceptable by the DVC authority.
- MPL had requested DVC to inform about the all-inclusive commercial rates for supply of potable drinking water.
- MPL had attended a number of meetings at various levels of DVC Maithon for availing this facility on payment basis. However MPL is yet to receive any updates from DVC on the above request.

In view of all the above submission we request once again to support us in providing the treated water supply to our Township. We once again agree to pay the standard commercial charges of water prevailing in DVC.

Thanking you

AND WHEREAS the First Party has agreed to such construction, operation and/or maintenance of the water supply scheme by the Second Party and has further agreed to such supply of water to the Second Party for an initial period of five years as referred to in Clause- 16 here-in-under on the terms and conditions as hereinafter appearing.

Rakesh Ranjan

P- 2/14

NOW THIS AGREEMENT WITNESSTH AND IT IS HEREBY DECLARED AND AGREED AS FOLLOWS: -

01. (a) PERMISSION:

(i) The "First Party" hereby grants to the "Second Party" the permission to construct, operate and/or maintain the said water supply scheme in accordance with the Plan and Drawing annexed hereto ("said Plan and Drawing") and to extract such quantities of water from Water treatment plant of DVC at Maithon for the purpose of domestic use as the "Second Party" may require up to **80KL per day treated drinking water** at the point in the Damodar Valley indicated in the said plan and Drawing annexed hereto and in the manner hereinafter mentioned provided the "Second Party" desiring to increase or decrease the quantity of water to be extracted as permitted aforesaid the "First Party" may require the "Second Party" to give the "First Party" Three(03) months` notice in writing and approach First Party stating the quantity of water required and the "First Party" after receipt of approval of First Party will permit the additional drawal of water depending on the condition prevailing at that time provided further that failure on the part of 'the First Party' will not be construed as breach of this Agreement. The allocation shall, in no way, be utilized /misused by 'the Second Party' by sale of water to any other consumer or its sister concern (or any agency on its behalf) for any purpose whatsoever. In the event of any such act, the same will be construed as breach of the terms and conditions of this agreement on the part of 'the Second Party` as specified in clause-17.

01. (b) **PERMISSION:**

(i) The "First Party" is seized and possessed of and is otherwise well and sufficiently entitled to the plots of land measuring 14165.31 square feet of First Party land, more particularly described in the drawing hereto annexed (hereinafter referred to as "said land"), hereby grants to the "Second Party" the right to use/build at its own cost the pump house supporting structures and approach route and also lay down pipes and other works on the said land.

(ii) These structures and pumping installations shall be the property of the "Second Party" and shall be maintained by them.

(iii) The "Second Party" shall apply to the "First Party" for extension of the license-period of the temporarily allotted piece of said land for permissive possession/occupation for the specific use as mentioned hereinabove in Cl. 01. (b).(i) before expiry of every license-period/term of 11 (eleven) months ("license period") as per the subsisting rules & regulations for temporary use/permissive possession/occupation. The "Second Party" hereby agrees to comply with all the existing terms and conditions as may be decided by the First Party from time to time and agrees to pay the license fee as may be revised time to time without raising any dispute in this regard.

(iv) For the temporary use/occupation of the said 14165.35 square feet of First Party land, the Second Party shall pay the "First Party" a license fee of Rs. 3,70,565/- {(Rs. 1,69,984/- for security Deposit for 11 months excluding GST and Rs. 2,00,581/- for advance payment for 11 months including GST)} @ rate decided by Corporation Memorandum No.Sectt./LA/Rent/2017/540 dated 29.09.2022 per term of 11 (eleven) months from the date of permissive possession/occupation of the said land is made over to the `Second Party`. **The payment Rs. 3,70,565/-has been paid by the MPL on dated 27.04.2023 (@ Rate of Rs.12 per square feet per 11(elven) month period as rate decided by the Corporation).**

The aforesaid license-period and the rate of license fee may be altered and /or revised and/or enhanced as per discretion of 'the FIRST PARTY' and 'the SECOND PARTY' agrees to

Rakesh Rajan

P- 3/14

make the payments as per the revised rate as and when made applicable. The Security Deposit (SD) equivalent to 11 months licence fee to be paid by the licensee in advance. However, Government Departments are exempted from payment of security deposit. The security deposit shall be refundable to the licensee only after expiry of licence period.

(v) The "Second Party" shall not be entitled to transfer or let out the said land to others without the consent of the "First Party".

(vi) The "First Party" shall not put up any structure of its own on the said land without the consent of the "Second Party" which shall not be unnecessarily withheld.

(vii) On the termination of the tenure of the temporary use and occupation period, the "Second Party" shall quit, vacate and deliver peaceful possession of the said land by removing the pumping and piping works built thereon and restoring it to its original condition at his own cost.

(viii) Neatness and cleanliness of the area occupied should be observed by the "Second Party"

02. **APPROVAL OF PLAN & DRAWING INSPECTION:**

The installation of the "Second Party" required for extraction of water at the point on the First Party indicated in the said plan and Drawing shall be duly approved by the "First Party" before erection provided the "First Party" or its representatives duly authorized in that behalf shall, from time to time, and at all times be entitled to enter such installations of the "Second Party" for inspection.

03. **(a) EXCESS DRAWAL:**

No drawal in excess of the water, as permitted shall be made by "the Second Party" without obtaining the specific prior written permission/approval of First Party and subject to such terms and conditions as "the First Party" may like to impose. Notwithstanding, whatever is mentioned in this agreement regarding excess drawl, it is hereby agreed and accepted by the Second Party that, for the quantities of water consumed in excess of the approved monthly drawal and for any other unauthorized drawl of water, sanctioned quantum will be charged **@ Rs 16.78/KL normal rate plus over drawal/unauthorized drawal in excess of sanctioned drawal on monthly basis will be charged @ 2 (Two) times the normal rate.**

(b) LESS DRAWAL:

The less drawal of water by 10% or more of the agreement quantity during any 5 (five) consecutive years will automatically call for revision of the agreement quantity. The revised agreement quantity will be reduced to average of preceding 5 yrs' actual drawal, without making any further reference to the Second Party incorporating the actual average drawal. However, the Second Party may opt to apply to First Party for increase the quantity as per provision under Clause -1(a) hereinabove.

04. **MODE OF MEASUREMENT & METERS:**

For the purpose of measurement of the quantity of water extracted, the "Second Party" shall under this Agreement, with the prior Approval of the First Party, install at such points as may be indicated by 'the First Party', as many meters or as equal to the different type or types of uses of water so as to register the quantity of water for the purpose of determining the water drawal pattern (excess/less drawal) of the Second Party in such units of measurement as may be adopted by "the First Party" from time to time provided that for the purpose of checking the accuracy of the meter/meters installed by "the Second Party", "the First Party" may install check meters or other mutually agreed upon check measures and "the Second Party" shall provide all facilities such as logbook etc. required by "the First Party" for such installation or such check.

It shall be responsibility of the 'Second Party' to repair/rectify/replacement of meter/meters within a period of 30 days from the date of detection of the fault by either

Rakesh Ranjan

P- 4/14

Party. And that 'the Second Party' has to submit a report certified by the representative of the First Party every year regarding their compliance with proper and satisfactory functioning of meter with proper logging of meter readings which will be given due importance during periodic review of water utilization by First Party. Non-compliance of above may be tantamount to cancellation of water allotment.

The reading of the meters referred to above shall be jointly taken by the accredited representative of the Second Party and First Party on/or as near as practicable to the last day of each English calendar month or as decided by the First Party and the reading so taken shall be recorded in a register, shall be binding, final and conclusive between the Second Party and the First Party as to the quantity of water drawl by the Second Party , provided that in the event of any meter being found defective and the quantity of drawal of water during the period when the meter was defective shall be determined, unless otherwise mutually agreed as detailed in clause – 6 & 10 here-in-under.

05. **SEALING OF METERS:**

All meters referred to in the above-mentioned Clause - 04 excepting the ones with automatic recorder on charts if any, shall be properly sealed on behalf of both the parties hereto and shall not be interfered with by either Party except in the presence of the other Party or its representatives duly authorized in that behalf.

06. **METER READING, INSPECTION & BASIS OF PAYMENT:**

The Control Valve House housing the meter/meters of 'the Second Party' shall remain in the custody of 'the Second Party' and 'the First Party' through its representative duly authorized in that behalf shall at all times be entitled to enter the said Control Valve **House** and inspect the meter/meters.

Provided further that if this meter/meters installed by 'the Second Party' for recording the quantity of water is/are out of order, the quantity of water extracted may be assessed by taking the average of the quantity extracted during the preceding 3 (three) months as per the reading of the meter/meters, provided further that nothing as aforesaid shall prevent the respective parties from arriving at a mutual settlement as regard the quantity of water extracted during the above period for the purpose of ascertaining excess/less drawal by the Second Party.

07. **QUANTITY OF WATER CONSUMED OR EXTRACTED:**

The Registers of meter reading referred to in the above-mentioned Clause- 04 or the assessed quantity of water mutually agreed upon by and between both the parties hereto or the average of the quantity of water extracted during the three months as aforesaid or computed by taking the difference between the direct recording and main meter shall be the prima facie evidence of the quantity of water extracted by 'the Second Party'.

08. **PROPRIETARY RIGHT OF METERS AND UPKEEPMENT:**

Meters as mentioned in the above-mentioned Clause -04 shall be the property of 'the Second Party' and 'the Second Party' shall be liable for the upkeepment of the meter and for carrying out test once a year or more to the satisfaction of the First Party about the accuracy of such meter/meters.

09. **ACCURACY OF METERS:**

In the event of any dispute or difference between 'the First Party' and the Second Party as to the sufficiency or accuracy or state of repair or condition of the said meter or as to the quantity of water extracted through such meter, such difference or dispute shall be referred to and determined by an Engineer to be appointed by both the parties hereto.

10. **BASIS OF ASSESSMENT IN ABSENCE OF METER:**

(a) It is accepted and agreed by the 'Second Party' that the total quantity of consumption of water for the month shall be computed by the First Party on the basis of allocation of water

Rakesh Rajan

P- 5/14

by First Party and the bills shall be raised on such quantity as referred to in Schedule-I & II. However, the Second Party is required to install and commission the meter(s) up to the satisfaction of the First Party for ascertaining excess/less drawal as referred to in clause 3. (a) & 3. (b) hereinabove.

(b) If at any time the meters installed for measurement of water extracted shall at any time, cease to register correctly or be removed for repair, calibration etc., then for the period until the said meters shall have been repaired replaced or otherwise adjusted as to register the quantity of water passing through it correctly, the quantity shall be computed as per proviso of clause 06 hereinabove. The First Party, however, shall be entitled to charge and 'the Second Party' shall be liable to pay for such quantity of water as mentioned in Schedule-II and the bills shall be continued to be raised by First Party based on the permitted quantity as mentioned hereinabove.

Notwithstanding the bills shall be raised as per provisions contained in preceding cl. 10. (a). The Second Party shall make every endeavor to get the meter repaired and installed to the satisfaction of the First Party within a period of 1(one) month.

11. BILLS & PAYMENTS:

(a) Bills & Tariff:

The price for supply of water shall be charged to the 'Second Party' in accordance with Schedule-I & the First Party's 'Schedule of Rates' as given in Schedule-II and other conditions in force from time to time, provided that any levy such as any Surcharge, GST/Sales Tax, or any another amount by whatever other name called known or made by the First Party, the state Government or any other competent authorities on quantity of water allocated to the 'the Second Party' under this agreement. shall be paid by 'the Second Party'.

(b) Security Deposit:

The First Party may require the Second Party to deposit a Security Amount Rs. 1,20,816/- equivalent to water charges for three calendar months, considering quantity allocated in KL as specified in Clause- 1(a) and given in the schedule –I annexed hereto and or as modified as per clause-13 here-in-under and as per the prevailing water rate mentioned in schedule of rates in Schedule-II (**The MPL has paid Security amount of Rs. 1,20,816/- on Dated 27.04.2023**). The Second Party shall have to pay altered security amount if the quantity of allocation is changed by First Party as per the terms of this agreement and as and when the water rates are revised and notified to the Second Party from time to time during the tenure of this agreement. In the event of termination of this agreement such security deposit shall be refunded after adjustment of dues, if any, to the Second Party without any interest thereon.

(c) Periodicity of Billing:

Bills will be raised to the Second Party monthly/quarterly based on allocation in KL by First Party or as decided by the First Party as the case may be. It will be the responsibility of Second Party to make the aforesaid payment within the due date without raising any dispute in this regard.

(d) Mode of payment:

The 'Second Party' shall pay the bill amount to the First Party's office at Kolkata by RTGS/Cheque/Demand Draft drawn on Kolkata Branch of any Nationalized Bank, payable to Chief Accounts Officer, DVC, Kolkata within 30 days from the date of issue of the bill. The license fee, however, is to be paid by the Second Party as per terms mentioned in Clause- 1 (b).

Provisional Billing for disputed bills:

In the case of any disputed bill(s) and or non-receipt/delayed receipt of bill, the Second Party shall collect the duplicate bill from the office of First Party and make the payment

Rakesh Ranjan

Sr. Divisional Engineer

P-6/14

immediately. However, Delay Payment Surcharge, if applicable, as mentioned here-in-under in clause 11. (f) shall have to be borne by the Second Party. In case of disputed bills, the Second Party shall continue to pay full amount as per the bill raised by the First Party. The necessary adjustment shall be done by the First Party on resolution of dispute and/or differences.

(e) **Delay Payment Surcharge:**

If 'the Second Party' fails to make the payment of any bill amount within the due date, the Second Party shall pay the surcharge of 2.0 % per month on the amount of the bill from the due date of payment to the date of receipt of such amount in First Party's office at Kolkata/in First Party's Account which shall be treated as date of payment. The rate of Delay Payment Surcharge is however liable to revision from such date as the First Party may decide with prior notice of one month in writing to the Second Party.

(f) **Default in payment:**

In the event any bill remaining unpaid for 60 days from the date of issue of the bill, the First Party shall give the Second Party **7(Seven)** days' clear notice in writing of its intention to discontinue the supply of water and on the expiry of such period if the payment has not been received, 'the First Party' may forthwith discontinue supply of water to the Second Party till the period the default continues. Such discontinuance of supply shall not be deemed as breach on the part of the First Party to comply with any of the terms of this Agreement and shall not relieve the Second Party of its obligations and liabilities under the Agreement.

(g) **Resolution of Dispute on Bill Amount:**

In the event of any dispute on the amount of the bill the Second Party shall submit the in details indicating the reason/reasons for such dispute and the aforesaid dispute/disputes normally shall be resolved by mutual discussion and/or mutual exchange of written documents between the Second Party and the First Party through authorized representative within **30 (thirty) days** from the date of receipt of such reference made by the Second Party to 'the First Party'.

12. **MODE OF SUPPLY UNDER NORMAL & ABNORMAL CONDITION:**

Save as provided herein clause 1(a)(i)(80KL) which, however, need not be continuous, throughout 24 hours, shall be available to 'the Second Party' provided that in case of draught or other unforeseen circumstances, force majeure or any other cause over which the First Party has no control, the First Party shall not be responsible for any diminution or discontinuance of supply on such occasions, but it shall restore the normal conditions of supply as soon as it reasonably can be done to the extent possible.

"The First Party" shall not be considered to be in default or in breach in supplying agreed quantity of Treated water due to causes beyond the control of the "The First Party" such as acts of God, Natural Calamities, Civil Wars, Fire, Draught, Riot and acts of unsurpassed power AND maintenance of WTP.

13. **VALIDITY PERIOD OF QUANTUM OF WATER ALLOCATION:**

Notwithstanding whatever is stated herein above, the allocated quantum of water for drawal by 'the Second Party' i.e. initial allocation of quantity (in MGD/Cusec/KL) by First Party shall remain valid for INITIAL AGREEMENT period of 5 **(five)** years.

Rakesh Rajan

14. **RULES & REGULATION:**

'The Second Party' agrees to conform to and abide by all rules and regulations made by the First Party including guidelines for water allocation set by First Party now in force

P-7/14

and/or which may from time to time be made by the First Party consistent with this agreement relating to the extraction of water from the First Party's sources within the statutory limit of the said Act.

Notwithstanding whatever is stated in Clause-13 above, the review committee for allocation of water shall have prerogative to review periodically to reflect and incorporate the changes which take place in the realm of Water Resource Management.

Notwithstanding that the First Party may not have acted on some previous breach, defaults or event of like nature on the part of the Second Party, it shall be lawful for the First Party to enforce the terms and conditions of these presents in the event of a subsequent breach, default or event of like nature in all matters related to withdrawal of Treated water by 'the Second Party'.

Any waiver by 'the First Party' of any breach of the terms and conditions of this agreement by the Second Party shall not constitute waiver of any subsequent breach of any other terms or conditions of this agreement.

15. **DISPUTE OR DIFFERENCE & ARBITRATION**:

Any dispute(s) or difference(s) arising out of or in connection with the agreement at any time between the 'First Party' and the 'Second Party' shall to the extent possible be settled amicably between the parties.

In the event of any dispute(s) or difference(s) whatsoever arising under the agreement or in connection therewith including any question relating to existence, meaning and interpretation of the agreement or any alleged breach thereof is not settled amicably between the Parties, the affected Party must promptly give the other Party written notice identifying and giving details of the dispute or difference. If the dispute is not amicably resolved within 30 (thirty) days of the delivery of the written request as provided hereabove, the dispute or difference may, at the option of either Party, be resolved through arbitration conducted by a sole arbitrator mutually appointed by the Parties in accordance with the Arbitration and Conciliation Act, 1996, as amended from time to time and any statutory enactment The decision/judgment of the Sole Arbitrator shall be final and binding on both the parties. The cost of Arbitration shall equally be borne by both the parties. The venue of Arbitration shall be at Kolkata.

All suits arising out of dispute(s) or difference(s) between the 'First Party' and the 'Second Party' are subject to jurisdiction of Court in the City of Kolkata.

16. **TENNURE OF AGREEMENT OR VALIDITY:**

This agreement shall subject as hereinbefore provided be and remain in force for a period of **5 (five)** years initially from the date of commencement of supply under this Agreement and thereafter shall continue uninterruptedly under the existing terms and conditions until determined by either Party after the expiration of the fifth or any subsequent year on giving **3 (Three) months'** prior notice in writing of such intention and at the expiration of such notice this Agreement shall absolutely cease and determine but without prejudice to the rights and remedies, if any, of either Party which may have accrued or arisen hereunder in the meantime and provided that the Second Party shall on giving the First Party **3 (three)** months' prior notice in writing of such intention be at liberty at any time after the expiration of the fifth or any subsequent year to terminate this Agreement by making payment of the charges equal to water charges for one year as per Schedule of Rates (Annexed as Schedule-II) in force at that time.

17. **TERMINATION:**

If 'the '**Second Party'** commits any breach of the terms and conditions of this agreement or if there is any default on the part of **'the Second Party'**, **'the First Party'** will be at liberty to terminate this agreement upon one months' notice to 'the

P-8/14

Second Party' without prejudice to the rights and remedies, if any, which may have accrued or arisen thereunder.

18. **REMARKS**

1) The license for land would be valid for the period of 11 (eleven) months only. The renewal of license may be allowed after every 11 months' subject to satisfactory performance and on written request by the Second Party as per terms & conditions prevailing at the time of renewal.
2) The license fee @₹12/- per sq. ft. for 11 (eleven) months to be realized for allotment of 14165.31 sq. ft. vacant land within Maithon Colony area in terms of OM No. No.Sectt./LA/Rent/2017/540 dated 29.09.2022 and Office order No. M-PL/HR/Genl-1/1773 dated 02.03.2023.
3) Applicable GST shall be paid by the Second Party in addition to the above license fee.
4) All payments shall be made to First Party in advance failing which delay payment surcharge @2% per month or part thereof shall be payable by the Second Party on the outstanding amount.

5) Other terms and conditions:

a) First Party reserves the right to revise the terms & conditions as well as other relevant issues as and when required.

b) After allotment of land to the Second Party on license to use basis, they shall start the necessary work within three months of allotment, otherwise the allotment is liable to be cancelled.

c) The consumption of electricity/ water, if necessary, will be on chargeable basis as per applicable rate of First Party. However, the Second Party will provide electric meter and cable and apply for connection of power from First Party at existing commercial rate.

d) The execution of work shall be done without hindering any traffic movement.

e) The Second Party shall be responsible for safety during construction

f) In case any accident occurs during and after the construction work or other any associated activities undertaken by Second Party, it shall be the sole responsibility of the Second Party and in case of injury, the compensation as calculated/ directed by the State Government Authorities shall be paid by Second Party to the victim or his/her heir, in accordance with the statutory provisions.

g) Second Party shall shift the infrastructure at their own cost in case the shifting is necessary for First Party / public utility purpose as and when instructed by First Party.

h) If any damage is caused to any existing structure of First Party during & after completion of this Project, it will have to be rehabilitated and/or constructed immediately by Second Party at their own cost.

i) Second Party will take all steps for protection of environment and ensure maintenance of ecosystem and will also take steps to control pollution caused on account of their interventions during and after execution of the Projects.

Rakesh Rajan

p- 9/14

IN WITNESS WHEREOF THE PARTIES TO THESE PRESENTS HAVE HERE UNTO PUT THEIR REPECTIVE HANDS AND SEALS EACH THE DAY AND YEAR FIRST ABOVE WRITTEN.

The Agreement along with Schedule of rates would come into effect on and from the date of commencement of water supply.

Sub: Request for provision of Direct Drinking Water Line Connection to MPL Township

Respected Sir,

You are kindly aware that Maithon Power Limited (MPL) has constructed its employee township "Anandam" in Area No. 6 of the DVC Colony. The said township is consisting of 96 numbers of residential units. Employees of MPL are residing in the above accommodation along with their family members. The above township have been constructed in 2012 and ever since the employees and families are residing there. The total water requirement of this township is being temporarily met through underground boring water. In view of the Government's present guideline we would like to put up our application for a permanent water supply line from the DVC's water treatment system. We are ready to pay the applicable charges of water as per your standing commercial rates / allied terms and conditions.

This application may please be treated as our formal application for supply of potable water supply to employee-township.

Thanking you,

Yours faithfully,

For Maithon Power Limited

Damodar Valley Corporation,
Combined Building,
Maithon - 828207.
Dist. Dhanbad, JH.

Subject: Request for provision of Direct Drinking Water Line Connection to MPL Township.

Dear Sir,

Please refer to our earlier letter in this subject with reference number MPL / FY 18 / 1007 - 011. In this context we would like to draw your kind attention to the following facts:

You are kindly aware that Maithon Power Limited (MPL) has constructed its employee township "Anandam" in area no. 6 of the DVC colony. The said township is consisting of 96 numbers of residential units. Employees of MPL are residing in the above accommodation along with their family members. The above township have been constructed in 2012 and ever since the employees and families are residing there. The total water requirement of this township is being temporarily met through underground boring water. In view of the Government's present guideline we like to put up our application for a permanent water supply line from the DVC's water treatment system. We are ready to pay the applicable charges of water as per your standing commercial rates/allied terms and conditions.

This application may please be treated as our formal application for supply of potable water supply to employee-township

Thanking you.

Yours Truly,

For Maithon Power Limited,

(M S Rahman)

Head - Project Planning & Coordination.

District: - Dhanbad, Jharkhand.

OFFICE OF THE S.E. CIRCLE-II D.V.C. MAITHON
No. 309
Date 25.8.18

Sub: Submission of Engineering note and drawing for Water supply scheme for MPL Township from water treatment plant, DVC.

Ref: 1. MPL/FY18 /17 08 05 Date: - 31st August 2017

2. MPL/FY18 /10 07 011 Date: - 14th July 2017

3. MPL/FY19/18 06 007 Date: - 7th June 2018

Dear Sir,

With reference to the above letters we are hereby sending the following documents for Water supply scheme for MPL Township from water treatment plant at millennium park, DVC:

- Water supply scheme for MPL Township from DVC water treatment plant.
- Proposed pump house location and pipe routing
- Typical detail of support for drinking water pipeline

Thanking you,

Yours truly,

For Maithon Power Limited,

Dear Sir,

Sub: Meeting Request on Completion of joint site inspection for water supply scheme for MPL Township from Water treatment plant, DVC.

With reference to the above correspondence and on completion of joint site inspection of MPL & DVC team we are request you for a meeting on Wednesday, 28th November 2018.

May kindly confirm.

We have already submitted necessary drawing, documents and technical specification etc.

Thanking you

Yours truly
For Maithon Power Limited

d) MPL/FY 18/17 07 11 Dated 14th July 2017.

Dear Sir,

Sub: MPL's Request for providing drinking water connection to Employee Township from DVC water treatment plant.

We refer to the above correspondence in the subject issue and latest meeting held in the office of Dy. CE Civil, DVC Maithon attended by MPL team on 28th November 2018.
In this regard we would further inform you that queries raised from DVC side like:

- All the construction related to pump house and pipe laying etc. shall be in the scope of MPL.
- Daily operation and maintenance shall be in the scope of MPL and necessary gate pass to be provided by DVC.
- In case of any damage in existing system the same will be repaired by MPL.
- Total land area involved in this case will be used 1316 m² (1300 meter length and 1 meter width for pipe line & Pump House area 4m X 4m) as ROW for laying of pipe.
- Specification of pumps will be 15 KW 3 phase horizontal centrifugal type with necessary piping, footvalve and priming arrangement etc.

In view of all the above submission we request once again to cordially supporting us in providing the treated water supply to our Township. We once again agree to pay the standard commercial charges of water prevailing in DVC.

Thanking you

Yours truly

e) MPL/FY 18/17 07 11 Dated 14th July 2017.

Dear Sir,

Subject: MPL's Request for providing drinking water connection to Employee Township from DVC water treatment plant.

We refer to the above correspondence in the subject issue and latest meeting held in the office of Dy. CE Civil, DVC Maithon attended by MPL team on 28th November 2018.

In this regard we would further inform you the following:

- MPL had requested DVC for the supply of drinking water connection at its Township in area no 6 of DVC Colony.
- A detailed project report was prepared and submitted explaining the above project which was found acceptable by the DVC authority.
- MPL had requested DVC to inform about the all-inclusive commercial rates for supply of potable drinking water.
- MPL had attended a number of meetings at various levels of DVC Maithon for availing this facility on payment basis. However MPL is yet to receive any updates from DVC on the above request.

In view of all the above submission we request once again to support us in providing the treated water supply to our Township. We once again agree to pay the standard commercial charges of water prevailing in DVC.

Thanking you

Yours truly
For Maithon Power Limited

ANNEXURE P/21

Press Information Bureau
Government of India
Ministry of Water Resources

31-July-2014 15:19 IST

National Water Policy

The objective of the National Water Policy, 2012 is to assess the existing situation and to propose a framework for a plan of action with a unified national perspective. In order to achieve the objective of the Policy, a number of recommendations have been made therein for conservation, development and improved management of water resources of the country. The salient features of the National Water Policy, 2012 are annexed. Implementation of these recommendations involves coordinated and continuing efforts on the part of the concerned Ministries / Departments of Central Government and the State Governments. Copies of the National Water Policy, 2012 have been forwarded to all State Governments / Union Territories and the concerned Ministries / Departments of the Central Government for appropriate action.

The salient features of national water policy (2012) are as follows:

1. Emphasis on the need for a national water framework law, comprehensive legislation for optimum development of inter-State rivers and river valleys.

2. Water, after meeting the pre-emptive needs for safe drinking water and sanitation, achieving food security, supporting poor people dependent on agriculture for their livelihood and high priority allocation for minimum eco-system needs, be treated as economic good so as to promote its conservation and efficient use.

3. Ecological needs of the river should be determined recognizing that river flows are characterized by low or no flows, small floods (freshets), large floods and flow variability and should accommodate development needs. A portion of river flows should be kept aside to meet ecological needs ensuring that the proportional low and high flow releases correspond in time closely to the natural flow regime.

4. Adaptation strategies in view of climate change for designing and management of water resources structures and review of acceptability criteria has been emphasized.

5. A system to evolve benchmarks for water uses for different purposes, i.e., water footprints, and water auditing be developed to ensure efficient use of water. Project financing has been suggested as a tool to incentivize efficient & economic use of water.

6. Setting up of Water Regulatory Authority has been recommended. Incentivization of recycle and re-use has been recommended.

7. Water Users Associations should be given statutory powers to collect and retain a portion of water charges, manage the volumetric quantum of water allotted to them and maintain the distribution system in their jurisdiction.

8. Removal of large disparity in stipulations for water supply in urban areas and in rural areas has been recommended.

9. Water resources projects and services should be managed with community participation. Wherever the State Governments or local governing bodies so decide, the private sector can be encouraged to become a service provider in public private partnership model to meet agreed terms of service delivery, including penalties for failure.

10. Adequate grants to the States to update technology, design practices, planning and management practices, preparation of annual water balances and accounts for the site and basin, preparation of hydrologic balances for water systems, and benchmarking and performance evaluation etc.

This was stated by Union Minister of State for Water Resources, River Development and Ganga Rejuvenation Shri Santosh Kumar Gangwar in a written reply in Lok Sabha today.

Samir/jk

ANNEXURE P/22A

Minutes of meeting between MPL and BHEL, Trichy on 11/11/16 and 12/11/16 regarding the issues of alarm temperature setting (Div. Panel, LTSH, Superheater & Reheater zones), overheating failures/inspection findings and way forward to ensure reliability and efficiency of the Boilers

Members Present

MPL	**BHEL Trichy**
Mr. S H Pandey	Mr. S Chandrasekaran
Mr. Rohit Shukla	Mr. S Thiagarajan
	Mr. T Balamurugan Murali
	Mr. Manish Kumar Raj
	Mr. D Balaji
	Mr. A Niruthiya Priyan

a. MPL shared the details of two failures of Reheater due to overheating (Apr'16 & Sept'16), Inspection findings of high internal oxide scale on tube 1 (T22 section) in Reheater rear on Panels towards Right hand side of the boiler and temperature trends of LTSH, Div. Panel, RH and SH tubes with BHEL Trichy.

b. MPL expressed their concern that findings of high internal oxide scale thickness in such a short span of time i.e. 32000-36000 hrs is something abnormal and matter of serious concern for reliability of Reheater tubes.

c. MPL shared the temperature profile findings and stated that temperatures are comparatively higher on Right hand side of the boiler. Secondly, the difference between one Thermocouple tag to another tag is higher in the range of 50-80 deg C for Div. Panel, PSH and LTSH zones. It was expressed that for Reheater the difference between the tags was very high i.e. around 115 deg C.

BHEL responded that within tubes of the same assembly difference is expected, however for same tube across Panels only slight variation is expected.

MPL said that the difference of >100 deg C in Reheater is for same tube i.e. tube 3 considered across Panels. Hence, the operating data shows different results with what had been anticipated in design. BHEL responded that they will get back regarding this in two weeks time.

d. Regarding the alarm setting Reheater, MPL stated that the setting of Alarm of 631 deg C is very high for Reheater zones where the MOC is T91 in the penthouse as well in some section of Outlet coils in the fired zone. MPL also shared that T91 tubes are restricted to a max of 610

12/11/16 12/11/16 12/11/16 12.11.16 (S. THIAGARAJAN)

12/11/16 SHPandey

deg C purely based on oxidation strength point of view even though the allowable temperature could be higher based on mechanical strength. This is also very well elaborated in various literatures like EPRI. MPL stated that limiting temperature should have been taken as 610 deg C while setting alarm considering long term operation and reliability of the tubes.

BHEL stated that as per BHEL's philosophy T91 is restricted to 649 deg C and T22 to a temperature of 593 deg C based on oxidation point of view.

e. MPL shared their methodology of working out proposed alarm temperatures for different zones in which a delta of 30 deg C between heated and unheated part for convective zone and 50 deg C for radiant zone and Thermocouple error of 1% has been considered. MPL requested BHEL for their views on this methodology.

BHEL responded that the alarm value is derived based on a proprietary calculations done through software. According to this max metal temperature considering all imbalances, all operating conditions etc. is arrived at and then alarm is derived which is different for different tubes. The value of alarm for the hottest tube amongst all tubes considering acceptable temperatures in different MOC's is set as the alarm. This is the practice followed by BHEL for all the boilers including 500MW/600MW/OTSC Boilers.

MPL insisted that still there would be a delta temperature difference between the heated and unheated part, hence alarms should have been set in such a way that at alarm value in penthouse, the tube in the heated section would be approaching the max allowable temp for that material with some margin in hand. Hence, MPL requested BHEL to re-look at the alarms once again. BHEL replied that alarm temperature can be set at lower value if required.

f. MPL also raised a query regarding zones like Div. Panel and Platen SH which have T22 tubes in the penthouse that whether T22 max allowable temp. limits based on mechanical strength or oxidation temp. whichever is lower would govern the alarm limits or not?

BHEL responded that based on mechanical strength it would govern, however oxidation strength is not considered as it is in the non-fired zone.

MPL insisted that operating above oxidation limits even in unfired zones will lead to rapid oxide scale formation and ultimately wall loss.

g. MPL put up some points for discussion (mail dtd. 11/11/16) and response from BHEL based on the temperature patterns, failures and inspection findings to which BHEL responded to revert back in 3 weeks time. Secondly, BHEL will revert on observations on MPL presentation.

h. MPL requested BHEL for inputs regarding the root cause of failures, long term solution like tube replacement with a higher metallurgy, setting of alarm values and any other action points which would ensure reliability of the Units in the long run.

12/11/16.

12/11/16

12/11/16

12.11.16

(S.THIAGARAJAN)

j. MPL will send 4 no. cut tube samples of U#2, cut during outage, to BHEL for verifying any whitish deposit causing failure in Reheater Inlet. BHEL stated that they have experienced some whitish deposit causing failure due to overheating in some other plant.

k. MPL requested BHEL regarding their views on inspection checks to be done on failed tube Panel 58 tube 11 in Inlet and Panel 58 tube 1 in outlet as there is a high possibility that section of tube not replaced might also have run hot and faced some deterioration. BHEL responded inspection of non-replaced part to be done for replacement decision.

l. MPL requested revised operating guideline as recommendation in view of details shared of current operating scenario and coal fired for averting overheating failures.

m. In view of current observations based on operation and current coal firing (within the range of design limits) , BHEL recommended replacement of T22 tube by T91 for tube 1 for all Panels in Reheater rear as indicated in the sketch.

n. BHEL recommended closing of all SADC dampers of non-working coal compartments assuming they are always 5% open in virtue of stoppers. Windbox to furnace dP of 80-100mm should be maintained at 80-100% load conditions.

o. BHEL stated that if alarms are coming in steady state, it is by virtue of coal properties. In view of this coal properties shall be forwarded to BHEL for further review and analysis.

p. Minimum thickness required for tubes of different sections shall be shared by BHEL as maintenance guideline within 10 days.

q. BHEL recommended to share operating combination (each data TMCR, 525MW, 80%, 60% load, lowest load operated with top mill for atleast 4 hrs steady state load, 5 snapshots) for deciding additional thermocouples on Reheater.

r. BHEL will revert on delta temp difference between heated and un-heated part for hottest tube of different zones (LTSH, Div Panel, PSH and RH). BHEL will revert back in 3 weeks

12/11/16.

12/11/16

12/11/16.

12/11/16.

(S. THIAGARAJAN)

MINUTES OF MEETING BETWEEN MPL AND BHEL, TRICHY ON 13-14TH JUNE'18 REGARDING REHEATER TUBE FAILURES & INSPECTION FINDINGS FOR ENSURING RELIABILITY OF BOILER

Members Present

MPL	BHEL
Mr. S H Pandey	Mr. P S Biruli
Mr. Rohit Shukla	Mr. D Chattopadhyay
	Mr. S Thiagarajan
	Mr. Pankaj Yadav
	Mr. Sunil Kumar
	Mr. Niruthiya Priyan

a. MPL presented the failure history, inspection findings of Re-heater zone, economiser and LTSH tube failures along with the operational data and details of coal fired to M/s. BHEL.

b. BHEL stated that major root cause resulting in overheating is delayed combustion on account of deviations in Coal Characteristics towards the worst side of the designed coal resulting in temperature excursions during start-up and load variation. During discussions the following measures were suggested by BHEL for increased reliability of the Boiler:

Operational measures

- Before planned transitions of load/mill changeover, spray on RHS to be given in Re-heater and spray on LHS to be given on Final Superheater. Final Superheater has criss-cross arrangement and spray on LHS in Final Superheater will reduce temperature on RHS of Final Superheater. This was suggested to decrease heat pickup in Reheater on RHS.
- Windbox DP should be maintained at 70mmwc. Revised curve for DP will be furnished by BHEL.
- Commissioning of Furnace temperature probe.
- Differential biasing of burner tilt between LHS and RHS.

Corrective measures:

- Acromat Thermocouples to be installed on 2-3 tubes of CRH preferably tube 2 or 3 on RHS for monitoring of metal temp. during start-ups and load variations.

Acromat details were furnished by BHEL. Measurement of same tube should be made available in penthouse at HRH outlet.

- Up-gradation of HRH from T22/T91 to SS347H as recommended by BHEL earlier. Priority wise 23 Panels on RHS to be considered first.
- A brief guideline for Tube plugging to increase flow is also under review by M/s BHEL. This shall be further studied for further recommendation, particularly for tubes running hot/ above alarm temperature. M/s BHEL shall revert back by 25th June'18.
- CRH tubes on RHS from tube 2 to 6 (counting from front) to be checked for Internal oxide scale measurements on upstream and downstream of CRH front and rear bend respectively. The bottom section of CRH, with a similar Priority order wise, 23 Panels on RHS to be considered for replacement and upgradation using SS347H material tubes, as this impact is also visible as part of affected sections.
- MPL presented the failure history, inspection findings for the Economiser banks, and LTSH Tubes. BHEL stated that major root cause resulting in erosion in LTSH and Economiser banks also on account of Coal Characteristics and properties. Since MPL is required to continually required to operate with the coal properties having higher ash content i.e. towards worst side of the designed coal, as per availability in the local region, additional care may be exercised to ensure replacement of above economiser and LTSH sections, at least once in next 4 years, followed by scheduled periodic maintenance to maintain the safety and reliability of boiler operation for plant generation.
- Over a period within 10 years, and plant approaching half-life period of design operation, plant will also be required to take up extensive replacement of internals for crushers, Coal mill internals and gear box including replacement of Burner assemblies in a phased manner of next 4 years' time.

In case of MPL Plant operating with varying load demand, as per grid demand, MPL, is advised to take help of our PS-SSBG group for requirement of flexibilising of Maithon plant for best basket of solutions mitigating the operational issues for flexible plant operations.

MPL

BHEL

OF

SAFETY AUDIT

CONDUCTED AT

MPL
MAITHON POWER LIMITED

MAITHON POWER LIMITED

(A JOINT VENTURE COMPANY OF TATA POWER & DVC)

DHANBAD, JHARKHAND

16th – 19th MARCH 2021

BY

NATIONAL SAFETY COUNCIL

98-A, Sector 15, Institutional Area,
CBD Belapur, Navi Mumbai-400 614
Tel. 022-27579924/5/6/7, Fax: 022-27577351,
Email: safetyaudit@nsc.org.in, Website: www.nsc.org.in

ACKNOWLEDGEMENT

The National Safety Council would like to thank the Management of Maithon Power Limited, Dhanbad, Jharkhand in general, and Shri Vijay V. Namjoshi, Chief Generation & Occupier and Shri Ramesh Jha, Chief Executive Officer & Factory Manager in particular, for inviting and providing excellent co-operation to the team in carrying out the Safety Audit from 16th – 19th March, 2021.

The excellent coordination by Shri Abhijit Pandey, Lead Engineer – Safety under guidance of Shri A. K, Manna, Safety Head and Senior executives from all departments immensely helped the audit team in completing the safety audit within the time available. The audit team would like to thank all of them.

The courtesy and hospitality extended to the audit team by the Management of Maithon Power Limited, Dhanbad during the field visit for the audit is sincerely acknowledged.

- National Safety Council

INTRODUCTION

1.1 The Background

The Management of the Maithon Power Limited requested National Safety Council (NSC), Navi Mumbai to conduct a Comprehensive Safety Audit of their plant located at Dhanbad in Jharkhand state.

Accordingly, the Safety Audit was conducted on 16th – 19th March, 2021 by a team comprising of following experts:

1. *Shri. Kishor D. Patil, Assistant Director, NSC and Lead Auditor*
2. *Shri. S. K. Chatterjee, Member, NSC Experts Panel*
3. *Shri K. N. Govindankutty, Member, NSC Experts Panel*

Shri Abhijit Pandey, Lead Engineer – Safety, Shri Rajkumar Rai, Lead Associate – Fire, Shri Sacchidanand Patel, Lead Engineer – Mechanical, Shri Ashok Kumar, Lead Engineer – Chemistry and Shri Rahul D. Banerjee, Lead Engineer - Electrical were assigned the responsibility as coordinators for liasoning with the audit team. They accompanied the audit team during the inspection of the plant and provided necessary information and documents for perusal. During the course of the field visit, interaction was made with various personnel in different departments in the plant. The overall coordination for the safety audit were done by Shri A. K. Manna, Head – Safety & Fire.

1.2 About the Maithon Power Limited:

Maithon Power Limited (MPL) is a joint venture company of Tata Power and Damodar Valley Corporation. MPL is the coal-based thermal power plant located at MA-5 Gogna, Maithon Dam, District Dhanbad in the State of Jharkhand. In Phase-I, the 2 x 525 MW power station has the installed capacity of 1,050 MW. Unit #1 was commissioned in September, 2011 and Unit #2 in July, 2012. In Phase-II, MPL is in the process of expansion by establishing another 1,320 MW capacity (2 x 660 MW) supercritical units.

The main plants include: coal handling plant, boiler and auxiliaries, turbo-generator and auxiliaries, DM plant, chlorination plant, 400 kV switchyard, electrostatic precipitators, ash handling pump house, cooling water pump house, raw water pump house, diesel generator set, etc. The main Departments are: MMD, EMD, C&I, Operation, CMD, CHP, Safety & Fire, Environment, Health, Chemical, HR, IR & Admn., and Security.

Manufacturing Process:

Coal is brought through tippers is unloaded in the coal storage yard. Dust extraction and tunnel ventilation systems are installed for dust suppression. Raw water from the Maithon Dam Reservoir is drawn to cover the total water requirement.

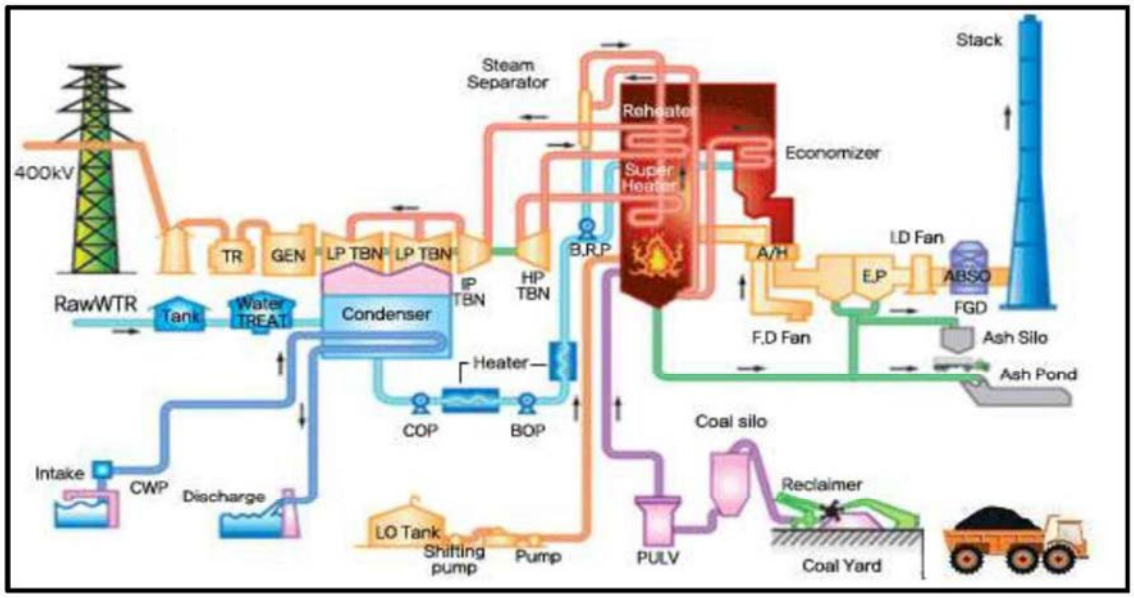
The thermal machines which convert the stored energy in the fuel to the kinetic energy of the rotor have two parts- boilers and turbines. They also include a variety of auxiliary equipment to provide fuel and water to the unit and to eliminate waste gases and products of combustion.

The thermal power generation process involves generation of electricity from burning of coal in two boilers. Coal is pulverized and blown into the boiler furnace where it burns. Water is heated and steam is generated. Steam moves at high speed to a turbine. The turbine spins and drives a rotor attached to a magnet in a generator. The rotating magnetic fields moving across coils in the generator produce electricity.

There is automatic control of coal pulverization of supplied water and fuel of combustion and of superheating. The elimination of ash in the auxiliary process is also automated. Ash is taken to the ash pond in slurry form for disposal. In addition, dry ash system is also installed for collection and use in cement plants, brick plants and low lying area filling.

The factory is a 'hazardous process' unit as defined under Sec. 2 (cb) of The Factories Act, 1948. It is also a Major Accident Hazard Factory as defined under the MSIHC Rules.

Presently MPL has a total strength of 253 management staff, and about 1500 contractor workers working in A, B, C, and General Shifts.



1.3 Scope of Work

The safety audit was carried out on the guidelines as mentioned in Indian Standard IS: 14489 - 1998 on "Code of Practice on Occupational Safety and Health Audit". The broad elements covered in the Safety Audit are as under:

1) *Safety Management Systems*
2) *Safety Training Plans.*

3) *PPE Norms and Practices.*
4) *Compliance with Statutory Requirements pertaining to Safety.*
5) *Fire Hazards and their Control Measures.*
6) *Mechanical/Physical Hazards.*
7) *Electrical System and Personal Safeguarding.*
8) *Safe Operating and Maintenance Procedures.*
9) *Safety Procedures for Contract Work.*
10) *Review of Emergency Planning, Preparedness and Response Systems.*
11) *Safe Handling and Storage of Hazardous Chemicals.*

1.4 The Objectives

i. Examine the existing procedures, system and control measures for health and safety hazards.
ii. Identify potential health and safety hazards not covered by the existing safety systems, procedures & practices.
iii. Recommend improvements for better effectiveness of the existing safety systems, procedures & practices and also other measures of hazards control.
iv. Recommend system, procedures and control measures for identified hazards.
v. Study compliance with critical statutory provisions and relevant codes of practices and recommend actions to be taken, wherever there is non-compliance.

1.5 Methodology

Following methodology was adopted to complete the audit successfully:

i. Study and analyze preliminary information provided by the MPL management in the format sent by the NSC.
ii. Opening Meeting with the Senior Officials of the MPL.
iii. Preliminary walk-through survey of the plant.
iv. Carry out sample inspection of the MPL.
v. Discussion with the Key personnel in group and individually as required to know their views, suggestions, or to verify existence of the systems / procedures.
vi. Study important documents and records.
vii. Concluding Meeting with the senior officials of the MPL to present important / salient observations and recommendations.
viii. Submission of the Audit Report to the MPL Management.

1.6 Opening Meeting

An opening meeting with the main objective of involving senior management at the start of the audit on 16th March, 2021 at 0900 hrs for explaining the scope, objectives and methodology of the Safety Audit by the audit team was held in Conference Hall in Administration Building. Shri Ramesh Jha, Chief Executive Officer and Factory Manager chaired the meeting. The meeting was attended by Senior officials of MPL Plant. The list of Executives / officials who attended the Opening Meeting is enclosed as Annexure – 1.

During the meeting, the Audit Team members made the following points:

i. A brief talk was made by audit team members on various activity of NSC.
ii. The Safety Audit being conducted on an invitation from MPL, Dhanbad. Management shows management keenness to carry out improvements with a view to making the work place safe. Since the plants are represented by the Executives / officials, their involvement and co-operation are essential and important in carrying out the Safety Audit successfully.
iii. The Audit is focused on revealing strength and inadequacies (if any) / weakness in respect of Safety Management system of the plant.
iv. The audit is not an inspection of each and every item, but a sample inspection and study of key records and documents.
v. The Audit Report will be a confidential document between the NSC and the Management of MPL, Dhanbad.

1.7 Study of Documents & Records

In order to check and assess the status of the Environment, Occupational Health and Safety (EHS) Management System prevalent in the departments and facilities, many documents such as Accident Statistics and Records, Safety Policy, Safety Committee Meeting - Agenda Notes and Minutes, Work Permit System, Operating and Maintenance Procedures, Inspection Schedules and Reports, Calibration reports and records of testing of critical equipment, earthing systems, fire extinguishers, etc were perused during the course of audit.

1.8 Departments/Sites Visited

1. Main Unit
2. Generator floor
3. Main Control room
4. DM Plant
5. Caustic and Acid Storage area
6. Fire Pump House
7. LDO/HFO Storage area and unloading station
8. Main Fire Station
9. Hydrogen Generation and Storage room
10. Canteen – 3 nos.
11. ESP 1 & 2
12. JNT area
13. 400 KV Switch yard
14. Effluent Treatment Plant
15. Coal Storage area
16. CHP Control room
17. Main Store
18. Training Centre
19. Occupational Health Centre
20. Cooling Tower
21. DG area

1.9 Concluding Meeting

On the last day of the visit i.e. on 19th March, 2021, the Concluding Meeting was held in Conference room at 1530 hrs. Shri Ramesh Jha, Chief Executive Officer and Factory Manager chaired the meeting, which was attended by senior executives/sectional heads. Closing Meeting is enclosed at Annexure – 2. The audit team presented salient observations and recommendations of the audit.

1.10 Audit Report – (Findings & Recommendations)

Based on the information collected through perusal of records/documents, observations made during the field visit by the audit team, the Observations and Recommendations are presented in Part 2 of this report as followed:

1.11 Disclaimer

The findings and the recommendations mentioned in this audit report are based on the actual condition prevalent in the building during the time of our audit. This report should not be deemed as any warranty or certification of Safety Management System and other technical aspects related to preventing accident in future.

*****

PART – 2

EXECUTIVE SUMMARY

At the request of Maithon Power Limited, National Safety Council (NSC) conducted safety audit of its Plant situated in Dhanbad, Jharkhand. The safety audit was conducted by a 3-member team from 16th – 19th March, 2021. The main objectives of the audit were to particularly examine Occupational Health & Safety (OH&S) systems prevalent in the plant, identify potential H&S hazards and suggest corrective actions wherever necessary.

The information presented in the report is based on perusal of various documents and internal records, sample inspection of the plant and discussions held with employees and management representatives. The recommendations made herein in the report, are based on the conditions and systems prevalent at the plant and hence applicable only to the said plant.

The key findings of the safety audit are summarized in the following paragraphs:

- MPL management gives priority to Safety Awareness among the employees as well as contract workers and ensures availability of adequate tools and financial resources for safety.

- This is highly appreciated that there is no fatal or reportable accident since last 3 years as entire team is taking efforts to maintain safety at workplace.

- Health and Safety Policy is prepared as per as per Rule 62 BH of The Bihar Factories Rules, 1950 under Section 7-A (3), 41-B(2) and 112 of The Factories Act, 1948.

- Well established training by induction video is available in plant for training purpose. Training for top management, employees, and contract workers are well organized

- Safety Committee is available as per Rule 62 – C of The Bihar Rules, 1950 to discuss on safety issues with respective department. All Head of Departments are the participating members. Committee is functioning well.

- Safety Department and management generate and improve safety culture by promotional activities and celebrating National Safety Day, Fire safety day, Road safety week, etc.

- Safety inspection plan and checklists has been prepared and carried out as per schedule. Recommendations in inspection report are complied in time bound manner.

- Occupational health center is available in plant to take care for all the type of medical emergencies.

- All the statutory licenses and approvals are available and copies are available with safety department.

- Fire prevention measures had been taken and all the fire protection equipment's are provided in plant area.

- Comprehensive emergency plan has been prepared and implemented through regular mock drill.

- Statutory requirements with respect to testing of lifting machines/tools and Pressure vessels are complied with.

- SAP is very effectively utilized for Preventive Maintenance System at Maithon Power Limited.

- SMP/SOP has been elaborately documented in SAP and effectively used for Inspection and during Maintenance Jobs.

- Permit to Work procedure envisages various work scenarios like Confined Space entry, Electric Permit, Excavation, General Permit, Hot Permit, Lifting and Slinging, Construction Work, Radiography and Work at Height.

- SOPs for all operation are well documented with JSA included for Job specific Safety requirements.

- Clean stairs with appropriate hand railings, clean and sound platforms with railing and toe boards were observed at all locations inside the plant.

- Hydrogen generation and bottling plant and Chemical labs are clean and properly ventilated.

- MPL is a zero discharge Plant and Rain water harvesting is done.

- Acoustic Guards/Boards have been used to house Turbines and Generators to absorb noise to remarkable limits.

While appreciating the above systems and measures already in practice in the plant, key areas identified for improvement in Safety & Health systems are listed below:

SAFETY, HEALTH AND FIRE MANAGEMENT

- Gate pass of Contractor employees should be issued only after clearance of medical certificate and completed induction training at site. This clause should be included in the Tender document.

- First – Aid boxes are provided at all locations and office area and maintained. Only Name and number of the first aider should be displayed near each first aid box and responsibility should be given to the same authorized person.

- Pre-employment and periodic Medical check-up should be carried out for employees and records should be maintained.

- If LPG cylinders are more than 100 Kg in premises, then License should be required as per Rule 44 of The Gas Cylinder Rules, 2016.

- Colour code of pipeline has been prepared but not implemented at plant level.

- Laboratory: as per Indian Standard 4209 : 1998
  - ⇒ Material Safety data sheets should be maintained in soft as well as hard copy in each laboratory.
  - ⇒ Separate discard policy should be prepared and chemicals should be discarded as per policy only.
  - ⇒ Chemical should be stored as per chemical compatibility chart only.
  - ⇒ Eye washer and safety shower should be maintained.
  - ⇒ Emergency PPE should be available in case of leakage or incident.

- Bonding strips should be provided to all the flange joints of pipeline to avoid accumulation of static charge as per Rule 62 (4b) of The Bihar Factories Rules, 1950 and adequacy/healthiness of earthing connections for all the equipment should be checked at periodic interval of time.

- Foam type extinguisher should be provided near flammable liquid in store.

- Hydrant system (Internal & External), wet risers, Hose reel drums, Hose boxes with separate pump house and separate fire water inventory has been provided as per Table 7 of National Building Code of India, 2016 and as per Rule 62 (11) of The Bihar Factories Rules, 1950. It should be maintained.

- Awareness for firefighting should be increased by advanced training to the employees as well as contract workers.

- Sprinkler system should be provided for coal yard, MOT tanks and it should be maintained as per IS 15105:2002 and IS 9972:1981.

- Illuminated signages at all the exits and arrow indicating the way to the escape route should be provided at a suitable height from the floor level on the wall as per 3.4.7.4 of National Building Code of India, 2016 – Part IV.

- Emergency Control Center should be declared and should be provided with necessary documents and equipment's required to handle emergency.

- All the vehicles including two wheelers should be parked in dedicated parking and in reverse direction only.

PHYSICAL & MECHANICAL HAZARDS AND THEIR CONTROL MEASURES

- Identification No., SWL, Test Date and Next Due Date were not visible in most of the EOT cranes and other lifting machines.

- Pressure Vessels did not have Safe Working Pressure marked on the body of the vessels.

- Pressure Gauge did not have the Maximum Safe Working Pressure limit marked in Red colour.

- In the laboratory expired chemicals were in use.

- Chemical containers are not sorted according to their compatibility.

- Full Body and Eye shower was not charged and could not be opened immediately. Eye shower pressure was very high and could injure the eye.

- No Smoking/ Smoking Strictly Prohibited sign was illegible in Hydrogen plant area.

- At the hydrogen charging area in the Power Plant, H2 gas pipe should be clearly identifiable and gas flow direction indicated.

ELECTRICAL SAFETY

- Fencing is not constructed to 250 KVA out door transformers at RWPH. The transformers should be efficiently protected by constructing fencing not less than 1.8 meter in height so as to prevent access by an undesignated person and the fencing should be connected to earth circuit.

- Power and instrumentation cables are laid in same cable track at FWPH. If any short circuit occurs in power circuit, it will affect the instrumentation system. Hence these two circuits are to be laid separately.

- The diesel tank of diesel engine at FWPH is not connected to earth circuit. For dissipating the static current formed in the diesel tank, earth circuit should be connected to diesel tank.

- Trees are grown up and its branches comes through cable bridge near CHP. In summer, it may dry which attract fire and damages the cable. Hence remove these trees from Cable Bridge.

- Water is accumulated in cable trenches at DM plant MCC room & switch yard. Slope is not maintained while constructing cable trenches. The accumulated water should be removed. The cable trench should be maintained dry and clean.

*****

OBSERVATIONS	RECOMMENDATIONS

PART – 3

SAFETY AND HEALTH MANAGEMENT SYSTEM

3.1 HEALTH AND SAFETY POLICY

MPL, Dhanbad management has prepared Health and Safety Policy covering Safety and Health. Copy of Health and Safety Policy is attached in Annexure – 3. Environment policy has been prepared separately.	This is in order as per Rule 62 BH of The Bihar Factories Rules, 1950 under Section 7-A (3), 41-B(2) and 112 of The Factories Act, 1948.
Both the policies are available in English and Hindi and displayed.	Appreciated.
The existing H&S Policy is signed by Managing Director & Chief Executive Officer of the company. The policy is revised in 11th March, 2019.	This is in order as per the provisions of Sec. 7A (3), 41B (2) of The Factories Act, 1948. Policy should be revised at regular interval.
The Policy is displayed in all the offices, Main gate, Central Control room, units, etc.	Good system.
The policy is publicized among the employees and workers by included in Induction training.	Good system. It should be continued.
The Policy revision document is not available.	The Health & Safety Policy should be revised as often as appropriate but it is necessarily required to be revised under the following circumstances: ▪ Whenever any expansion or modification having implications of H&S of persons at work is made or ▪ When new substance or articles are introduced in the manufacturing process having implications on H&S of persons exposed to such substances.

OBSERVATIONS	RECOMMENDATIONS
3.2 SAFETY ORGANISATION	
MPL, Dhanbad has established Safety department in their unit.	This is in order as per Rules 62-B of The Bihar Factories Rules, 1950 under Section 40B of The Factories Act, 1948.
Presently Shri A. K. Manna, Head – Fire & Safety has been looking after the safety functions who is qualified in Safety. He functionally reports to CEO. He is assisted by Shri Abhijit Pandey, Lead Engineer and Shri Rajkumar, Lead Fire. Both are qualified and well experienced in their area. Shri Pandey is assisted by 2 nos. of Safety officers and one Contractor Safety officer to handle the activities. Organisation chart of Safety Department is attached in Annexure – 4.	
The safety department is found to perform their duties of advising and assisting the management in fulfillment of its obligation.	
All the statutory licenses copies are available with Safety Department.	
3.3 SAFETY COMMITTEE	
The plant has constituted a Safety Committee to promote co-operation between the management and workers in maintaining proper safety and health at work. Safety Committee Governance Structure is attached in Annexure – 4.	This is satisfactory and is in line with the statutory requirement as per 62 - C of The Bihar Factories Rules, 1950 under sections 41 and 41-G of the Factories Act, 1948.
The Committee comprises total 26 members having equal representation of management, workers and contractors.	This is in order as per 62 – C (3) of The Bihar Factories Rules, 1950.
Chief O&M is the Chairman of the Committee. Head Fire & Safety is the Secretary of the Committee.	Thai is in order as per 62 – C (2a & 2b) of The Bihar Factories Rules, 1950.

OBSERVATIONS	RECOMMENDATIONS
The Committee has management members representing from the different departments like Mechanical, Electrical, C&I, HR, Contract Material, CHP, FMO, Civil, Environment, Chemistry, Purchase and Store.	This is in order as per 62 – C (2C) of The Bihar Factories Rules, 1950.
Committee meets once in month. Last Committee meetings were held on 28.01.2021, 26.12.2020, etc. Attendance register for the committee are maintained.	This is in order.
The agenda and minutes of the meeting are prepared and circulated to the committee members. Action part of each item of the agenda has been decided in the meeting and target date is assigned to individual person / department for effective functioning of the Committee. At the beginning of each meeting, status of implementation of decisions taken in the earlier meeting is discussed. Target date and responsible person is mentioned in the MOM for effective implementation.	Appreciated. It should be continued.
Constitution Order of Safety Committee is once in 2 years.	This is in order as per Rule 62 – C (4) of The Bihar Factories Rules, 1950.

3.4 SAFETY INSPECTION

Safety Inspection is carried out regularly to identify unsafe act are as follows: i. Safety officer is taking Inspection round on daily basis. ii. Electrical, Mechanical, Vehicle Department – Monthly basis. iii. Daily Site round by Cross functional team. Schedule has	Appreciated. It should be continued.

OBSERVATIONS	RECOMMENDATIONS
been prepared including top management. iv. Daily theme-based round is taken which is received from Corporate office. v. In addition to this, Pre-monsoon inspection, slip trip inspection, Oil leakage inspection, Coal accumulation inspection and Gas cylinder inspection is carried out. Record of safety inspection is maintained.	
3.5 SAFETY AUDITS	
3.5.1 Internal Safety Audit	
There is no system of conducting internal audit comprehensively. Only Group safety audit has been carried out by Corporate office.	Comprehensive Internal safety audit should be carried out once in year with team from different sections like: 1. Production 2. Maintenance 3. Electrical 4. Safety & Fire Recommendations arising out of internal audit should be implemented in a time bound programme.
3.5.2 External Safety Audit	
External audit carried out once in 2 years from M/s. National Safety Council. Compliance is done on the recommendations.	It is good that management have keen interest to improve the safety management system.
3.6 ACCIDENT REPORTING, RECORDING, INVESTIGATION & ANALYSIS	
3.6.1 Reporting & Recording of Accidents / Dangerous Occurrences	
MPL Dhanbad has a well laid down and detailed procedure for reporting, inquiry (investigation) and recording	Good system. It should be continued.

OBSERVATIONS	RECOMMENDATIONS
of accidents/near-miss incidents. The procedure is divided into Accident / Incident Reporting, Reportable accident and Near-miss and operated on SAP system. Separate investigation forms are prescribed for reporting of accidents. Incident reporting in following fashion: Observer I SAP I Safety + Group HOD I Concerned HOD I If Medium/High – Managing Director Contractors also refer the same reporting system.	
Accident data are maintained by the Safety Department. The accident data for the last 5-years is maintained.	It is appreciated that there no fatal and reportable accidents in last 4 years and First-aid cases are also in decreasing trend. But, it should be continued by aiming “Zero Accident” and follow Safety Management plan.
Accident Register & Register of Accidents & Dangerous Occurrences in Form No. 23 is maintained with NIL report every year.	This is in order as per Rule 104 of The Bihar Factories Rules, 1950.

3.6.2 Analysis and Investigation of Accidents

Accident investigation has been carried out by team appointed by Unit Head. Team is deputed as per the nature of the accident. Separate procedure is prepared with Doc. No. TPSMS/GSP/IRI/011 – Rev. 01. Final report is submitted with compliance with target date. Then this report is discussed within Safety committee meeting even.	Good system. It should be continued.

OBSERVATIONS	RECOMMENDATIONS
If incident is high potential or reportable, then this investigation report submitted to Occupier of the company.	
Analysis of accident is carried out as per IS 3786 – 1983 and prepare accident reduction programme and action plans to improve safety performance and records are maintained.	Appreciated. It should be continued.

3.7 SAFETY EDUCATION & TRAINING

There is a separate well designed training centers available:	Management is commended for this facility for employees.

SN	Name	Cap.
1	Safety Hall	40
2	Conference Hall	25
3	Conference	20
4	MFI Hall	30
5	Field Hostel	15 - 20

All the infrastructures equipped with audio visual aids to keep abreast of the facilities provided by the center with modern systems.	
The activities for these training centers are handling by Shri Rahul Roichowdhary, Lead Associate - Business – HR.	
Training calendar and schedule is prepared with around 45 programmes which includes all safety, health and environmental programs with their duration and catagory for the year 2020 – 21 and followed.	Appreciated. It should be continued.
Training has been provided by Interdepartmental trainer and training has been given under knowledge sharing programme.	Good system. It should be maintained.

OBSERVATIONS	RECOMMENDATIONS
Induction training for new joinee is given in which safety, first-aid and fire modules are included and then Production and utilities are covered.	Good system. It should be maintained.
On-job training is given as per assessment done and before joining at shop floor for three months to fresher.	Appreciated. It should be continued.
Employee training evaluation has been available and feedback form is available online.	Good system. It should be continued.
Attendance register is maintained for all the employees, contract workers and security personnel's.	
The employees are deputed to attend external training programmes and also sent at Inter-plant level.	Appreciated.
There are 25 of employees got First Aid training by St. John Ambulance Association, Kolkata.	Good system. Refreshing training in between also to be considered.

3.8 SAFETY COMMUNICATION / MOTIVATION / PROMOTION

Suggestions scheme is in place and suggestion boxes are available at all the Canteen areas, Operation offices, office areas and Fire station.	Good system. It should be continued.

OBSERVATIONS	RECOMMENDATIONS
	
	
Employees are rewarded on monthly and fortnightly basis for best suggestions.	
Safety awareness is found good among employees and contract workers as TBT is conducted for all the activities and records are maintained.	Good system. It should be continued.
Following Safety Management systems are following in MPL to enhance the safety awareness and maintain the safety system:	Appreciated. Journey to the excellence should be maintained.

OBSERVATIONS	RECOMMENDATIONS
1. Safety Management Systems: Safety Leadership Approach 2. Technological Intervention -Safety Management/ Process Safety 3. EPM Processes – Safety Management 4. Safety Excellence Journey 5. Safety Observation Cycle 6. Safety Trackers Details of safety management and List of Safety Procedures and EPM Processes are attached in Annexure – 6 & 7.	
Plant celebrates National Safety day/week, Fire Safety Week, World environment day and different activities are also conducted. Following activities has been conducted during these celebrations: a) Safety slogan competition b) Best Safety Performance Awards Distribution c) Poster competition for employees and their family members. d) Safety Flag hosting e) PPE Demonstration f) Fire Mock drill g) Fire equipments demonstration h) Fire Training programmes i) Training. Safety posters, accident statistics, etc have been displayed on Safety Alert Notice board.	Good system. It should be continued. It is suggested that, Electrical safety week should be started.
Statutory warning like speed limit, no smoking signs, safety instructions are provided and authorized entry, no use of mobile phone are displayed in hazardous areas. In addition to this, posters are displayed in many areas of the plant for awareness.	Good system. It should be maintained.

OBSERVATIONS	RECOMMENDATIONS
3.9 HAZARD IDENTIFICATION & RISK ASSESSMENT (JSA, QRA, HAZOP)	
Hazard Identification and Risk Assessment (HIRA) study has been conducted to detect and assess hazards in the operations and processes as per OSHAS 45001 with Doc. No. TPSMS/GSP/HIRA/005 in 2016 and risk register is prepared.	This is in order. Risk register should be updated. If new machine / process is incorporated or old machine / process added / deleted, then HIRA should also be reviewed / revised.
Job safety analysis is carried out for non-routine activities.	
Criteria for HIRA are attached in Annexure – 8.	
HAZOP studies and QRA study is not carried out for hazardous storage area and their pipelines.	Technical studies should be carried out and effect for the same should be reviewed.
3.10 SAFETY MANUAL	
Safety Manual is prepared and followed for MPL unit.	Appreciated. Copies for the same should be available in different departments and training center for reference.
Content of Safety manual is attached in Annexure – 9.	
3.11 PERFORMANCE APPRAISAL SYSTEM	
Performance Appraisal is included with 10% criteria allotted for safety depending on the work area and target improvement or each employee.	Appreciated. It should be maintained.
3.12 SAFETY BUDGET	
There is a system for Safety Budget which has been approved by Unit head and will be used for the following Safety Activities. 1. Safety Training 2. Inspection and Audit 3. Rewards 4. New Technology development	It is a good practice.

OBSERVATIONS	RECOMMENDATIONS
5. Procurement of PPE 6. Safety week, Fire week, etc. 7. Procurement of fire fighting equipments and tools 8. Statutory signages. In addition to this, approval has been taken as a special case as and when required.	
3.13 SAFETY LIBRARY	
It was informed that, company is using safety related information online and some statutory books are available with Safety Department.	It is a good practice. However it is suggested to ensure a separate safety section should be provided in which safety related reading materials / books on various Acts, Rules, Circulars, safety magazines, Indian standards, code of practices, safety manual, etc. available for reference purpose.
3.14 CONTRACTOR SAFETY SYSTEM	
Contractors / Agencies for man-power supply are selected depending on the nature of work. However, their safety performance is considered in selection. Separate Guidelines on contractors' safety with Vendor Evaluation form is prepared with Doc. No. TPSMS/GSP/CSM/015 – Rev. 05. In addition to this Contractor field safety audit is conducted.	Good system. it should be followed.
Contractors / Agencies are required to observe OHS Clauses in as per Contract document. Further to that, If the contractor fails in providing safe working environment, Penalty clause is there as Clause in agreement.	Good system.
As per the clause on PPE in agreement for manpower supply service provider, Contractors / Agencies are required to provide all the necessary PPE's as per Clause of the agreement.	System is in place but not followed. It is suggested that, Work permit system should be strengthening and PEP talk should be given by supervisor before start the work. After submission of PEP talk form,

OBSERVATIONS	RECOMMENDATIONS
	work permit may be signed from site incharge.
During the visit it is found that contract workers are not wearing safety appliances and following safety rules near construction and maintenance area.	
Pre employment & periodic medical check-up Health Examinations of the Contractor's labours is conducted but not specified.	Pre employment & periodic medical check-up of contractor workers Clause should be incorporated in the Contract Document. The verification system should be there before entering in the MPL premises.
Dedicated area like canteen and shelter place is provided for contractors by the Management. But, it is found that, contractor workers are not using the same. Tiffin boxes are available at many places in the production and store area.	It is suggested that, Inspection should be carried out by Welfare officer on monthly basis and report should be maintained.
Contractor's vehicles and two wheelers are not parked in designated area.	Vehicles including two wheelers should be parked in dedicated parking area only and that should be in reverse condition.
LPG cylinders of contractors are stored at backside of the store.	Separate area should be provided for the storage of LPG and minimum quantity of the cylinders should be maintained.

3.15 FIRST-AID & MEDICAL

3.15.1 First-Aid Station and boxes

Total 31 nos. of First aid boxes are provided in all the plant areas. List of first-aid boxes is available.	This is in order as per Rule 66 of The Bihar Factories Rules, 1950.
Inspection of the boxes is carried out regularly once in month and register of inspection is maintained.	Display the name and telephone no. of first-aider near the first-aid boxes. Each first aid box should be under the charge of a separate responsible and first aid trained person (holding certificate of first aid) who should be always readily available during the working hours of the station as per Section 45 of the Factories Act, 1948
The notice containing name and telephone number of first-aider is not provided near the box.	

OBSERVATIONS	RECOMMENDATIONS
	and Rule 66 of The Bihar Factories Rules, 1950.
3.15.2 Trained First-Aiders	
There are 25 of employees got First Aid training by St. John Ambulance Association Kolkata.	Good system. Refreshing training should be provided as per Section 45(3) of the Factories Act 1948.
3.16 OCCUPATIONAL HEALTH CENTRE (OHC)	
MPL, Dhanbad is having separate OHC in the Admin. building. Dr. Pankaj Kumar Singh, MBBS is Chief Medical Officer empanelment to take care of medical emergency. Doctor has completed AFIH course. Doctor and staff is available full time in colony itself. In addition to this, 3 nos. of doctors are assisted to CMO. OHC is handling by one fulltime staff nurse, ANM, Pharmacist and 9 assistants. Medical facilities should be provided in dispensary to handle medical case during emergency. Health register in the format of Form No. 16 is maintained.	This is order as per Rule 62-OH of The Bihar Factories Rules, 1950.
A full fledge hospitals are empanelled nearby as follows: 1. Dhanbad hospital – 40 Km 2. Durgapur Govt. Hospital – 45 Km 3. DVC ESI hospital – 16 Km.	
For continuous backup, two ambulances are provided with basic facilities and 24x7 driver availability.	This is a good practice to facilitate medical treatment of the employees of the plant.
All biomedical waste which is collected is send to M/s. Asarfi Hospital Limited. It is authorized by State Pollution Control Board with Lic No. JSPCB/HO/RNC/BMW –	Satisfactory as per The Bio-Medical Waste (Management and Handling) Rules, 1998 are conferred by section 6, 8, 25 of the Environment (Protection) Act, 1986 (29 of 1986).

OBSERVATIONS	RECOMMENDATIONS
7856589/2020/5103/12/2020 dated 03.12.2020 which is valid upto 30.09.2021.	

3.17 PRE-EMPLOYMENT AND PERIODICAL MEDICAL EXAMINATIONS

Pre-employment medical examination is conducted for before joining from outside facility and records are available with HR Department. Periodic medical checkup is carried out annually for all the employees and once in six months for employees working in Hazardous area and records are maintained.	Pre-employment and periodic medical examination should be carried out for all the employees as well as contractor workers as per Rule 62 NH (1a & 1b) of The Bihar Factories Rules, 1950. It is suggested that Health Surveillance Matrix should be prepared with reference to the HIRA document and implemented.
Separate hygiene test for canteen workers is carried out.	Annual medical examination and hygiene test should be carried out once in 15 days for all the canteen staff as per Rule 71B of The Bihar Factories Rules, 1950.

3.18 COMPLIANCE WITH STATUTORY REQUIREMENTS

3.18.1 Applicable Statutes

There is a responsibility on the management of MPL, Dhanbad to comply with the provisions of various relevant statutes on Safety viz :-

i. The Factories Act 1948, (FA) and The Bihar Factories Rules, 1950.
ii. Environment Protection Act, 1986.
iii. The Air (Prevention and Control of Pollution) Act, 1981.
iv. The Water (Prevention and Control of Pollution) Act, 1974.
v. Public Liability Insurance Act, 1991 and Rules 1991 (Amended in 1993).
vi. Storage license under SMPV (Unfired) Rules, 1981(As amended in 2002)
vii. Gas Cylinder (Amendment) Rules, 2016.
viii. Petroleum Act, 1934 and Petroleum (Amendment) Rules, 2011.
ix. Central Electricity Authority Regulations, 2010.

3.18.2 Licenses

Availability and Validity of the following Licenses were verified:

i.	Factory License of Reg. No. FCA1535400248101 in the format of Form No. 4 under Rule 4(4) for 4000	This is in order as per The Factories Act, 1948.

	OBSERVATIONS	RECOMMENDATIONS
	nos. of employee and 5000 HP received from Factory Inspection Department which is valid till 31.12.2030 is available.	
ii.	Environment statement for year 2018 – 19 has been submitted on 29.07.2019.	This is in order.
iii.	Consolidated Consent for Water, Air from Jharkhand State Pollution Control Board having Consent No. JSPCB/HO/RNC/CTO - 5926045/2020/2 dated 01.01.2020 is available which is valid till 31.12.2024. License for Hazardous waste having Lic. No. JSPCB/HO/RNC/HMW – 360249/2017/5 in the format of Form 2 dated 08.05.2017 is valid upto 23.12.2025.	This is in order as per Section 25 & 26 of The Water (Prevention and Control of Pollution) Act, 1974, as per Section 21 of The Air (Prevention and Control of Pollution) Act, 1981, Rule 6 (2) of The Hazardous Waste (Management, Handling and Transboundary Movement) Rules, 2016under The Environment Pollution Act, 1986.
iv.	License to Storage and use of Petroleum Class C – 12185 KL has been received from PESO having license No. P/HQ/JH/15/1060 (P259489) valid till 31.12.2022 is available in the format of Form No. XV.	This is in order as per Petroleum Act, 1934 and Petroleum Rules, 2011.
v.	License to Storage and use of H2 cylinder has been received from PESO having license No. G/HO/JH/05/77 & GHO/JH/06/76 (G28906) dated 18.08.2018 valid till 30.09.2023 is available in the format of Form No. XV.	This is in order as per Gas Cylinder Rules, 2016. License for LGP gas cylinder storage and use should be taken.
vi.	License for Boiler for Registry number of boiler BR/8922 and BR/8971 under Regulation 389 with validity is available.	This is in order.
vii.	Public Liability Insurance Policy with Policy No. 03020003580500 is available from M/s. Tata AIG General Insurance Company Limited, Mumbai	This is in order as per Public Liability Insurance Act, 1991.

	OBSERVATIONS	RECOMMENDATIONS
	which is valid till midnight of 31.03.2021.	
viii.	Stability Inspection has been conducted by Competent Person, M/s. K. K. Engineering, Jharkhand in January 2021 & February 2021 and Stability Certificates has been issued dated 22.03.2021 valid up to 19.03.2024. Report is available.	This is in order as per Rule 3A of The Bihar Factories Rules, 1950. This should be carried out for all the buildings.
	 Stability of Storage tank support should be added in the list.	

3.19 HEALTH AND SAFETY IMPROVEMENT PLAN AND TARGETS

	Health and Safety improvement plan has been prepared and reviewed on yearly basis.	Appreciated. It should be maintained.

*****

OBSERVATIONS	RECOMMENDATIONS

PART – 4

CHEMICAL HAZARDS AND CONTROL MEASURES

4.1 STORAGE & HANDLING OF HAZARDOUS CHEMICALS

Hazardous chemicals stored in bulk quantities are HCL, H2SO4, Caustic Soda, Ferric Chloride, Sodium Hypochlorite etc which are stored in Tanks. Apart from these, Chlorine Toners and Hydrogen Cylinders in H2 generation Plant are also stored.	Noted.
Each of the Tank Farms have dyke. Acid tank farms are provided with neutralizing pits in case of leakage.	Good.
MSDS and SOPs for Unloading/Handling of the chemicals are displayed at the respective sites.	The Full Body /Eye Shower may be moved to a easily accessible spot outside the dyke wall.
Full Body /Eye Shower is provided in the Acid Tank Farm. In HCL Tank Farm area the Shower is within the dyke. When checked it was observed that turbid water gushed out at very high pressure.	Clean potable water to be supplied to Eye/Body shower. Each shower should have a pressure regulator. IS: 10592 may be referred for Eye/Body shower.
It was observed that HCL Tank and Caustic Soda Tank had the same colour in DM Plant.	Different colour as per Colour Code to be maintained for different chemicals.
License No. G/EC/JH/06/319 has been renewed up to 30th Sept. 2023 for Chlorine Storage.	In Order.
MSDS and Safe handling procedure is displayed in the Store.	MSDS and Caution/Danger boards in Local language to be displayed at the entrance.
There are chlorine leakage sensors set at 1 ppm with Alarm system. Automated Caustic Soda release valve for neutralization is in operation.	

OBSERVATIONS	RECOMMENDATIONS
Required PPEs including 5 sets of SCABA are available. Chlorine Toners are hydrotested and date of next date is marked on the toners.	To be maintained.
In H2 Plant MSDS and DOs and DONTs are displayed prominently.	
Audit Team was happy that Mobiles had to be handed over to the Security at the entrance.	
License for generation and storing 120 H2 cylinders have been renewed up to 30.09.2023.	
H2 Plant was clean and well maintained. H2 sensors were with Alarm system connected to MCR were observed in Generation, Filling and Storage areas.	It is suggested that insulated chains may be used to eliminate any spark.
Cylinders were kept upright with caps and chained.	
Light fittings were Flame proof type.	

4.2 MATERIAL SAFETY DATA SHEET (MSDS)

MSDS for all Hazardous Chemicals and Gases have been displayed in the vicinity of Handling and Storage areas. MSDS boards are available both in local language and English.	MSDS may be displayed at the entrance or boundary walls for all stake holders and visitors to check inadvertent entry into hazardous areas.
At some locations like Chlorine Storage area MSDS boards are inside the storage area.	

4.3 COLOUR CODE FOR PIPELINES

Colour Code Matrix for Pipelines were displayed at few locations only.	Colour Code Matrix need to be displayed at the entrance and other prominent locations to caution all visitors to the Plant.
Adherence to the color code is not strictly adhered to. At H2 Plant Air	Color Code once fixed should be strictly followed.

OBSERVATIONS	RECOMMENDATIONS
and Water pipes were both in Blue color.	
The direction of flow was seen at very few places	Direction of Flow and the name of the Liquid / Gas being conveyed to be clearly written on the pipelines and also storage Tank. IS: 2379 : 1990 may be referred

4.4 LABORATORY SAFETY

There are two Laboratories inside the Plant the Main Lab is at the DM Plant.	
Laboratory is clean and spacious.	
Chemicals/Reagents were not arranged according to their compatibility. Acid and alkali bottles were side by side. Label on few bottles showed the that expiry date was over.	Chemicals to be arranged as per compatibility.
A fume chamber and a Full Body-cum-eye shower was seen inside the Lab.	This to be sorted out.
The body/Eye shower was not charged.	Good. Please Refer IS: 10592 for Full body and Eye Shower

4.5 TRANSPORT SAFETY AND TRAINING TO DRIVER

Coal is the main input material which is transported by Road. A huge fleet of dumpers are operated through seven contractors to transport coal from linked Collieries to Coal Yard of MPL. Safe movement of such large fleet is controlled through RFDI (Radio Frequency Detection and Identification) system and GPS fitted in each dumper.	
Ash Disposal bunkers are outside the working area and do not pose any safety problem. Ash is disposed	

OBSERVATIONS	RECOMMENDATIONS
through Bulkers or Dumpers. Loaded dumpers have to be covered to prevent any spillage or ash getting blown away by wind affecting the environment.	
Inside the Plant a speed limit of 16 KMPH is maintained by all vehicles.	Appreciated.
All drivers of dumpers of contractors as well as operators of other machines like Hydra, mobile cranes, dozers and excavators are given safety training.	HIRA and JSA for Rail Movement and unloading have to be developed.
All vehicles engaged by MPL have rear view cameras and reversing horns.	
Transportation by Rail is also to start within few months as Rail Track laying and Track Hoppers are under construction.	

*****

OBSERVATIONS	RECOMMENDATIONS

PART – 5

PHYSICAL & MECHANICAL HAZARDS AND CONTROL MEASURES

5.1 TESTING & EXAMINATION OF PRESSURE VESSELS/PLANTS

List of Pressure Vessels/Air Receivers are maintained by the Maintenance Planning Group in the SAP system.	Appreciated.
All the Air Receivers are Examined by Competent Authority every six months.	Conforms to Bihar factory Rules 1950 (BFR 50) Rule 57 Section (d) (i).
Test Certificates and Competency certificates are up to date.	Appreciated.
Since internal examinations cannot be done due to operational constraints, UT is carried out during half yearly examination.	To be maintained.
Hydrostatic Tests of Receivers in continuous use are carried out every four years.	
The PVs had ID No., Capacity, Test Date and the Next Due Date marked on the body.	Maximum Permissible Working Pressure may also be marked on the body of PVs.
The Pressure Gauge did not have the Maximum Permissible Working Pressure marked in Red.	Not in conformity with BFR 57 (c) (ii). MPWP may be marked in Bold Red.
Compressors are mainly of centrifugal type.	To be maintained.
The Compressor House of Power Plant was found to be adequately ventilated and illuminated.	

5.2 TESTING & EXAMINATION OF LIFTING MACHINES & TACKLES

A comprehensive list of all cranes, lifting machines, tools and tackles are	Commendable and appreciated. For all new lifting tools and slings the

OBSERVATIONS	RECOMMENDATIONS
maintained in the SAP system.	date of putting it into service may be mentioned.
Types of Lifting machines and tools used at MPL are EOT, HOT and Monorail Hoists, Pulling & Lifting Machine, Chain Pulley Blocks, Wire Slings, Mobile Cranes and Hydras etc.	Noted.
All the EOT Cranes, other lifting machines are tested annually by Competent Person.	Good. Test certificates verified. Competency certificate examined.
Measurement of Rope dia is either not done or not mentioned.	
On the two EOT cranes on Turbine floor the SWL is not clearly visible from the floor. Identification number not marked on the body	To be painted in sufficiently large and bold letters.
Trained operators are engaged for the EOT cranes. Operator cabins have safe access, are well ventilated and have non conducting flooring.	
Records of routine inspections with checklists could not be produced for the lifting machines in Power Plant areas.	Periodic Inspection with checklists to be regularized.
Checklist for periodic maintenance of all other equipment is available	Good.
Records of inspection of conveyors, drives, rail tracks, etc. are done by CHP.	Appreciated.
Mobile cranes Hydra machines, Dozers etc. are tested by competent persons and certificates are available.	Good.
Wire Slings do not have tags indicating ID, SWL, Test date and next due date.	All wire slings need to be tagged. Supplier also should submit Test Certificates of Ropes during delivery

OBSERVATIONS	RECOMMENDATIONS
Lifts in the Plant and Offices are Tested every six month and Test Certificates verified. Copied of certificates were pasted inside some lifts.	Good Practice. To be maintained.

5.3 MANUAL AND MECHANICAL MATERIAL HANDLING

5.3.1 Manual Material Handling

MPL has no Manual Material Handling practices.	Noted.

5.3.2 Mechanical Material Handling

Coal is the major fuel which is procured by Rail and by Road.	To be maintained.
Rail wagons are offloaded on the Track Hopper. Coal is transported to Coal beds through conveyors.	
Track hopper is well maintained and free of accumulation of stones or other foreign material.	
A Stacker cum Reclaimer is used both for stacking and reclaiming coal.	
Seven different contractors operate dumpers for transporting coal from their designated coal mines to MPL. They have also their designated yards for dumping coal.	
Each dumper is fitted with Radio Frequency Detector Identification (RFDI) to digitally identify the contractor and the source. The system also guides the dumper to its designated yard.	This unique system has considerably reduced road accidents involving dumpers.
Each dumper is also fitted with GPS for tracking their movement.	Appreciated.
Dumpers also have rear view cameras and reversing horn.	

OBSERVATIONS	RECOMMENDATIONS
Dozers are deployed at the coal feeding hoppers and a very good system to check any criss-cross movement.	Appreciated.
Mobile Cranes (tyre mounted) and new generation Hydra machines are deployed for material handling.	
Series of Conveyors transport coal from Coal yard to Crushers, Mills and to Boiler bunkers.	Appreciated. To be maintained.
Conveyors have Pull Chords and emergency stop switches. Wire mesh nets have been provided to prevent contact with running belt.	Cables to securely laid on the trays and cable trays to be made free of coal dust.
However, at BCN 3A/3B, coal spillage was observed and an electric cable had fallen from the cable tray on the walkway. Any leakage of the cable could be dangerous.	Laudable.

5.4 GUARDING OF MACHINES & DANGEROUS AREAS

Rotating parts of all machine drives and couplings were found stoutly guarded. Greasing/lubricating points could be safely accessed.	Confirms to Section 21, 22 and 26 of FA 1948.
The rotating drums in the underground and over ground conveyors, couplings and nip points are provided with guards. Walkways are protected.	To be maintained.
Drains are mostly found covered.	Safety measures taken is appreciated.
At the Project site of FGD, stairs of the new stack under construction have been provided with hand rails and mid rails and nets to arrest any fall.	
The stack at CHP has vertical fixed type steel ladder.	The vertical ladder may be replaced with a spiral ladder with handrails and platforms at suitable heights.

OBSERVATIONS	RECOMMENDATIONS
5.5 STORAGE AND HANDLING GAS CYLINDER	
Only DA cylinders are used in MPL for Gas cutting jobs and LPG is not permitted.	Noted.
DA and Oxygen Cylinders were found placed on trolleys during cutting activities. Shifting of gas cylinders inside the plant is also in trolleys.	Appreciated.
Flash Arresters are in use both at Cylinder and Torch end.	Good Practice.
At the storage areas, cylinders were found properly chained and capped.	Confirm to Gas Cylinder Rules, 2016.
However, at the cylinder storage area of contractors, DA and Oxy cylinders were stacked side by side.	At least 20 feet distance should be maintained between Flammable gases and Oxygen or there should be Fire wall of minimum 5 feet high.
Empty and Loaded cylinders were capped and stored in their respective storage areas and chained.	Confirm to Gas Cylinder Rules, 2016.
In the canteens LPG cylinder were fitted to manifolds. The Flow regulator valves and flow meters were fitted to the manifold inside the room.	Control valve and the flow meter should be place outside the room near the entrance so that in case of any fire inside the room, gas flow can be cut off from outside.
At the Hydrogen generation plant, empty and loaded cylinders were separately stored, capped and chained.	It is suggested that non-ferrous chains be used inside H2 Plant and at the H2 cylinder storage spots.
Signage like 'NO SMOKING' has become illegible	Very Prominent "NAKED FLAME AND SMOKING STRICTLY PROHIBITED" signage at all the approach roads to H2 plant should be put up.

OBSERVATIONS	RECOMMENDATIONS
5.6 MEANS OF ACCESS, PLATFORMS & RAILINGS	
Stairs with hand rails and mid rails have been provided in all the staircases of Power House, CHP, Pump Houses and offices. Platforms are guarded with railings. Stairs and platforms are clean and free of any dust, oil or water spillage.	In conformity with Section 32 of FA 1948.
Even at dust prone area of Coal handling Plant all stairs, Landings, Platforms and Machine floors were clean and sufficiently protected.	Appreciated.
The approach to LDO tank is from HFO Tank Farm side.	Separate entry directly to LDO tank is suggested.
5.7 VENTILATION, ILLUMINATION, NOISE AND VIBRATIONS	
a) The layout and design of Shops have taken care of ventilation at all floor levels adequately. There is sufficient flow of natural air. Control Rooms are Airconditioned.	In conformity with Section 13 of FA 1948 and Rule 20 (b) of BFR 1950.
Exhaust fans are provided in Compressor Houses. Pump houses have large openings for sufficient drought.	
The underground conveyor galleries have Ventilation system to supply clean air.	
b) The shop floors get sufficient natural light during the day. Light fittings provide additional illumination wherever required.	In line with Section 17 of FA 1948 and Rule 31 and 32 of BFR 1950.
Basement of Coal receiving hoppers at CHP and Underground conveyor galleries are adequately illuminated. There was no glare from any of the light fittings.	Appreciated.
Illumination mapping has been carried out MPL and Readings were	

OBSERVATIONS	RECOMMENDATIONS
all within norms.	
c) High noise emanating equipment like Turbines and Generators have been enclosed in Acoustic Guard housing which has considerably reduced noise.	In line with Section 17 (3) (a) and Rule 33 of BFR 1950. Appreciated. To continue at regular intervals for both Day and Night.
Signage in high noise areas are few and not very prominent.	More signage in high noise areas needed.
No worker was seen using Ear Plugs. One workman from M/s SMCS said that the contractor has not provided him with Ear Plugs.	Use of Ear Plugs to be encouraged. All PPEs to be supplied to workmen.
d) Vibration frequency of Turbines /Generators are continuously exhibited in Control Panels through the DCS system in MCR and abnormal vibration would cause tripping as Interlocks are integrated.	Good.
Vibration measurement for ID/FD Fans and other machineries in CHP are done by Mechanical team periodically.	Good.
e) Ergonomics is not part of the regular training program. But brooms, mops etc supplied to cleaning staff do not strain the lower back	Good.
In the Control Rooms the position of online screens and sitting are arranged to give comfortable viewing without any strain on the neck or back.	Good.
Sitting arrangements in the offices and computer desks are ergonomically designed.	

OBSERVATIONS	RECOMMENDATIONS
5.8 PREVENTIVE MAINTENANCE SYSTEM AND RECORDS	
MPL has a well-established system of Preventive Maintenance.	SAP system can be used for various analysis to come up with Predictive Maintenance
A comprehensive list of all mechanical equipment is maintained in SAP and Maintenance schedule has been designed on the basis of past experience and guidelines of OEM. Sometimes preventive maintenance is also necessitated if Vibration results or Oil tests so demands.	
SOP for Cross Function Safety Team in critical overhauling is well documented with JSA.	
Checklists for maintenance jobs are part of SMP.	Good.
5.9 WORK PERMIT SYSTEM	
All kinds of jobs like General Permit, Electrical Permit, Hot Work Permit, Confined Space Entry, Lifting and Slinging, Excavation, Radiography, Work at Height and Project Nature Permit.	Appreciated.
PTW Procedure is vide document TPSMS/CSP/PTW/008TPSMS/CSP/ PTW/008.	
Work Permit System is established effectively through the SAP system. Approval process is through SAP system. After approval a print of PTW is taken and signed by the concerned departments.	
During inspection it was found that the signatures on the hard copy is not very clear as no names are put. It is also not clear if the PTW has been closed or not.	PTW must be closed by responsible person on completion and after clearance from concerned agencies. Names of signatories also should be clear as PTW is legal document.

OBSERVATIONS	RECOMMENDATIONS
LOTO has been soundly established for Electrical Work Permits.	Appreciated.
Safety Measures as per JSA has been incorporated.	Good. Has to be revised periodically.

5.10 SAFE OPERATING PROCEDURES (SOP)

Documented SOPs is available at MPL for almost all operations in Boiler, Turbine and Generator, Mechanical Material Handling like Coal tippling, Coal crushing and stacking etc.	Good Practice.
SOPs are NOT displayed in the Control Rooms or at the operational areas.	SOPs need to be printed in Bold letters with larger font and displayed more prominently in the Control Rooms and also at other critical locations. SOP should be in both Hindi and English.
All critical functions are provided with Interlocks and linked to the DCS system.	To be maintained
Pressure/ Temperature Gauges of different types, Sensors and Monitors are calibrated.	Good.
There are Registers to record of temporary bypass of Interlocks for maintenance or for operation. However, the approver's column in some cases were missing.	A policy for such Bypass of Interlocks may be made with fixed responsibilities for approval and normalization.

5.11 PLANT MODIFICATION PROCEDURE / NEW EQUIPMENT REVIEW (MOC)

Plant/Process Modification which can impact Health or Safety is addressed by MOC Procedure vide TPSMS/GSP/MOC/007.	Appreciated.
Procedure for Temporary and Permanent changes have been considered and authorization for approval is documented.	Good.

OBSERVATIONS	RECOMMENDATIONS
HIRA is a must document with all such modifications of Process or Plant.	HIRA with respect to Installation, Operation and Maintenance to be ensured

5.12 MONITORING OF WORK PLACE & STACK EMISSION (TREATMENT & DISPOSAL OF WASTES & EFFLUENTS)

Workplace monitoring is done through various means like Noise and Ambient quality measurements.	At the Main Gate only SPM results are exhibited and SOX and NOX results are not declared. This is not in conformity with the CPB Rules.
There are two stacks one for the Power Plant and the other at CHP for DE system. There are online monitoring of SPM, NOX, SOX and Real Time results are available in the Control Rooms.	
There are Seven sensors for Air Quality measurement all around the Plant.	
It was found that SOX and NOX results are higher than the maximum limits that prescribed by CPCB. It was informed that MPL has been granted permission to maintain this level till their Flue Gas Desulphurization Units come into operation in December 2022.	Progress of the Work for FGD for both the units are in progress as per schedule which is appreciated.
MPL is a Zero discharge Plant. It has ETP and STP and Waste Water Management System. It also has Rain Water Harvesting System.	Appreciated.
Sludge from Water Treatment Plant is dumped in Fly Ash ponds & used for Road Building or Mines pit filling.	

OBSERVATIONS	RECOMMENDATIONS

5.13 PERSONAL PROTECTIVE EQUIPMENT (PPE)

Employees in general were observed to be using PPEs like Safety Helmet and Safety Shoes.	Good Practice. To be maintained.
No worker in high noise areas were observed to use Ear Plugs.	Use of ear plugs to be encouraged.
MPL procures PPEs as per Specifications of BIS standards from reputed companies.	Appreciated.
Special type of PPEs are procured by respective departments.	
PPEs like Electrical Rubber gloves, insulated tools, face shield, Rubber Gloves, Aprons etc. are procured by Electrical department or Chemical Dept as may be the case.	
Quality of Safety Helmet and Shoe given to the Audit team for Plant visit was found to be satisfactory.	A strict check on the quality of PPE given to Contract workers must be done by MPL
For contract workmen, PPE is provided by the contractors and the cost is reimbursed.	

*****

OBSERVATIONS	RECOMMENDATIONS

PART – 6

FIRE PREVENTION, PROTECTION AND MITIGATION

6.1 FIRE HAZARD OCCUPANCY

With respect to fire scenarios, the plant is classified under "Light Hazard Occupancy" But at the same time, LDO/HFO storage area, H2 Cylinder Generation Unit and H2 station and Coal handling area is comes under "High Hazard Occupancy" and fire zone 2 with reference to fire load.

6.2 FIRE ORGANISATION

There is separate fire department in the company. Shri Rajkumar Rai, Lead Associate – Fire is heading the fire department. He is reporting to Shri A. K. Manna, Safety Head. Shri Rai is assisted one Site Incharge, Assistant Site Incharge and Senior Supervisors. Site Incharge is assisted by 4 nos. of Shift Supervisors, 11 nos. of DCPO 33 nos. of Firemen and 5 nos. of maintenance assistant form Siemens. Full fledge Fire station is looking after day-to-day functions of fire aspects and take immediate actions to mitigate any eventualities that may arise.	This is in order as per Rule 62 of The Bihar Factories Rules, 1950 and IS 3034.
Fire Safety Management chart is attached in Annexure – 10.	
Safety Warden team is prepared to handle different kind of emergencies including fire emergency.	Good system. It is suggested that Safety cap or Jacket separately should be provided for identification during emergency to ERT member.

6.3 FIRE ORDER/NOTICE

Separate fire notice indicating the responsibilities in case of fire is not prepared.	As an industrial practice, action plan to deal with fire which is known as 'Fire Order/Notice' should be prepared as per Clause 4.11 of Part – 4 of The National Building Code 2016 and implemented to manage fire emergencies by displaying at
Information for fire protection is displayed in Coal Handling plant area.	

OBSERVATIONS	RECOMMENDATIONS
	vantage points. Employees should be made aware of their role and responsibility during a fire emergency. The Fire Order/Notice should be used as a guidance document to conduct 'Fire drills".
6.4 FIRE TENDER	
MPL plant is having 3 nos. of fire tenders and Incase of major emergency, tenders are available from Asansol Fire Station which is at around 40 Km.	Arrangement is satisfactory only route inside the plant area should be finalized and unobstructed always.
6.5 FIRE PREVENTIVE MEASURES	
6.5.1 Smoking Regulations	
No Smoking Policy has been prepared and implemented. 'No smoking' boards are displayed in plant areas.	No smoking policy should be prepared and implemented. No person should be allowed for smoking, lighting or carrying of any match, lighter or smoking material as per Rule 62 (4d) of The Bihar Factories Rules, 1950.
6.5.2 Housekeeping	
Overall housekeeping in the plant area is good. Following are the observations: 1. Combustible boxes are stored in Control room electrical panel area.	Efforts should be put in to maintain good housekeeping and avoid fire.

OBSERVATIONS	RECOMMENDATIONS
	
Dry vegetation found in coal storage area.	Frequency should be maintained to remove dry vegetation around the area where chances of fire is there.
	
	

6.5.3 Spontaneous combustion

Material like cardboard, wood, thermacol, cotton waste, Oil soaked rags, etc are liable to spontaneous combustion found in many areas in the plant.	Such stores should be thoroughly examined and should be removed.

OBSERVATIONS	RECOMMENDATIONS

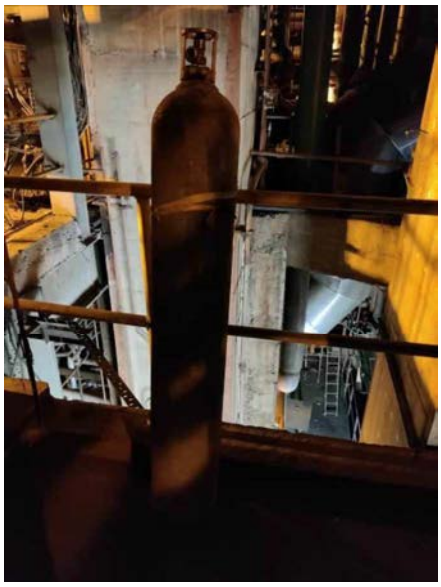
6.5.4 Static Electricity

Bonding strips for flange joints are not provided at LDO/HFO pipelines, MOT pipelines and diesel area.	Bonding strips should be provided to all the flange joints of pipeline to avoid accumulation of static charge and adequacy/healthiness of earthing connections for all the equipment should be checked at periodic interval of time. This is also requirement as per Rule 62 (4b) of The Bihar Factories Rules, 1950.

6.5.5 Handling of Flammables and Gas Cylinders

Handling of lubricating oil, diesel, paint and thinner in small quantities has been found in Contractor office areas, MOT area, Hydrogen station.	Lubricating oil should be stored away and only should be transported by trolley as and when required. It is suggested that storage of this kind of bottles should be avoided or stored in safe cabinets.

OBSERVATIONS	RECOMMENDATIONS
	



6.5.6 Passive Fire Protection

1. Duct travelling from one area to another area and cables of panel are not sealed at many places.	As per IS 12459, all cable entries and duct in floor/electrical room should be effectively sealed by use of fire stops. Also as per CEA Regulation No. 36, all ducts (Cable duct) should be provided with fire barrier at each floor crossing.
	
	
2. Smoke exhaust system is not provided for the major building.	Smoke exhaust system for major building area should be provided at

OBSERVATIONS	RECOMMENDATIONS
3. Fire rated door are provided for fire exits.	top or near terrace area. This is in order as per Rule 62 (9 - h) of The Bihar Factories Rules, 1950. Design norm of fire door should be available for reference.
4. No written procedure for management of change/modification is exist. After modification in Control room area, changes are carried out without following procedure.	There should be written format for the management of change for any building modification. Drawings, manual, Evacuation route, etc. documents should be updated after any modification.

6.6 FIRE INSPECTION

Fire Inspection on fire prevention is in practice by using checklist once in 6 months. High visibility tour (HVST) is carried out once in year by Corporate office. Reports are avaliable	Joint regular monthly inspection by a team comprising Fire, Plant representative and Electrical executives should be carried out to ensure pruning of loose cables/ wires to avoid short circuit. Separate checklist should be prepared area wise and report should be submitted to concerned area incharge. Recommendations on deviation should be complied in time bound frame.

OBSERVATIONS	RECOMMENDATIONS

6.7 FIRE INCIDENT REPORTING SYSTEM

Fire Incident reporting and recording system is exist. Fire call register is maintained. Other reporting, recording and investigation procedure is same as accident.

Good system. It should be maintained.

Following are the data:

Year	No. of fire incidents
2020 - 21	--
2019 – 20	04
2018 – 19	03
2017 - 18	--

6.8 FIRE FIGHTING TRAINING

Fire training has been provided once in month as per training schedule to cover all the employees.

Good system. It is suggested that, all the employees and contract workers should be covered once in 6 months for fire training.

6.9 FIRE DETECTION AND ALARM SYSTEM

Smoke detector and alarm system is installed in the buildings and plant areas.

Good system. It should be continued.

All smoke detectors and manual call points should be numbered. Procedure or instructions for operating MCP should be displayed near each MCP.

Following are the details:

LOCATIONS	Detector POINTS
Smoke Detectors	1378
Gas Detectors	06
Manual Call Points	498

It is found that, Panel provided for the detection system is with on off system. Incase of closure, system will not gives any alarm in emergency.

No on-off system should be there, it should be on direct supply.

Review of smoke detectors and manual call points should be carried out after any change in process/building.

OBSERVATIONS	RECOMMENDATIONS
	
Servicing and maintenance of the detectors, panels and MCP's are carried out by internal team.	
6.10 PORTABLE FIRE EXTINGUISHERS	
There are total 423 nos. of fire extinguishers are provided in entire plant area which includes DCP/ABC, Foam and CO_2 type fire extinguishers.	Arrangement is adequate. It is suggested that, survey should be carried out considering the different types of fire risks and type of fire to allot the fire extinguishers as Mechanical foam type fire extinguishers are not provided near flammable storage areas.
Detail list of extinguishers with their type and capacity has been prepared and maintained.	
At many places fire extinguishers are not within the reach of workers due to obstacles of material stores or due to poor housekeeping.	As per Rule 62 (10 – I & j) of The Bihar Factories Rules, 1950, all fire extinguishers should be kept at height 750mm from ground level.
	

OBSERVATIONS	RECOMMENDATIONS
Use of Fire extinguishers charts are displayed in plant areas.	Appreciated. It should be maintained.
	
All the extinguishers are allotted with individual number.	Appreciated.
The refilling of fire extinguisher is carried out by internal team.	Maintenance and servicing of fire extinguishers should be carried out as per IS:2190:2010.
	
Total 34 nos. of fire buckets are provided and maintained in the plant.	Good system. It should be maintained.

6.11 FIRE WATER SYSTEM (INCLUDING FIRE PUMP HOUSE) / HYDRANT SYSTEM

There is a fire water tank having capacity of 2800 KL dedicated for fire only. In addition to this, 28000 KL Clarifier water tank will be used in case of fire emergency. Fire lines are laid underground/over-ground covering every area of plant.	Arrangement is satisfactory as per The National Building Code of India, 2016. It should be maintained. Hydrant maintenance should be carried out as per IS 13039:1991 – External hydrant system provision and maintenance and IS 3844 – Code of practice for installation and maintenance of Internal fire hydrant

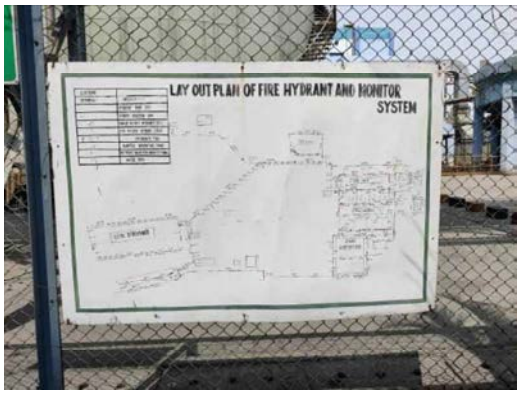
OBSERVATIONS	RECOMMENDATIONS
External and internal hydrants are installed after every thirty meters.	system.
Fire hose box installed at various conspicuous location, with fire hoses, and nozzle branch.	
All Fire Hydrants, Hose Boxes, Water monitors has been allotted with identification number.	
The total no. of Pumps available with:	

TYPE	QTY	CAPACITY
Main Electric Pump – Hydrant	2	172 M3/Hr
Diesel Pump	2	168 M3/Hr
Jokey Pump	2	10.8M3/Hr
Booster Pump	2	108 M3/Hr

Fire hydrant points are not maintained. Maintenance of Hydrant points, Monitors, Fire Tenders and Deluge valves are carried out by M/s. Akshar Fire & Safety Limited, Ahmedabad.	
	
Electrical cables are routed with fire hydrant line.	Electrical cables should be rerouted.

OBSERVATIONS	RECOMMENDATIONS
	
Fire hydrant lines are provided with branch for flushing, but it found that branch line using for other purposes.	Fire water should not be used for any other purpose as per 7.6.2 of Fire Protection Manual of TAC.
	
	

OBSERVATIONS	RECOMMENDATIONS
	
	
During visit, leakages found in underground hydrant line at BTG area which is not possible to rectify also.	It is suggested that, fire line in BTG area should be installed above the ground for ease of maintenance and better fire protection system for same area.
Checklist has been prepared for all the pumps by maintenance department and preventive maintenance has been carried out as per the schedule prepared.	Appreciated.
Layout of Fire hydrant system is available and displayed.	Appreciated. Only it should be updated whenever any changes are carried out.

OBSERVATIONS	RECOMMENDATIONS
	


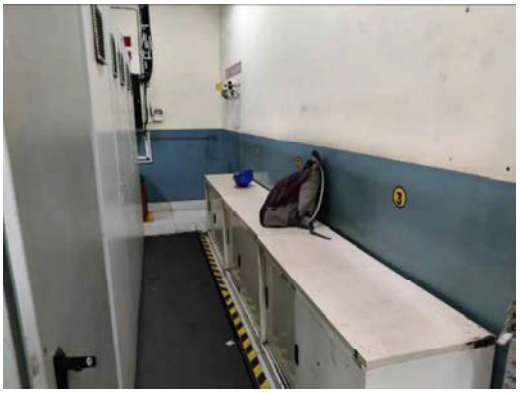
Foam pourer system is provided for LDO/HFO storage tank area.	Good system. It should be maintained.
	
Sprinkler system is provided covering transformers and maintained in auto mode.	Appreciated. Sprinkler system should be provided for coal yard. It should be maintained and tested as per IS 15105:2002 and IS 9972:1981.
	
Medium velocity water sprinkler provided for following system: 1. Cable Gallery 2. LDO/HFO tank area 3. CHP – Conveyor belt area.	

OBSERVATIONS	RECOMMENDATIONS
	
High velocity water sprinkler provided for following system: 1. 400 KV Switchyard 2. GT system 3. TG – MOT, DOT, SOT, MDBFP and TDBFP 4. Boiler	
Sprinkler system not provided for MOT tank.	It should be provided and maintained.
Following are the fire safety equipment's are available in plant area to tackle fire emergency:	Appreciated. It should be maintained.

SN	Area	Qty
1	Fire Buckets	65
2	Fire Hydrant Points	279
3	Hose Boxes	279
4	Fire Water Monitor	66
5	Foam Making Branch Pipes	03
6	Foam trolly	15
7	Fire Proximity Suit	8
8	SCBA Sets	25

6.12 FIRE AND EMERGENCY EXIT

1. Main entry gate of plant is wide enough for passage of fire fighting.	This is in order as per Rule 62 (9) of The Bihar Factories Rules, 1950.
2. Most of the access, floors, walkways, passages, stair-case etc. in plant were found well	"Every exit, exit access or exit discharge should be continuously maintained free from all obstructions

OBSERVATIONS	RECOMMENDATIONS
planned but not maintained. At some pathway, material has been kept.	and impediment" as per 4.2.3 and 4.4.2.4.2 of National Building Code of India, 2016 – Part IV. It should be removed on immediate basis.
	


3. Emergency exits/means of escape are not wide enough in contractor office area.	It should be provided and maintained.
	
4. Signages are provided on exits but not at all the places.	Illuminated signages at all the exits and arrow indicating the way to the escape route should be provided at a suitable height from the floor level on the wall as per 3.4.7.4 of National Building Code of India, 2016 – Part IV.

OBSERVATIONS	RECOMMENDATIONS
6.13 EMERGENCY PREPAREDNESS AND PLANNING	
Emergency Preparedness and Response plan has been prepared. Emergency Control Centre is not declared.	Appreciated. Emergency Control Center should be declared and should have following facilities: i. A copy of On-site Emergency Plan ii. List of important telephone numbers such as Police, Fire Brigade, Hospitals, and other outside emergency services, etc. iii. List of key personnels with addresses and telephone numbers iv. List of mutual aid scheme members v. Plant layout indicating storage of hazardous materials vi. List of Fire extinguishers vii. Fire fighting system (layout of Fire Hydrant), List of personal protective equipments viii. Material Safety Data Sheets ix. Portable Public address system x. Telephone
Electrical emergency siren has been provided to declare emergency.	Good system. It is suggested that electrical siren should be connected with emergency back-up system in case of power failure.
Vehicles are parked in designated parking area but, not in reverse direction.	All the vehicles including two wheelers should be parked in reverse direction only.

OBSERVATIONS	RECOMMENDATIONS
	
Emergency exit plan has been prepared and displayed.	Appreciated. It should be maintained.
6.14 MOCK DRILL	
Mock drill has been carried out on quarterly basis. Observers are appointed for the drills and recommendations are incorporated given by observer with target date. Plan for drill is prepared and followed. Records and reports are maintained.	Good system. It should be continued.
6.15 COMMUNICATION	
For the purpose of communication following facilities are available: 1. Emergency electric siren 2. Public Address system 3. Megaphone 4. Walki-Talki system – 80 nos. 5. Mobile phones, and 6. Intercom 7. CCTV – 300 nos.	Good system. All communication facilities provided should be periodically tested and results should be recorded.
6.16 MUTUAL AID SCHEME	
MPL Dandbad is not having an arrangement for mutual aid.	It should be done and documented as per the guidelines given vide Para 9 of TAC Fire Protection Manual.

*****

OBSERVATIONS **RECOMMENDATIONS**

PART – 7

ELECTRICAL SAFETY

Maithon Power Ltd, Nirsa has an installed capacity of 1050 MW in two units of 525 MW each and uses coal as fuel. The generated voltage is 21 KV, which is stepped up to 400 KV through generator transformer of capacity 216 MVA. The GT is single phase units and are accommodated in transformer yard along with unit auxiliary transformer of capacity 25 MVA. Bus ducts are provided to GT from generator and in bus duct 6 kg/sq. cm air pressure is maintained. MPL is thermal generation and availability of coal from CI L & BCL coal fields and water availability from Damodar river which is flowing about two kms away from plant. At water intake point, 250 KVA capacity two transformers of voltage ratio 6.6/ 0. 44KV is installed for operating in take motors of rating 279 KW. The generated power is evacuated through four no's of 400 KV circuits which is connected to grid, The circuit breaker rating of line side and bus side at 400 KV is 2000 A and the isolator also having the same rating. The line side isolators are equipped with earth blades and which are operating on remote& local. Two no's of DG's are available in the plant with a capacity of 2 MW each and are synchronized with main LT supply at DG control panel.

During the process of audit, verified documents such as SLD, transformer test records, cable distribution system, earth test results, PTW, accident records, maintenance schedule, DC system, operational log book, calibration details of protective relays, lux level at switch gear rooms, breaker test reports and DGA results of power transformers including BDV of oil. Checks and verifications are carried out at TG floor, 400 KV switch yard, transformer yard, control rooms, HT & LT switch gear rooms of units, DG's & DG panel, fire water pump house, stores, cable gallery's, MCC's, DTC's, BOP, Raw water pump houses, DM plant, FOPH, AHP, CHP, compressor house and external & internal electrical installations in plant premises, which are convincing that, the electrical section, up to a certain extend complied the statutory requirements as per CEA Regulation 2010.

7.1 TESTING AND EXAMINATION OF ELECTRICAL MACHINES & EQUIPMENT

LT power cables & HT cables are extended for street lights/area lights/load centers and the cables are taken through underground along the side of internal roads. Most of all places in the plant, cable markers are not visible along the route of cable. But near CHP the HT cable marker is visible. Hence the cable route is not identifying, especially in canteen/contractor shed area.	Cable marker shall be provided along the route of cable. This shall save the cable while digging and reduces the interruption period in case of cable fault. Cable laying should be as per CEA 2010 R (67) (P&L).

OBSERVATIONS	RECOMMENDATIONS
  The cable trench is accumulated with water and no source to drain the water from cable trench at DM plant LT switch gear room & at 400 KV switch yard near marshaling box.	Stop the water entry at source by proper sealing. It is not safe to charge the cable which are under water. Slope should be maintained while constructing the cable trench to drain water. This should confirm to CEA2010 Regulation no. 67(P&L).
  LT power cables and instrumentation/ control cables are laid in same cable track and crossing each other without any separation at FWPH.	Separate cable trays should be used for laying of control cables and power cables. As any fault on power cable may damage the instrumentation system, which leads to malfunction in operation. A comprehensive procedure for segregation /separation of cables of different types/voltages shall be adapted for laying of cables. This confirms to Central Electricity Authority (CEA) Regulations – 2010 no.37-11(b)

OBSERVATIONS	RECOMMENDATIONS
  Disconnected/faulty cables are not removed from circuit at RWPH.	Cable shall be properly terminated at proper places by nut and bolt with identification. If the cables, not in service / disconnected, remove from circuit and kept in store, to avoid confusion in case of cable fault, and early rectification. This should confirm to CEA 2010 Regulation no. 12.
 LT service cables are joined and covered with PVC tape at FWPH, which may lead to short circuit due to lose joint.	Make permanent LT joint by using jointing kits. The naked joints may attract injury to lives as there are chances of coming into contact with exposed live portion of wires. Make service laying in permanent in nature to avoid loose fitting, which should confirm to CEA 2010 Regulation no. 12.
 The LT distribution boxes is properly sealed at its point of entry of cable to prevent any entry of foreign objects, in PDB provided at LT switch gear room of 400 KV CR.	Very systematic cabling system adapted and implemented, which is the requirement of CEA 2010 Regulation no. 22(i).

OBSERVATIONS	RECOMMENDATIONS
	
Creepers are climbed on wire mesh fencing of 400 KV switch yard.	When it dry, it attracts fire due to spark from substation operation. Hence the same has to be removed. The switch yard fencing should be maintained as it protects the equipment's inside. This confirms to CEAR 2010 (12).
	
Rubber mats/insulating mats are not spread at in front of LT panels installed at ER-3 & DM plant switch gear room.	Providing rubber mats in front of panels for the safety of the operator. The rubber mat should confirm to IS-15652 of 2006, which is as per Central Electricity Authority Regulation 2010, sub-clause no.19 (5).
	
Smoke detector sensor is provided at 400 KV control room at the celling, and regularly testing.	Providing smoke detector at control room for early detection of fire is possible. Hence the control cables and equipment's in control panel can

OBSERVATIONS	RECOMMENDATIONS
	be protected. This should confirm to CEA 2010 Regulation no. 5 (plants, lines).
The 90 KW HFO-2B motor & 160 KW main hydrant motor at FWPH are connected to earth circuit by 25x3 mm GI strip from two distinct earth sources.	Very systematic earth circuit connection. CEA 2010 Regulation no.41 (Xii) states that 75 KW motor should be connected to earth circuit from two distinct sources. Proper installation of electrical equipment should reduce the maintenance cost and increase the life of the equipment.
	
Disconnected/faulty LT cables are not removed from service cable bunch/circuit, causing identification is difficult at cable gallery of CHP & ESP.	Remove the disconnected/faulty cable from circuit, which will help in fault finding and reduces the interruption period and also confirms to CEA 2010 Regulation no.12.

OBSERVATIONS	RECOMMENDATIONS
  Many materials like isolator mechanism boxes, substation GI structures and old CT's are placed in 400 KV switchyard. This reduces the operating space in switch yard. Way should be clear in switch yard for emergency operation.	Remove these materials from switch yard and the way should keep always free from obstacles and which should confirm to CEA 2010 Regulation no.12.
  Fire buckets filled with dry and clean sand on separate stand with cover is not provided near CHP switch gear room. 	Protective Equipment like fire buckets filled with dry and clean sand on separate stand should be provided near transformer yard for ready and immediate use of extinguishing fire, which is mandatory as per CEA 2010 Regulation no. 27(1).

OBSERVATIONS	RECOMMENDATIONS
Protective relays such as over current, earth fault & numerical relay are installed on HT/LT switch gear panels at RWPH switch gear room.	Installation of protective relays on control panels displays instant fault description. This should comply with CEA 2010 Regulation no. 100. The relays should be calibrated periodically and assure that the test results are within the limits.
	
Rust has partially developed on LT terminal box of 2500 KVA 6.6/0.4 KV distribution transformer installed at CWPH.	Periodic painting should be carried out on transformer. The cables and the terminals inside the box may get damaged due to development of rust, which affects the system operation. This should confirm to CEA 2010 Regulation no.12.
	
Scrap materials are stacked in CHP switch gear room. Hence approach to DB is denied in emergency.	Remove these materials from switch gear room, for getting sufficient space to the operator for operating the equipment's in emergency. The switch gear panel room always kept free of scrap materials, which is the requirement of CEA 2010 Regulation no.12.
	
At GT-1 B, in transformer yard, Baffle wall has constructed between generator transformers with sufficient space between wall and transformer.	Baffle wall between two transformers to avoid the spreading of fire to other one. This should confirm to CEA 2010 R 44(2)(vii)(a).

OBSERVATIONS	RECOMMENDATIONS
	
Grasses are grown up at 400 KV switch yard. When grasses are dry, it attracts fire due to spark from yard operation, which affects the substation equipment's.	Remove the grasses from 400 KV switch yard to protect the yard installations, which confirms to CEA 2010 Regulation no.12.
	
First aid box with prescribed medicines is available at 400 KV switch yard control room for giving immediate first aid to injured person.	First aid box should be provided at control room, which confirms to CEA 2010 Regulation no.27.

OBSERVATIONS	RECOMMENDATIONS
	
Cables are not supported while connecting to LV termunals of 2.5 MVA transformer installed for ESP. The LV bushing terminals may get damaged due to the dead weight of cable acting on LV bushings.	Provide cable support to avoid damages to terminals, which confirm to CEA 2010 Regulation no.67(P&L).
	
At RWPH cable gallery the illumination level is inadequate. Sufficient lights are not available at whole area of cable gallery.	Illumination survey to be carried out regularly at other cable galleries also. If any deficiency in illumination observed, provide adequate illumination at that location subject to observing the standard as per CEA 2010 Regulation no.10 (p&l).
	

OBSERVATIONS	RECOMMENDATIONS
Except in few cases the LT panels are mostly found in satisfactory condition, however at the LT switch gear at ER-3, is having disconnected wires with open end terminals are not removed from circuit and is mixed up with service wires inside the panel. The switch gear panel surface also not clean. Dust accumulation on panel.	Service wires should be properly connected to terminal on panels and ensure that all wires are connected to concerned terminals. This complies with CEA 2010 Regulation no. 104.The surface of panel should be maintained dust free.
	
By considering load requirement, proper capacity LT switchgear 630 A & 1000 A has been installed and commissioned at FWPH MCC room for fire hydrant LT panel.	Critically study the load requirement of various process of the said plant and take necessary action to replace if found unbalance to that particular equipment commensurate with maximum electrical consumption. This is the requirement of CEA 2010 Regulation no. 12.
	
At 400 KV switch yard, cable trench cover is damaged, causing damages to control cable insulation.	Replace the damaged trench cover to protect the control cables. The cable trench cover should be properly placed in grove of trench

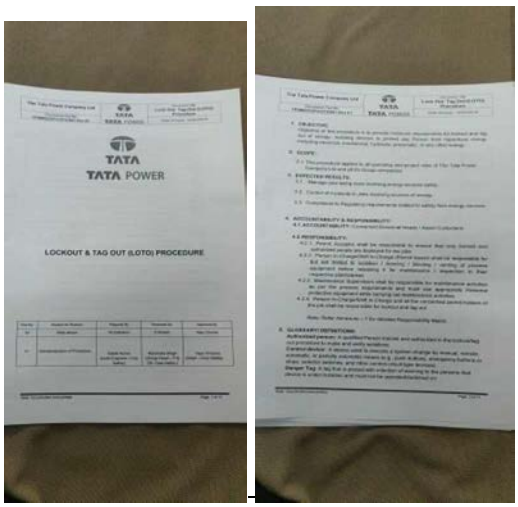
OBSERVATIONS	RECOMMENDATIONS
	wall. Sufficient width should be available in grove for seating of trench cover to avoid slipping. The cables and cable laying work should confirm to CEA 2010 Regulation no. 43.
The 2000 KVA DG-1, is tested periodically and test results are regularly reviewing by authorities.	This is satisfactory and complies with CEA 2010 Regulation no. 31(1) (2). Confirm the DG test results are within the permissible limit.
	

7.2 PREVENTIVE MAINTENANCE PRACTICES

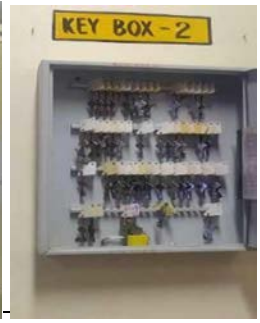
The preventive maintenance schedule of electrical equipment's and panels of Hydrogen plant is exhaustive & comprehensive and it is not covering all periodicities as data available for audit. Check list for PM schedule is not available.	Preventive maintenance schedule for all periods such as daily, weekly, monthly, quarterly, half yearly, and yearly should be carefully prepared for all electrical equipment's and installations. The check list should be strictly followed. This is the requirement of CEA 2010 Regulation no. 12 Form-III.
The preventive maintenance schedule for 216 MVA 21/400 KV GT-1B-phase, is covering all important components of transformer and are not included in its physical verification format.	The findings in the check list should be rectified as early and properly documented. The transformer maintenance register should confirm to CEA 2010 Regulation no. 12.

OBSERVATIONS	RECOMMENDATIONS
	
The maintenance schedule with check list of all electrical equipment's like transformers, motors, HT panels, LT panels and circuit breakers are available with electrical section and monitoring the maintenance scheduled.	Regularly monitors the planned maintenance schedule of approved works and proper documentation to be maintained for future reference, which confirms to CEA 2010 Regulation no. 12.

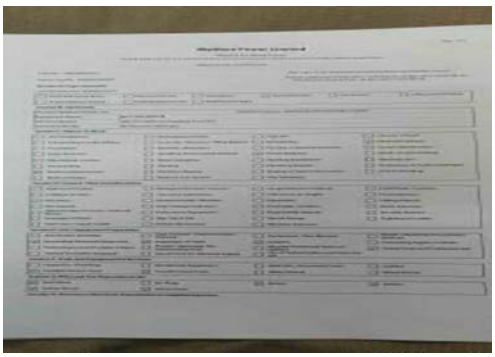
7.3 ELECTRICAL WORK PERMIT SYSTEM & LOTO PROCEDURES

Proper work permit system with foolproof arrangement is existing in electrical department and LOTO system is not followed by Electrical section.	Present work permit system adapted by electrical section for availing any outage works is to be followed till the prescribed outage system is finalized. This is a requirement of C.E.A. 2010 Regulation no. 19(1) (2) (3).
	


At 400 KV switch yard control room, the incomer circuit is locked in 'OFF' position and key has kept at CR key board during outages. There is separate arrangement made for keeping key in control room.	Properly maintain the procedure followed for outages and necessary entry should be made in log book which should confirms to CEAR 2010-(12).

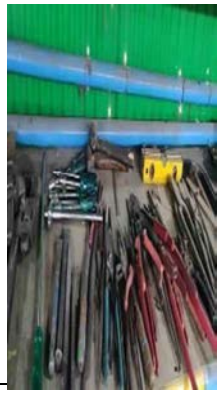
OBSERVATIONS	RECOMMENDATIONS
 	


The work permit for preventive maintenance work on HT switch gear panels is issued according to format and work has executed. Proper entry has made and documented, which are available in electrical section.	The procedure adapted for outages is good and the activities are entered in register, in order with date & time, confirms CEA 2010 Regulation no.12.
	



7.4 ELECTRICAL HAND TOOLS – INSPECTION & RECORD KEEPING

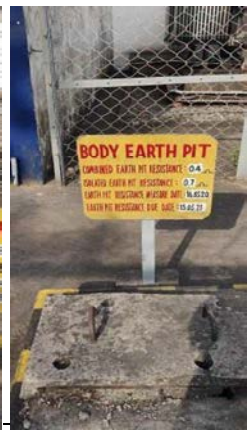
Electrical hand tools such as insulated pliers, screw drivers, tool box, earthing/discharge rods etc. are kept in separate place and its records are available with Electrical section.	After work, keep these tools at the designated place, like tool room/tool box. Then in emergency the same shall be easily available, confirms to CEA R 2010-19(2).
 	



OBSERVATIONS	RECOMMENDATIONS
Insulated pliers and insulated screw drivers are using by electrical staff while extending supply from Main switch installed at contractor shed for fabrication purpose.	Ensure that pliers and screw drivers are having proper insulation level before using. A register should be maintained mentioning the make and description of hand tools for ready reference. Which confirms to CEA Regulation no.19. If the cables are not in service, remove from circuit.

7.5 EARTHING SYSTEM

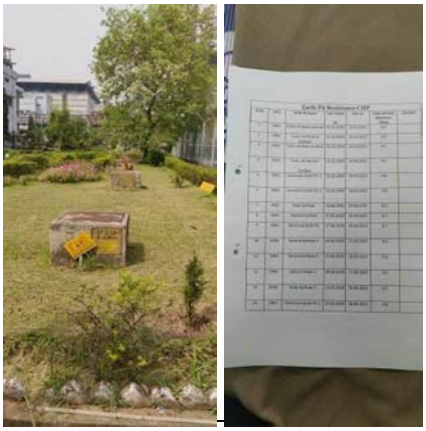
The earth pits are provided CHP near transformer, which are numbered and properly documented. Regular cleaning is to be done on earth pits. Earth pits are provided with chamber and cover with earth details.	The numbering done on earth pits is good and it is very much helpful in documentation. Proper and regular cleaning of earth pit is required, then only good conductivity can be expected and confirms to C.E.A. 2010 Regulation no. 41(xv) (a) (b)(c).



The lighting arrester of GT-B & R phases are earthed by 50X5 mm GI strips and which is extended to main earth strip coming from nearby earth pit. Watering arrangement is not done to earth pit.	Individual earth connection gives good conductivity. Watering arrangement should be done to earth pit, which confirms to CEAR 2010(74).

OBSERVATIONS	RECOMMENDATIONS
	
The earth connection to raiser is heavily rusted in earth pit near CWPH. The GI strip also develops rust at earth circuit connecting point. The earth pit is not cleaned and the pit wall also damaged.	For getting good earth connection, replace the rusted nut bolt. The earth pit should be cleaned and repair damages, which is as per CEA 2010 Regulation (16).
	
Rust developed at the nut bolt & GI strip provided to earth at LT panel installed at Chimney.	Replace the rusted nut bolt for getting good conductivity to discharge leakage current. This complies CEA 2010 Regulation no.48. To avoid entry of dust the glass on door to be provided.

OBSERVATIONS	RECOMMENDATIONS
	
Earth resistance tests are conducted regularly on earth pits and its values are documented and verified at Hydrogen plant LA earth pit. The CHP earth pit values are measured in ohms are available with Electrical section.	The earth values in ohms should be documented regularly after test, then only the obtained values should be compared. The earth test is confirmed to CEAR 2010 (41).
	



7.6 ELECTRICAL ZONE CLASSIFICATION

There is no documentation for Electrical Zone Classification in entire plant.	Drawings and documentation for Electrical Zone Classification should be prepared and periodically reviewed to make the changes if any. The Electrical Zone Classification document should be made available for reference to authorities.
The electrical zone classification demarcation drawings of the plant & bldgs. are not available during audit.	The 400 KV switch yard & GT yard areas are coming under electrical zone expect the service area which is normally part of the TG building.

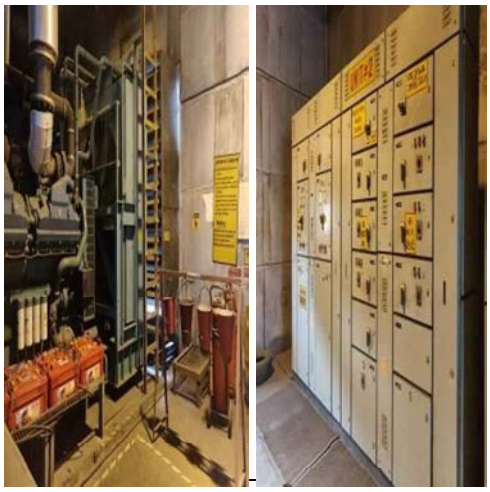
OBSERVATIONS	RECOMMENDATIONS

7.7 FLAMEPROOF ELECTRICAL EQUIPMENT /FITTINGS

Flameproof Electrical Fittings with specifications for concerned application is documented. Flame proof fittings are provided to Hydrogen plant and FOPH. In Hydrogen plant office, the LT DB in service is non flame proof.	Periodic review shall be taken at regular interval at strategic locations where flameproof fittings are required especially in flammable gas emanating area. The non-flame proof DB should be replaced to flame proof. The flameproof electrical fittings shall be done in this area to conform to CEA 2010 Regulation no. 37(iv).
 	
There is no documentation about hazardous area classification for proposing the flame proof fittings are required, especially at Hydrogen plant.	If flame proof electrical fitting is required for a location, then it should be as per CEA Regulation no.110.

7.8 EMERGENCY LIGHTING SYSTEM

DG sets of capacity 2000 KVA each are available in the plant, which meets the emergency loads. The DG output is 415 volts. Change over facility is installed at DG control panel.	The Diesel Generator Sets should be maintained properly and documented as per maintenance schedule, then only it helps in emergency. The availability of DG confirms to CEAR 2010(10)(13)(p&l).

OBSERVATIONS	RECOMMENDATIONS
	


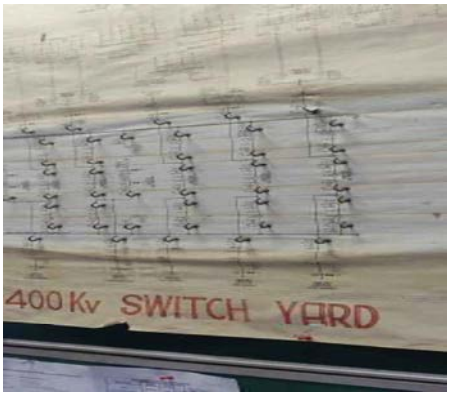
At strategic locations like control rooms, switch gear rooms and in pathway areas, emergency lights are operational. Emergency light is in service at CHP switch gear room.	Emergency supply should be made available from DG to strategic locations in the plant, which confirm to CEAR 2010 (10)(15)(p&I).
	
Drawings of locations of emergency lamps installed are not available in Electrical Section and details of emergency lamps provided at strategic locations in the plant are not documented.	The emergency light locations shall be marked in the drawings and the same has to be displayed in prominent locations at plant with periodic review. This will give a quick access in emergency and confirms to CEAR 2010(8).
Only two diesel generators are available in the plant of capacity 525X2 MW. Common stand by DG is not available in the plant.	One DG set should be provided to each unit of 200 MW and above. In addition, there should be one common stand by DG set of same capacity to serve for two units, which confirms to CEAR 2010 (10)(13).

OBSERVATIONS	RECOMMENDATIONS

7.9 COMPLIANCE WITH CEA 2010 AND RULES

The Electrical Inspectorate has approved the Electrical Installation and the documentations which are available in Electrical section. The inspection reports are also available in office.

The approved electrical drawing should be made available any time in electrical office and presented to the authorities as and when demanded. Then only it complies with the C.E.A. 2010 Regulation no. 8(1), 9, 10 & 11(6).

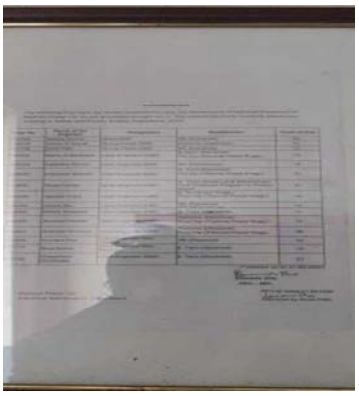


The single line diagram of electrical layout including location are available at electrical section. The drg. is available for verification during audit.

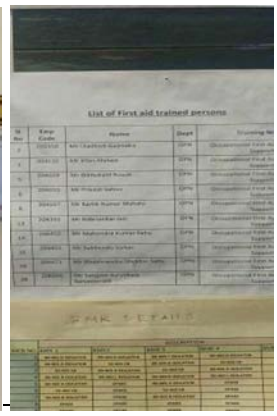
Any changes in circuit should be reflected in drawing and make sure that the drawing is up to date and confirm to CEA 2010 Regulation no.43(P&L).

OBSERVATIONS	RECOMMENDATIONS

7.10 ELECTRICAL SAFETY AND PERSONAL SAFEGUARDING

Authorized list of personnel's eligible to receive and take permit is maintained at electrical section. The authorized personal list is displayed at prominent location in 400 KV switchyard CR.	As per C.E.A. 2010 Regulation no. 3(3), it is mandatory to maintain a register of authorized personal list. This authorized personal list should be updated timely.
	


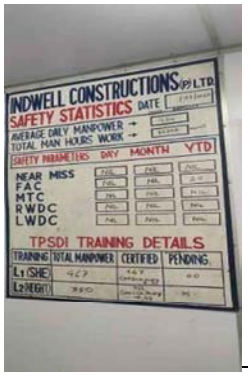
Electrical incidences are reported properly and in time and its document copies are available with Electrical section.	Conducting incident investigation after occurrence reporting is full filling the statutory requirements under C.E.A. 2010 Regulation no.8
Training on Electrical Safety is conducted by Electrical section. Systematic Electrical safety training is conducted for Electrical Staff and contract employees with prescribed syllabus on electrical safety.	It is recommended that periodic systematic Electrical Safety training is imparted to the electrical staff and contract through well experienced trainers. Electrical safety training should confirm to CEA 2011 Regulation no. 11.
Helmets, Safety shoes and hand gloves are regularly used by Electrical Staff while at work. PPEs are issued by entering in register.	The concerned in-charge shall ensure these PPEs are worn by staff while entrusting for the particular assignment, which complies to CEAR 2010-19 (2).
400 KV Control room is provided with First Aid Boxes with prescribed medicine and he location of first aid box is easily approachable. List of first aid trainers is also displayed in CR with employee code no.	First aid box with prescribed medicine should be provided in control room and the same is to be available easily in emergency. This complies with C.E.A. 2010 Regulation no. 27(3).

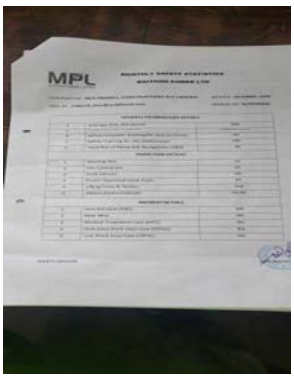
OBSERVATIONS	RECOMMENDATIONS
 	


In CHP control room, artificial respiration chart is displayed at prominent location in CR.	Artificial respiration chart should be displayed at prominent location in switch gear room. This complies with C.E.A. 2010 Regulation no. 28(1).
	
DO's and DON'T's are displayed at the entrance of the 400 KV switch yard.	It is recommended to display DO's and DON'T's board at the entrance of the switch yard with the following points: ⇨ Entry restricted to authorized persons only. ⇨ Do not carry long objects inside the switch yard. Use safety gadgets like helmet, safety shoes, and hand gloves of appropriate type while working inside the yard. Displaying danger board confirms to CEA 2010 Regulation no.18.
	
The 250 KVA out door transformers installed at RWPH is not constructed	The out-door transformers should be efficiently protected by chain link

OBSERVATIONS	RECOMMENDATIONS
with fencing. The voltage rating of both transformers is 6.6/0.44 KV and both transformers are in service.	fencing not less than 1.8 m in height so as to prevent access by an undesignated person and the fencing should be effectively connected to earth circuit, which is as per CEAR 2010 (49).

Monthly safety statistics are prepared and displaying at office.	Staff confidence should increase and it helps the general safety awareness among staff. Which confirms to CEAR 2011 (11).

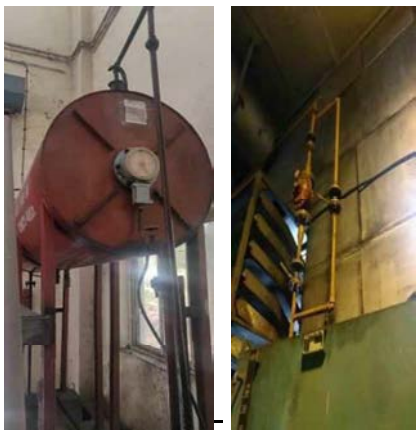




7.11 LIGHTENING PROTECTION SYSTEM/STATIC ELECTRICITY PREVENTION & DISCHARGE SYSTEM

Lightening arrestor has provided at GT- B phase in 400 KV switch yard. The earth resistance value of LA earth pit is documented. Separate registers are maintained for recording the earth value.	Earth connection should be checked regularly for its tightness and its resistance value shall be taken periodically and make sure that the values are within the limit, which has to confirm CEA 2010 Regulation no.41 (xvi) (xvii). The LA earthing shall be confirmed to CEA 2010 Regulation no.74 (2).

OBSERVATIONS	RECOMMENDATIONS
The diesel engine provided at Fire water pump house; its diesel tank is not connected to earth circuit. If earth circuit is not connected to diesel tank, the static current formed in diesel tank is not properly dissipating as the path of discharge is through MS frame which is grouted in concrete to earth. Earth bonds are not connected to diesel pipe flanges at DG 's diesel tank.	The diesel tank should be earthed for discharging of static current, which is also confirms to OISR-110. However, it is recommended to prepare a list of locations where provision of static discharge setup should be made. Earth bonds should be connected across diesel pipe flanges as between flange gasket has placed, which is non-conductor. Periodic inspection and maintenance carried out shall be defined in the maintenance schedule list. This is to comply with C.E.A. 2010 Regulation no. 74 (2).



7.12 SAFETY IN TEMPORARY WIRING

No separate system has been adapted for providing extension of temporary supply which is evident in temporary supply has extended near contractor shed/canteen.	The following method should be adapted for extension of temporary electric supply: a) Armored cable shall be used for extension. b) Cable shall be taken through G.I. pipe at pathway crossing. This is the requirement of C.E.A. 2010 Regulation no. 21 and 107.

At CHP switch gear room, disconnected cables and temporary extended cables are in circuit path	Remove the disconnected cables from circuit which reduces the interruption time while locating the

OBSERVATIONS	RECOMMENDATIONS
and the disconnected cables are not removed from circuits/cable trays which are mix up with service cables including instrumentation cables.	cable fault. If faulty cables are removed, less times should take for rectification. The control cables should be laid in separate GI cable trays from power cables, which confirms to CEA 2010 Regulation no. 67(5).

7.13 FIRE PREVENTION, PROTECTION AND MITIGATION w.r.t. ELECTRICAL SAFETY

A good number of portable fire extinguishers and fire buckets filled with dry clean sand are placed at strategic locations in CHP switch gear room. The portable fire extinguisher locations are easily approachable in emergency and approach ways are clear. The approach way to fire extinguisher location is obstacle free.	This is very good and the portable fire extinguisher maintenance should be carried out in time and documented. The approach way should be obstacle free, which should be assured. This should comply with CEA 2010 Regulation no. 27(1).

OBSERVATIONS	RECOMMENDATIONS
Many electrical equipment's are installed in TG building, and are maintained as per schedule. The healthiness of equipment's is assured through the maintenance planning. This helps in reducing the chances of electrical fire/electrical incidences.	This is very encouraging and hence continue with due importance to maintenance and record keeping. This also has to confirm with CEA 2010 Regulation no. 12
At transformer yard, arranges are made for high velocity water sprinkler system with its control valves. 	Adequate fire protection system should be arranged such as providing high velocity water sprinkler system in transformer yard, confirms to CEA 2010 Regulation no. 44.

Health and Safety Policy

HEALTH AND SAFETY POLICY

Tata Power is committed to provide safe and healthy working environment for the prevention of work related injuries and ill-health. Safety is one of our core values. We strive to be a leader in safety excellence in the global power and energy business. In pursuit of this, we are committed to the following:

- Maintain and continually improve our management systems to eliminate hazards and reduce health & safety risks to all our stakeholders.
- Incorporate appropriate health & safety criteria into business decisions for selection of plant and technology, performance appraisal of individuals and appointments in key positions.
- Comply and endeavour to exceed all applicable health & safety legal and other requirements
- Integrate health & safety procedures and best practices into every operational activity with assigned line-functional responsibilities at all levels.
- Involve our employees and business associates in maintaining a safe and healthy work environment through consultation and participation
- Inculcate safety culture by visible leadership and empowerment.
- Ensure required competency to enable our employees and business associates for working safely.
- Promptly report incidents, investigate, share crucial learnings and prevent recurrences.
- Influence our business associates in enhancing their health and safety standards and align with Tata Power's health & safety codes and practices.
- Set safety & health metrics as indicators of excellence, monitor progress and continually improve health and safety performance.

We shall ensure the availability of appropriate resources at all times to fully implement and communicate this policy to all stakeholders by suitable means and periodically review its relevance in continuously changing business environment.

Ref.: Non availability of spare parts for Pyrotech supplied (Via BHEL to MPL) DLP system Model ID1400 67.

Dear Sir,

Greetings!

We would like to inform you that we have supplied Planar (formerly Clarity/Synelec) DLP system Model ID1400 67 in March 2010 to Maithon Power.

Planar ID series DLP cubes is already **End of life /obsolete** few years back.

Now we are also facing some problem to maintain the costly spares for these models (due to the component unavailability in market for the long time). Hence the supply of spares pertaining to this system cannot be possible in future. Also Repairing of the all faulty cards & modules are also not possible globally of existing DLP system.

We would like to bring to your kind notice that **all Planar DLP based Rear View Projection Cubes are END of LIFE** in the market and the **New generation direct view fine pitch LED Videowall** has been introduced few years back.

Hence we request you to please upgrade the existing DLP based Videowall System to direct view Fine pitch LED Videowall for trouble free operation.

Best Regards,

Pyrotech Electronics Pvt. Ltd. Unit-II

Overview

EOL14636

Cisco announces the end-of-sale Cisco 220 Series Smart Switches. The last day to order the affected product(s) is July 30, 2022. Customers will continue to receive phone support from the Cisco Small Business Support Center (SBSC) as shown in Table 1 of the EoL bulletin. Table 1 describes the end-of-life milestones, definitions, and dates for the affected product(s). Table 2 lists the product part numbers affected by this announcement. For customers with active product warranties, support will be available as stated in the product warranty terms and conditions.

End-of-life milestones

Table 1. End-of-life milestones and dates for the Cisco 220 Series Smart Switches

Milestone	Definition	Date
End-of-Life Announcement Date	The date the document that announces the end-of-sale and end-of-life of a product is distributed to the general public.	January 29, 2022
End-of-Sale Date: HW	The last date to order the product through Cisco point-of-sale mechanisms. The product is no longer for sale after this date.	July 30, 2022
End of Phone Support: HW	The last date to receive phone support as part of the product warranty. After this date, all phone support services for the product are available with additional charges or support fees. In some cases, support may not be available.	July 30, 2023
Last Ship Date: HW	The last-possible ship date that can be requested of Cisco and/or its contract manufacturers. Actual ship date is dependent on lead time.	October 28, 2022
End of SW Maintenance Releases Date: HW	The last date that Cisco Engineering may release any final software maintenance releases or bug fixes. After this date, Cisco Engineering will no longer develop, repair, maintain, or test the product software.	July 30, 2023
Last Date of Support: HW	The last date to receive applicable service and support for the product as entitled by active service contracts or by warranty terms and conditions. After this date, all support services for the product are unavailable, and the product becomes obsolete**. Warranty duration is based on product ship dates; refer to warranty terms and conditions for details.	July 31, 2027

HW = Hardware OS SW = Operating System Software App. SW = Application Software

While Cisco is committed to the End-of-sale milestone, based on the inventory and supply status, Cisco may need to turn off the orderability for SKUs before the End-of-sale date. Cisco may also keep the orderability on after the End-of-sale date. Customers are encouraged to migrate to the replacement products as soon as possible for better availability and support.

Overview

EOL13835 - Amended

Cisco announces the end-of-sale Cisco SG250, SG250X and SF250 Series Smart Switches (Select Models). The last day to order the affected product(s) is October 30, 2021. Customers will continue to receive phone support from the Cisco Small Business Support Center (SBSC) as shown in Table 1 of the EoL bulletin. Table 1 describes the end-of-life milestones, definitions, and dates for the affected product(s). Table 2 lists the product part numbers affected by this announcement. For customers with active product warranties, support will be available as stated in the product warranty terms and conditions.

End-of-life milestones

Table 1. End-of-life milestones and dates for the Cisco SG250, SG250X and SF250 Series Smart Switches (Select Models)

Milestone	Definition	Date
End-of-Life Announcement Date	The date the document that announces the end-of-sale and end-of-life of a product is distributed to the general public.	April 30, 2021
End-of-Sale Date: HW	The last date to order the product through Cisco point-of-sale mechanisms. The product is no longer for sale after this date.	October 30, 2021
End of Phone Support: HW	The last date to receive phone support as part of the product warranty. After this date, all phone support services for the product are available with additional charges or support fees. In some cases, support may not be available.	October 30, 2022
Last Ship Date: HW	The last-possible ship date that can be requested of Cisco and/or its contract manufacturers. Actual ship date is dependent on lead time.	January 28, 2022
End of SW Maintenance Releases Date: HW	The last date that Cisco Engineering may release any final software maintenance releases or bug fixes. After this date, Cisco Engineering will no longer develop, repair, maintain, or test the product software.	October 30, 2022
Last Date of Support: HW	The last date to receive applicable service and support for the product as entitled by active service contracts or by warranty terms and conditions. After this date, all support services for the product are unavailable, and the product becomes obsolete**. Warranty duration is based on product ship dates; refer to warranty terms and conditions for details.	October 31, 2026

HW = Hardware OS SW = Operating System Software App. SW = Application Software

While Cisco is committed to the End-of-life milestones, based on the actual supply and inventory status, Cisco may need to turn off the orderability for SKUs before the End-of-sale date. Cisco may also keep the orderability on after the End-of-sale date.

Product End-of-Life Notice

End-of-Sale and End-of-Life Announcement for the Cisco Catalyst 2960 Series Switches

EOL9449 - Amended

Cisco announces the end-of-sale and end-of-life dates for the Cisco Catalyst 2960 Series Switches. The last day to order the affected product(s) is October 31, 2014. Customers with active service contracts will continue to receive support from the Cisco Technical Assistance Center (TAC) as shown in Table 1 of the EoL bulletin. Table 1 describes the end-of-life milestones, definitions, and dates for the affected product(s). Table 2 lists the product part numbers affected by this announcement. For customers with active and paid service and support contracts, support will be available under the terms and conditions of customers' service contract.

Table 1. End-of-Life Milestones and Dates for the Cisco Catalyst 2960 Series Switches

Milestone	Definition	Date
End-of-Life Announcement Date	The date the document that announces the end-of-sale and end-of-life of a product is distributed to the general public.	October 31, 2013
End-of-Sale Date	The last date to order the product through Cisco point-of-sale mechanisms. The product is no longer for sale after this date.	October 31, 2014
Last Ship Date: HW	The last-possible ship date that can be requested of Cisco and/or its contract manufacturers. Actual ship date is dependent on lead time.	January 29, 2015
End of SW Maintenance Releases Date: HW	The last date that Cisco Engineering may release any final software maintenance releases or bug fixes. After this date, Cisco Engineering will no longer develop, repair, maintain, or test the product software.	October 31, 2015
End of Vulnerability/Security Support: HW	The last date that Cisco Engineering may release a planned maintenance release or scheduled software remedy for a security vulnerability issue.	October 30, 2017
End of Routine Failure Analysis Date: HW	The last-possible date a routine failure analysis may be performed to determine the cause of hardware product failure or defect.	October 31, 2015
End of New Service Attachment Date: HW	For equipment and software that is not covered by a service-and-support contract, this is the last date to order a new service-and-support contract or add the equipment and/or software to an existing service-and-support contract.	October 31, 2015
End of Service Contract Renewal Date: HW	The last date to extend or renew a service contract for the product.	January 29, 2019
Last Date of Support: HW	The last date to receive applicable service and support for the product as entitled by active service contracts or by warranty terms and conditions. After this date, all support services for the product are unavailable, and the product becomes obsolete.	October 31, 2019

HW = Hardware OS SW = Operating System Software App. SW = Application Software

Product Migration Options

Customers are encouraged to migrate to the Cisco Catalyst 2960-Plus Series Switches. Information about this product can be found at: http://www.cisco.com/en/US/products/ps13024/index.html.

Customers may be able to use the Cisco Technology Migration Program (TMP) where applicable to trade-in eligible products and receive credit toward the purchase of new Cisco equipment. For more information about Cisco TMP, customers should work with their Cisco Partner or Cisco account team. Cisco Partners can find additional TMP information on Partner Central at http://www.cisco.com/web/partners/incentives_and_promotions/tmp.html.

Customers may be able to continue to purchase Cisco Catalyst 2960 Series Switches through the Cisco Certified Refurbished Equipment program. Refurbished units may be available in limited supply for sale in certain countries

© 2013 Cisco and/or its affiliates. All rights reserved. This document is Cisco Public Information.

on a first-come, first-served basis until the Last Date of Support has been reached. For information about the Cisco Certified Refurbished Equipment program, go to: http://www.cisco.com/go/eos.

Service prices for Cisco products are subject to change after the product End-of-Sale date.

The Cisco Takeback and Recycle program helps businesses dispose properly of surplus products that have reached their end of useful life. The program is open to all business users of Cisco equipment and its associated brands and subsidiaries. For more information, go to: http://www.cisco.com/web/about/ac227/ac228/ac231/about_cisco_takeback_recycling.html.

For More Information

For more information about the Cisco Catalyst 2960-Plus Series Switches, visit http://www.cisco.com/en/US/products/ps13024/index.html, or contact your local account representative.

To request information about the Cisco Catalyst 2960-Plus Series Switches, send an e-mail to 2960-plus@cisco.com.

Overview

EOL13189 - Amended

Cisco announces the end-of-sale and end-of-life dates for the Cisco Catalyst C2960C switches. The last day to order the affected product(s) is October 30, 2020. Customers with active service contracts will continue to receive support from the Cisco Technical Assistance Center (TAC) as shown in Table 1 of the EoL bulletin. Table 1 describes the end-of-life milestones, definitions, and dates for the affected product(s). Table 2 lists the product part numbers affected by this announcement. For customers with active and paid service and support contracts, support will be available under the terms and conditions of customers' service contract.

End-of-life milestones

Table 1. End-of-life milestones and dates for the Cisco Catalyst C2960C switches

Milestone	Definition	Date
End-of-Life Announcement Date	The date the document that announces the end-of-sale and end-of-life of a product is distributed to the general public.	October 31, 2019
End-of-Sale Date: HW	The last date to order the product through Cisco point-of-sale mechanisms. The product is no longer for sale after this date.	October 30, 2020
Last Ship Date: HW	The last-possible ship date that can be requested of Cisco and/or its contract manufacturers. Actual ship date is dependent on lead time.	January 29, 2021
End of SW Maintenance Releases Date: HW	The last date that Cisco Engineering may release any final software maintenance releases or bug fixes. After this date, Cisco Engineering will no longer develop, repair, maintain, or test the product software.	October 30, 2021
End of Vulnerability/Security Support: HW	The last date that Cisco Engineering may release a planned maintenance release or scheduled software remedy for a security vulnerability issue.	October 31, 2025
End of Routine Failure Analysis Date: HW	The last-possible date a routine failure analysis may be performed to determine the cause of hardware product failure or defect.	October 30, 2021
End of New Service Attachment Date: HW	For equipment and software that is not covered by a service-and-support contract, this is the last date to order a new service-and-support contract or add the equipment and/or software to an existing service-and-support contract.	October 30, 2021
End of Service Contract Renewal Date: HW	The last date to extend or renew a service contract for the product.	January 28, 2025

© 2023 Cisco and/or its affiliates. All rights reserved.

Milestone	Definition	Date
Last Date of Support: HW	The last date to receive applicable service and support for the product as entitled by active service contracts or by warranty terms and conditions. After this date, all support services for the product are unavailable, and the product becomes obsolete.	October 31, 2025

HW = Hardware OS SW = Operating System Software App. SW = Application Software

Product part numbers

Table 2. Product part numbers affected by this announcement

End-of-Sale Product Part Number	Product Description	Replacement Product Part Number	Replacement Product Description	Additional Information
WS-C2960C-12PC-L	Catalyst 2960C Switch 12 FE PoE, 2 x Dual Uplink, Lan Base	WS-C2960L-16PS-LL	^Catalyst 2960L 16 port GigE with PoE, 2 x 1G SFP, LAN Lite	-

Product migration options

Customers may be able to use the Cisco Technology Migration Program (TMP) where applicable to trade-in eligible products and receive credit toward the purchase of new Cisco equipment. For more information about Cisco TMP, customers should work with their Cisco Partner or Cisco account team. Cisco Partners can find additional TMP information on Partner Central at: https://www.cisco.com/web/partners/incentives_and_promotions/tmp.html.

Customers may be able to continue to purchase the Cisco Catalyst C2960C switches through the Cisco Certified Refurbished Equipment program. Refurbished units may be available in limited supply for sale in certain countries on a first-come, first-served basis until the Last Date of Support has been reached. For information about the Cisco Certified Refurbished Equipment program, go to: https://www.cisco.com/go/eos.

Service prices for Cisco products are subject to change after the product End-of-Sale date.

The Cisco Takeback and Recycle program helps businesses properly dispose of surplus products that have reached their end of useful life. The program is open to all business users of Cisco equipment and its associated brands and subsidiaries. For more information, go to: https://www.cisco.com/web/about/ac227/ac228/ac231/about_cisco_takeback_recycling.html.

For more information

For more information about the Cisco End-of-Life Policy, go to: https://www.cisco.com/c/en/us/products/eos-eol-policy.html.

For more information about the Cisco Product Warranties, go to: https://www.cisco.com/c/en/us/products/warranty-listing.html.

To subscribe to receive end-of-life/end-of-sale information, go to: https://cway.cisco.com/mynotifications.

To whom it may concern;

Release: VK Parts Alart

Dear Valued Partners,

Please be informed that as of 9 Dec. 2019, we have used up all the VK parts kept in stock for overseas customers, and regret tell you that we have **no longer able to take any more VK orders** as from now on.

VK means VK transducer system parts including RS, RW, RD, VL, VW and VK.

Please make sure to switch completely to FK series as there are no more exceptions for any customers any more.

If you have any questions, please let us know.

Thank you.

NATIONAL GREEN TRIBUNAL
NEW DELHI
Dy No.: 905/2015

Guidelines for in-use Generator sets

(Noise and Emissions)

IN-USE GENSETS: Guidelines for Noise and Emission Control

Consequent upon recognizing a fact that genset is a source of air and noise pollution in urban India, the emission standards for petrol & kerosene gensets (up to 19 kilowatt) were notified on 5th October, 1999 which have been subsequently revisited and revised on 07.08.2013. The noise limits for petrol & kerosene genset are in place since 25.09.2000. Similarly, emission standards for diesel gensets (up to 800 kilowatt) were notified on 17.05.2002 which have been revisited and revised on 11.12.2013. The noise limits for diesel gensets are in place since 17.05.2002. These norms are enforced, at manufacturing stage, through notified institutes/laboratories, wherein Central Pollution Control Board functions as nodal agency. Emission norms for diesel gensets (above 800 kilowatt) have been separately notified on 11.07.2002 and being implemented. The standards are likely to be notified shortly for natural gas/LPG run gensets or diesel/petrol & natural gas/LPG gensets.

In the matter of Appeal no. 12(THC) of 2013: Market Welfare Association Vs. District Magistrate & Ors; O.A. No. 17(THC) of 2013: Fashion Market Welfare Association Vs. District Magistrate & Ors, SAS Nagar & Ors; and O.A. No. 32(THC) of 2013: Sadhu Singh & Ors. Vs. The Chief Administrator & Ors., Hon'ble National Green Tribunal (PB) has directed CPCB to prepare guidelines for compliance monitoring and measures to be taken for controlling the pollution by in-use gensets. The Hon'ble Tribunal specifically desired to know life time of locally manufactured gensets and diesel gensets used for agriculture purpose in addition to possibility of checking emission standards as done in vehicles. As a matter of fact, every engine is subjected to wear and tear, which leads to deterioration in its performance i.e. higher noise levels and emission. Generally public complaints are received for gensets having capacity less than 60 kilowatt or so, installed at market places or in residential areas. In the instant care, the Market Welfare Associations of Mohali have installed diesel gensets for their members and power so generated, being used by the shop keepers in case of power failure.

The Punjab Pollution Control Board (PPCB) prescribed emission limits to these Market Welfare Associations for gensets while in-use which is not envisaged in the Environment (Protection) Rules, 1986. These associations have provided stacks of appropriate height to channelize smoke/emission as reported. The associations were not able to comply with the said stipulations for emission prescribed by PPCB. Market associations raised the issue before Hon'ble Punjab and Haryana High Court. The cases were transferred to the National Green Tribunal by the Hon'ble High Court in 2013. Union of India (UOI) through this Ministry was impleaded as one of the respondents, at a later stage.

The concept of monitoring of a genset during its use is a copy of concept of PUC certificate, for (in-use) vehicles, as applicable. Vehicle can be taken to PUC certificate booth or booth/van can be parked on road side for testing of a vehicle but, testing machines cannot be lifted to basement(s) or top floor(s) for monitoring where generators are installed. Each genset manufactured after May 2005 would be complying with emission and noise norms, at manufacturing stage, as per prevalent notified standards. The issue of noise standards for in-use gensets i.e. standards/guidelines to control noise problem has reportedly been discussed in 21st meeting of the 'National Committee on Noise Pollution Control' held on 26.09.2014 in the Central Pollution Control Board.

NGT vide its order on 24.10.2013 asked the Member Secretary, PPCB for a meeting with CPCB and Ministry to finalize the policy as to how best can the DG set be subject to emission standards without asking for providing porthole, monitoring platform Etc. First meeting of officials of CPCB, PPCB and the MoEF&CC was held in the Ministry in the Chamber of Dr. Rashid Hasan, Advisor on 07.11.2013 and second meeting in the office of Member Secretary, CPCB on 15.01.2014 in the matter. CPCB organized a meeting of officials of CPCB, SPCB and MoEF&CC on 01.09.2014. A draft guidelines has been developed. Another meeting has been organized on 23.01.2015 in the Ministry in the matter.

Member Secretary, CPCB appeared personally on 21.04.2014 in the matter and submitted before NGT that CPCB would be able to evolve appropriate methodology for checking the emission of DG sets. NGT directed that on receipt of such report or recommendations from CPCB, MoEF&CC would take official view of the matter. CPCB undertook emission monitoring of a few in-use gensets and submitted the report to Hon'ble NGT (PB), New Delhi on 22.05.2014.

On suggestion of the Ministry, the draft guidelines have been circulated by CPCB among various State Pollution Control Boards (SPCBs) and Pollution Control Committees (PCCs) for inputs. A few SPCBs/PCCs have provided their comments in the matter. Some of them are not is agreement to the recommendations of 'National Committee on Noise Pollution Control' in respect of noise limits. Issues have been decided. Following guidelines for installation of gensets, Do's & don't for Operation & Maintenance, Common facility for power back up; active life of Gensets, and Phasing out of Gensets are suggested.

1. Installation of Gensets

i. Gensets be installed with stand alone or isolated foundation with proper anti-vibration packing/pad, etc;

ii. Smoke of a gensets be channelized/emitted in a manner that it is not a nuisance in the neighbourhood;

iii. Genset be installed in the basement, roof top, ground floor, front/back offset of the premises/building, in, in order of priority. However, due care be taken so that it is not a nuisance in the neighbourhood; and

iv. The developer for new market/malls, high rise building or a gated green field colony shall necessarily install a source of standby power back up and installation of genset by individuals be prohibited. Developer shall necessarily install a system to harvest solar or wind energy, as applicable as a source of electricity apart from solar geysers.

2. Phasing out old Generator sets

Phasing out of old generators as per following schedule may be enforced by concerned SPCB/PCC, area SDM and Police.

i. Any generator set having engines not engraved with manufacturer's name and date of manufacturing not to be allowed to operate on or after 01.06.2015;

ii. Any diesel generator set without certified acoustic enclosure as per GSR 371(E), dated 17th May 2002 not to be allowed to operate on or after 01.06.2015; and

iii. Generator sets manufactured on or after 17th May 2002 be scrapped and dismantled after its useful life, i.e., 15 years from the date of manufacturing or 50,000 hours of operation, which ever earlier.

3. Phasing out age old Diesel Gensets for agricultural applications

Gensets being operated for agricultural applications are away from habitation. The phasing out of diesel gensets may be undertaking as per the following:

i. Any genset being used for agriculture purpose, having engines not engraved with manufacturer's name and date of manufacturing not to be allowed to operate after 01.06.2016;

ii. Any diesel generator set without certified acoustic enclosure as per GSR 371(E), dated 17th May 2002 not to be allowed to operate on or after 01.06.2016; and

iii. All gensets manufactured on or after 17th May 2002 be discarded after its useful life i.e., 16 years from the date of manufacturing or 60,000 hours of operation, whichever earlier.

4. Maintenance of Diesel Gensets.

It is the responsibility of genset owner to maintain the genset. Proper maintenance as per following can reduce the pollution level and increase the Genset life.

i. Do 's

- Inspect the pre cleaner for dirt /dust accumulation and it may be cleaned once in a week;
- Check vacuum indicator for red band and clean the outer element only by compressed air, with pressure not more than 60 psi, if required;
- Drain the water and sediment from water separator and fuel tank before starting;
- Maintain coolant condition as per specifications;
- Check lube-oil pressure every morning after starting;
- Check engine log book of previous shift and reset the engine, if required;
- Clean the engine externally every day;
- Check any leakage of engine oil, coolant and fuel before start up and top up the engine oil, if required;
- Prime the engine before starting;
- Check battery condition and electrical connection before starting as per O&M manual;
- Start the engine and operate it without load/idle idle for 2-3 minutes for any leakage or abnormal sound. Do corrections, if necessary;
- Start the engine on electrical mode and check for proper functioning of safety controls;
- Idle the engine for three minutes before shut off;
- Carry out recommended schedule maintenance checks; and
- Use genuine parts while replacing them during break down or preventive maintenance.

Don 't

- Operate the engine with choked or ruptured air cleaner element;
- Operate the engine with vacuum indicator removed;
- Remove inner element for cleaning;
- Operate the engine without diesel tank cap and strainer;
- Operate the engine without radiator pressure cap;
- Operate the engine without thermostat;
- Operate the engine with lubricating oil level below 'L' mark or above 'H' mark;
- Crank the engine more than 30 seconds continuously;
- Operate the engine with dirty radiator core;
- Over extend the filters and lubricating oil change period;
- Allow dirt or any debris to enter oil system during oil change;
- Operate the engine without support of exhaust and intake piping;
- Operate the engine with low oil pressure or with high coolant temperature.

5. **CPCB Proposal for Continued action plan:** Meanwhile, CPCB in association with the manufacturers and in consultation with "Standing Committee on emission for off-Road Vehicles and construction equipments" may explore the methods of monitoring of in-use generator sets. A study project will simultaneously be undertaken to suggest emission limits and noise limits for in-use diesel Gensets.

6. **Conclusion:** Fixing of life of genset i.e. 15 years for residential and commercial purpose and 16 years for agricultural purpose would help in controlling air and noise pollution due to use of gensets, since, it is a difficult proposition to monitor noise and emission levels at par with the PUC certificate system, as applicable for in-use vehicles.

No. RT-11036/16/2018-MVL
Government of India
Ministry of Road Transport and Highways
(MVL Section)
Transport Bhawan, 1, Parliament Street, New Delhi-110001

Dated the, 20th April, 2020

To,

The Principal Secretaries/ The Secretaries/ Department of Transport
The Commissioners
of all the States and Union Territories.

Subject: Compliance to the Hon'ble Supreme Court orders in regard to registration of BS IV vehicles

Madam / Sir,

I am directed to refer to this Ministry's letter dated 6th March, 2020 vide which the reference was cited to the Hon'ble Supreme Court order dated 24.10.2018 passed in the matter of W.P (C) No. 13029 of 1985, M.C. Mehta V/s Union of India wherein the Hon'ble Supreme Court had directed that - *"Therefore in exercise of the power vested in this Court under Article 142 of the Constitution, we read down sub-rule 21 of Rule 115 and direct that sub-rule of Rule 115 shall be interpreted and understood to read that no motor vehicle conforming to the emission standard Bharat Stage-IV shall be sold or registered in the entire country with effect from 01.04.2020" (Copy enclosed).*

2. Further, the Hon'ble Supreme Court in its order dated 27.03.2020 in the matter of W.P (C) No. 13029 of 1985, M.C. Mehta V/s Union of India had passed following directions (copy enclosed):-

" It is stated by Mr. K.V. Vishwanathan, learned senior counsel appearing on behalf of the applicant / Federation of Automobile Dealers Association that 1,05,000 two wheelers, 2250 passenger cars and 2000 commercial vehicles are there which have been sold but not registered throughout India. Unsold vehicles are stated to be 7,00,000 two wheelers, 15,000 passenger cars and 12,000 commercial vehicles.

With the With the consent of Mr. A.N.S. Nadkarni, learned Additional Solicitor General and Mr. K.V. Vishwanathan, learned senior counsel, it is ordered that sold vehicles be registered by the concerned authorities by 30.04.2020. However, at the same time we direct the applicant to furnish details of the purchasers, on affidavit, of the aforesaid vehicles through e-mail, within seven days from today. Details of registration shall also be furnished to this Court.

... ..

It is stated that there are 7,00,000 two-wheelers which are unsold throughout India with different dealers. Similarly, passenger vehicles are 15,000 and commercial vehicles are 12,000. In Delhi and NCR region, we are not allowing sale and registration

Scanned with Cal

of these kind of vehicles any more. However, in the remaining part of the country, due to the situation which has arisen due to lockdown, it is ordered that not beyond 10% of the vehicles, except with the Dealers in Delhi and NCR region, are permitted to be sold out of the aforesaid number of vehicles to make up the good of six days which were available before the lock-down has been ordered in the country. Details of the sale shall be furnished by the applicant and there shall be no violation of the order passed by this Court. Sales to be done within ten days of the lifting of the lock-down operating in the concerned cities and not beyond it and on an affidavit number of vehicles sold shall be stated by the applicant/Federation of Automobile Dealers Association and only those vehicles shall be permitted to be registered about which affidavit is filed. If out of the vehicles which are permitted to be sold some of them remain unsold then obviously there is no question of any further extension of time for sale of these kind of vehicles. Particulars shall be given on an affidavit with engine and chassis numbers by the applicant/Federation of Automobile Dealers Association of the sale of vehicles before the registration is made, within seven days of the sale."

3. In view of above, the compliance to Hon'ble Supreme Court's orders may strictly be personally ensured while registering only above such BS IV vehicles by passing suitable instructions to NIC and registering through VAHAN. Further, it may be ensured that only the officers of the Transport Department finalise the registration of such BS IV vehicles which are incompliance to the Hon'ble Supreme Court orders.

Yours faithfully,

(Dr. Piyush Jain)
Director (MVL)

Transport Bhawan, 1, Parliament Street, New Delhi-110001

Dated the, 6th March, 2020

To

The Principal Secretaries/The Secretaries (Transport), Department of transport of all the States/UT Administrations.

Subject: Registration of only BS VI vehicles from 1st April, 2020.

Sir/Madam,

I am directed to refer to the this Ministry's notification G.S.R. 889(E) dated 16.09.2016 vide which the Government has mandated mass emission standard for BS-VI throughout the country with effect from 1st April, 2020 to bring down pollution across the country. Further, this Ministry has also issued GSR 178 (E) dated 20th February, 2018 on the subject matter. However, the Hon'ble Supreme Court vide its order dated 24th October, 2018 has directed that no new motor vehicle conforming to the emission standard Bharat Stage-IV shall be sold or registered in the entire country with effect from 01.04.2020. The Hon'ble Supreme Court's in its order dated 24.10.2018 (copy enclosed) in the matter of W.P (C) No. 13029 of 1985, M.C. Mehta V/s Union of India has passed following directions:-

"Therefore, in exercise of the power vested in this Court under Article 142 of the Constitution, we read down sub-rule 21 of Rule 115 and direct that sub-rule 21 of Rule 115 shall be interpreted and understood to read that no motor vehicle conforming to the emission standard Bharat Stage-IV shall be sold or registered in the entire country with effect from 01.04.2020."

2. The compliance to Hon'ble Supreme Court order be strictly ensured.

Yours faithfully,

(S. K. Geeva)

RECORD OF PROCEEDINGS

Writ Petition(s)(Civil) No(s). 13029/1985

M.C. MEHTA Petitioner(s)

VERSUS

UNION OF INDIA & ORS. Respondent(s)

(ONLY I.A. NO. 45883/2020 AND I.A. NO. 45912/2020 AND I..A. NO. 48113/2020(EXTENSION OF TIME) TO BE LISTED ON 27.3.2020 MR. CHANDRA PRAKASH AND MUDIT SHARMA, ADVOCATES
IA No. 45883/2020 - INTERVENTION/IMPLEADMENT
IA No. 45912/2020 - MODIFICATION)

Date : 27-03-2020 These matters were called on for hearing today.

CORAM :
HON'BLE MR. JUSTICE ARUN MISHRA
HON'BLE MR. JUSTICE DEEPAK GUPTA

For applicant(s)/petitioner(s)
Mr. K.V. Vishwanathan,Sr.Adv.
Mr. R. Basant,Adv.
Mr. Mudit Sharma,Adv.
Mr. Rishikesh Chitaley,Adv.

For Respondent(s)
Mr. A.N.S. Nadkarni,ASG
Mr. S.S. Rebello,Adv.
Mr. Gurmeet Singh Makker, AOR
Mr. Mukesh Kumar Maroria, AOR

UPON hearing the counsel the Court made the following
O R D E R

The Court convened through Video Conferencing.

IA Nos. 45883/2020, 45912/2020 & 45912/2020

It is stated by Mr. K.V. Vishwanathan, learned senior counsel appearing on behalf of the applicant/Federation of Automobile Dealers Association that 1,05,000 two-wheelers, 2250 passenger cars

and 2000 commercial vehicles are there which have been sold but not registered through out India. Unsold vehicles are stated to be 7,00,000 two wheelers, 15,000 passenger cars and 12,000 commercial vehicles.

With the consent of Mr. A.N.S. Nadkarni, learned Additional Solicitor General and Mr. K.V. Vishwanathan, learned senior counsel, it is ordered that sold vehicles be registered by the concerned authorities by 30.04.2020. However, at the same time we direct the applicant to furnish details of the purchasers, on affidavit, of the aforesaid vehicles through e-mail, within seven days from today. Details of registration shall also be furnished to this Court.

With respect to unsold vehicles as the manufacturer should have been ready because of deadline set for BS-VI compliant vehicles, there is no justification to extend the time which was fixed long time ago. This is not something new which has occurred, it would be further injurious and further burden on human health to be caused by pollution of BS-IV vehicles when BS-VI vehicles are supposed to be produced by the manufacturers well in advance considering the deadline of 31st March, 2020.

It is stated that there are 7,00,000 two-wheelers which are unsold through out India with different dealers. Similarly, passenger vehicles are 15,000 and commercial vehicles are 12,000. In Delhi and NCR region, we are not allowing sale and registration of these kind of vehicles any more. However, in the remaining part of the country, due to the situation which has arisen due to lock-down, it is ordered that not beyond 10% of the vehicles, except

with the Dealers in Delhi and NCR region, are permitted to be sold out of the aforesaid number of vehicles to make up the good of six days which were available before the lock-down has been ordered in the country. Details of the sale shall be furnished by the applicant and there shall be no violation of the order passed by this Court. Sales to be done within ten days of the lifting of the lock-down operating in the concerned cities and not beyond it and on an affidavit number of vehicles sold shall be stated by the applicant/Federation of Automobile Dealers Association and only those vehicles shall be permitted to be registered about which affidavit is filed. If out of the vehicles which are permitted to be sold some of them remain unsold then obviously there is no question of any further extension of time for sale of these kind of vehicles. Particulars shall be given on an affidavit with engine and chassis numbers by the applicant/Federation of Automobile Dealers Association of the sale of vehicles before the registration is made, within seven days of the sale.

The application for impleadment is allowed to the extent of intervention and these applications are accordingly, disposed of.

(ANAND PRAKASH)
BRANCH OFFICER

IS 3034 : 1993

Indian Standard

FIRE SAFETY OF INDUSTRIAL BUILDINGS: ELECTRICAL GENERATING AND DISTRIBUTING STATIONS — CODE OF PRACTICE

(Second Revision)

1 SCOPE

This standard lays down the fire safety requirements regarding building construction, various process hazards and facilities, storage areas, etc, pertaining to electricity generating stations (where electricity is generated from conventional sources using coal, oil, gas turbines, diesel generator sets, and the distributing stations).

NOTE — This standard does not deal with the fire safety requirements of nuclear power plants and hydro-electric power stations.

2 REFERENCES

The Indian Standards listed in Annex A are necessary adjuncts to this standard.

3 GENERAL

3.1 The main fire risk areas in a thermal power station are:

a) Control room;
b) Switch gear room;
c) Cable ways and races;
d) Coil and oil storage;
e) Coal handling system including conveyor belts;
f) Transformer houses;
g) Coal houses;
h) Coal mills; and
j) Bunkers.

3.2 The following are also the areas having high damage potential in a thermal power station:

a) Turbo-generator including lubricating and jacking oil systems, turbo-generator supporting structures and floor areas around the turbine;
b) Hydrogen cooling and seal oil equipment;
c) Boiler feed pump turbine including lubricating and jacking oil services, and supporting structures including floor areas around the pump;
d) Burner front areas of the boiler including fuel oil lighting up headers and pipe work basement floor immediately beneath the burner front, and the boiler casing area above the burner wind box;
e) Oil filled generator, station unit and auxiliary transformers, reactor tranformers including associated cooler and conversation tanks;
f) Auxiliary boilers, oil burner pumps;
g) Diesel driven pump/engine units and their fuel and storage tanks;
h) Bulk hydrogen stores; and
j) Hydrogen generation plant.

3.3 Apart from mechanical hazards of gas turbines, the hazards from fire mainly arise from fuel explosion fires due to leak in the fuel system or lubricating and seal oil systems. Surface temperatures of combustible chambers will be higher than ignition temperature of fuel and lube oil.

3.4 The distribution stations such as load despatch centres and sub-stations also cause fire hazards arising from oil-field transformers, switch gear, cable galleries/tunnels, etc.

3.5 The planning for the fire protection scheme should start right from the design stage of the plant, thereby ensuring that adequate and suitable fire protection measures, both active and passive are incorporated not only while finalising the plant design itself, but right up to the completion stage.

3.6 In the fire protection system for the power plant, due consideration shall be given to the danger of smoke logging in all locations, in addition to safeguarding against other likely gaseous toxic products, the provision of adequate means of escape shall also be given due consideration in the interest of life safety.

4 BUILDING CONSTRUCTION AND RELATED REQUIREMENTS

4.1 The structural elements of all buildings of an electrical generating/distributing station shall be of Type 1 construction, complying with the requirements as given in IS 1642 : 1989.

4.2 Provision for smoke ventilation, preferably of automatic type shall be made, over the generator floor to permit escape of heat and large volumes of smoke likely to be generated. The requirements of fire venting shall conform to the provisions contained in relevant Indian Standards.

4.3 A normal ventilation rate of minimum 2 cycles per hour shall be maintained for large area turbine halls. For extraction of smoke from fire, a volume change rate of 12 changes per hour shall be obtained depending on fire load, room height, size, etc. In case the start of the smoke extraction is delayed, the volume change rate shall have to be increased even up to 30 changes per hour. Smoke vents of approved design shall be incorporated in cable tunnels/galleries, plant rooms, switch board rooms, etc and provision made for the attachment of portable extraction unit, if not already served by a fixed smoke extraction installation.

4.4 To achieve compartmentation, the plant shall be sub-divided into individual fire areas, to be maximum extent feasible. Reduce the spread of fire between such areas and the consequential damage, and also to achieve easy control and extinguishment of fire. Such subdivision by fire barriers or separation walls of minimum 2 hours fire resistance shall be provided in the following cases:

a) Where turbine hall houses more than one unit, a fire barrier/separation wall shall be provided for each unit beneath the operating floor in the turbine and electrical bays;
b) Between TG hall and control room/computer room/instrument room;
c) Between TG hall and electrical switchgear room (unit-wise barriers needed);
d) Between the TG hall and cable galleries (unit-wise barriers needed);
e) Between TG hall and boiler house;
f) Between TG hall and coal pulverisers;
g) Between TG hall and administrative building;
h) Between staircases and lift shafts and the rest of the building;
j) Between storage of flammable liquids and rest of the building;
k) Between transformer yard/outdoor transformers and other nearby building, in case a clear distance of 15 m is not available;
m) Between individual oil-field transformers containing oil in excess of 2 000 litres in case clear distance as specified in IS 1646 : 1982 is not maintained;
n) Between battery rooms and other adjoining areas, and
p) Between cable galleries of each unit.

4.5 The doors provided in the separation walls between these fire areas shall be self-closing fire-check doors of fire rating equal to that of the fire wall.

4.6 Windows/Ventilators/Glass panels in fire separation walls (for example, for control rooms or computer rooms) shall be provided with preferably clear fire resisting glass panels of minimum 45 minutes fire resistance or with automatic fire resistant shutters or automatic water curtain.

4.7 Cellular or foamed plastic materials (such as expanded polystyrene, polyurethane foam etc) shall not be used as interior finish or insulation in any part of the building. Where interior finish (wall linings, false ceilings, etc) is unavoidable, they shall be non-combustible material and of Class 1 flame spread (*see* IS 12777 : 1989).

4.8 Air conditioning for the control room shall provide a pressurised environment to preclude the entry of smoke in the event of a fire outside the control room.

4.9 Plastic ducts, including fire retardant types shall not be used for ventilating systems.

4.10 Provision shall be made in all fire areas of the plant for removal of all liquids, including fire fighting water, directly to safe areas. The drainage facilities shall be adequate to cater to all of the following emergencies:

a) The spill of the largest single container of any flammable or combustible liquids in the area;
b) A minimum flow of 3 600 lpm for fire fighting operations for at least 20 minutes; and
c) A maximum design discharge of fixed fire suppression system operating for a minimum of 20 minutes.

4.11 Floor draining from areas containing flammable or combustible liquids shall incorporate suitable flame traps or flame arresters, conforming to IS 11006 : 1984.

4.12 The building or compartment housing the coal pulverising equipment shall be constructed in accordance with IS 3595 : 1984. The doorway openings in the separating walls shall be provided with sills of not less than 15 cms height with provision of ramps on either side.

4.13 Switch gear wherever applicable, oil-circuit breakers and transformers shall be housed preferably in detached single storey building of Type 1 construction (*see* IS 1642 : 1989).

4.14 The building used for storage purposes shall confrom to the requirements of IS 3594 : 1991.

4.15 The safety distance separating various buildings shall be in accordance with IS 1643 : 1988, and the means of exit requirement shall be in accordance with IS 1644 : 1988.

4.16 Distance separating fuel oil storage tanks, open storage of oil drums, etc shall be in accordance with the relevant statutory requirements.

4.17 The power station buildings and switch yards shall be provided with lightning protection conforming to IS 2309 : 1989.

5 POWER STATION FACILITIES

5.1 Coal Storage and Handling

The safety requirements for the coal storage and handling and other associated equipments in the power station shall conform to the provisions contained in IS 3595 : 1984. However, certain aspects which need special attention are enumerated below.

5.1.1 The belt conveyor system installed for handing coal shall preferably be of enclosed type so as to prevent the escape of dust in the power house area and these shall be thoroughly bonded and grounded to minimize static discharges. Dust collectors should preferably be located outdoors, wherever necessary.

5.1.2 The conveyor belt shall preferably be of fire resistant material conforming to IS 3181 : 1978. The openings in the walls and floors through which the conveyor belt system passes shall be adequately protected with properly designed water spray nozzles capable of providing the necessary particle size and pressure, to cover top and bottom sides of the conveyors near the openings. These water spray nozzles shall be controlled by an automatic valve actuated by fire detectors with a manual override.

5.1.3 Regular inspection with remedial maintenance shall be undertaken to reduce coal spillage problems and therefore the fire risks.

5.1.4 Special care shall be taken against the risk of fire while belts are being vulcanised or when welding is being carried out in the vicinity of conveyors.

5.1.5 The major fire hazard in bunkers is caused by stagnant coal which may remain for long periods in bunkers even though they are continuously in use. The chances of the stagnant coal catching fire are greatly aggravated by any draught of air through the coal in the bunkers. In the event of a fire in the bunkers, the two main hazards are the production of highly toxic CO gas and also generation of thick smoke in a confined space. Therefore, it is highly essential to ensure proper ventilation to the bunker area.

5.2 Turbo-Generators

5.2.1 While many of the older units are open design and air cooled, all newer and larger units are totally enclosed and hydrogen, or water cooled, or use a combination of liquid and gas for cooling. The stator winding may be liquid cooled and the rotor gas cooled by use of hydrogen. Mechanical of electrical failure of the generators are possible with resultant fire hazards.

5.2.2 Some of the air cooled generators are provided with CO_2 extinguishing systems for the windings. Hydrogen cooling is generally used for larger machines (capacity exceeding 200 MW). The generator control equipment is usually provided with devices to monitor the hydrogen gas pressure and purity. To prevent gas leakages, oil pressure gland seals (oil seals) are provided. One of the essential fire safety requirements in hydrogen cooled generators is to maintain the H_2 purity at about 95 percent to make explosion risks minimum. However, there is explosion hazard in the oil system and also in the event of hydrogen leak through the oil seals. The hazard of a TG fire incident may be increased if hydrogen is released in the event of mechanical failure or severe vibration. Fire is the most common result of H_2 leakage. A few incidents have occurred where escaping H_2 has mixed with air and exploded.

5.2.3 The H_2 cylinders used for cooling shall be placed outdoors or in a separate well ventilated room with exhaust. Where H_2 is supplied from a central storage outside, an emergency shut-off valve shall be installed on the supply line at an accessible location which may be operated from the control room. When H_2 cooled generators are taken out of service for inspection, or repairs, and during restoration to service, an inert gas, such as CO_2 shall be used to purge the line to prevent the formation of an explosive H_2 air mixture.

5.2.4 Periodical checks for H_2 leaks shall be made at the generator and sealing system.

5.2.5 Major fire risks in turbo-generators arise from the leakage or escape of combustible lubricating and hydraulic fluids contained in the lubricating or governor seals, and jacking oil systems. The risk normally extends to the floor areas which house the lubricating systems and within the radius of an oil spray pattern cascading from a failure of bearing oil supply headers.

5.2.6 A bund wall shall surround and contain the main labricating oil, jacking and flushing oil package unit are, to prevent spread of oil to surrounding floor areas.

5.2.7 Concrete or concrete protected steel shall be used for the supporting structure of turbo-generator units. Exposed steel construction is acceptable if protected by an automatic deluge sprinkler system (if, facilities exist for 'leg-wetting').

5.3 Fuel Oil Storage

5.3.1 The fire safety requirements for all the fuel oil storage facilities in the power plant shall conform to the relevant statutory requirements. Apart from these, some of the other important requirements are:

a) Only the minimum quantity required for day's requirements shall be stored in the TG house presmises;

b) All internal storage tanks shall be provided with a trough or catchpit, having the same capacity as the tank, for collecting leakages, which shall be equipped with a drain pipe, leading back to the main supply tank or safer areas; and

c) All above ground storage tanks installed in-doors shall comply with the following provisions:

   i) The individual capacity of any tank shall not exceed 10 000 litres;

   ii) The aggregate capacity of such tanks shall not exceed 2 00 000 litres; and

   iii) The building/compartment housing storage tanks shall be segregated from other building/compartment by separating walls, and all openings shall be protected by fire resisting doors of 2 hours rating and a brick or concrete liquid-tight ramp at least 150 mm in height.

5.3.2 An in-door storage tank shall not be filled otherwise than from open air through a permanently fixed metal pipe, the inlet of which shall be fitted with a screwed cap or valve. The fill pipe, shall extend into the tank so that its outlet is within 5 cm of the tank bottom.

5.3.3 All oil tanks shall be fitted with a vent pipe leading into open air, the open end being covered with a standard flame arrester conforming to IS 11006 : 1984.

5.3.4 For storage located in-doors, overflow pipes shall be carried outside the building, and deliver the oil into a catch pit or other safe position and the pipe shall terminate in a water seal container at least 30 cm below the surface of water.

5.3.5 *Outdoor Oil Storage*

5.3.5.1 External hydrant system for the power plant should be extended to cover the outdoor storage tanks with 63 mm double outlet covering the entire area. The oil tanks should also be protected by 38 mm fixed water monitors at vantage points so as to provide water for cooling of the tanks.

5.3.5.2 The oil storage tanks should also have fixed foam fire extinguishing system in conformity with IS 12835 (Part 1) : 1989.

5.4 Lubrication Oil Risks

5.4.1 The fire risk of the lubrication system of the turbo generator may be considerably reduced by using completely separate circuits for the lubricating system and the control system. The risks arise from an escape of combustible lubricants and hydraulic fluids contained in the systems.

5.4.2 An oil fire generally follows an escape of fluid on to hot steam surfaces, impregnation and absorption of oil into laggings and leakage into electrical equipment.

5.4.3 The continuous ieakage and absorption of combustible oils into lagging covering steam pipes, turbine casing, etc give rise to lagging oil fires.

5.4.4 The seal oil and the jacking oil systems are also subject to the same risks.

5.4.5 There shall be arrangement for collecting leakages of lubricating oil from the distributing pipe installations by adopting any one of the following methods:

a) By running the oil lines in steel-lined trough, specially provided for this purpose; and

b) By employing the double pipe system that is running the pressurised supply pipe inside a large pipe acting as a leakage collector, which shall also act as a return pipe.

5.4.6 Where it is not practicable to separate oil risks from hot pipes and components sufficiently shielding/deflecting plates and protection cladding shall be provided at suitable point and place.

5.5 Boiler Plant

5.5.1 The details in respect of the fire safety aspects of the boiler plant installation and auxiliary equipment shall conform to the provision contained in IS 8633 : 1977.

5.5.2 The fuel delivery to the burners shall be of proper temperature and pressure as recommended by the manufacturer.

5.5.3 *Furnace and Its Control Unit*

The manually operated dampers of the boilers shall be such that they may not close off more than 80 percent of the internal cross-sectional area of the smoke pipe.

5.5.4 The automatically operated dampers of the boilers shall be of type to maintain safe damper openings at all times and arranged to prevent starting of burner unless the damper is opened at least 20 percent of the internal cross-sectional area of the smoke pipe.

5.5.5 Readily accessible shut off valves shall be provided in oil supply line near each oil burner.

5.5.6 Every boiler shall be equipped with the following safety control devices:

a) Electrical ventilation interlocking mechanisms which would prevent the fuel pumping circuit from being put into operation without closing the ventilating fan-motor circuits;

b) Pre-ventilation time delay which would prevent the furnaces from being fired until and unless the furnace had been ventilated for a pre-determined period of time;

c) Anti-flooding device to prevent abnormal discharge of oil at the burner; and

d) Flame failure safeguard which would automatically cut off flow of fuel in the event of accidental extinguishment of the burner flame.

5.5.7 No maintenance work shall be undertaken on a furnace without completely purging the interior of all traces of flammable gases and vapours and unless satisfactory results are obtained by checking with a cumbustible gas indicator (explosive meter).

6 ELECTRICAL EQUIPMENT AND INSTALLATIONS

6.1 General Requirements

6.1.1 The electrical equipment and installations of the power stations shall conform in all respects to the relevant guidelines given in IS 1646 : 1982.

6.1.2 Gasoline, benzene, ether, alcohol and similar flammable cleaning fluids shall not be used on energized electrical apparatus. The use of such flammable cleaning fluids on de-energized apparatus may, however, be permitted provided the apparatus is not energized within half an hour of such use.

6.1.3 None of the flammable solvents mentioned in 6.1.2 shall be used in the vicinity of electrical equipment from which spark may be received.

6.1.4 Every electrical equipment shall be kept free of deposits of oil, grease, carbon dust, etc.

6.1.5 Each and every electrical equipment shall be effectively earthed to avoid any flask/spark.

6.2 Cables and Cable Galleries etc

6.2.1 The fire protection requirement for cable galleries, cable runs, etc shall conform to the provisions contained in IS 12459 : 1988, including the fire protection requirements such as segregation of cable runs into compartments, use of fire resistant cables in critical areas and groups of cables, sealing of penetrations in the walls and floors by use of fire stops, fire detection and alarm systems, and the extinguishing systems.

6.3 Transformers

6.3.1 All transformer installations shall comply with the provisions of IS 1646 : 1982 in addition to the following:

a) As a protection against excessive damage due to occurrence of faults, transformers fitted with conservators shall be protected with Buchoz Relay;

b) All transformers shall be equipped with oil temperature alarms or excess current relay protection;

c) The bushings, insulators, and contacts of taps changing gears shall be kept scrupuluosly clean at all times; and

d) The level and dielectric strength of the transformer oil shall be checked at periodic intervals, and in the event of presence of a large quantity of sludge the oil shall be renewed.

6.3.2 In addition to the usual cable clamps above floor level, cables shall also be clamped immediately below floor level. Each cable or group shall, where possible, be protected by a pipe or cover of heat resisting material rising to a height of at least 45 cm above floor level or terminating just below cable gland, sealed at the bottom and filled with sand or small pebbles.

6.3.3 Whenever possible, all jute shavings shall be removed from cables in switch rooms, basements and tunnels.

6.3.4 Where cables rest on the floor of tunnel or basements, they shall be separated into groups by vertical barriers of tile brick, or concrete and the trenches so formed shall be filled with small pebbles. Alternatively, the cables may be separately clamped and each cable run shall be separated by a minimum clear space of 75 mm.

6.3.5 The cable shall not be routed near hot steam pipe, turbine, pulverised coal pipe and near hot gas ducts. Wherever it is unavoidable fire resistant cables shall be used.

6.3.6 Power cables and control cables shall run in separate trenches, wherever possible.

6.4 Battery Room

6.4.1 Motor generator sets and/or convertors or rectifiers together with necessary switch and control gear shall be mounted separately (preferably in separate rooms as far as possible) and away from the batteries.

6.4.2 The storage batteries in all attendant equipment, except compact metal clad unit shall be mounted away from all other apparatus, in a position free from dust, and shall be well ventilated.

6.4.3 The batteries shall stand directly on durable, non-absorbant and non-conducting material, such as glass, porcelain or glassed earthenware. The materials shall rest on a bench which shall be kept dry and insulated from earth. If constructed of wood it shall be slatted and treated with anti-sulphuric enamel.

6.4.4 The batteries shall be so arranged on the bench that a potential difference exceeding 12 V shall not exist between adjoining cells. The batteries exceeding 20 V shall not be bunched or arranged in circular formation.

6.4.5 All combustible materials within a distance of 60 cm measured horizontally shall be protected with hard asbestos sheets or similar material. No object shall be suspended directly over the batteries.

6.4.6 The charging circuit shall be provided with double or triple pole switches and fuses. Where a motor generator is employed, the motor shall be provided with double or triple pole switches and fuses and automatic battery and cutout shall be placed in the generator circuit. Any sub-circuit shall be provided with a fuse rated at not more than 7 ampere in each live conductor.

6.4.7 The charging control panels shall be of durable, non-ignitable, non-absorbant, non-conducting material and together with rectifiers, transformers and supports for resistance of lamps, shall be on a bench which shall be kept dry and insulated from earth. If constructed of wood, it shall be slatted and treated with anti-sulphuric enamel.

6.4.8 If batteries are charged through resistance or lamps, unless enclosed in metallic enclosure, shall be at least 60 cm away from the nearest battery.

6.4.9 All permanent wiring shall be securely run and protected, against mechanical injury and efficient terminals or connection shall be supplied from which connection to batteries may be made. Rubber insulated wiring or any other type of combustible insulated wiring, if on insulators, shall not be run in such a position that a fire arising at any battery could reach it. All conductors connecting the supply terminals to batteries shall have either rubber or tough compound insulation without tape or braid.

6.4.10 If the source of supply in the mains has one conductor earthed, the lamps or other resistances shall be connected on an earthed lead and the batteries connected direct to earth conductors.

6.4.11 No celluloid cased storage batteries shall be allowed for use.

6.4.12 All china clay or other insulators shall be kept free of dust, and all casing, conducts, wood or metal work likely to be affected by acid spray or fumes shall be protected by acid resisting paint, varnish or compound, All exposed current carrying metal and terminals shall be coated with petroleum jelly.

6.4.13 Suitable exhaust fans shall be provided for the removal of gas from the battery rooms. Battery rooms shall be provided with ventilation to limit the concentration of hydrogen to one percent by volume.

7 ILLUMINATION

7.1 For effective fire fighting purposes, the minimum illumination required for all working places, such as turbine houses etc is 100 lux, and for control rooms is 150 lux.

8 FIRE PROTECTION MEASURES

8.1 Electrical generating and distribution stations come under the occupancy classification of Industrial Buildings, G-3 (*see* IS 1641 : 1989).

8.2 The extent and nature of the fire protection measures as well as exit facilities to be provided will depend on various factors like size and location of the station, risks involved, availablity of outside help for major fire fighting. However, all the power stations, irrespective of their size, shall provide for adequate the protection/fire fighting arrangement and exit facilities.

8.3 Generating stations may vary in size from small municipal stations to large multi-unit power stations, including super thermal power stations.

8.4 The modern trend is to locate power station in relatively remote areas with hardly any other assisting fire service within reasonable distance. This isolated location makes it all the more necessary for power stations to have an independent full fledged and well maintained fire fighting service of their own. Further, in order to enable quick response to any fire outbreak and to limit the response time to accepted standards, that is, within 5 minutes, it is necessary that a well trained and adequate fire fighting services is available within the premises.

8.5 Turbo-Generators and Supporting Structures

8.5.1 The fixed water spray type protection system shall be used for controlling a fire involving large quantities of lubricating oil on turbine generators. This shall consist of two systems of water protection, one for areas below the operating floor of the turbo generator and designed to extinguish pool fires and also providing protection against heat generated by three-dimensional or spray fires. The other is a water spray system for oil fires at or around the bearing housings. Fixed CO_2 or dry chemical extinguishing systems have been found to be inadequate for basic protection of turbo-generator because of the likelyhood of re-ignition and, further, these extinguishing media may not be sufficient to cope with a long duration fire. However, in some cases fixed dry chemical or CO_2 systems backed by water spray systems should be provided.

8.5.2 Fixed high velocity water spray systems, designed to discharge a flow of 10 lpm/m^2 shall cover completely all oil systems, oil piping, pumps, coolers and all similar associated equipments including adjacent floor areas. The water spray systems shall be divided into convenient zone, and each zone shall have sufficient number of projectors to cover the risk adequately. The number and groups of projection zones are related to, the size of turbo-generator unit and its lubricating plant and auxiliaries. Typical zone arrangements shall cover the following areas of seal oil systems, coolers and pipe work, governor gear, excitor, main lubricating tank and pumps, lubricating oil pipe work, turbo generator and boiler feed pump, exposed steel equipment, foundation support legs, rate of rise fire detectors in accordance with IS 2175 : 1988 shall be provided. The heat detectors shall be provided at strategic points and arranged to give early warning of any unusual high temperature conditions in the area.

8.5.3 Automatic control of the extinguishing systems in this area is more effective than manual control. However, manual over-ride shall also be provided. Zone control deluge operating valve shall be carefully sited so as to be operable without fire or smoke hazard to the operator during a fire. This may be achieved by careful location of the valve assemblies away from protection zones, or by enclosures of the valves in protective cubicles, at the same time affording the operator a good view of the protected zones. Access routes to control valves shall not involve exposure hazards to the operating persons.

8.5.4 The water spray systems shall incorporate isolation facilities so as to enable periodic testing, maintenance etc.

8.5.5 Normally all cut off valves shall be locked open.

8.5.6 The internal hydrant (landing valves) shall be provided for protection of the turbo-generator building including turbine operating floors and basement areas.

8.5.7 The hydrant system shall have sufficient pressure to allow the generation of low expansion foam from hand branches for fighting static/running oil fires.

8.6 Turbine Driven Feed Pumps

8.6.1 The fixed high velocity water spray system shall cover completely all the systems, oil pipe to the pumps, coolers and other similar associated equipment including adjacent floor areas, as for the main turbine. The fire detection system as well as the water spray system shall be of the same type as for the turbo-generator.

8.6.2 To enable fire fighting to be successfully carried out facilities shall be provided for easy smoke disposal, by provision of sufficient cont-rollable top and bottom ventillation.

8.6.3 In the event of a fire involving or close to a turbo-generator or its auxiliaries, it may be safer to shut down the unit so as to limit the. damage only to that directly resulting from the fire.

8.7 Hydrogen Equipment

8.7.1 Any hydrogen equipment that is sited in the turbo generator shall be positioned in such a way that the area and the equipment are well ventilated and directed into the open air.

8.7.2 Spark free tools shall be used in an area where gas may be present.

8.8 Transformers

8.8.1 No fixed fire protection equipment (such as high velocity spray) is required on transformers below 10 MVA or in the case of oil filled transformers with oil capacity of 2 000 litres and below. For all other transformers high velocity water spray system shall be provided. This system shall be separately mounted and designed to take into account the possibility of a transformer explosion. The water spray deluge valve house shall be located outside the transformer fire zones and protected from radient heat and other fire effects. The actuation of this system shall be automatic but manual operating valves shall also be provided.

8.8.2 The high velocity spray system for the transformers should be well designed to have adequate coverage of the entire transformer unit including the conservation tanks, the bushings and the bottom area. The positioning of the nozzles should be such to protect all surfaces of the transformer and to give discharge rate for the system not less than 10 lpm/m^2 of the area to be protected. The

automatic high velocity water spray shall be of pre-active with quartzoid bulbs.

8.8.3 Fire barriers walls shall be provided between transformers where they are less than 15 m apart or where the oil capacity exceeds 2 000 litres.

8.8.4 The transformer shall be so designed as to permit the safe testing of the fire protection system, with discharge of water, while on load.

8.8.5 There shall be arrangements for containment of the spilled oil. For generator transformers and other large transformers the drainage system as well as storage, pit shall be sufficient to accommodate at least the total volume of the oil and an allowable volume of fire fighing water. The drain pipes shall be provided with standard type of flame arresters.

8.8.6 The fire protection systems covering the generator transformers, associated oil conservator tank and cooler batteries shall be designed to meet the single risk concept so that simultaneous deluge over all the three risk zones is possible.

8.8.7 The electrical clearances for high velocity spray system shall be as given in Table 1.

8.9 Switch Gear

8.9.1 Gas filled circuit breakers (such as SF_6 or sulphur-hexafluoride) and vaccum breakers are the least fire hazardous as compared to the oil breakers or air-blast breakers. Hydrant protection shall be in close proximity to these risks.

8.9.2 For an enclosed switch gear room automatic Clean Agents or CO_2 total flooding extinguishing system is considered preferable to water spray. Switch rooms shall be provided with controllable ventilators.

8.9.3 All cable entries in the switch gear room shall be effectively sealed by use of fire stops (*see* IS 12459 : 1988).

8.9.4 All switch gear rooms shall be kept clear and free from any accumulated debris or flammable material.

8.9.4.1 The following 6.6 kV and 415 V switch boards may preferably be housed in separate rooms:

a) Unit switch boards (with separate room for boards of each unit),

b) Station switch boards, and

c) Unit switch boards.

8.9.5 Switch gear rooms shall be pressurised by the ventilation system to prevent ingress of dust. Suitable interlocks shall be provided to switch off the pressurised ventilation system before the centralised extinguishing gas system is to be put into operation.

Table 1 Clearance from Water Spray Equipment to Live Un-Insulated Electrical Components

(*Clause* 8.8.7)

Nominal Line Voltage	Nominal Voltage to Ground	Design BIL	Minimum Clearance
kV	kV	kV	mm
To 15	To 9	110	178
23	13	150	254
34.5	20	200	330
46	27	250	432
69	40	350	635
115	66	550	940
138	80	650	1 118
161	93	750	1 321
196-230	114-132	900	1 600
		1 050	1 930
287-380	166-220	1 175	2 210
		1 300	2 489
		1 425	2 769
		1 550	3 048
500	290	1 675	3 327
		1 880	3 607
500-700	290-400	1 925	3 886
		2 100	4 267
		2 300	4 674

NOTES

1 BIL values are expressed as kilovolts (kV), the number being the crest value of the full wave impulse test that the electrical equipment is designed to withstand.

2 When the design BIL is not available, and when nominal voltage is used for the design criteria, the highest minimum clearance listed for this group shall be used.

8.9.6 Smoke detectors of ionisation and optical types shall be employed in the switch gear rooms on cross-zoning principle with suitable time delay devices incorporated. Proven intelligent, micro processor based detection/suppression system shall be preferred.

8.9.7 Fixed automatic gaseous extinguishing of local application type shall be ideal in the switch gear system.

8.10 Control Room

8.10.1 For control room of Class I and II of power generating units as well as distribution stations shall have fire barrier/separation walls between the main TG hall/any other adjacent

room. The control room shall have 2 hours fire resistance with smoke stock fire check doors of the same rating.

8.10.2 All cable entries/openings in the control room shall be effectively sealed.

8.10.3 The room shall be kept clear and free of any waste material whenever glass panels are provided, it shall be of clear fire resisting glass having minimum 45 minutes fire resistance or fitted with automatic resistant shutters/ automatic water curtain.

8.10.4 The AC system shall be automatically switched off before. the extinguishing system is put into operation.

8.10.5 Smoke detectors of ionisation and optical types shall be provided in the Control room on cross-zoning principle with suitable time delay devices incorporated. Proven intelligent, micro-processor based detection/suppression system shall be preferred.

8.10.6 'ON' and 'OFF' type sprinkler system, CO_2 or Clean Agents extinguishing system shall be provided for control room. In this case 'ON' and 'OFF' type should be preferred.

8.11 Cable Galleries

8.11.1 The experience of Power Station cable fires had been that in many cases, several units, if not the whole station, got seriously affected by a single fire. PVC is not easily flammable but burns freely in fairly high temperature conditions producing copious quantities of dangerous fumes and gases including HCL gas. These gases are toxic and highly corrosive. The cable galleries, separating rooms etc shall be provided with facilities for ventillation and means for controlling it from outside. Apart from the need to clear smoke and toxic gases in the event of a fire, ventillation may be necessary for temperature control of the galleries on areas.

8.11.2 To limit the spread of fires along cable ways fire barriers shall be installed in accordance with the requirements of IS 12459 : 1988.

8.11.3 Access and exit ways large enough to allow a man wearing breathing apparatus and carrying other fire fighting equipment to pass through shall be provided. The distance between such exit ways shall not exceed 30 m in the cable runs. The cable galleries or runs shall be provided with automatic fixed fire fighting installations using water, CO_2 Clean Agents or Water Mist or high expansion foam. However, water spray sprinkler system is generally preferred. The design of sprinklers and projectors shall ensure that no rack or cable is left unprotected. Automatic sprinkler system for the cable galleries shall be designed for a density of not less than 12 lpm/m^2 over area of 232 m^2. Water spray system shall have the same density.

8.11.4 Smoke detectors of ionisation and optical type shall be provided in the control room on cross-zoning principle with suitable time delay devices. Proven intelligent micro processor based detection/suppression system shall be provided. Alternatively heat detectors of linear type covering all the cable racks/trenches shall be installed.

8.11.5 Where high expansion foam or gas exgtinguishing systems are used, the system shall actuate only after all persons inside have been evacuated.

8.11.6 Self-contained BA sets shall be available for ready use by trained personnel at strategic points near the entry to the cable galleries.

8.11.7 All cable galleries/tunnels shall be maintained in a neat and tidy conditions. These shall not be used for storage/dumping of scrap or any other article including electrical spares.

8.11.8 The means of escape shall be clearly indicated and all exit ways shall be kept clear. The controlled access procedure shall be enforced for the cable galleries, tunnels etc for employees on regular work or inspection duties.

8.11.9 Floors of all cable galleries/tunnels shall have a slope of suitable gradient leading to a sump of adequate capacity for collecting seepage and other water including water used for fire fighting. An automatic sump pump of suitable capacity shall be installed at each sump to pump out the water to the surface drain.

8.12 Coal Storage and Handling Equipment

8.12.1 Coal handling plant shall be provided with an early warning fire detection system for moving and stationery fire detectos such as rate of rise/infra-red/linear heat detectors/optical beam should be adopted.

8.12.2 The fire protection measures for open storage of coal and coal handling equipment, as prescribed in IS 3595 : 1984 shall be provided. In addition, the following measures shall also be complied with.

8.12.2.1 After determining the location and extent of a fire in a coal storage yard, the coal should be dug out and the heated coal removed. Moisture accelerates oxidation, and therefore it has got to be ensured that the seat of the fire is attacked. For this, the use of Extended Branch Pipe (*see* IS 11101 : 1984) shall be helpful.

8.12.2.2 Caution has to be exercised while applying extinguishing water jets on coal and coal handling equipment to avoid raising of a coal dust cloud which may result in a dust explosion.

8.12.2.3 For enclosed structures adequate explosion venting provision shall be made.

8.12.2.4 Static electricity hazards shall be minimised by the permanent bonding and grounding of all equipment including conveyor belts, pulley idlers, motor drives, etc.

8.12.2.5 Automatic sprinkler system shall be designed for a minimum of 10 lpm/m^2 density over 232 m^2 area. Water spray system shall have the same density.

8.12.2.6 Conveyors that are below grade or enclosed present special hazards for fire fighting, and need to be maintained properly.

8.12.2.7 The actuation of detection system shall automatically shutdown the conveyor belts in the area involved.

8.12.2.8 On detection of a fire dust collectors and fans shall automatically shut-down.

8.12.2.9 Carbon monoxide (CO) gas detection system shall be desirable for pulverizers to give early warning about conditions leading to fires and explosions.

8.12.2.10 The planed hydrant system should cover the coal storage and handling areas/ equipments also. The escape route in overhead conveyor system, adequate means of escape shall be provided particularly in long enclosed conveyor belts. In the later case, exit doors shall be provided at intervals of not greater than 50 metres, fitted with escape rungs, which would enable persons inside the closed conveyor system to escape in case of fire/explosion.

8.13 Boiler Plant Fire Protection

8.13.1 Boiler furnaces shall be protected with automatic sprinkler water spray, foam or foam water sprinkler systems covering the burner front oil hazard.

8.13.2 Boiler furnaces and boiler front areas shall be provided with automatic fire detection systems based on rated type fire detection system in accordance with IS 2175 : 1988.

8.13.3 Boiler front fire protection systems shall be designed to cover the fuel oil burners and igniters, adjacent fuel oil piping and cable up to a 6 m distance from the burner and igniter including structural numbers and walk-ways at these levels. The sprinkler systems shall be designed for a density of 10 lpm/m^2 over 232 m^2 area. Water spray system shall have the same density.

8.13.4 Entire boiler plant shall be protected by wet riser system with landing valves at all levels and connected to the hydrant water mains.

8.14 Electrostatic Precipitator

8.14.1 Once a fire is detected the ESP unit should go into emergency shut-down immediately. Once the flow of air and fuel to the fire have been stopped and the electrostatic precipitator has been shut-down and de-energised, the precipitator doors may be opened and water jet/spray directed as required.

8.15 Gas Turbine Generators

8.15.1 Certain areas of the turbine operate at high temperature and have slow cooling rate after shut-down. Surface temperature of the combustion chamber will be higher than the ignition temperature of fuel and lube oil.

8.15.2 The lubricating and hydraulic seal oil systems require similar type of fire protection as in the case of steam turbine driven generators. Isolated installations may be protected with an automatic sprinkler water spray system.

8.15.3 Where the generator is installed in an enclosure, a CO_2 system may be provided.

8.15.4 In gas turbine generator and accessory compartments, to extinguish fires in electrical equipment by CO_2 system, the rate of discharge shall be such that a 34 percent concentration is attained within one minute after actuation, and 30 percent concentration shall be maintained throughout the deceleration period but not less than twenty minutes. All metal surfaces shall be cooled to below auto-ignition temperature of the oil. The minimum concentration as mentioned above shall be achieved after taking into account the possible leakage.

8.15.5 The fuel system shall be inter-locked with automatic fire extinguishing system so that the fuel supply is automatically shut off upon operation of the fire extinguishing system.

8.15.6 The emergency shut down controls shall provide tripping arrangement for over-speed, excessive vibration, flame-out and high exhaust temperature.

8.16 Water Supplies for Fire Fighting

8.16.1 The water supplies for fire fighting for Power Stations shall by and large, conform to the provisions contained in IS 9668 : 1990 and internal Hydrant System to IS 3844 : 1989 and External Hydrant System to IS 13039 : 1991. In addition, the following requirements shall also be taken into account.

8.16.1.1 The water supplies shall be planned on the basis of the requirement of the largest fixed fire extinguishing system demand plus the maximum demand from the hydrant mains of not less than 3 600 l/m for minimum of 4 hours duration for power stations falling under the category of classes 1 and 2, and for a minimum of 3-hours duration for the lower categories. Pumping capacity of the water supply system for fire fighting shall be based on the requirements mentioned above. It shall be ensured that no tapping is done from the fire

fighting mains to meet the requirements of process units or other services. The water mains shall be of adequate size as prescribed in relevant Indian Standards and shall be of wrought or mild steel (located and wrapped) pipe [galvanised and ungalvanised/UPVC/GRP/ Centrifugal cast (spun) iron/stainless steel]. If the mains are laid in high corrosive situations, it may be desirable to cathodic protection or coating and wrapping or both, if required.

8.16.1.2 The fire fighting pumps shall be of automatic starting with manual stopping and in conformity with IS 12469 : 1988.

8.16.1.3 The main reservoir shall have replenishment arrangement for complete re-filling operation which shall preferably be accomplished automatically.

8.16.1.4 The water mains shall be looped around the main power block and the pipe sizes shall be designed to cater to future expansion, needs.

8.16.1.5 The interior fire protection mains/risers shall be considered as an extension of the yard main and shall be provided with at least 2 valve connections with sectional control valves.

8.16.1.6 For the entire power station area only. 'Branch Pipe Universal' conforming to IS 2871 : 1983 shall be provided in the hose cabinets as spray nozzles having sheet-off capability shall be ideal for use on electrical equipment.

8.17 Manual Fire Alarm System

8.17.1 The entire plant area, including administrative and other buildings shall be provided with manual fire alarm system with call boxes deployed at various strategic locations. The system shall conform to the requirements given in IS 2189 : 1988. The control panels of the fire alarm system shall be located both in the plant control room as well as the fire station control room.

8.18 Lightening Protection

8.18.1 Lightening protection for the power station building and outdoor bulk oil storage areas shall be provided.

8.19 Emergency Power

8.19.1 All generator units require emergency power for operation of the turning gear, bearing oil pumps, seal oil pumps control units, besides meeting the requirements of emergency services like emergency lighting of all vital areas, means of escape, fire fighting pumps etc. A set of station batteries is a reliable supply for each load. Separate battery banker shall be provided for each unit and control centre. In addition, emergency stand by power is necessary in the form of diesel generator. These units will provide backup power to the station battery system and shall be designed to have capability of sufficient power for automatic and 'dead' start. In addition, emergency lamps with adequate illumination shall be provided at strategic locations which shall automatically operate on the failure of the mains supply.

9 FIRE PROTECTION FOR POWER PLANTS DURING CONSTRUCTION

9.1 The potential fire hazards during construction of Power Stations are considerable, and call for observance of stringent fire precautions. An above average level of fire protection is necessary during this phase due to life safety consideration of the large number of on-site personnel, high value of materials, and long duration of the construction period.

9.2 The availability of essential fire protection equipment, and minimisation of fire risks during construction activities are particularly important.

9.3 Construction schedule shall be co-ordinate so that planned permanent fire protection systems are installed and placed into services as soon as possible, at least prior to the introduction of any major fire hazards.

9.4 Minimum fire detection and fire extinguishing measures shall have to be provided for all locations where fire hazards are present, like storage of construction materials, storage of flammable materials, fire safety of welding and cutting and other building operations.

9.5 A fire trained supervisor shall be available at the construction site to ensure that all essential fire safety precautions are observed.

9.6 Where practical, the permanent fire hydrant system for the plant shall be installed well ahead of the completion of the project so that fire fighting water supplies shall be available even during construction period. Where this is not practicable, a minimum number of water tanks of not less than 1.25 lakh litres capacity with replenishing arrangements shall be available at strategic locations in the plant area which may be utilised as emergency water supply for fire fighting even after commissioning of the plant. A minimum of 2 hours duration water supply for fire fighting shall be available at the construction site.

9.7 Portable Fire Extinguishing System

9.7.1 In addition to the fixed water extinguishing systems, sufficient number of first aid fire fighting equipment like different types fire extinguishers shall be available for development at various fire risk areas as per IS 2190 : 1992. It is essential that the fire extinguishers are inspected, maintained in accordance with IS 2190 : 1992.

9.8 Maintenance of Fire Protection System/ Equipment

9.8.1 All the fire protection system/equipment or devices shall be inspected and maintained regularly to ensure for their safe operation at all times. The suggested schedule for each inspection, testing and maintenance is given in Table 2. Proper records of such maintenance shall be maintained.

10 REQUIREMENT OF MAJOR FIRE FIGHTING APPLIANCES/EQUIPMENT AND MANPOWER

10.1 On account of the reason that the power stations are generally located in relatively remote areas with hardly any other assisting fire service within reasonable distance, it is necessary for the power stations to be provided with an independent full-fledged and well maintained fire service of their own. Quick response to a fire outbreak by fire fighting service is vital as it makes a difference between a small tie or a major fire with catastrophic loss. In other words, power station fire brigades shall be in a position to tackle a fire, control and extinguish it before any damage is done.

10.2 Requirement of Major Fire Fighting Appliances/Equipments

10.2.1 *Major Appliance/Equipment for Power Stations of Installed Capacity Less than 50 MW* (*Class IV Power Stations*)

10.2.1.1 There may not be any need for any major fire fighting appliances for generating stations of this category provided the station is located within 8 km from the nearest municipal fire brigade possessing adequate fire fighting appliances. In case it is located at a further distance, or if the municipal fire appliances are not available, a Trailer Fire Pump conforming to IS 944 : 1979, or a higher capacity Portable Pump conforming to IS 12717 : 1989 shall be provided with skeleton fire staff.

10.2.1.2 The Power Station shall have a hydrant system, and also at least 3 Static water tanks deployed at strategic locations, of minimum 1.25 lakh litres capacity. The following shall be provided:

a) The v/m equipment, minimum of 25 lengths of 63 mm dia fire fighting hose of 20 m lengths each (15 lengths of type 'A' of IS 636 : 1988, and 10 lengths U/L hose conforming to IS 4927 : 1992);

b) Branch Pipe Universal, conforming to IS 2871 : 1983 — 4 No.

c) Foam-making Branches FB 5x — 2 No.

Table 2 Fire Equipment Inspection, Testing and Maintenance Frequency Schedule

(*Clause* 9.8.1)

Item	Weekly	Monthly	Semiannual	Annual
Supervisory Alarm Circuits	X	T		
Fire and Smoke Detectors		A	M/T	
Manual Fire Alarms		T	M/T	
Sprinkler Water Flow Alarms		M/T		
Sprinkler and Water Spray Systems	X	A	M	T
Foam Systems	X	A	M	T
Halogenated Agents, Chemical and CO_2 Systems	X	A	M	T
Fire Pumps and Booster Pumps	T	M		T
Water Tanks and Alarms	X	A	M/T	
P I V's and OS and Y Valves	X	X		M/T
Fire Hydrants and Associated Valves		X	M/T	
Fire Hose and Standpipes		X		
Portable Fire Extinguishers and Hose Nozzles		X		M
Fire Bridage Equipment		X		T
Fire Doors	X	T		
Smoke Vents		X		M/T
Emergency Lighting		X/T		
Radio Communication Equipment		T		

where

X = Inspection

T = Operational Test

M = Maintenance

A = Alarm Test (Transmitters)

NOTES

1 Testing of these systems should be done where possible after necessary precautions have been taken to eliminate any hazardous conditions which would result from the discharge of the extinguishing agent.

2 On systems where flow testing is not practical, a representative number of nozzles should be removed and checked for signs of blockage. In these cases the annual test will consist of a trip test of deluge preaction valves or valve operations as applicable.

3 This is a test to verify pump operability only.

4 Performance tests to be conducted under load to verify that the pumps meet design conditions.

5 Valves not locked to be inspected weekly. Valves locked or electrically supervised to be inspected monthly.

6 Testing of standpipes to include water flow at highest elevations.

d) Foam-making FB 10 x — 1 No.

e) Mechanical Foam compound [IS 4989 (Part 1) : 1985] — 200 L

f) BA sets (Positive Pressure type) — 4 No.

g) Blower and Exhauster for fire-fighting as per IS 941 : 1985 — 2 No.

h) Water Jel Blankets (Fire Blankets) (1.80 × 1.50 m) — 2 No.

j) Water Jel Blankets (for burns) (0.90 × 0.75 m) — 4 No.

k) Water Jel Container — 1 No.

10.2.2 The above scales of equipment and fire protection systems shall be equally applicable to load despatch centres in the grid systems, and also for major distribution stations (220 kV substations and abo).

10.2.3 *For Generating Stations of Installed Capacity from 50 MW to 199 MW (Class III)*

The following equipments shall be provided:

Type of Appliances	*No.*	*Manning Pattern*
1. Foam and CO_2 C/T (Conforming to IS 951 : 1987)	1	Round the clock
2. Water Tender Type 'B' conforming to IS 950 : 1980	1	Reserve
3. Large capacity portable pump conforming to IS 12717 : 1989	1	Reserve
4. Portable Water/Foam Monitors	2	(No separate manpower required)
5. B A sets (Positive Pressure type)	8 sets	
6. High Pressure Charging sets (for B A Sets)	1 No.	(at HQ)
7. Blower and Exhauster for fire fighting, conforming to IS 941 : 1985	2 No.	
8. Water Jel Blankets (1.80 × 1.50 m)	4 No.	
9. Water Jel Blankets (0.90 × 0.75 m)	8 No.	
10. Water Jel Container	2 No.	
11. Foam compound	1 000 litres	
12. Dry Chemical Powder Trailer of 150 kg capacity	1 No.	

10.2.4 *For Major Power Stations Having Installed Capacity Over 200 MW up to 999 MW (Class II)*

The following equipments shall be provided:

Type of Appliances	*No.*	*Manning Pattern*
1. Foam and CO_2 C/T	1	Round the clock
2. Dry Chemical Tender 2 000 kg conforming to IS 10993 : 1984	1	Round the clock
3. Water Tender type 'B'	1	
4. High Capacity Portable Pump (conforming to IS 12717 : 1989)	1	Reserve
5. Portable Water/ Foam Monitors	2	No separate manpower required
6. 13.5 m Light alloy extension ladder with props	1	No separate manpower required
7. B A sets (Positive Pressure type)	18	
8. High Pressure Charging Set	1	
9. Trailer/Portable Flood Light Unit	1	
10. Jeep 4 × 4	1	
11. Blower and Exhauster	4	
12. Water Jel Blankets (1.80 × 1.50 m)	8 No.	
13. Water Jel Blankets (0.90 × 0.75 m)	16 No.	
14. Water Jel Container	4 No.	
15. Foam Compound	20 000 litres	
16. Dry Chemical Powder Trailer of 150 kg capacity	1 No.	
17. High Expansion Foam Generator	1 No.	

10.2.5 *Super Thermal/Power Stations Having Installed Capacity Exceeding 1 000 MW (Class I)*

The following equipments shall be provided:

Type of Appliances	*No.*	*Manning Pattern*
1. Foam and CO_2 C/T	1	Round the clock
2. Water Tender type 'B'	1	Round the clock

Type of Appliances	*No.*	*Manning Pattern*
3. Dry Chemical Tender 2 000 kg	1	Round the clock
4. Emergency Tender conforming to IS 949 : 1985	1	As reserve
5. Hydraulic Platform 22 m Height (indigenously fabricated)	1	As reserve
6. Portable Water/Foam Monitors	4	Reserve
7. 13.5 m light alloy extension ladders	2	
8. Trailer/Portable Flood Light Unit	1	
9. Jeep 4 × 4	1	
10. B A sets (Positive Pressure type)	24	
11. High Pressure Charging Set	1 set	
12. Blower and Exhauster	4 No.	
13. Water Jel Blankets (1.80 × 1.50 m)	16 No.	
14. Water Jel Blankets (0.90 × 0.75 m)	32 No.	
15. Water Jel Containers	8 No.	
16. Foam Compound	50 000 litres	
17. Dry Chemical Powder Trailer of 150 kg capacity	1 No.	
18. High Expansion Foam Generator	2 No.	

NOTE — Considering the large area of the Super Thermal Power Stations and also for facilitating quick turnouts it may be necessary to deploy the operational equipment at two fire stations, a main Fire Station and Sub-Fire Station, both having update communication arrangement to help easy mobilisation in case of emergency.

10.3 Requirement of Manpower for Manning the Fire-fighting Appliances

10.3.1 The manpower requirements has to be based on the number of fire fighting appliances to be kept manned round the clock (day and night). The scales of manpower required for each type of appliance shall be as per the norms prescribed by the Standing Fire Advisory Council of the Government of India and also as per guidelines given in IS 6070 : 1983. The fire crew, computed as per the scales prescribed above shall work in three shifts. A reserve of $33\frac{1}{3}$ percent of the total strength required for shift duties shall also be provided, to cater for leave, absence, training requirements, etc. it has to be ensured that the designated strength of crew for each shift is available for speedy turn at all times for quick response to fire calls.

10.3.2 For generating stations of installed capacity less than 50 MW the following minimum manpower shall be maintained:

Assistant Station Officer — 1

Leading Fireman (L/F)/
Fireman (F/M) — 1 (per shift)

The norms shall apply for manpower requirements for major substations also.

10.3.2.1 In addition to the full time fire fighting staff, selected members of the security/plant staff shall have also to be imparted basic training in fire fighting/fire prevention duties who may also be utilised for fire fighting duties in emergency.

10.3.3 For Class III, Class II, and Class I category Power Stations the manpower requirements shall be computed as per scales laid down by the Standing Fire Advisory Council/ IS 6070 : 1983.

10.3.4 In addition to the above, one qualified fire officer of senior rank shall also be necessary for each power station, depending upon the category, as overall incharge of the Power Station Fire Brigade for ensuring proper training, control and supervision of the entire fire fighting staff. He shall also be responsible for all the fire protection arrangements in the Power Station.

10.3.5 Considering the large area of Super-thermal Power Stations, facilitate quick turn out it may be necessary to deploy the operational manpower at two Fire Stations — a Main Fire Station and a Sub Fire Station, both having up-to-date communication facilities to help easy mobilisation in case of emergency.

10.4 Fire Stations

10.4.1 Power Stations authorised for full time Fire Brigades with major fire fighting appliances shall have well designed Fire Stations for housing appliances and fire fighting staff. They shall be so located that the response time for fire appliances are kept to a minimum not to exceed 5 minutes. The design of the Fire Stations shall conform to the Standard Fire Station requirements as prescribed by the Standing Fire Advisory Council.

11 FIRST-AID FIRE FIGHTING

In the entire Power Station area, first-aid fire fighting equipment like fire extinguishers shall be deployed. It is essential that these extinguishers are periodically inspected and maintained in accordance with the provisions contained in IS 2190 : 1991.

12 FIRE EMERGENCY ORDERS

12.1 Each Power Station shall have a Fire Emergency Plan formulated so as to facilitate organised actions to be taken in case of fire by staff at various levels, during day-light hours as well as night. These orders shall also contain the instructions on fire prevention measures and the fire fighting organisation.

12.1.1 The Fire Emergency Orders shall also contain a Mutual Aid Scheme for mobilising assistance by way of equipment and trained manpower from neighbouring units, if available.

12.2 Periodical mock fire drill shall be conducted so as to check the alertness and efficiency of Plant staff as well as fire fighting staff, and records maintained.

PART -1
GENERAL

1.1 INTRODUCTION

Safety audit is on improvement over the conventional safety inspection, it encompasses every components of the total system, that is, the management's safety policy, safety training, features of the processes, storages, raw materials including supporting raw materials and that of the design, layout and construction of the plant, operating procedures, personal protection standard, accident records, emergency procedures etc.

In other words, this is a method which will reasonably give an indication as to how well a factory's program are working in all its aspects, how hazards are being recognized and controlled and how unsafe acts of work-methods are being eliminated.
The idea is that top management must take an active and interested part in the development and operation of the safety programs.

The broad objectives of the audit are to study critically the safety efforts being made by the management to prevent incidents and to ensure the extent of compliance of the safety rules and regulations.

The Management of Maithon Power Limited, Dhanbad requested Progressive Industrial Consultants, Jamshedpur to conduct a comprehensive safety audit of their work site at Maithon, Nirsa, District Dhanbad, Jharkhand - 828205. Accordingly, experts from Progressive Industrial Consultants conducted the occupational safety & health (OSH) audit from. 14th June 2024 to 15th June 2024. The support extended by the senior officials and the other employees of Maithon Power Limited, Jharkhand during the audit and in the preparation of this document is well appreciated.

1.2 AUDIT SCOPE

The scope of the OSH audit is to cover the following aspects:

- ✓ Identification of areas of OSH management system that require improvement;
- ✓ Assessment of effectiveness of the measures taken for controlling OSH hazards;
- ✓ Recommendation of measures to strengthen the OSH system.

The OS&H audit was carried out with reference to the applicable principal safety statutes namely, the Factories Act, 1948 and the Jharkhand Factories Rules, 1950; the Electricity Act, 2003 and the Electricity Rules, 2005; Static and Mobile Pressure Vessels (unfired) Rules 1981; the Gas Cylinders Rules, 2004; Manufacture, Storage &Import of Hazardous Chemicals (MSIHC) Rules, 1989; the Air Act, 1981 and the Rules framed there under; the Water Act, 1974 and the Rules framed there under; etc.; relevant standards & codes of practice; and good engineering practices in the industry.

IS 14489:1998 – "Code of Practice on Occupational Safety and Health" is used as a guide in the selection of key elements of the audit system and the records to be Examined during the audit. It was also used to prepare the audit checklist. The audit, in particular, covered OSH management system and technical aspects required for the safe operation of the plant.
This standard does not cover audit of environmental management system for which a separate Indian Standard IS/IS0 14001 is available.
The important elements of OH&S system, which were Examined during the audit, are:

- Access & plant layout
- Physical condition of the plant & effectiveness of existing controls
- Health and safety policy
- Safety organization, Safety committee & Safety budget
- Safety education & training
- Safety inspection
- Accident/Incident reporting, investigation and analysis
- First aid and Occupational Health Centre
- Built in safety system
- Lifting machines & lifting tackles
- Personal protective equipment
- Fire protection
- On site emergency preparedness
- Compliance evaluation with statutory requirements
- Illumination, Ventilation and Noise

1.3 AUDIT OBJECTIVES

The audit was conducted with the following objectives:

- To carry out a systematic, critical appraisal of all potential hazards involving personnel, plant, services and operation method.
- To determine organization's effectiveness of compliance evaluation procedure for the Health & Safety related legal requirements and those of the company's written safety policies, objectives and progress.
- To review and critically assess the existing safety programs to prevent and control the hazards in the plant with the focus on finding adequacy.
- To identify the opportunities for improving effectiveness for implementation of safety systems, procedures, plans and programs and also for improving the existing procedures.

1.4 Audit Team

The audit was conducted by:

a) MR. Shashi Kant Singh, Lead Auditor, Progressive Industrial Consultants, Jamshedpur.

b) MR. Anish Kumar Singh, Auditor from Progressive Industrial Consultants, Jamshedpur

c) MR. Nikhil Bajaj, Auditor from Progressive Industrial Consultants, Jamshedpur

1.5 Audit Methodology

1.5.1 The objectives for carrying out the safety audit are to assess the effectiveness of the safety and health systems in the plant, identification of the areas of improvement and checking conformity of compliance evaluation procedure of the systems and procedure with the statutory requirements in force.

The audit was conducted on sample basis strictly in accordance with the guidelines provided in IS: 14489:1998 (code of practice on occupational safety and health audit) with due emphasis on:

a) Existing safety management system.
b) Implementation of statutory acts and rules in force and compliance to Annex C (clause 4.3.3.1) of IS 14489: 1998.
c) Identification of potential hazards in the facility.
d) On site & off-site emergency plan and emergency procedures
e) Preventive maintenance program
f) Safety training/ education program for employees
g) Environment management
h) Hazardous waste

1.5.2 Opening Meeting:

Opening Meeting was organized by MR. Amit Chatterjee along with head safety and other Departmental Heads of Maithon Power Ltd., Dhanbad. The meeting was held on 14th June 2024 at 10.00 AM in the Conference room.

Sri. Shashi Kant Singh and Mr. Anish Kumar Singh, Lead Auditor discussed about the scope and methodology of safety audit. After the opening meeting, plant visit schedule was discussed and finalized with the EHS team.

1.5.3 The audit assignment is being carried out at the request of the management of Maithon Power Limited, Jharkhand. This shows their keenness to ensure compliance with all the applicable safety provisions under the statutes and make their plant safer. The audit process was coordinated by Maithon Power Limited, Jharkhand.

1.5.4 The safety audit is not an inspection of each and every activity, but is a sample inspection of the workplace and checking of key documents. The coverage will be limited to the field visits to the plant and departments or areas planned to be inspected by the management, information provided to the audit team, and documents produced for verification.

1.5.5 The safety audit is not a fault-finding exercise but is an identification of areas for improvement in OSH, based on observations, discussions with personnel at various levels, and reference to the documents & records made available for verification.

1.5.6 After completing the opening meeting, plant visit schedule was discussed with the

team and finalized.

1.5.7 The auditors carried out field visits along with the coordinators concerned. During the visits to work areas, the auditors made observations with reference to the OHS hazards. During the field visits, the auditors discussed with site personnel at various levels and collected information on the job activities and conditions in the areas of concern.

1.5.8 Information on the OSH was also collected through examination of documents and records. The information gathered through interviews of the site personnel was verified through scrutiny of the records.

1.5.9 The audit observations made through field visits, interviews and examination of documents & records.

1.5.10 Closing Meeting:

After completion of the audit, closing meeting was held in the in the Conference room on 15.06.2021 at 5.00 PM along with head safety and his Team.

The lead auditor highlighted salient audit observations & recommendations.

1.6 Audit Date

The Safety audit was carried out at 10.15 AM to 4.30 PM on 14.06.2024 &15.06.2024 at Maithon Power Limited, Jharkhand plant along with Maithon Power Ltd team.

1.7 General Information of the Factory

Maithon Power Limited (MPL) is a coal-based electricity generation thermal power plant. It is joint venture of Tata power & Damodar valley corporation. The venture implemented 1050 MW (2 X 525 MW) in Nirsa, District -Dhanbad in the Indian state of Jharkhand. This project is India's first 525 MW unit thermal power plant and the first PPP venture plant in the country. This project is India's first public private power project. Area of Maithon Power Ltd is approximately 1116 acres.

MPL has two Units with installed capacity of 1050 MW (2X 525 MW). Unit # 1 was commissioned in September 2011 and Unit # 2 started generation in July 2012.

Coal is transported both by Road and Rail. About 70 % of coal is procured by Road and 30% is transported by Rail. Coal handling Plant is responsible for unloading, stacking and dispatching coal to crusher house from where Pulverized coal is fed to boiler.

Other dept are Towers, Steam Turbines and Generators, 400 KV switch yard, DM Plant, Hydrogen generation and bottling plant, Chlorination plant, LDO/HFO Tank farm, Compressor house, DG Sets, Water Pump house including Fire Water Pump including Fire Water Pump house, Fire station, OHC etc.

INNOVATIVE TECHNOLOGY:

THE HUMAN TOUCH: At, the greatest accomplishment is a fully dedicated and trained manpower and a total quality management works ethos. It is largely because of the participative work culture and unmatched excellence in manpower and management that of MAITHON POWER LIMITED, JHARKHAND is rapidly moving ahead by leaps and bounds.

CERTIFICATION: M/s Maithon Power Limited system is ISO 45000,9000 certify company

1.7 GEOGRAPHICAL BACKGROUND

Location and Topography: -

The assessment site is located at Maithon, Nirsa Dhanbad, in Jharkhand. Its geographical co-ordinates are Latitude 23°47'N and Longitude 86°43'E/ with mean sea level 456 ft above. The nearest Kumardhubi Railway station is about 9 km from the Plant. The town is Nirsa which is located about 2.0 km distance in north-west direction from the Maithon Power Limited plant. The district Head Quarter- Dhanbad is located about 35.0 km distance from the Maithon Power Limited Plant site. The nearest airport "Dhanbad Airport" at Dhanbad, Jharkhand is located about 35.0 km distance from the Maithon Power Limited plant. Maithon dam is about 9.5 km distance in from the Plant Location. Damodar is the most important river of this reason. Damodar flows for about 77km through the district -Dhanbad being joined by the Barakar at its eastern border near Chirkunda.

Population: -

Population of Dhanbad district is about 2684487 (as per 2011 census), Density 3400/sq.Miles. MPL nearby population is about 29343 living in around 21 villages.

Climate: -

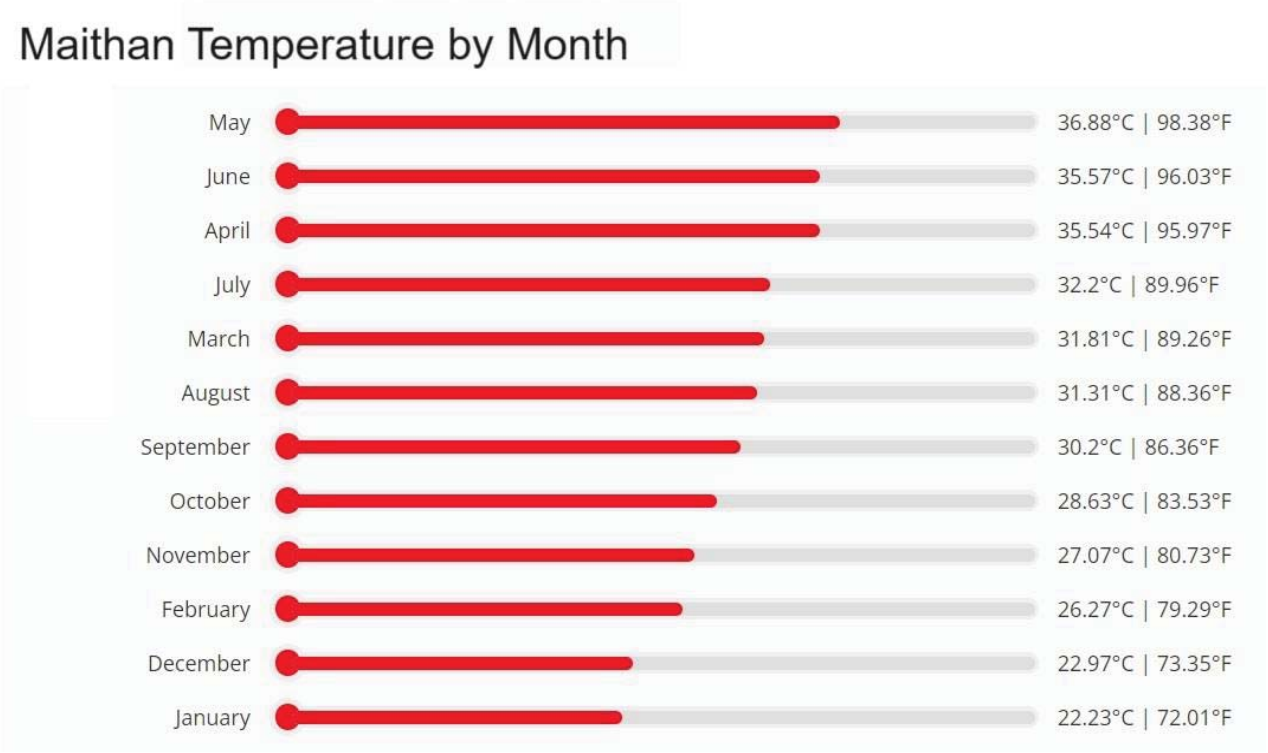
Meteorological features of the Chotanagpur plateau can broadly be summarised as follows

- ✓ Temperature
  - ➢ Mean monthly during summer : 32 – 42 deg. C
  - ➢ Mean monthly during winter : 14 – 24 deg. C
  - ➢ Absolute maximum : 46 – 48 deg. C
  - ➢ Absolute minimum : 2 deg. C

- ✓ Rainfall
  - ➢ Mean annual :1020mm
  - ➢ Mean monthly (rainy season) :230mm

- ✓ Humidity
  - ➢ Maximum relative humidity :85%(July -September)
  - ➢ Minimum relative humidity :10%(march -April)

- ✓ Wind
  - ➢ Mean velocity : 3 – 9 kmph
  - ➢ maximum velocity : 140 Kmph
  - ➢ Predominated wind direction : North westerly direction Nov to may
    South Easterly direction July to October



Climate Maithan: Weather by Month

1.10 Workers & Shifts

The company employs permanent employees & contract workers, inside the plant premises and operates in three shifts (A, B & C) and in General shift (8.30AM to 5.00PM). The employees break up is as follows:

Staff	–	219
Contract Workers	-	3458

1.11 Audit Report

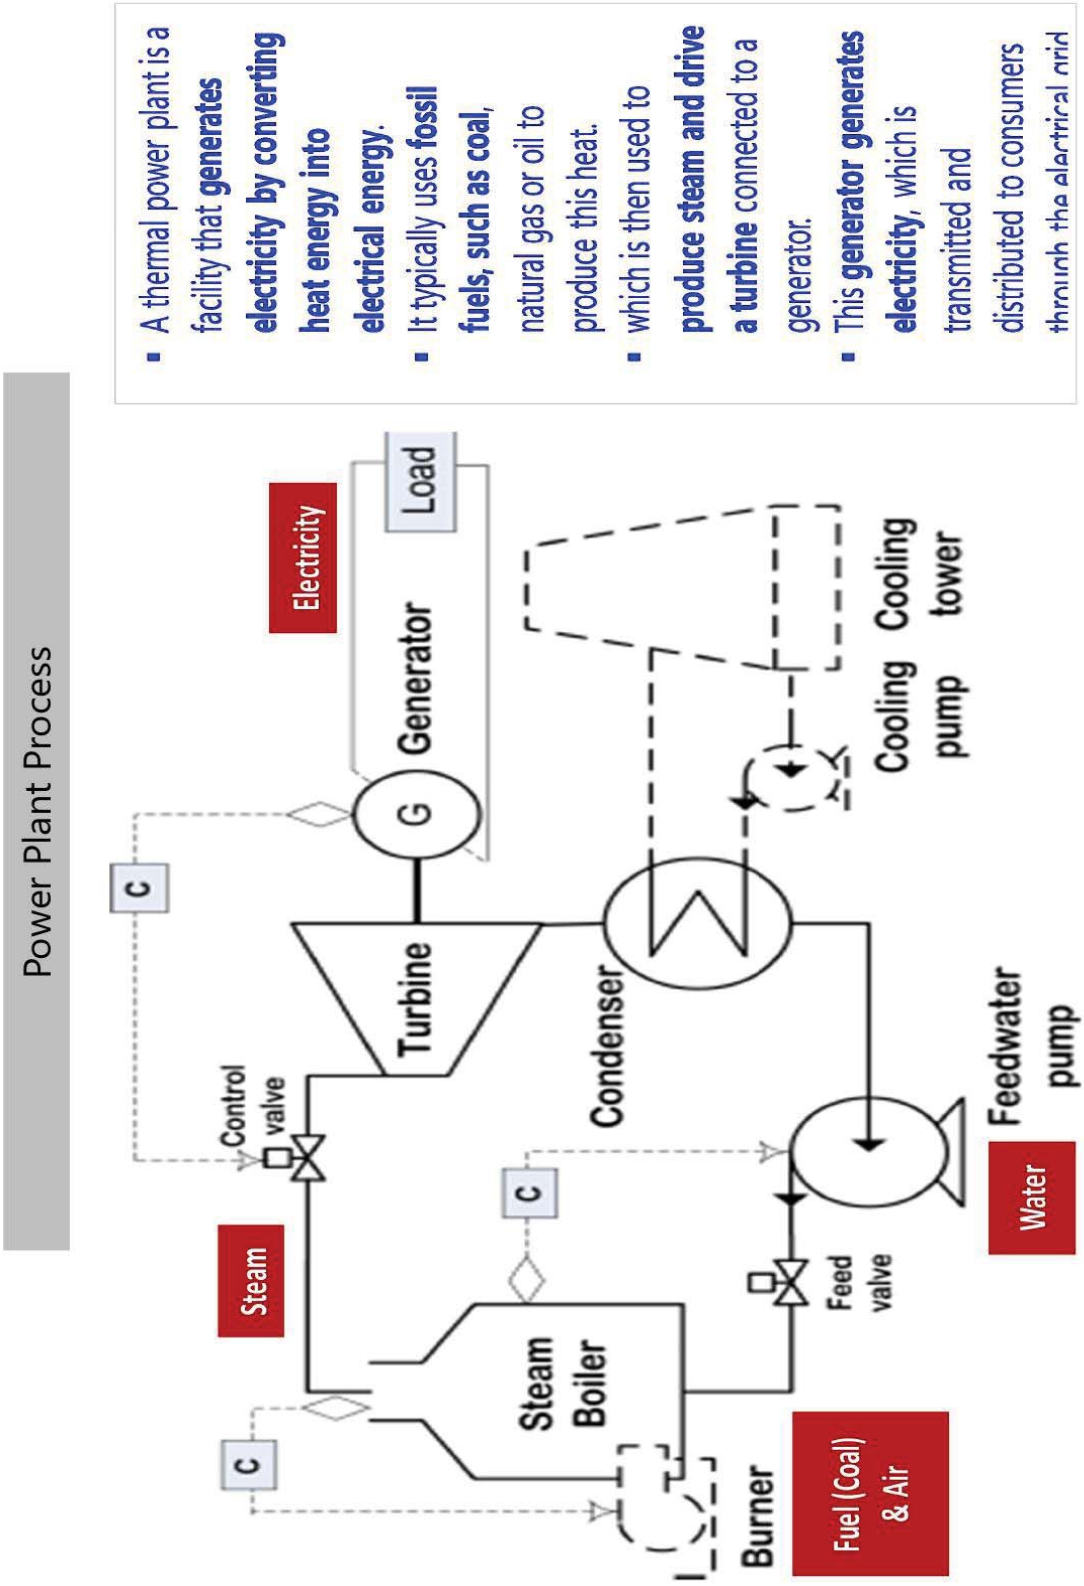
Based on the information collected, records/documents perused, observations made and interviews held with employees at various levels during field visits, 'Observations and Recommendations' are presented in the audit report.

These recommendations are of two types:

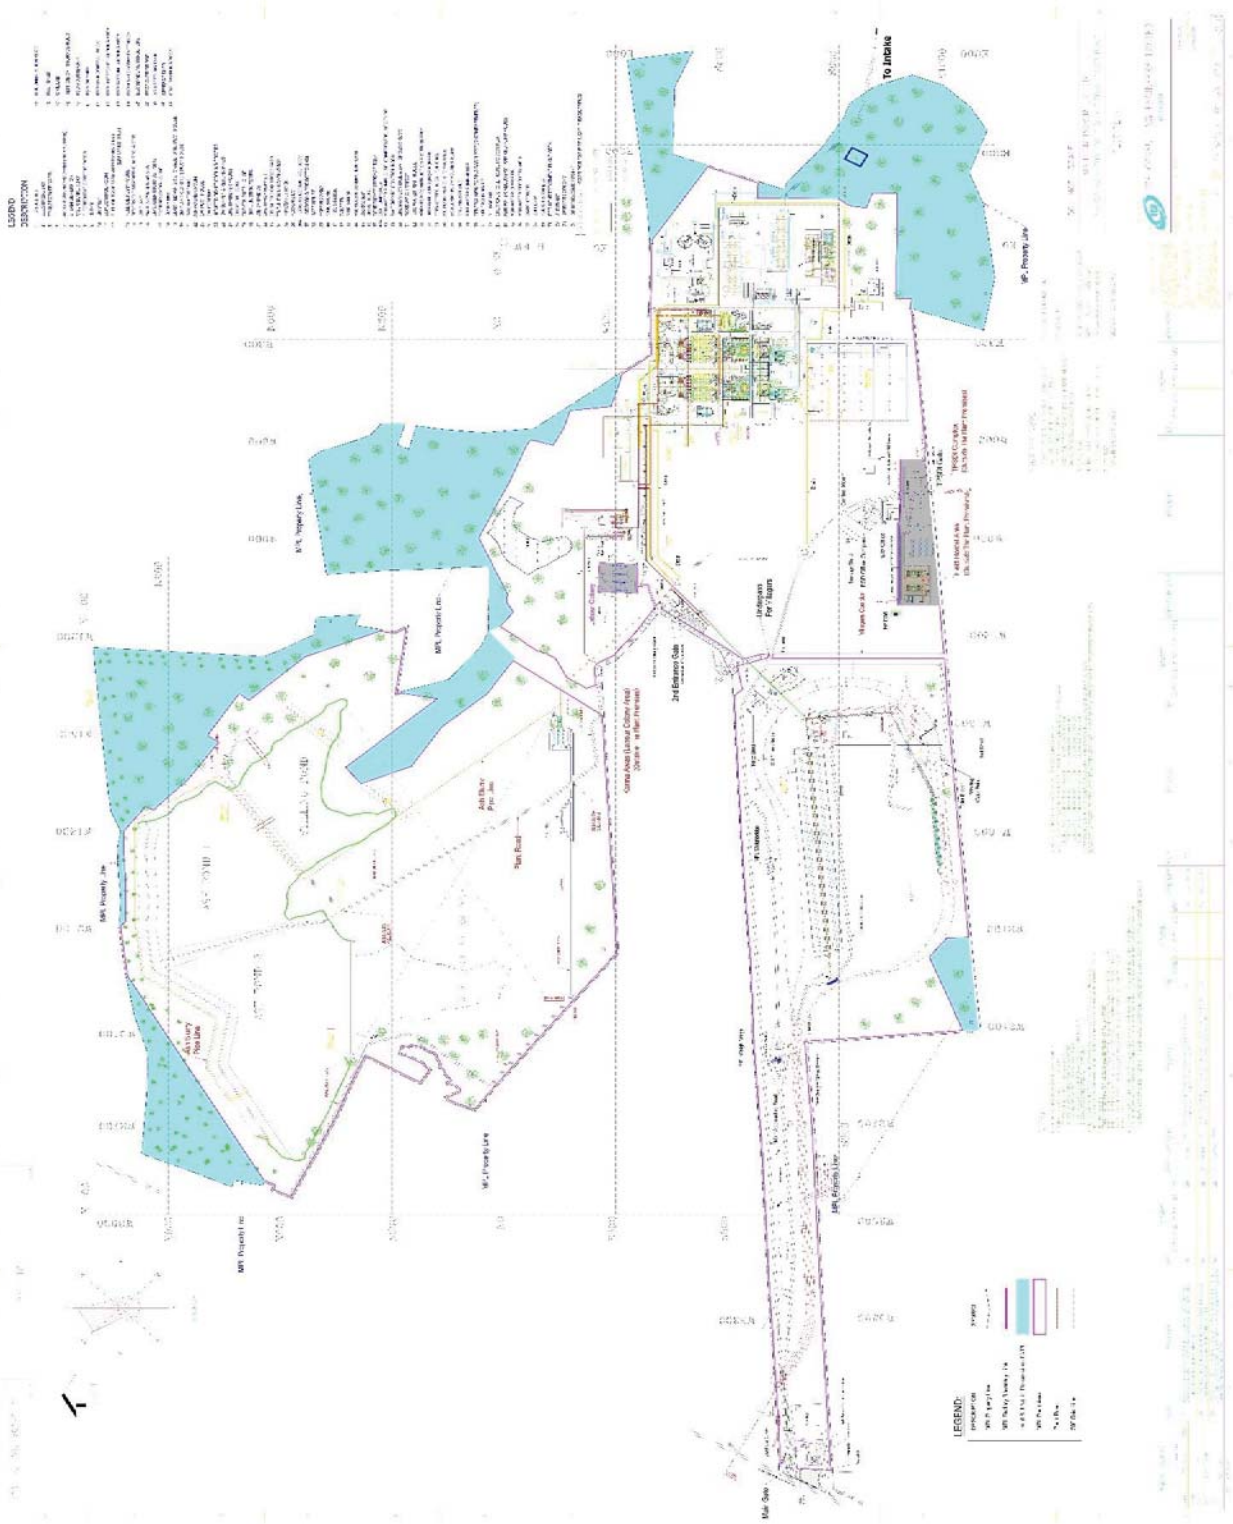
- For improvement in the system's specified requirements; and
- For more effective implementation of the specified requirements of the system. It is up to the management of MAITHON POWER LIMITED, JHARKHAND, Jamshedpur to determine the extent, the way and means of actions to improve the OH & S system as per recommendations of the audit team. However, the recommendations regarding compliance with statutory and legal requirements are to be fully implemented.

Progressive Industrial Consultants has exercised great care and diligence in conducting the safety audit to ensure quality and impartiality, and in suggesting recommendations. However, this report is not deemed to be any Warranty or a Certificate on the OH&S management system in Maithon Power Limited, Jharkhand,

Process flow Diagram:



Approved Map:



PART – 2
EXECUTIVE SUMMARY

1. The safety management systems in the plant are good. Majority of the Legal documents are in place and within validity period. License, Consents, Certification etc. are in place.

2. The company has declared 'Occupational Health & Safety Policy' signed by the CEO& Managing Director (Occupier) As per JFR, 1950, Rule 62 BH.
   The OH&S Policy and other policies need to be reviewed time to time and copies of the policy to be displayed at conspicuous places within the factory premises in a language understand by the majority of workers. System of giving weightage for safety performance of employees in career progression is proposed to be implemented as a statutory requirement, which is evident.

3. SOPs/WIs is displayed at shop floor in pictorial form in all local languages. Good practice to help employees for better understanding about the job steps along with the associated hazards for accident prevention.

4. Security at the Main Gate and Safety briefing for visitors is appreciated need general briefing on Emergency situations.

5. Adherence to speed limits of 16 Km/Hr which is as per norm of Jharkhand Factory Rule 1950 by all vehicles is appreciated.

6. PPE Matrix area wise has been displayed at shop floor which will inculcate the effectiveness of usage of PPE by the employees.

7. The storage chemicals and gasses area are good and is as per the statutory requirement.

8. Although safety posters are displayed at various locations of the plant but display of a few more statutory warning notices and Do's & Don'ts preferably in local language (Hindi and Bengali) especially within the shop floor will create more awareness amongst employees towards occupational health & safety and to be regularly clean for visibility.

9. The general housekeeping of the plant is satisfactory and is appreciated, continuous efforts are required to further improve the overall housekeeping of the entire plant. A systematic housekeeping inspection plan may be developed for all sections of the plant comprising of a team of Sectional heads, HR head and EHS department. The frequency of such housekeeping inspection may be one plant area per week. Suitable

time bound action plan should be initiated on the findings of the inspection report.

10. A training policy for OH&S and life saving rule should be developed to ensure that all employees including senior management personnel are exposed to training during a year need to include Lifesaving rule and other safety related topics for creating a safe environment.

11. Statically data of the company shown no any accident, fatal or reportable, Frequency and severity rate zero during the last past five years shows seriousness of management is about safety.

12. The Assembly points provided in each area but review required as per fire load calculation and based on process safety risk management.

13. External audit had been conducted by NSC, as per IS 14489: 1998/2018 and compliances are evident.

14. Safety Committee has been constituted in compliance with Rule62-C of Bihar factory Rules 1950 with equal representation from Management and workers and the committee meets every month, and the function and duties of the safety committee members is as per norms of Rule 62 -C -7 of Jharkhand factory rule 1950.

15. Permit to Work System is well defined as 'Work Permit' is one of the important tools for prevention of incidents. System is working perfectly.

16. All energy source are identified and LOTO system for working with electrical and other energized equipment are implemented within the plant perfectly. But There are some scopes for improvements.

17. The cables are required to be laid properly in cable trays in cable gallery with proper fire protection system (application of fire resistance paint, laying of LHS cable, regular cleaning of dust etc).

18. The electrical hand tools calibration records to be maintained.

19. The test dates of all earth pits inside the plant are as per norms. All earth pits are tested periodically, preferably once in a period of every one year during dry season on a dry day. The ER value is maintained < 1.0 Ohm, is appreciated.

20. Two-day induction training on safety for workmen with training videos and models is effectively done.

21. Occupational Health Centre is capable of tackling Medical Emergencies and provided with two ambulances as per Jharkhand Factory Rule 1950 62AH-12.

22. Pre-employment medical examination and annual health check up is done for each employee including contract employees. The annual health checkups was last held in 2020 As per J.F.R, 1950, Rule 62 NH (1) (b), the workers employed in a 'hazardous process' are medically Examined by MO once in a period of 6 months, in respect of occupational health hazard to which they are exposed.

23. Fire services activities are under the responsibility of security and fire services of Maithon Power Ltd. A dedicated fire fighting team with good numbers of trained fire fighters are there as per Rule 62 of Jharkhand Factory Rule, 1950.

24. Fire fighting training imparted to employees. Refresher training programs on fire fighting for employees should also be organized at regular intervals.

25. Found Inspection tags on portable fire extinguishers at various locations of plant but some extinguishers were kept on ground and has to be hanged as per norms, at some location's emergency equipment found missing and proper access to be provided to meet safe handling, Fire fighting equipments were tested as per norms.

26. Most electrical installations and machines are found earthed properly.

27. The single line diagram and schematic diagram are found on record for electrical HT/LT installations.

28. Signage/warning notice on the entry gate of electrical installations are observed as per norms i.e. with danger sign and skull signage's also.

29. The LT insulation tests are needed to be conducted in all LT electrical installation in line with CEA 2010 regulation no 33.

30. The emergency lights are available at most of the areas and with backup power system.

31. In switchyard gated were found unlocked to be protected from unauthorised entries.

32. The diesel generating sets of capacity 2 x 2000 KVA in DG house are well maintained.

33. Handling, storage & import of hazardous are as per MSIHCR-1989.

34. Hazardous waste Management system was found maintained as per Hazardous Waste (Management & Handling) Rules.

35. As per Rule 62 (18) of JFR, 1950, each first aid fire fighting equipment is properly marked with serial number, date of last refilling and date of last inspection with properly trained first aider, which is complied as per norms.

36. The flameproof fittings are noticed in Hydrogen Plant and other gasses plant areas and pipe lines are as per norms of painted with distinguish colour.

37. Fire sealing/painting for electrical cables is not evident at several location inside plant premises.

38. The storage of Hydrogen, other gasses and dust, area is good and found as per the norms of statutory requirement. Fire load calculated by an agency HSM Solution, Ahmadabad but Categories wise hazard identification not conducted in plant to be categorized and consequences analysis to be conducted by a team with following considerations-
    - ✓ List types of process events possible such as fire, explosion, or toxic release (worst case and probable case)
    - ✓ Estimate potential release quantities
    - ✓ Estimate distance to different levels of concern, such as toxic concentrations, thermal effects, overpressure or significant environmental effects
    - ✓ Estimate safety and health effects on the site and the community for people who potentially could be affected.

39. Mechanical Integrity of equipment, pressure vessel, piping & component are well maintained

40. The classification of hazardous areas having flammable gases, vapours and dust for electrical installation has been done but review required as per norms of IS 5571.

41. Showers and Eye Showers are evident but proper water pressure to be maintained.

42. The fitness and pollution certificates of all heavy vehicles within the plant premises are available with the drivers as per Motor Vehicle Act 1988.

43. All wire rope slings are kept in designated and safer place but some place wire rope and other equipments are lying on shop floor to protect them from any wear and tear.

44. The battery bank in power house is well maintained but free movement and with provision of neutralizing material.

45. All statutory requirement like lifting tools tackles, pressure vessel inspection date and other test date and due date were displayed.

46. Ergonomics projects in process hazard are evident but need more focus.

47. Well documented Integrated safety management system observed.

48. Internal Risk assessment of all activities conducted but need in more clarity and training to employees.

SUMMARY OF ALL EMERGENCY DEVICES

Area	Smoke Detector	MCP	HOOTER	MONITOR MODULE FOR SPRINKLER	HEAT Detector	BEAM Detector	RELAY MODULE	TOTAL

During safety audit following Documents Examined and Discussed with concerns during visit.

1. Quantitative Risk assessment (Including Individual Societal and technical risks), HAZOP, HIRA, Risk level and other risk assessments. Need some improvement.

2. Reliability check of critical equipments with inspection procedure of the all interlocks and safety devices control system.

3.SOP for Preventive and periodic maintenance.

4.Documents related to Process safety information's, Alarm Trip devices, interlocks list with inspection and malfunction procedure.

5.SOP of air emission management and found within parameter required and need display of data at prominent places.

6. SOP of Chemical hazards and prohibited substances in the work places and list of chemical inventory, need Hazardous area classification as per IS code 1572 and its compliances.

7. SOP of communication, participation and consultation.

8. List of confined spaces and their operation and maintenance procedure, 64 no of identified confined spaces are there need training on confined space and equipments used during the

job.

9.SOP of EHS Accident &Incident Investigation and one accident happened in past (25.8.2023)

10. Emergency properness and response plan include demography, risk of neighboring plants connecting road and approved map.

11. Environmental Aspect and Impact Analysis need training and participation of major group of employees and some targets for improvement.

12. Examined Ergonomics project (one project with objective target and analysis)

13.SOP of work permit system and found working good but need some clarity among contract employees.

14.SOP of Contract management documents with pre-employment with performance evaluation, need approval of their safety management plan.

15. Examined SOP of Industrial hygiene programme and it is found OK

16. Examined SOP of Industrial waste management, plan procedure and found working as per norms.

17. SOP of STP & its KPI and found within limit and with care of oxygen concentration need hazardous area classification with compliances.

18. Examined SOP of LOTO and Energy source identification document and found system working perfectly.

19. Examined SOP and documents related to Machine guarding need some improvement with audit as per Factories Act 21 (need reliability check of emergency equipments).

20.Examined of SOP of confined space and its lists, but observed some gap in permit system for confined system.

21.Examinedd SOP for monitoring measurement analysis and performance evaluation found as per norms.

21. Noise and illumination survey report and found within limit but during visit found low illumination at some places and high noise level need survey again.

22. Examined SOP and documents related to safe electrical programme and found working ok

but need some improvements as shown in photographs displayed below report.

23. Examined SOP for Scrap and Spillage mapping but during visit found need more attention.

24. Traffic control management, visitor, contract and MPL employee entry related documents.

25.Examinedd SOP for Supplier engagement and Ware house safety, found system working as per norms.

26. Examined Rubber mat and Earth pit test report found OK.

27. Document Examined of fire load calculation and their compliances, Fire surveillance and extinguishing management and found system is well working.

28. Examined SOP and HIRA of various safety related systems like transportation, visitor management, PPE, training and found system is working but review needed.

PART – 3
AUDIT OBSERVATIONS & RECOMMENDATIONS

1.1 Safety Management System – Element wise

(A) OH&S Policy:

Observation	Recommendation
• The Organization has an Occupational Health & Safety Policy signed by Mr. Praveer Sinha, CEO & Managing Director and displayed at prominent places. This Policy expresses Top Management's commitment.	• As per JFR, 1950, Rule 62 BH, the policy should be signed by the occupier. Recommended The policy to be reviewed and updated time to time and copies of the policy is already displayed at conspicuous places within the factory premises in a language understand by majority of workers.
• The policy is not effectively communicated to employees (observed during plant area visit).	• Suitable training may be imparted to the employees for effectual communication of the policy to make the policy more effective.
• The weightage for safety is so far being given in the Annual Appraisal for executives.	• As per JFR, 1950, Rule 62 BH (5) (b), the safety performance of employees should be considered in the career progression. Substantial more weight age should be given for safety aspect in annual appraisal system.
• Ash, corporate Environment policy, E waste Management policy, water stewardship policy are evident.	• Appreciated, need training policy.

(B) OH&S Organization set up:

Observation	Recommendation
▪ In MPL safety department established, consists of four qualified safety officer including Chief Safety and all safety officer reporting to chief safety as per norms, directly reporting to the Plant Head & Factory Manager, and having practical experience and knowledge of safety.	▪ This is in compliance with the Rule 62 B (5) of JFR, 1950.
▪ The duties assigned to the safety officer are in line with those prescribed in the statutory provisions. No additional duties are assigned to them. The duties assigned to them relate to advice on safety issues, carry out safety inspections/safety training, coordinate safety committee meetings, accident investigation and establish/improve safety management systems.	▪ This is in compliance with the statutory provision under Rule 62 B (4) of JFR, 1950.

(C) Health, Environment & Safety Improvement Plan/Target:

Observation	Recommendation
▪ monthly safety report is prepared by the EHS department comprising of and submitted to the top management in each month for information. The monthly safety report for FY 2023-24 was verified.	▪ Good practices and should be continued.
▪ Annual Business Plan (ABP) for EHS is in place.	▪ Observed system for achieving the OH&S target w.r.to the key strategies, KPI, UOM and responsibility
▪ Comprehensive report is prepared as per manufacture, Storage and import of Hazardous chemical Rules 1989 / 2000, Schedule 11.	▪ System working.
▪ Environmental Hazard Identification and Risk Identification (HIRA), is prepared.	▪ HIRA prepared for plant for various activity does not cover all aspect. Recommended HIRA to be reviewed audited by third party
▪ Aspect Impact of Environment issues are prepared.	▪ KPI prepared and follow the system, Good practices.

▪ Stack monitoring report and treated effluent report prepared and report observed as per statutory requirements.	▪ Compliances to statutory requirements.
▪ Spittoons, clean, cold Drinking, washroom etc (requirements of J.F.R 1950) are as per requirements.	▪ Compliances to statutory requirements.

(D) Safety Committee:

Observations:	Recommendation:
▪ The Safety Committee is in place. The Chief O&M (Factory Manager) is the chairman of the committee. The committee comprises with equal number of management and worker's representatives and chief safety is working as secretary of the committee. The meeting is held on of every month. Minutes of the meetings are maintained.	▪ This is in compliance with section 41-G of The Factories Act, 1948 and Rule 62 C of JFR, 1950.
▪ The date of commencement of the Safety Committee is from Jul' 2023. The validity of term for 2 years. Duties and Rights are communicated and documented with all members.	▪ The function and duties of the members of safety committee already documented, communicated & displayed as prescribed in Rule 62 C (7) of the JFR, 1950. The Safety Committee members may be trained about their role and responsibility for effective functioning in line of the above mentioned rules.
▪ The committee meets once a month and attendance register is maintained.	▪ Evident as per norms of Rule 62 C (4) of the JFR, 1950
▪ Agenda of the meeting and MOM is circulated before the meeting and track &discussed the action plan and compliances of the last meeting.	▪ System working as per norms
▪ The MOM of Safety committee dated May 2024 was verified.	▪ System working as per norms.
▪ Attendance sheet of the meeting was evidenced.	▪ System working as per norms.

(E) Safety Inspection & Observation:

Observation	Recommendation
▪ Safety inspection of plant and machinery are in place. The sectional committee with a team carries out Safety Inspection / observation of the plants on a regular basis and records the findings with photographs in the system. The report is sent to the respective department with a copy to concerned HOD and Plant head for compliance. The safety inspections records are maintained by safety department, most of the observations were attended	▪ Area -wise safety inspection check-list based on specific hazard is evident. Good practice. Recommended time frame compliances.
▪ A few safety inspection/observation reports of recent past were verified and found that ratio of unsafe conditions and act are as per norms.	▪ Good practices and should be continued.
▪ System of Safety Line Walk is in place.	▪ Good practices and should be continued.

(F) Safety Audit:

Observation	Recommendation
▪ **External Safety Audit:** The previous external safety audit conducted by a nation safety council team (competent agency) as per norms of IS 14489.	▪ Compliance of Previous external safety audit check and found most of the recommendation has been completed. ▪ Good practice evident
▪ **Internal Safety Audit:** Internal audits are being carried out by a team with safety personnel. Points are observed and compliance ensure in time frame and points discussed in concerned meetings. Audit plan is evident. Committee has power to stop any job or activities high risk or abnormal situations NC open (crossed the time closing time) – Nil	▪ Good practice evident

(G) Safety manual/safety Standard:

Observation	Recommendation
Safety Manual: ▪ Safety manual /Standard is evident for MPL included occupational health and safety MOC, incident investigation analysis and reporting, HIRA, handling of hazardous substance, Emergency plan with role and responsibility, PPE, PTW, safety audit and inspection, Training, contract management, Traffic control and safety policy with safety Vision, Safety Principles and safety code of conducts.	. ▪ Good practice evident but need more focus on training
▪ Role of top management and executives are well defined in Tata Power safety Management System (TPSMS).	▪ Good practice evident
▪ Revision of Manual/safety standard is evident	▪ Good practice evident

(H) Accident Reporting, Investigation & Analysis:

Observation	Recommendation
▪ A procedure has been established for reporting accidents and dangerous occurrences to the Inspector of Factories in Form No. 17 A and for a supplementary notice for which the injured person returns to work in Form No. 17 B.	▪ This is in compliance with Rule 96 of JFR, 1950.
▪ An Accident Register is maintained in prescribed format of Form 23.	▪ Accident investigation procedure is being followed and records are maintained.
▪ In FY 2023 – 2024, 0(Zero) LTI cases were evidenced (F. Rate and S. Rate). as per Investigation plan document, investigation is based on CAPA to avoid any repetitions of incidence	▪ All accidents are being investigated in a proper manner. Emphasis should be given on fact finding, any system deviation etc. and not fault finding and systematic analysis Recommended based on IS 3786:1983 'Method of computation of frequency and severity rates for industrial injuries and classification of industrial accidents'
▪ Near-miss incidents are reported and records are maintained.	▪ Near miss reporting is a very effective tool in accident prevention and employees should be encouraged to continue report of near miss cases. ▪ All plant incidents including near miss cases should be shared with the employees for learning and implementation.

(I) Employee selection and placement:

Observation	Recommendation
▪ Employees are appointed as trainees through campus interview from reputed institutions. ▪ Management Trainees have to compulsorily undergo 7 day Safety Training. A test is conducted at the end of the7 day session and if safety examination is not cleared one cannot move to the next stage of training programme.	▪ Good practices ▪ Good practices, focus training on policies and Emergency response plan, Process safety risk management.

(J) Safety Education & Training:

Observation	Recommendation
▪ System of training exists. The infrastructure for safety training comprises of a training hall audio – visual aids and video film on safety. Designated personal are generally conducts the training session.	▪ The drive for safety training including awareness on process safety is good should be continued. ▪ A training policy should be developed to ensure that all employees including senior management personnel are exposed to effective training during a year.
▪ Training calendar for 2024-25 contains 13 topics focus on awareness on process safety/risk assessment. Training man-hours for FY 2023-24 was evidenced and found satisfactory.	▪ A few training topics e.g. Behavioral based training, safety training on Emergency response plan and policies should be included as per requirements.
▪ Training record revealed that the training plan vs actual is similar.	▪ Training plan Vs. Actual need to be ensured.
▪ Training need identification (TNI) was evidenced.	▪ Good practice and should be continued.
▪ Training module for different topics has been standardized.	▪ Good practice and should be continued
▪ There is a system of feedback on trainings conducted.	▪ System is evident.
▪ The target set for Safety training for the year 2024-25 is 2 man days/employee/year.	▪ Good practice and should be continued.
▪ Formal safety induction training to contract workers before their deployment is imparted by concerned people.	▪ System found working well, Tata Power Skill Development Centre is an established for contract worker skill development.
▪ Toolbox talks as means of training is used systematically.	▪ Toolbox talk is an effective tool for prevention of incidents. The subjects covered should be related to job being performed in that shift/day by the team. Before starting the shift/day's activity, at least 10 minutes Toolbox talk conducted by the respective Engineer/Supervisor will help the team to execute the job in a safe manner. Records of Toolbox talk should be maintained.

(K) Motivational & Promotional Measures for OH&S:

Observation	Recommendation
▪ Various programs are conducted on safety round the area to keep employees motivated and alert. National Safety Week, National Fire Day and World Environment Day are in family celebrated a big way and members also participate. Events like : a) Awarding the Best Safety Performers. b) Safety Slogan and Safety Poster competition. c) Fire drill, Fire equipment display and use. d) Safety PPEs exhibition e) PPE use and training etc. are organized. Winners are rewarded. Their posters and slogans are exhibited. There is a scheme for Theme Based weekly / monthly awareness campaign round the year. The Tata Power Safety Management System has well maintained system like- a) SMS - Safety leadership Approach. b) Technical – Process safety. c) EPM – Safety Management. d) Safety Excellence journey. e) Safety observation cycle. f) Safety Tracker	▪ A good system to promote safety improvement drive in the plant and motivating employees towards safety. ▪ EHS promotional activities is in order should be continued

(L) Identification and Assessment of Hazard:

Observation	Recommendation
▪ HIRA is in place.	▪ HIRA need to be revised by incorporating the relevant hazards, conditions etc and training needed for more clarity.
▪ HIRA prepared for all activities has been reviewed and updated time to time	▪ All the activities under HIRA should be reviewed and updated time to time w. r. to Risk, severity & occurrence etc. and records should be maintained.
▪ Process safety risk management for controlling all process hazards, Process safety risk management system is not evident.	▪ To understand process hazard; risk involved and establishes system to manage risk, Implementing Process safety risk management system is best system to control high and low risk process hazards.

(M) Safety Document (Safety management Document, SOP, Work Permit, Safety Standard etc):

Observation	Recommendation
▪ Safety management Document for process and maintenance activities is evidenced.	▪ Well defined system observed to be mentioned
▪ SOPs/WIs was displayed at shop floor in but invisible due to dust.	▪ For Good practice need displaying of pictorial SOP at shop floor. SOPs should be reviewed and updated time to time.
▪ Area wise and activities list of SOP is evidenced. Environment and ill health related hazards are not considered in the SOPs.	▪ A good system to promote safety improvement drive in the plant for safety management system.
▪ Well defined and systemic work permit system is evident	▪ Good practice
▪ It initiated by SAP notification, PTW preparation, Approval, Application of LOTO, Tool Box Talk, JSA, Revalidation, systematic way of site Restoring are evident.	▪ Well working system, appreciated
▪ In work permit system, responsibility of issuer, Acceptor & Permit holder is well defined and system working is evident.	▪ Appreciated
▪ LOTO system is being followed while working in energized system	▪ same to be followed for mechanical energized system.

(N) Safety Budget:

Observation	Recommendation
▪ Company budgets for safety have been provided annually by the plant funds. The budget is provided for the expenditures on procurement of PPE, implementation, recertification, modification of safety devices, testing and certification of pressure vessels, lifting machines lifting tackles, tree plantation, signage, first aid training, fire equipment's, third party audits etc. It was told that there is no restriction for safety expenditure.	▪ There is a precise and documented sufficient safety budget without any limit allocating funds for safety improvement within the company.

(O) Occupational Health Centre (OHC):

Observation	Recommendation
▪ The plant has its own well maintained (as per norms) occupational health centre and attached for health services. 01 Doctors are deputed in each shift (A, B & C shift) and one person in general shift.	▪ As per Rule 62 OH (1) of JFR, 1950, any factory carrying on 'hazardous process' shall be provided and maintained in good order an Occupational Health Centre (OHC). One full time Factory Medical Officer and trained dressers, male and female.
▪ 01 Ambulance with dedicated ambulance driver is deployed in A, B & C shift at the first aid centre and they are first-aid trained. The ambulance is provided with stretcher, first aid box and medical oxygen cylinder and other required equipment's.	▪ This is in compliance with Rule 62 PH (1) of JFR, 1950. The medical staff and ambulance drivers should undergo training on medical response to emergencies total no First -aider trained is 43 and 37 first aid boxes kept at various places.
▪ First aid and accident cases is being maintained in a register.	▪ All activities are documented and checked found ok.
▪ First aid boxes are with compliances of Jharkhand factory rule 1950 64 (c).	▪ First aid boxes to be distinctively marked with a red cross on a white ground name & No of first aider to be displayed as per rule 64 -E J F R 1950.
▪ The activities of First Aid centre are documented and health checkup documents found updated.	▪ As per JFR, 1950, Rule 62 NH (1) (b), the workers employed in a 'hazardous process' shall be medically Examined by FMO once in a period of 6 months, in respect of occupational health hazard to which they are exposed.

▪ There is a tie-up with some multispecialty hospitals of DVC, Dhanbad and Asansol for any major incidents/accidents.	▪ Compliances of ERP
▪ It was informed that Pre - employment medical examination and annual health check up is done for each employee. The annual health checkups was last held in march' 2024.	▪ Well maintained system.
▪ Disposal of any liquid chemical waste document was available.	▪ All waste handled by the authorized party who are authorized by PCB. Necessary care may be taken to comply with the Rule 4 of the chemical Waste (Management & Handling) while handling and disposal of chemical waste.
▪ There are 37 no of first aid boxes including some spare first aid box in the entire plant. All sections of the plant are provided with one first aid box with required materials.	▪ Compliance observed of Rule 64 (E) of JFR, 1950, but the names of persons trained in first-aid treatment shall be pasted at a conspicuous place in the factory and near each first-aid box

(P) Emergency Preparedness:

Observation	Recommendation
▪ Plant has an 'Emergency Preparedness and Response' (EPR) plan, approved by concerned agencies. The roles and responsibilities of Site Main Controller, Site Incident Controller, notified team, alert alarm system, list of emergency assembly points, list of fire extinguishers and their lay outs, list and location of first aid box, list of MSDS etc. are evident in the EPR.	▪ 'On site Emergency Plan' document is approved by the Chief Inspector of Factories, Jharkhand and the control copies to be made available as per distribution list. All the essential elements as mentioned in the observation column is incorporated in the Onsite Emergency Plan and include Risk related to Demography of area and List of equipments, checklists etc.
▪ Awareness level of Emergency contact numbers and Assembly point of working group was not satisfactory during plant visit.	▪ Awareness training on Emergency plan for shop floor employees need to be organized for enhancing their alertness and basic knowledge level to make the plan more effective.
▪ Mock Drill plan for FY 2023-24 was verified.	▪ More emergency situations should be considered for mock drill.
▪ All emergency point need to free from obstructions and to be reviewed as per calculation of norms.	▪ Need review

(Q) Compliances with Statutory Requirements (License, Consents, Certification etc.)

Observation	Recommendation
• **Factory License** #.	• System is in order
• **Lifting tools & Tackles**: Register of lifting tools & tackles are not evident, work order placed to the competent agency.	• System is in order.
• **PAN** AAGCB4215M 20/08/2015	• System is in order
• **FIRE NOC and fire load calculation & their compliances.**	• System is in order
• **CTO/CTE** under section 25/26 dated	• System is in order
• **Register of Accident (Form-23)** is evident as per Bihar/Jharkhand Factories Rules, 1950.	• As per Rules 104, Jharkhand Factories Rules, 1950 in a register of accidents shall be maintained in Form No-23.
• **Building/Structural Stability Test**: Building stability not evident work order placed to the competent agency.	• System is in order.
• Quarterly Fire drill evident in mock drill plan.	• Fire drills shall be held once in every three months as per Rules 62, Sub Rules 23(C) of Bihar/Jharkhand Factories Rules,1950.

(R) Documents of system of Management of change / process / plant modification / change of procedure:

Observation	Recommendation
1. Coal Mill Maintenance Platform is not available.	▪ Recommended to erect permanent platform in those areas of Coal Mill which are located at height and need periodic maintenance and risk assessment to be carried out for newly constructed platform and activities.
2. Fire Sealing & Painting for Electrical Cables is not adequate.	▪ Fire retardant coatings & fire stops have not been provided in cable galleries & cable vaults which are not complying the standards of IS 12459 (CODE OF PRACTICE FOR FIRE SAFETY IN CABLE RUNS) which may put the plant safety at risk. MPL has been advised to comply with IS 12459-5 standards and cable to be tied with properly.

(S) Mechanical Integrity and specific job like working at height and confined space:

Observation	Recommendation
HEIGHT WORK ▪ All worker Contract and MPL employees engaged in height job are well trained in use of safety harness and life. Contract employees are trained from TPSDI.	▪ System is in place for controlling, monitoring the safety standard for work at height.
▪ Height pass and standard quality of harness, life line and fall arrestor has been used while working at height with ensuring competent supervision.	▪ System is well working and is Appreciated.
▪ safety standard for erection and use of Scaffolding jobs is well established and after checking of scaffolding by competent person are being used, red tag and green tag system is also in system.	▪ System is well working and is Appreciated
▪ Sky Climber is required for internal inspection& maintenance of boilers and Inflatable Jack facilitates coil inspection coverage of larger area in less time Therefore, their proper functioning is to be maintained at any moment at site but provision is missing.	▪ a) Some equipment like Sky climber need rectification as any operational malfunction may lead to serious injury. MPL team has been advised to properly maintain/replace equipment which are having high safety impact while doing maintenance jobs at site. b) The process of Boiler coil inspection by manual method is not advisable. Inflatable jacks & other safe pulling devices need to be used.
▪ Confined space location identified and list prepared ,92 locations inBTG,28 in CHP and 52 locations etc are identified.	▪ System is well working and is Appreciated.
▪ Safety standard for confined space working including SOP and work permit system is evident and system found working.	▪ While working in confined space Recommended confined space work permit system clearance from competent person as per Rule 36 of Factory Act 1948.
▪ Testing of lifting tools, tackles, equipments and Pressure vessels testing as per Factory act 1948 sec 28,29&31is evident.	▪ Test record found as per norms.
▪ Internal Inspection of plant for moving machineries is evident.	▪ Required inspections as per Factory act 1948 sec21(2) by competent person.
▪ Preventive Maintenance of Electrical and Mechanical equipment is evident well maintained plan and procedure is available in each section is evident.	▪ Fulfillment of requirements' of Process safety management.

PHYSICAL HAZARD a) Housekeeping - In general overall housekeeping is good. Scope of improvement exits in all around the plant. Loose material like nut bolts and dust observed at some locations. Corroded and abundant structure and building to be safely removed with proper plan.	▪ It should be maintained, loose material to be removed from platforms gratings. Anti corrosion paint may be applied to reduce the corrosion risk and proper repairing of building is required some location like CHP.
b) Machine and general area guarding is observed as per norms.	▪ Well maintained system,
c) Material handling-Material handling /transporting of material is being carried out by through conveyer, Rail wagon, track hopper, dumper, stacked reclaimed etc	▪ Good control on material handling system is shown.
Electrical safe guarding - Electrical Safety requirnments- 1. Testing and Examination of Electrical Machines & Equipment – MPL power plant has two generators of 525 MW capacities which generate power at 21 KV and six single phase transformers of capacity 217 MVA each for two generators to step-up the voltage to 400 KV in star connection finally. The single line diagram of electrical power system from HT to LT is available on record.	▪ System is working safetly, Regular Oil testing is recommended and provision for firefighting arrangement is evident as per IS-3034:1993 and CEA 2023 Regulation No 46(2) (IX).
2. The 525 MW generators have been provided with protections like differential, control over current, stator overload, slow reverse power, under voltage, negative phase sequence etc. The protocols of 525 MW generators and main transformers are on records.	▪ System working well
3. Electrical Hand Tools – Inspection & Record Keeping List of electrical hand tools is available which being used by Maithon and contractors, the third party inspections and regular inspection of the hand tools are being carried out and records are maintained by Maithon and electrical contractors.	▪ System working well all testing and inspection record is evident.
4. Earthing system- It is observed that proper earthing system has been installed on HT/LT panels, transformers, motors etc. The loop earthings of fans and fittings in various areas have done. The earthing layout drawings of earthing systems and earth resistance tests are available on record.	▪ Recommended to follow the system.

5. **Electrical Zone classification**- flammable areas are established in the plants like Hydrogen plant, coal dust, diesel storages tanks etc however, the electrical zones classification was not done on the basis of fire hazardous areas for electrical installations in the plant.	▪ Follow the guideline of IS 5571 and 5572
6. **Emergency Lightning System**- emergency lighting systems are available in some location like power house, control room, technical building, OHC etc. through diesel generators of 2x2000 KVA.	▪ Review the system as per guideline of IS code 3043:2018 and follow the compliances.
7. **Compliances of CEA regulation 2010and Indian Electricity Act2022**- It is observed that records of inspection by CEA are found on record which is evident. The insulation mats are provided in front of electrical panels in MCC rooms and other required locations. Electrical Inspector is designated in line with CEA 2023 Regulation No (5A) fulfillment required statutory norms is evident.	▪ Appreciated and recommended follow the norms
8. **Use of PPE in Electrical job**-It was observed that PPEs are being used to good extent while working on electrical installations.	▪ Appreciated and recommended follow the norms.
9. Lightening protection system and static electrical prevention and discharge system- The lightning protections by spike type lightning arrestors have been provided in most of structures and building is evident.	▪ Need survey and provide as per requirements also follow provisions of IS code 7689 for proper bonding of gas line flanges in plant to avoid any generation of static charge
10. **Temporary electrical connection**-Loose wiring and connection not noticed and wire was found with proper manner with provision of tripping devices and provision of proper cable rating- well working system is evident.	▪ Follow IR rule and NEC 230.208 and NEc230.10 &IS 732
11. **Electrical safety training-training** imparted as per plan by trained and qualified personnel record available.	▪ To be continued.
12. **Switch yard safety and norms follow in working in Electrical room** - The provision for lightening and earthing was observed. The system of thermography was noticed to record high temperature for protection. Safety and statutory norms was being followed -Records are evident.	▪ Follow Indian electricity rule 1956 IS:5216 and IS:10118.
13. **Chimney -**275 m height of single chimney is observed with provision of lightening arrestors	▪ provision as per norms, no recommendation.

at two locations with proper earthing and aviation light at 8 locations on different heights. compliances of statutory norms is evident.	
14. CHP-provision Pull cord and other safety devices were found but water accumulation and other high risk situation observed.	▪ Recommended detail review of structural and building stability and protection from water logging. detail check points to be developed for maintenance job of counter weight, receiving and discharge chute, Belt joint (Vulcanized or mechanical), Idlers & pulley maintenance and changing job, deck plate, Belt safety switches (ZSS, belt sway switch, pull cord), Belt sway, spillage cleaning job etc.

(T) Fire Prevention, Protection & Mitigation:

1. Organizational Set-up and Overview for Fire Fighting:	
Observation	**Recommendation**
a) Fire NOC, Audit and fire load calculation document exists.	a) Needed compliances of all points of Fire audit and fire load calculation.
b) Fire services activities are under the MPL responsibility and for mutual aid MPL is attached with Jharkhand fire service station Dhanbad.	b) System is in order
c) HOD (Safety & Fire) is overall in charge of Fire Department. He is assisted by Lead Associate (Fire) MR. Rajkumar Rai.	c) System in Order
d) The functioning of Fire Department has been outsourced to a third party M/s Vahari Engineering from Jamshedpur.	d) System in Order
e) One Sr. Supervisor is the Site In-charge and four supervisors are working under him in A, B, C and in General shift, Three safety Officers, 9 DCPO and 36 Firemen are working for fire services. They are well experienced and having qualification as per norms.	e) System in Order
f) A fire Load calculation of the plant was conducted by competent agencies.	f) System in Order.
g) 'Fire Orders' containing 'Instructions for Prevention & Control of Fire' is available.	g) Fire Orders' need to be incorporated and any changes taking place in the plant/equipment need to be updated.

2 .FIRE DETECTION AND ALARM SYSTEM -System Working as per Norms of J.F.R 62	
For fire detection system following points has been observed. A) **1170 Smoke** Detectors fixed at all the Control Rooms, Panel Rooms, Cable galleries, Conference halls with alarm panel at Central Control Room and Repeater panel is at Fire Control Room. B) Dampers are provided at ventilation duct. C) 78 Heat sensors are fixed in crusher house, laboratories, battery D) Detectors/Sensors are inspected and maintained by Siemens, the OEM. E) Linear Heat Sensors (LHS) provided in cable galleries to initiate alarm if temperature rises F) LHS provided in Coal Conveyor galleries is linked to sprinkler system and an infra -red heat sensor has been installed recently in coal conveyer near JH#6. G) Alarm system is also connected with hooter in several locations in loop. H) 498 Manual Call Points fixed at all vulnerable areas, rooms, halls with distinctive Red colors which are press button type.	**Compliance of Jharkhand factory rule 62 (1) (d) is evident** ▪ System is in order.
3. Mutual Aid:	
• Fire services are mutually aided with Jharkhand Govt fire services Dhanbad.	• Need to be included in On-Off site Emergency Response plan.
4. Portable Fire Extinguishers and Fire Buckets:	
Observation	**Recommendation**

a) Total 443 Fire Extinguishers of ABC/DCP, Foam and CO2 types of various sizes are placed at required locations all over the plant as per fire load calculation and accordance of IS 15683:2006 and fire extinguishers are assigned with ID No's	a) System is as per norms.
b) The fire extinguishers are tested on quarterly basis. The records are maintained properly. Visual Checking of fire extinguishers are done by services of MPL. This is in compliances with J.F.R 62 Clause 21 and is being hydro test as per IS 2190:2010.	b) System is as per norms.
c) Water and Foam is replaced every year.	c) System is as per norms.
d) 15 Trolley mounted Foam guns have been provided at Transformer deluge valves and DG sets room.	d) System is as per norms.
e) Portable Fire extinguishers were kept on the floor at different locations as per norms.	e) At some locations found kept on floor and at some location found missing.
f) Total 65 in number of sand buckets, are placed at the right locations as per plan and norms with clean dry sand.	
5. Fixed Fire Extinguishing System (Fire Hydrant System):	
a) As mentioned in sl. no. 2 (g) smoke and heat detectors are available at Admin block, paint shop kitchen and storage area, electrical panel rooms and other working areas.	a) It is suggested to maintained documents of regular checking and maintenance as per Jharkhand Factories Rules 62, clause 9(an).
b) The fire detection system is being checked on half yearly basis by concern department.	b) Records available.
6. Fire Incidence Reporting and Recording System:	
a) Fixed Fire Fighting has facilities include 288 fire hydrants, 66 Monitors and 88 deluge valves.	a) To be continued.
b) Inspection is done on monthly basis.	b) To be continued.
c) Every fire Hydrant, Monitors, Deluge valves, Fire hoses has its Own ID Nos (mentioned in Layout).	c) To be continued.
d) Water pressure at the highest hydrant point (72 meters) is maintained between 3.5 to 3.8 and at the farthest point at 11 kg/cm2.	d) To be continued.
e) Hose reel with nozzles located beside each hydrant & are easily accessible without any hindrance.	e) NDT of pipe line is Recommended, all emergency point must be free from any obstructions and at some locations either equipment found missing in boxes.
f) In Admin building stair valve of fire hydrant system observed on landing platform.	f) Need access the risk.

7. Fire Fighting Training and Drill and signages:	
a) Fire fighting training is included in the yearly training calendar of 2023. b) Fire drills are conducted systematically. The mock drill plan for the year 2023-24 shows fire related mock drills are planned.	a) Firefighting training is to be conducted in a scheduled and systematic manner covering more employees from different areas. Frequency of training is to be enhanced. All employees including contractual employees need to be trained in institutes of repute to build up their competency level. b) The purpose of a fire drill is extinguishing fires as well as to familiarize and reinforce proper evacuation routes and practices. As per Rule 62 (23) (c) of JFR 1950, Fire fighting drills shall be held at least once in every 3 months and records in respect of such periodical drills shall be maintained.
8. Fire Fighting Equipments & Facilities:	
a) Three Fire tenders are provided to Fire department of MPL by MPL management Two at old station and one at Near CHP, Out of these three, two are multipurpose type and one has only water tanker of 3000 liter, One new Tender, smaller in size and capable of negotiating narrow bridges and lanes has been provided. b) Fire Tenders are checked daily with the help of a checklist and record evident. c) 28 lack liter water tank is provided for fire fighting purpose. d) Fire pump house and fire fighters has the following facilities- ▪ Main electric Pump – 2, cap 172 M3/Hr ▪ Diesel pump – 2, cap 168 M3/Hr ▪ Jockey pump – 2, cap 10.8 M3/Hr ▪ Booster – 2, cap 108 M3/Hr ▪ 6 Fire suits ▪ 33 SCABA sets (including 15 with Chlorine and DM plant) ▪ One refilling set. One set of hydraulic tools for breaking open locks, c) A consolidated list of existing "emergency exits" is available.	a) Good, Facilities found as per norms b) Good, Facilities found as per norms c) Good, Facilities found as per norms d) Good, Facilities found as per norms e) Good, Facilities found as per norms ▪ Emergency exit should not be blocked.

9. Passive & Active fire protection System: system is as per Statutory Norms	
a) Fire seal provided to all cables passing from one floor to another or through walls.	a) Good, system is in order.
b) Cables are coated with fire retardant paint for one meter length from the fire seals and at regular intervals.	b) Good, system is in order.
c) Emergency exits are fire resistant type with the required fire ratings.	c) Good, system is in order
d) Most Transformers were found separated with Fire walls.	d) Good, system is in order
e) HVWS provided to 400 KV switch yard, GT system, TG building (MOT, DOT, MDBFP, TDBFP etc.) and MVWS provided at LDO/HFO tank farm, CHP, Cable gallery.	e) Good, system is in order
f) Foam pouring system provided to LDO/HFO tank on top.	f) Good, system is in order
10. Built in safety in civil design and construction	
a) Buildings are constructed with non-flammable material Doors are wide and so are the stairways making escape from the building or for rescue operations.	a) Good, system is in order.
b) Emergency exits are provided in each building and Control rooms They are of fire Resistant type with four hour ratings. Emergency exits lead to wide landings and then to staircases. Ways to Emergency exits are clearly marked.	b) Good, system is in order.
c) Water hydrant and risers are installed in the buildings and available at 72 meter level of boilers also Hydrant lines are kept pressurized and at 72 mtr. level 3.8 Kg pressure is maintained.	c) Good, system is in order.
d) Control Rooms, Cable galleries, MCC and switchgear rooms have Smoke detectors.	d) Good, system is in order
e) Manual call points are at multiple locations with repeater panel at Fire Control Room	e) Good, system is in order

11. Fire safety in handling Flammable and Explosive Material	
a) Caution/Danger signs are placed conspicuously.	a) Good, system is in order.
b) Earthing facility for tankers of LDO / HFO / Diesel is in place	b) Good, system is in order.
c) High velocity water sprinklers are provided in Transformers and MVWS in LDO /HFO Tanks and MOT in GT building.	c) Good, system is in order.
d) LPG cylinder bank at the canteen is located outside with adequate ventilation and protection from sunlight.	d) Good, system is in order.
e) Cylinders are fitted to manifolds. There is a gas detector inside the bank which is at height.	e) Good, system is in order.
f) Hydrogen generation building has Fire extinguishers in each rooms Fire hydrants are placed on all sides of the building. Round the surveillance through CCTV is carried out.	f) Good, system is in order.
g) Oil tank areas have fire hydrants, monitors and foam flooding system. MVWS with deluge valves fixed as fire prevention measures.	g) Good, system is in order.

(U) Chemical Hazard:

Observation	Recommendation
1.TRANSPORTATION OF HAZARDOUS SUBSTANCES- List of Hazardous Chemical imported is being maintained by Chemistry department. Record is available for verification	• System is in order and compliance of J.F.R 62DH
2.Handling Of Hazardous Substances Following hazardous substances like Sulphuric Acid loading / unloading, Chlorine toner unloading, toner changing & dosing, Acid dosing, cleaning of neutralization tank, tank cleaning operation, dechocking of chlorine line, clarifier unit sludge pit cleaning, chemical solution tank cleaning, Hydrogen Plant operation including storage of hydrogen cylinder, are handling done with SOPs.	• System is in order
Risk control measures like trained manpower, work done only by authorized personnel, MSDS, Safety Training & retraining, communication exercise, proper supervision, use of suitable PPEs has been carried out during handling of hazardous chemicals.	• System is in order

Bund wall for Bulk Caustic soda storage tank in tank in DM Plant, tank identification number, emergency measure during accidental release, information to employees are found in place and on site emergency mockdrill carried as per plan and requirement.	• System is working well
Identification of pipe line with direction of flow is observed	• Appreciated Compliance of J.F R 62SH
Factory has identified a responsible person to deal with handling of chemical.	• Emergency situation while transporting of hazardous chemical though tanker is missing
3.Storage of Hazardous chemicals Company is storing Chlorine tonners, caustic and Sulphuric acid at DM plant for water treatment. HAZOP and Pumps are housed inside the dyke area however pump on off is being done from outside. Hazardous chemical classification as per flammability and on other standard study of such chemicals are evident. and is per guideline of JFR 62DH. The eye washer and safety shower is installed at dyke area with proper clean water pressure.	• SOP and MSDS to be displayed at site.
4.Spill Control Measures- The flooring of the Lubricant Yard is made impermeable and sloped to collect any spillage. The dyke walls made strong and in good conditions prevent direct flow to open drain.	• System is in order
5.MATERIAL SAFETY DATA SHEET (MSDS) MSDS is available for all chemicals and labeling is also observed - compliance with J.F.R 62CH.	• System is in order
6.GAS CYLINDERS SAFETY Marking of cylinders, identification with color code, proper handling of Gas cylinder, provision of Discharging static charge at hydrogen plant has been observed. Compliance with gas cylinder Rule 2016.	• Need rectification of ESD
7.LABELING AND COLOUR CODING Pipe line for handling of chemicals and other liquid and gasses is observed as per guide line of IS 2379:1990, ANSI / ASME 13.1: 2015 IS 4379:1981/BS EN1089-3	• Good, to be continue
8.HAZARDOUS WASTE MANAGEMENT Hazardous waste container are found with labeling and collected and kept at designated places.	• System is in order

Compliances of Hazardous waste Management Rules-2016 is evident and has been hand over to an authorized agency M/S Haryana petro Oils.	
U. Industrial hygiene (Illumination, Ventilation, & Noise etc):	
1. Illumination survey is carried out in the plant periodically. The last survey report was conducted on dated January 2021 during night hours and the illumination level at various location of the plant was within normal limit. 2. In general adequate ventilation is available in the plant and workshops. However, no ventilation study to assess the adequacy of ventilation was evidenced for enclosed areas. 3. Noise level at operating places are as per norms. Noise level monitoring is being done periodically in different hours (morning, afternoon and night) and records are maintained.	1. Good practice. The requirement of illumination levels in work places and passages /roads should be indicated as per the provisions in the State Factory Rules but found poor at some places. 2. As per Section 13 of the Factories Act' 1948, proper ventilation survey been carried out. For Ventilation study, IS 3103:1975 Code of Practice for Industrial Ventilation may also be referred. It is necessary to conduct Ventilation survey of enclosed areas. 3. Good practice. As per the Factories Act' 1948, the permissible level of noise for exposure of 8 hours in a day is 90 dB (A).

V. Safety Culture	
1. Prevalence of a good safety culture is evident from several factors.	1. Good system.
2. Almost all vehicle adhere to speed of 30 KMPH inside plant.	2. Good system
3. Cars are parked in the reverse in the parking zone.	3. Good system
4. All employees strictly follow the No smoking zones.	4. Good system
5. All executives put on green reflective jackets.	5. Good system
6. Work men of different contractors have their distinctive reflective jackets.	6. Good system
7. Use of general PPEs is observed.	7. Good system
8. General perception of safety amongst all level of workmen is good.	8. Good system
9. Their approach to safety inspections and audits was very positive.	9. Good system

10. The Tata power Safety management System (TPSMS) is followed by all employees.	10. Good system
11. There are 13 elements in TPSMS which ensures continuous improvement of safety culture.	11. Good system
12. KRA of each employee aligned with TPSMS.	12. Good system
13. Each HOD has to submit a personnel safety action plan in KRA Elements of TSMS are: a) Leadership & Accountability b) Hazard Identification& Risk management system c) Compliance Assurance Design, Construction& Operational Control d) People, Competency& Behaviours Communication, Consultation & Empowerment e) Incident Reporting, Investigation & learning f) Asset Management g) Management of Change h) Working with Contractors Response & Crisis Management i) Document Control & Record management j) Measuring Performance, Audit &Review	13. Good system
14. All four wheelers were observed to be parked in reverse to facilitate immediate move out in Emergency	14. Good system

PART – 4
FIELD VISIT OBSERVATIONS & EVIDENCE

Sl. No.	OBSERVATIONS	OBJECTIVE EVIDENCE
1	Proper illumination not evident at several location inside plant premises needs to review.	
2	Fire Hydrant and emergency points are not accessible, and not available at some points need review for internal inspection plan.	

3	There is a gap in between hand railing and ladder, walkway trip hazard and corroded mesh which may cause slip, trip and fall hazard, needs to review.	  
4	Electrical board front cover open at several, power cable is contact with metal surface. Insulated mat and not metal mounting to be recommended.	 
5	Stacker lifting trolley load test record not found & Fire hydrant pipe line ultrasonic thickness test and hydro test not found.	

5	Emergency exit uneven, slippery and partial obstructed at few location, which is not suitable emergency situation needs to review.	
6	Valve operation is ergonomically unsafe and not approachable at few location.	
7	Hand railing availability and foot step size to be reviewed at different location inside plant premises.	

8	Posing of Trip and stumbling hazard noted during field audit at few location needs to review. All exposed MS TMT bar to be covered to protect from weather exposer to avoid excessive corrosion.	 
9	Pipeline looks rusty, first metal layer is eroded at few location inside plant premises painting and color coding of pipes and NDT of pipe lines required.	
10	Emergency safety shower is not working and pressure is uneven	
11	Temporary plastic cover for electric board to protect electric board from rain water is not fire proof material needs to review.	
12	Water clogging near electrical panel without insulated mat may cause electrical shock hazard needs to review for protection from these potential hazard.	 

PART – 5
GOOD PRACTICES / OBSERVATIONS

Part _ 5: Good Practices / Observation

1	Safety Tracker displayed at plant premises	2	Thermo Hygrometer displayed at various location inside plant premises.	

3	Do's & Dont's displayed inside plant premises as per job description.	
4	Pictorial SOP in regional language displayed inside plant premises evident.	

5	Basic PPE required to work inside plant premises is displayed at several location inside plant premises.	
6	Plant is having well equipped occupational health centre with 24X7 ambulance facility.	

PART – 6
RECOMMENDATIONS

RECOMMENDATION:

- Fumes extraction system and oxygen concentration level indicator must be reviewed.
- Obstruction observed at some emergency points and exit gate must be cleared, fire hydrant point must be strengthened, review required of all emergency equipments and points, and MSDS to be displayed in all local languages.
- External audit by competent agency of dangerous machine and process safety to be carried out.
- Training Plan to be review for hazardous job, Risk assessments and on policies for skilled, unskilled workmen and for senior executives.
- Waste generation and disposal process need to be reviewed.
- Available hazard area classification is not appropriate recommended to be done by the third party for the betterment.
- The preventive and planned maintenance systems are in place and records are maintained which was evident during audit, but coal mill maintenance platform where maintenance job is carried out more than 10 mtr height while using temporary platform is very risky needs to review for permanent platform.
- Recommended with consultation of competent agencies for Electrical area classification for flammable Gases and Vapours", "IS 5572 : 2009 - Classification of Hazardous Areas (Other Than Mines) Having Flammable Gases and Vapours for Electrical Installation (Third Revision)", and "IS 5571 : 2009 - Guide for Selection And Installation of Electrical Equipment in Hazardous Areas (Other Than Mines)". "IEC 60079: Explosive atmospheres – Part 10-1: Classification of areas – Explosive gas atmospheres" and "IEC 60079: Part 0: Equipment General Requirements" have been used as reference.
- Some fire extinguisher were kept on floor must be hanged properly.
- Industrial Hygiene monitoring Records to be reviewed, Illumination and noise level must be checked again as poor illumination found some places.
- Waste and scrap disposal system must be reviewed and duration of disposal must be shortened, to avoid accumulation of scrap and sludge.
- Process safety Management (PSI PHA and other requirements) system to be developed including J. F. R 1950 Rule 95-shedule xiii part 1&2.
- HIRA to be reviewed.
- Recommended traffic management Audit to avoid and risk of traffic inside plant.
- Plant is having HIRA for various activity having gaps in few activities recommended to be review all HIRA by third party for the improvement.
- Recommended to erect permanent platform in those areas of Coal Mill which are located at height and need periodic maintenance and risk assessment to be carried out for newly constructed platform and activities.

- Fire retardant coatings & fire stops have not been provided in cable galleries & cable vaults which are not complying the standards of IS 12459 (CODE OF PRACTICE FOR FIRE SAFETY IN CABLE RUNS) which may put the plant safety at risk. MPL has been advised to comply with IS 12459-5 standards and cable to be tied with properly
- Storm water, spill management and scrap mapping sytem to be reviewed.
- All drains and opening must be covered.

Conclusion:

The audit findings indicate that, MAITHON POWER LIMITED, DHANBAD, JHARKHAND Plant has endeavored to provide safe working condition in the plant. The involvement of top management in implementation of safety system within the organization is visible. The organization's policy accepts Safety & Occupational Health as integral part of production. The unit is capable to manage any emergency, and this is known to the key persons involved.

However, during the audit a few shortcomings were noted as will be evident from the audit report and accordingly recommendations made in this report are suggestive in nature. Compliance to these recommendations within a stipulated time period will help in further strengthening the safety management system to meet the desired objective. A compliance report and corresponding modification may be maintained to achieve a highest level of traditional Safety Culture.

Progressive Industrial Consultants would like to thank the Management of MAITHON POWER LIMITED, DHANBAD, JHARKHAND, Plant for their help & courtesy extended during Safety Audit of the said plant.

Sub: Regarding inspection of structures.

Ref : Letter of Inspector of Factories, Dhanbad, Circle-3, vide memo no. 06, dated 16.01.2021.

Dear Sir,

With reference to the letter of Inspector of Factories, Dhanbad, Circle-3, vide memo no. 06, dated 16.01.2021, we have conducted thorough inspection of buildings/structures of Maithon Power Limited. Many defects were found during inspection. Some buildings/structures needed minor modification/rectification, but some needed major. We are extending the validity certificate up to 21st March 2024. MPL is expected to do all the marked correction to their buildings/structures at the earliest, after which re inspection will be done and certificate of validity will be extended. During inspection it was found that rectification/modification in RCC buildings/structures were up to the mark, but buildings/structures as mentioned below needs to be restored.

Following is the list of the structures that needs rectification: -

a. BCN #3A/3B: Main gallery structure and supporting members including tie bracing and columns.
b. JNT 1, 2, 3, 4, 4A, 5, 6, 7, 8, Crusher House - Columns, bracings, Plan bracings, supporting members, runners, Intermediate truss, Monorail door support, Slab supporting beam, Length breakers & debris chute revamping.
c. Crusher House Dust Extraction System chimney and duct revamping.

We request you to look into the matter and ensure compliance of the above on priority.

Thanking you,

Ref. No.: ERLDC/SL/2017-18/**6212** Date: 14.02.2018

To,

All the RTU Replacement Committee Members,

As per the e-mailing address

Sub: Replacement/up-gradation of Old RTU/SAS in Eastern Region – reg.

Dear Sir(s),

As you are aware that Report on Replacement of old RTUs in Eastern Region for Real Data transfer of RTU / SAS to Main and Back-up control center dually over IEC104 protocol (report available at http://erpc.gov.in/?page_id=91 under miscellaneous report section) has been approved by ERPC in 36th TCC/ERPC meeting held in Bhubaneswar on 13th & 14th September 2017.

It is further to mention that the report has suggested replacement/Up-gradation of these old RTUs / SAS due to the following reasons:-

- Non-availability of spare parts that might lead to long outage of real time SCADA data
- Having limitation of reporting dually over IEC 104 protocol
- Maintenance of the RTUs by the respective owners.

It has been requested to go through the report and take appropriate action for Replacement/Up-gradation of the RTU/SAS as there were instances of frequent failures of the Old RTUs. Also, last mile fiber connectivity may also be made available (wherever not available) as real time data reporting over IEC 104 protocol is not possible.

The action for replacement/up-gradation of old RTU/SAS as stated above may be initiated at the earliest.

Yours faithfully,

14/2/18

(Executive Director)
ERLDC

Independent Auditor's Report on Statement of details of decapitalisation of Property, Plant & Equipment for financial years ended on March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024, in support to the requirements of Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019

To
The Board of Directors
Maithon Power Limited
Corporate Center
34, Sant Tukaram Road,
Carnac Bunder, Mumbai- 400009

1. This Report is issued in accordance with the terms of our service scope letter dated November 18, 2024 and Master Engagement Agreement dated October 13, 2022, as amended with Maithon Power Limited (hereinafter the "Company")

2. At the request of the management, we have examined the accompanying Statement of details of decapitalisation of Property, Plant & Equipment (PPE) during financial years ended on March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024 (hereinafter referred to as the "Statement"), which we have initialled for identification purposes only.

3. The Company intends to submit the accompanying Statement for consideration of and evaluation by the Central Electricity Regulatory Commission in connection with true up petitions filed by the Company as required by the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the control period 2019-2020 to 2023-24.

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the management of the Company including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

5. The Management is responsible for ensuring that the Company complies with the requirements of the CERC Regulation and for providing all relevant information to the CERC.

Auditor's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a limited assurance based on our examination whether details of decapitalization of PPE for the financial years ended March 31, 2020 to March 31, 2024 are in agreement with books of account and records which were examined by us as considered necessary for the purpose of our audit underlying the audited financial statements for the year ended March 31, 2020 to March 31, 2024.

   The above paragraph constitutes the "Reporting Criteria".

7. The financial statement of the Company referred to in paragraph 6 above, were audited by us, on which we had issued unmodified audit opinions vide our reports dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023 and April 16, 2024 respectively. Our audits of these financial statements were conducted in accordance with the Standards on Auditing, as specified under Section 143(10) of the Companies Act, 2013 and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test check basis, evidence supporting the amounts and disclosures in the financial statements. Our audits were not planned and performed in connection with any transactions to identify matters that may be of potential interest to third parties.

8. We conducted our examination of the Statement in accordance with the requirements of the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India ("ICAI"). The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

10. Our scope of work did not involve us performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of the amounts reported in the Statement. We have not performed an audit, the objective of which would be the expression of an opinion on the financial results, specified elements, accounts or items thereof, for the Company taken as a whole. Accordingly, we do not express such audit opinion.

11. A limited assurance engagement involves performing procedures to obtain sufficient appropriate evidence on the Reporting Criteria mentioned in paragraph 6 above. The procedures performed vary in nature and timing from and are less extent than for, a reasonable assurance. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement.

12. We have performed the following procedures in relation to the Statement:

    a. Traced the total aggregate amounts of year wise decapitalization of PPE as set out in the Statement for the financial years ended March 31, 2020 to March 31, 2024 from the respective audited financial statements.

    b. Obtained the listing of asset wise decapitalization of PPE for each year as prepared and compiled by management based on information available in the SAP (ERP used by the Company for its accounting purpose) and traced the name of asset, original value of assets capitalized and year to put to use to the fixed asset register maintained by the company underlying the respective audited annual financial statements on test check basis.

    c. We have solely relied on management representation for appropriateness of classification of decapitalized PPE into decapitalization - part of capital cost and decapitalization – not part of capital cost as set out in the statement and have not performed any procedure on it as regards such appropriateness of classification.

    d. Performed necessary enquires with the management and obtained necessary representations. The Company has provided all relevant information for the respective financial years as stated above. We have relied on the same and have not performed any independent procedures.

       The above-mentioned procedures include examining evidence supporting the particulars in this Statement. Further, our scope of work did not involve us performing audit test for the purposes of expressing an opinion on the fairness or accuracy of any of the financial information or the financial statements of the Company taken as a whole.

Conclusion

13. Based on procedures performed by us, and on observations as set out in paragraph 12 above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes, if any thereon, are in agreement with books of account and records underlying the audited financial statements of the Company for the years ended March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024.

Independent Auditor's Report on Statement of annual and quarterly opening and closing balances of package wise undischarged liabilities for financial years ended 2019-20 to 2023-24, in support to the requirements of Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019

To
The Board of Directors
Maithon Power Limited
Corporate Center
34, Sant Tukaram Road,
Carnac Bunder, Mumbai- 400009

1. This Report is issued in accordance with the terms of our service scope letter dated November 18, 2024 and Master Engagement Agreement dated October 13, 2022, as amended with Maithon Power Limited (hereinafter the "Company").

2. At the request of the management, we have examined the accompanying Statement of annual and quarterly balances of package wise undischarged liabilities for financial years ended 2019-20 to 2023-24 (hereinafter referred to as the "Statement"), which we have initialled for identification purposes only.

3. The Company intends to submit the accompanying Statement for consideration of and evaluation by the Central Electricity Regulatory Commission in connection with true up petitions filed by the Company as required by the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the control period 2019-2020 to 2023-24.

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the management of the Company including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

5. The Management is responsible for ensuring that the Company complies with the requirements of the CERC Regulation and for providing all relevant information to the CERC.

Auditor's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a limited assurance based on our examination whether details in the Statement for yearly balances are in agreement with books of account and records which were examined by us as considered necessary for the purpose of our audit underlying the audited financial statements for each of the years ended March 31, 2020 to March 31, 2024 and for the quarterly balances, books of account and records underlying the Board approved unaudited interim condensed statements for the quarters ended April 1, 2019 to March 31, 2024.

   The above paragraph constitutes the "Reporting Criteria".

7. The financial statements of the Company referred to in paragraph 6 above, were audited by us, on which we had issued an unmodified audit opinions vide our reports dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023 and April 16, 2024 respectively. Our audit of these financial statements was conducted in accordance with the Standards on Auditing, as specified under Section 143(10) of the Companies Act, 2013 and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test check basis, evidence supporting the amounts and disclosures in the financial statements. Our audits were not planned and performed in connection with any transactions to identify matters that may be of potential interest to third parties.

8. We conducted our examination of the Statement in accordance with the requirements of the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India ("ICAI"). The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

10. Our scope of work did not involve us performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of the amounts reported in the Statement. We have not performed an audit, the objective of which would be the expression of an opinion on the financial results, specified elements, accounts or items thereof, for the Company taken as a whole. Accordingly, we do not express such audit opinion.

11. A limited assurance engagement involves performing procedures to obtain sufficient appropriate evidence on the Reporting Criteria mentioned in paragraph 6 above. The procedures performed vary in nature and timing from and are less extent than for, a reasonable assurance. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement.

12. We have performed the following procedures in relation to the Statement:

    a. Obtained the audited financial statements of the Company for each of the years ended March 31, 2020, March 31, 2021, March 31, 2022 , March 31, 2023 and March 31, 2024 audited by us on which we had issued unmodified audit opinions vide their report dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023, April 16, 2024 respectively and the Board approved unaudited interim condensed statements for each of the quarters ended after April 1, 2019 to March 31, 2024.

    b. Traced the annual aggregate opening and closing balance of undischarged liabilities as set out in the Statement to respective audited financial statements.

    c. Traced the quarterly aggregate opening and closing balance of undischarged liabilities as set out in the Statement to unaudited interim condensed statements of respective quarters.

    d. Obtained the listing of period wise and package wise details of balances of undischarged liabilities segregated into undischarged liabilities for capitalized assets and capital work in progress as prepared and compiled by management based on information available in the SAP (ERP used by the Company for its accounting purpose) and traced the breakup of balances between various packages to the books of account and other records underlying audited annual financial statements and unaudited interim condensed statements.

    e. Examined items of package wise balances from the listing provided to us by the management on sample basis from the underlying information available in the ERP as stated in paragraph 12(d) above and noted that the name of the package for each of the selected sample. We have however not performed any procedures to ensure the completeness and accuracy of the details containing segregation of payable balances and the identification/classification of the package as prepared by the management.

    f. Management has represented to us that balances of undischarged liability for capitalized assets and balances of undischarged liability for capital work in progress have been appropriately segregated between the various packages as set out in statement. We have solely relied on such representation and have not performed any procedures as regards such appropriateness of classification.

    g. Performed necessary enquires with the management and obtained necessary representations. The Company has provided all relevant information for the respective period as stated above. We have relied on the same and have not performed any independent procedures.

    The above-mentioned procedures include examining evidence supporting the particulars in this Statement. Further, our scope of work did not involve us performing audit test for the purposes of

expressing an opinion on the fairness or accuracy of any of the financial information or the financial statements of the Company taken as a whole.

Conclusion

13. Based on procedures performed by us, and on observations as set out in paragraph 12 above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes thereon, are in agreement with books of accounts and records underlying audited financial statements of the Company for the years ended March 31, 2020 to March 31, 2024 and unaudited interim condensed statements for the quarters ended after April 1, 2019 to March 31, 2024.

Restriction on Use

14. This report has been issued at the request of the Company, solely in connection with the purpose mentioned in paragraph 3 above and should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this report is shown or into whose hands it may come. We have no responsibility to update this report for events and circumstances occurring after the date of this report.

Independent Practitioner's Report on Statement of Undischarged Liabilities scheme wise/package wise of M/s Maithon Power Limited for the year ended FY 2019-20 to 2023-24

To
The Board of Directors
Maithon Power Limited
Corporate Centre
34, Sant Tukaram Road,
Carnac Bunder, Mumbai - 400009

1. We are issuing the report on Statement of Undischarged Liabilities scheme wise/package wise based on your request vide email dated 24th January, 2025.

2. At the request of the management, we have examined and are issuing report on figures reported in accompanying Statement of Undischarged Liabilities scheme wise/package wise (hereinafter referred to as the "Statement") during the year ended FY 2019-20 to 2023-24 which have been initialed for identification purposes only.

3. The Company intends to submit the accompanying Statement for consideration of and evaluation by the Central Electricity Regulatory Commission in connection with true up petitions filed by the Company as required by the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the year 2019-2020 to 2023-24 containing Scheme wise/ Package wise Undischarged Liabilities.

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the Management of the M/s Maithon Power Limited and the preparation and maintenance of all accounting and other relevant supporting records & documents. This responsibility includes design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

KASG & CO. FRN: 002228C CHARTERED ACCOUNTANTS

5. The Management is also responsible for ensuring that the Company complies with the requirements of the CERC Regulations and for providing all relevant information to the CERC.

Practitioner's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a reasonable assurance based on our examination whether details in the Statement for yearly balances are in agreement with audited financial statements, books of account and records for the year then ended which were produced before us for the purpose of report.

7. The financial statements of the Company referred to in paragraph 6 above, were audited by the respective Statutory Auditors of the Company.

8. We have conducted our examination of the Statement in accordance with the Guidance Note on Reports or Reports for Special Purposes issued by the Institute of Chartered Accountants of India. The guidance note requires that we comply with the ethical requirements of the code of ethics issued by the Institute of Chartered Accountants of India.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC-1), Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information and Other Assurance and Related Services Engagements.

Conclusion

10. Based on the examination as above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes thereon, are not in agreement with books of accounts and records underlying audited financial statements of the Company for the FY 2019-20 to 2023-24.

Restriction on Use

11. The report is addressed to and provided to the Company solely in connection with the purpose mentioned in paragraph 3 above and should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this report is shown or into whose hands it may come without our prior consent in writing.

Independent Auditor's Report on Statement of annual and quarterly opening and closing balances of package wise capital work in progress for financial years ended 2019-20 to 2023-24, in support to the requirements of Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019

To
The Board of Directors
Maithon Power Limited
Corporate Center
34, Sant Tukaram Road,
Carnac Bunder, Mumbai- 400009

1. This Report is issued in accordance with the terms of our service scope letter dated November 18, 2024 and Master Engagement Agreement dated October 13, 2022, as amended with Maithon Power Limited (hereinafter the "Company")

2. At the request of the management, we have examined the accompanying Statement of annual and quarterly opening and closing balances of package wise capital work in progress for financial years ended 2019-20 to 2023-24 (hereinafter referred to as the "Statement"), which we have initialled for identification purposes only.

3. The Company intends to submit the accompanying Statement for consideration of and evaluation by the Central Electricity Regulatory Commission in connection with true up petitions filed by the Company as required by the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the control period 2019-2020 to 2023-24.

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the management of the Company including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

5. The Management is responsible for ensuring that the Company complies with the requirements of the CERC Regulations and for providing all relevant information to the CERC.

Auditor's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a limited assurance based on our examination whether details in the Statement for yearly balances are in agreement with books of account and records which were examined by us as considered necessary for the purpose of our audit underlying the audited financial statements for each of the years ended March 31, 2020 to March 31, 2024 and for the quarterly balances, books of account and records underlying the Board approved unaudited interim condensed statements for the quarters ended after April 1, 2019 to March 31, 2024.

   The above paragraph constitutes the "Reporting Criteria".

7. The financial statements of the Company referred to in paragraph 6 above, were audited by us, on which we had issued an unmodified audit opinions vide our reports dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023 and April 16, 2024 respectively. Our audit of these financial statements was conducted in accordance with the Standards on Auditing, as specified under Section 143(10) of the Companies Act, 2013 and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test check basis, evidence supporting the amounts and disclosures in the financial statements. Our audits were not planned and performed in connection with any transactions to identify matters that may be of potential interest to third parties.

8. We conducted our examination of the Statement in accordance with the requirements of the Guidance Note on Reports or Certificates for Special Purposes (Revised 2016) issued by the Institute of Chartered Accountants of India ("ICAI"). The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

10. Our scope of work did not involve us performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of the amounts reported in the Statement. We have not performed an audit, the objective of which would be the expression of an opinion on the financial results, specified elements, accounts or items thereof, for the Company taken as a whole. Accordingly, we do not express such audit opinion.

11. A limited assurance engagement involves performing procedures to obtain sufficient appropriate evidence on the Reporting Criteria mentioned in paragraph 6 above. The procedures performed vary in nature and timing from and are less extent than for, a reasonable assurance. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement.

12. We have performed the following procedures in relation to the Statement:

    a. Obtained the audited financial statements of the Company for each of the years ended March 31, 2020, March 31, 2021, March 31, 2022 , March 31, 2023 and March 31, 2024 audited by us on which we had issued unmodified audit opinions vide their report dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023, April 16, 2024 respectively and the Board approved unaudited interim condensed statements for each of the quarters ended after April 1, 2019 to March 31, 2024.

    b. Traced the annual aggregate opening and closing balance of capital work in progress as set out in the Statement to respective audited financial statements.

    c. Traced the quarterly aggregate opening and closing balance of capital work in progress as set out in the Statement to unaudited interim condensed statements of respective quarters.

    d. Obtained the listing of period wise and package wise details of balances of capital work in progress as prepared and compiled by management based on information available in the SAP (ERP used by the Company for its accounting purpose) and traced the breakup of balances between various packages and sub packages to the books of account and other records underlying audited annual financial statements and unaudited interim condensed statements.

    e. Examined items of package wise balances from the listing provided to us by the management on sample basis from the underlying information available in the ERP as stated in paragraph 12(d) above and noted the name of the package and sub package for each of the selected sample. We have however not performed any procedures to ensure the completeness and accuracy of the details containing segregation of balances and the identification/classification of the package as prepared by the management.

    f. Performed necessary enquires with the management and obtained necessary representations. The Company has provided all relevant information for the respective period as stated above. We have relied on the same and have not performed any independent procedures.

    The above-mentioned procedures include examining evidence supporting the particulars in this Statement. Further, our scope of work did not involve us performing audit test for the purposes of expressing an opinion on the fairness or accuracy of any of the financial information or the financial statements of the Company taken as a whole.

S.R. BATLIBOI & CO. LLP
Chartered Accountants

Conclusion

13. Based on procedures performed by us, and on observations as set out in paragraph 12 above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes thereon, are in agreement with books of account and records underlying audited financial statements of the Company for the years ended March 31, 2020 to March 31, 2024 and unaudited interim condensed statements for the quarters ended after April 1, 2019 to March 31, 2024.

Restriction on Use

14. This report has been issued at the request of the Company, solely in connection with the purpose mentioned in paragraph 3 above and should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this report is shown or into whose hands it may come. We have no responsibility to update this report for events and circumstances occurring after the date of this report.

Independent Auditor's Report on Statement of annual and quarterly opening and closing balances of package wise capital advances for financial years ended 2019-20 to 2023-24, in support to the requirements of Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019

To
The Board of Directors
Maithon Power Limited
Corporate Center
34, Sant Tukaram Road,
Carnac Bunder, Mumbai- 400009

1. This Report is issued in accordance with the terms of our service scope letter dated November 18, 2024 and Master Engagement Agreement dated October 13, 2022, as amended with Maithon Power Limited (hereinafter the "Company")

2. At the request of the management, we have examined the accompanying Statement of annual and quarterly opening and closing balances of package wise capital advances of the Company for financial years ended 2019-20 to 2023-24 (hereinafter referred to as the "Statement"), which we have initialled for identification purposes only.

3. The Company intends to submit the accompanying Statement for consideration of and evaluation by the Central Electricity Regulatory Commission in connection with true up petitions filed by the Company as required by the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the control period 2019-2020 to 2023-24.

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the management of the Company including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

5. The Management is responsible for ensuring that the Company complies with the requirements of the CERC Regulation and for providing all relevant information to the CERC.

Auditor's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a limited assurance based on our examination whether details in the Statement for yearly balances are in agreement with books of account and records which were examined by us as considered necessary for the purpose of our audit underlying the audited financial statements for each of the years ended March 31, 2020 to March 31, 2024 and for the quarterly balances, books of account and records underlying the Board approved unaudited interim condensed statements for the quarters ended after April 1, 2019 to March 31, 2024.

   The above paragraph constitutes the "Reporting Criteria".

7. The financial statements of the Company referred to in paragraph 6 above, were audited by us, on which we had issued an unmodified audit opinions vide our reports dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023 and April 16, 2024 respectively. Our audits of these financial statements were conducted in accordance with the Standards on Auditing, as specified under Section 143(10) of the Companies Act, 2013 and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test check basis, evidence supporting the amounts and disclosures in the financial statements. Our audits were not planned and performed in connection with any transactions to identify matters that may be of potential interest to third parties.

8. We conducted our examination of the Statement in accordance with the requirements of the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India ("ICAI"). The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

10. Our scope of work did not involve us performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of the amounts reported in the Statement. We have not performed an audit, the objective of which would be the expression of an opinion on the financial results, specified elements, accounts or items thereof, for the Company taken as a whole. Accordingly, we do not express such audit opinion.

11. A limited assurance engagement involves performing procedures to obtain sufficient appropriate evidence on the Reporting Criteria mentioned in paragraph 6 above. The procedures performed vary in nature and timing from and are less extent than for, a reasonable assurance. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement.

12. We have performed the following procedures in relation to the Statement:

    a. Obtained the audited financial statements of the Company for each of the years ended March 31, 2020, March 31, 2021, March 31, 2022 , March 31, 2023 and March 31, 2024 audited by us on which we had issued unmodified audit opinions vide their report dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023, April 16, 2024 respectively and the Board approved unaudited interim condensed statements for each of the quarters ended after April 1, 2019 to March 31, 2024.

    b. Traced the annual aggregate opening and closing balance of capital advances as set out in the Statement to respective audited financial statements.

    c. Traced the quarterly aggregate opening and closing balance of capital advances as set out in the Statement to books of account and record underlying unaudited interim condensed statements of respective quarters.

    d. Obtained the listing of period wise and package wise details of balances of capital advances as prepared and compiled by management based on information available in the SAP (ERP used by the Company for its accounting purpose) and traced the amounts of various packages to the books of account and other records underlying audited annual financial statements and unaudited interim condensed statements.

    e. Examined items of package wise capital advances from the listing provided to us by the management on a sample basis from the underlying information available in the ERP as stated in paragraph 12(d) above and noted the name of the package for each of the selected sample. We have however not performed any procedures to ensure the completeness and accuracy of the details containing segregation of balances and the identification/classification of the package as prepared by the management.

    f. Performed necessary enquires with the management and obtained necessary representations. The Company has provided all relevant information for the respective periods as stated above. We have relied on the same and have not performed any independent procedures.

       The above-mentioned procedures include examining evidence supporting the particulars in this Statement. Further, our scope of work did not involve us performing audit test for the purposes of expressing an opinion on the fairness or accuracy of any of the financial information or the financial statements of the Company taken as a whole.

Chartered Accountants

Conclusion

13. Based on procedures performed by us, and on observations as set out in paragraph 12 above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes thereon, are in agreement with books of account and records underlying audited financial statements of the Company for the years ended March 31, 2020 to March 31, 2024 and unaudited interim condensed statements for the quarters ended after April 1, 2019 to March 31, 2024.

Restriction on Use

14. This report has been issued at the request of the Company, solely in connection with the purpose mentioned in paragraph 3 above and should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this report is shown or into whose hands it may come. We have no responsibility to update this report for events and circumstances occurring after the date of this report.

Independent Practitioner's Report on Statement of Railway Capex incurred, Capitalization, Advances and Undischarged Liability during the period FY 2008-09 to 2020-21 of M/s Maithon Power Limited

To
The Board of Directors
Maithon Power Limited
Corporate Centre
34, Sant Tukaram Road,
Carnac Bunder, Mumbai - 400009

1. We are issuing the report on Statement of Railway Capex incurred, Capitalization, Advances and Undischarged Liability based on your request vide email dated 24th January, 2025.

2. At the request of the management, we have examined and are issuing report on figures reported in accompanying Statement of Railway Capex incurred, Capitalization, Advances and Undischarged Liability (hereinafter referred to as the "Statement") during the period FY 2008-09 to 2020-21 which have been initialed for identification purposes only.

3. The Company intends to submit the accompanying Statement for consideration of and evaluation by the Central Electricity Regulatory Commission in connection with true up petitions filed by the Company as required by the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the period 2008-2009 to 2020-21 containing quarterly opening and closing balances of Railway Capex incurred, Capitalization, Advances and Undischarged Liability during the period FY 2008-09 to 2020-21.

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the Management of the M/s Maithon Power Limited and the preparation and maintenance of all accounting and other relevant supporting records & documents. This responsibility includes design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

KASG & CO. FRN: 002228C CHARTERED ACCOUNTANTS

5. The Management is also responsible for ensuring that the Company complies with the requirements of the CERC Regulations and for providing all relevant information to the CERC.

Practitioner's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a reasonable assurance based on our examination whether details in the Statement for quarterly balances are in agreement with audited financial statements, reviewed financial results, books of account and records underlying the Board approved unaudited interim condensed statements for the quarters then ended which were produced before us for the purpose of report.

7. The financial statements of the Company referred to in paragraph 6 above, were audited and reviewed by the respective Statutory Auditors of the Company.

8. We have conducted our examination of the Statement in accordance with the Guidance Note on Reports or Reports for Special Purposes issued by the Institute of Chartered Accountants of India. The guidance note requires that we comply with the ethical requirements of the code of ethics issued by the Institute of Chartered Accountants of India.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC-1), Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information and Other Assurance and Related Services Engagements.

Conclusion

10. Based on the examination as above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes thereon, are not in agreement with books of accounts and records underlying audited financial statements and reviewed quarterly results of the Company for the FY 2008-09 to 2020-21.

KASG & CO. FRN: 002228C CHARTERED ACCOUNTANTS

Restriction on Use

11. The report is addressed to and provided to the Company solely in connection with the purpose mentioned in paragraph 3 above and should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this report is shown or into whose hands it may come without our prior consent in writing.

Independent Auditor's Report on Statement of Long-Term Loan Movement with Interest for financial years ended on March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024, in support to the requirements of Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019

To
The Board of Directors
Maithon Power Limited
Corporate Center
34, Sant Tukaram Road,
Carnac Bunder, Mumbai- 400009

1. This Report is issued in accordance with the terms of our service scope letter dated November 18, 2024 and Master Engagement Agreement dated October 13, 2022, as amended with Maithon Power Limited (hereinafter the "Company")

2. At the request of the management, we have examined the accompanying Statement of Long-Term Loan Movement with Interest for financial years ended on March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024 (hereinafter referred to as the "Statement"), which we have initialled for identification purposes only.

3. The Company intends to submit the accompanying Statement for consideration of and evaluation by the Central Electricity Regulatory Commission in connection with true up petitions filed by the Company as required by the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the control period 2019-2020 to 2023-24.

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the management of the Company including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

5. The Management is responsible for ensuring that the Company complies with the requirements of the CERC Regulation and for providing all relevant information to the CERC.

Auditor's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a limited assurance based on our examination whether particulars of movement in long term borrowings and interest on long term borrowings of the Company for the financial years ended March 31, 2020 to March 31, 2024 are in agreement with books of account and records which were examined by us as considered necessary for the purpose of our audit underlying the audited financial statements for each of the years ended March 31, 2020 to March 31, 2024.

   The above paragraph constitutes the "Reporting Criteria".

7. The financial statements of the Company referred to in paragraph 6 above, were audited by us, on which we had issued unmodified audit opinions vide our reports dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023 and April 16, 2024 respectively. Our audits of these financial statements were conducted in accordance with the Standards on Auditing, as specified under Section 143(10) of the Companies Act, 2013 and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test check basis, evidence supporting the amounts and disclosures in the financial statements. Our audits were not planned and performed in connection with any transactions to identify matters that may be of potential interest to third parties.

8. We conducted our examination of the Statement in accordance with the requirements of the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India ("ICAI"). The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

10. Our scope of work did not involve us performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of the amounts reported in the Statement. We have not performed an audit, the objective of which would be the expression of an opinion on the financial results, specified elements, accounts or items thereof, for the Company taken as a whole. Accordingly, we do not express such audit opinion.

11. A limited assurance engagement involves performing procedures to obtain sufficient appropriate evidence on the Reporting Criteria mentioned in paragraph 6 above. The procedures performed vary in nature and timing from and are less extent than for, a reasonable assurance. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement.

12. We have performed the following procedures in relation to the Statement:

    a. Traced the opening and closing loan balances set out in the Statement for the financial years ended on March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024 from the books of account and records underlying audited financial statements of the Company for the respective years.

    b. We have verified the amount of loan repayments, loan drawn and interest during the respective years from the books of account and records underlying audited financial statements of the Company on test check basis.

    c. Performed necessary enquires with the management and obtained necessary representations. The Company has provided all relevant information for the respective financial years as stated above. We have relied on the same and have not performed any independent procedures.

    The above-mentioned procedures include examining evidence supporting the particulars in this Statement. Further, our scope of work did not involve us performing audit test for the purposes of expressing an opinion on the fairness or accuracy of any of the financial information or the financial statements of the Company taken as a whole.

Conclusion

13. Based on procedures performed by us, and on observations as set out in paragraph 12 above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes thereon, are in agreement with books of account and records underlying the audited financial statements for the years ended March 31, 2020 to March 31, 2024.

Notes:

1. The opening balance of long term borrowings pertaining to FY 2019-20 has been extracted from books of account and other accounting records underlying the audited financial statements for the year ended March 31, 2019.

2. The balances of long term borrowings and interest on such borrowings presented above does not include the impact of amortization of processing costs due to recognition of long term borrowings at amortised cost using effective interest rate (EIR) method.

3. The aforesaid details of borrowings has been extracted from the information available in SAP which is the ERP used by management for recording of transactions.

4. The above table does not include any penal interest for the year.

5. Interest during the year for State Bank of India related to Flue Gas Desulfurisation (in "H" above) is not eligible for inclusion while computing weighted average rate of interest on the actual loan portfolio as it is in capital work in progress stage.

6. The above statement is true and correct to the best of our knowledge and belief.

Independent Auditor's Report on Statement of Gross Block of Assets (Property, Plant & Equipment, Right of Use and Other intangibles Assets) as on year ended March 31, 2019, March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024, in support to the requirements of Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019

To
The Board of Directors
Maithon Power Limited
Corporate Center
34, Sant Tukaram Road,
Carnac Bunder, Mumbai- 400009

1. This Report is issued in accordance with the terms of our service scope letter dated November 18, 2024 and Master Engagement Agreement dated October 13, 2022, as amended with Maithon Power Limited (hereinafter the "Company")

2. At the request of the management, we have examined the accompanying Statement of Gross Block of Assets (Property, Plant & Equipment, Right of Use and Other intangibles Assets) as on year ended March 31, 2019, March 31, 2020, March 31, 2021 and March 31, 2022, March 31, 2023 and March 31, 2024 (hereinafter referred to as the "Statement"), which we have initialled for identification purposes only.

3. The Company intends to submit the accompanying Statement for consideration of and evaluation by the Central Electricity Regulatory Commission in connection with true up petitions filed by the Company as required by the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the control period 2019-2020 to 2023-24.

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the management of the Company including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

5. The Management is responsible for ensuring that the Company complies with the requirements of the CERC Regulation and for providing all relevant information to the CERC.

Auditor's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a limited assurance based on our examination whether details of Gross block of Property, Plant & Equipment for the financial years ended March 31, 2019 to March 31, 2024 are in agreement with books of account and records which were examined by us as considered necessary for the purpose of our audit underlying the audited financial statements for the year ended March 31, 2019 to March 31, 2024.

   The above paragraph constitutes the "Reporting Criteria".

7. The financial statements of the Company referred to in paragraph 6 above, were audited by us, on which we had issued unmodified audit opinions vide our reports dated April 17, 2019, April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023 and April 16, 2024 respectively. Our audit of these financial statements was conducted in accordance with the Standards on Auditing, as specified under Section 143(10) of the Companies Act, 2013 and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test check basis, evidence supporting the amounts and disclosures in the financial statements. Our audits were not planned and performed in connection with any transactions to identify matters that may be of potential interest to third parties.

8. We conducted our examination of the Statement in accordance with the requirements of the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India ("ICAI"). The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

10. Our scope of work did not involve us performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of the amounts reported in the Statement. We have not performed an audit, the objective of which would be the expression of an opinion on the financial results, specified elements, accounts or items thereof, for the Company taken as a whole. Accordingly, we do not express such audit opinion.

11. A limited assurance engagement involves performing procedures to obtain sufficient appropriate evidence on the Reporting Criteria mentioned in paragraph 6 above. The procedures performed vary in nature and timing from and are less extent than for, a reasonable assurance. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement.

12. We have performed the following procedures in relation to the Statement:

    a. Traced the total gross block of assets as per audited financial statements as set out in the Statement for the year ended on March 31, 2019, March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024 from audited financial statements of respective years.

    b. Obtained the listing of year wise gross block of assets prepared and compiled as per the description of assets mentioned in Appendix 1 - Depreciation Schedule to the CERC Regulation by the management based on information available in the SAP (ERP used by the Company for its accounting purpose) and reconciled the year wise total amount of gross block of assets to the books of account and other records underlying the audited annual financial statements.

    c. Examined sample items from the list on a test basis from the underlying information available in the ERP as stated in paragraph 12(b) above and noted the description for each of the selected samples. We have however not performed any procedures to ensure the completeness and accuracy of the details containing segregation of gross block of assets and the identification/classification of the same as prepared by the management.

    d. We have traced amount of fair valuation of freehold land to respective audited financial statements.

    e. Performed necessary enquires with the management and obtained necessary representations. The Company has provided all relevant information for the respective financial years stated above. We have relied on the same and have not performed any independent procedures.

    The above-mentioned procedures include examining evidence supporting the particulars in this Statement. Further, our scope of work did not involve us performing audit test for the purposes of expressing an opinion on the fairness or accuracy of any of the financial information or the financial statements of the Company taken as a whole.

Conclusion

13. Based on procedures performed by us, and on observations as set out in paragraph 12 above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes thereon, are in agreement with books of account and records underlying the audited financial statements of the Company for the years ended March 31, 2019, March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024.

Notes:

1. Name of the Assets as mentioned in above statement confirms to the description of assets mentioned in Appendix 1 - Depreciation Schedule to the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019.
2. Land under full ownership excludes addition of Rs.12351.21 lakhs being the fair valuation as per Ind AS.
3. The package wise details have been prepared by us based on information available in SAP which is ERP used by management for its accounting purpose.
4. The above statement is true and correct to the best of our knowledge and belief.

Subject: Claim settlement for stones (+250 mm) as per joint assessment

Ref: MPL/CL/CCL/ 2017-18/35 dated: 2nd May' 17

Dear Sir,

This has reference to letter no. **MPL/CL/**CCL/ 2017-18/35 dated: 02.05.2016 submitted to CCL in regard to claim settlement for stone (+250 mm) as per joint assessment of CCL and Maithon Power Ltd on dated 26th & 27th April 2016.
The assessment was for the period of FY 14-15 and from April' 15 to Dec' 15. The stone qty assessed and agreed by both the parties 2279.06 Mts for FY 14-15 and 2255.98 Mts for the period of April' 15 to Dec' 15.

Based on the assessment, we hereby once again requesting for the settlement of stone compensation as per billed grade of coal being supplied in mentioned tenure.

Your kind co-operation in this matter is highly solicited.

Thanking you,

Yours faithfully,

This report is a worksheet for internal purposes only. SGS has no responsibility and / or liability whatsoever for the consequences of any action taken or not taken on the basis of this Report. All orders are accepted and all reports and certificates issued subject to the General Conditions of Service which are accessible at www.sgs.com/terms_and_conditions.htm

The above reflects our findings at time and place of Inspection. This Status does not relieve sellers/suppliers from their contractual responsibilities nor does prejudice buyer's right of claim towards seller/Supplier for compensation for any apparent and/or hidden defects not detected during our random Inspection or occurring thereafter.

The manual sampling method was agreed with the SGS Principal, as sampling by more reliable methods that provide probability samples was not possible. The Holder of this document is cautioned that collected MANUAL samples of this type do not satisfy the minimum requirements for probability sampling, and as such cannot be used to draw statistical inferences such as precision, standard error, or bias.

The consignement from which the samples were collected had a nominal top size of over 80millimeter.While the sampling method was agreed upon by all parties to this report,due to the limited ability to extract representative increments from the cargo,the samples collected will not necessarily be representative of the entire cargo.SGS has no responsibility and /or liability for the consequences of any action taken or not taken on the basis of this report.

This report is a worksheet for internal purposes only. SGS has no responsibility and / or liability whatsoever for the consequences of any action taken or not taken on the basis of this Report. All orders are accepted and all reports and certificates issued subject to the General Conditions of Service which are accessible at www.sgs.com/terms_and_conditions.htm

The above reflects our findings at time and place of Inspection. This Status does not relieve sellers/suppliers from their contractual responsibilities nor does prejudice buyer's right of claim towards seller/Supplier for compensation for any apparent and/or hidden defects not detected during our random Inspection or occurring thereafter.

The manual sampling method was agreed with the SGS Principal, as sampling by more reliable methods that provide probability samples was not possible. The Holder of this document is cautioned that collected MANUAL samples of this type do not satisfy the minimum requirements for probability sampling, and as such cannot be used to draw statistical inferences such as precision, standard error, or bias.

The consignement from which the samples were collected had a nominal top size of over 80millimeter.While the sampling method was agreed upon by all parties to this report,due to the limited ability to extract representative increments from the cargo,the samples collected will not necessarily be representative of the entire cargo.SGS has no responsibility and /or liability for the consequences of any action taken or not taken on the basis of this report.

MAITHON POWER LIMITED

Ref. No. MPL/CL/CCL/17-18/95 Dated: 10-04-2017

To,

GM, Hazaribag Area
Central Coalfields Limited

Subject: Third Party sampling and analysis of coal at loading points of CCL till CSIR-CIMFR is not taking over the sampling & analysis work and for witnessing the sampling and sample preparation as per tripartite MOU signed with CSIR-CIMFR, Central Coalfields Limited and Maithon Power Limited

Ref. No.	MPL/CL/CCL/16-17/935	Dated: 20.01.2017
	MPL/CL/CCL/16-17/926	Dated: 06.01.2017
	MPL/CL/CCL/16-17/924	Dated: 06.01.2017
	MOU-CIMFR-CCL	Dated: 28.11.2016

Dear Sir,

This has reference to the Letter no. MPL/CL/CCL/16-17/924&925 dated: 06.01.2017 regarding the authorisation given to M/s SGS India Pvt. Ltd (M/s SGS) as a Third Party Agency for Third Party sampling of coal as per Tripartite MOU at loading ends of CCL on behalf of Maithon Power Limited for the period of six months i.e. from 1st Jan 2017 to 30th June 2017.

We hereby submit the analysis reports for the coal samples collected at loading points of CCL for Road mode and analysed as per the the standard operating procedure circulated by CIL in NABL Lab of M/s SGS India Pvt. Ltd, Dhanbad for 1st June to 8th June 2017

The above is for your information only for quality improvement.

Your kind cooperation in the matter is highly solicited.

Thanking you,

Yours faithfully,
For Maithon Power Limited

BHARAT COKING COAL LIMITED
(A Subsidiary of Coal India Limited)
QUALITY CONTROL DEPARTMENT

Ref,No-BCCL/GM(QC)/F-TP/19/408 Dated 26/9/19

To,
Mr. Tarun Chattopadhyay
Head –Coal Logistics
Maithon Power Limited.

Sub- Third Party Sampling reports in regard to provision for engagement of independent Third Party Agency for sampling and analysis of coal at loading end of BCCL by Power producers/Utilities.

(Letter Ref Nos ;MPL/CL/BCCL/19-20/16 to 23 (for 08 Areas) Dated 22Aug 19)

Dear Sir,

Please refer to The MoU(executed on 26.06.2016 between CIL,Power Utilities and CSIR-CIMFR) and Tripartite Agreement on Third Party Sampling(TPS) for coal quality monitoring at loading end of BCCL for dispatch to Power Utilities executed on 28.11.2016 between BCCL (First party),MPL (Second party) and CSIR-CIMFR (Third party).

For your kind information, as per the MoU (signed on 28.06.2016 between CIL,Power Utilities and CIMFR) and Tripartite Agreement (signed on 2.11.2016 between BCCL,MPL and CIMFR) ,there is no provision for appointment of an independent 3rd Party sampling agency by Power Producers/Utilities .

Accordingly, only CSIR-CIMFR will work as a Third Party sampling Agency and carry out the collection ,preparation and analysis of coal at the loading end of BCCL. So,only CSIR-CIMFR's analysis reports will be acceptable to both of BCCL &MPL.Any analysis reports submitted by you will not be admissible for BCCL.

Also please refer to clause No S.6.9 of your Agreement,

Quote,

Collection and preparation of samples will be witnessed by the representative of Coal Company and Power Utility, however if they are not present or do not participate, the work will be done by CSIR-CIMFR/TPS representative and absence or failure of participation shall not be considered as a ground for disputing the result.

Unquote

Vide your letter no MPL/CL/BCCL/18-19/342 Dated 27.02.2019,you have requested to the General Manager (Quality Management),BCCL for authorization of your representative named M/s Mitra SK to witness the sampling and analysis of coal at loading end as per MoU and your representative has been authorized for the same.

your representative named M/s Mitra SK to witness the sampling and analysis of coal at loading end as per MoU and your representative has been authorized for the same.

Therefore, your representative is **authorized only to witness the sampling and analysis of coal samples being carried out by CSIR- CIMFR(as Third Party sampling Agency) at the loading end.**

If you carry out any sampling and analysis of coal samples in any lab and submit the same to BCCL, it is immaterial /useless for BCCL and such results will not be entertained by BCCL. Your all letters along with analysis reports are being returned to you.

Hope, you will not send such irrelevant letter to this office or any office of BCCL in future.

Thanking you.

6/9/2019

EXECUTIVE SUMMARY

- The performance assessment of boilers was conducted in ***August 2024.*** The work at the site consisted of measurement of input and output variables of different equipment and auxiliary loads in the plant.

- The boiler efficiency of unit 1 and 2 were found to be **84.98 %** and **84.89%**, respectively at test conditions, against the design value of **87.80%.**

- The performance test results of boilers indicate that both the boilers are performing with a maximum achievable efficiency point even with firing of coal with low GCV and higher ash content.

1.0 INTRODUCTION

This section introduces the plant, & process and defines the scope of the work.

1.1 Maithon Power Limited

Maithon Power Limited (MPL) is a joint venture of Tata Power and Damodar Valley Corporation. It has established 2*525 MW units, coal fired thermal power plant in Nirsa, Dist. Dhanbad. This is India's first public private power project. The power is evacuated through 400 kV transmission lines by PGCIL to benefit New Delhi, Jharakhand, West Bengal and Kerala. In this audit, both the units of the plant (unit 1 and 2) have been studied for boiler performance.

1.2 Scope of the work

The scope of the work is given below:

1. Performance assessment of boilers of 2*525 MW units.
2. Submission of detailed study report based on performance test carried out.

The performance evaluation of the boiler will be carried out based on indirect method (heat loss method) as per ASME PTC-4 guidelines, which includes,

- Dry and wet stack loss including moisture in combustion air, H2 in fuel
- Sensible heat loss in fly ash and bottom ash
- Furnace surface convection and radiation loss
- Flue gas analysis (O2 and CO measurement)

The following parameters will be collected from plant,

- Coal samples (two from each units) for ultimate and proximate analysis.
- Fly ash and bottom ash samples for % unburned carbon knowledge.

2.0 WORK CARRIED OUT

The assessment work of performance of boilers was conducted during ***August 2024.*** The work at the site consisted of measurement of input and output variables of different equipment and auxiliary loads in the plant. The performance test on boilers of Unit # 1 and 2 was carried out as per ASME PTC-4 guidelines. The performance tests were carried out at following plant loads:

Unit 1 – 528.00 MW
Unit 2 – 524.74 MW

The coal and ash samples were collected during the test. The data is processed at CPRI to evaluate Boiler Efficiency. The boiler efficiency was evaluated based on indirect method (heat loss method) as per ASME PTC-4 guidelines.

3.0 OBSERVATIONS AND STUDY RESULTS

3.1 Coal Analysis

Coal and ash samples were collected during the tests. The results of ultimate and proximate analysis of the same are given in Table 1. The GCV of coal used during boiler performance tests of Unit-1 and Unit-2 are 3978.62 kcal/kg and 3724.3 kcal/kg respectively. Both the boilers are designed to handle coal with GCV of 4671 kcal/kg. The ash content of the coal used during the performance testing of boilers of Unit # 1 is 41.97 % and that of Unit # 2 is 46.02 % against the design ash content of 36.19 %.

The trend of monthly average GCV of coal being used in unit 1 and unit 2 for the period from April 2021 to July 2024 are depicted in Fig. 1 and Fig. 2 respectively. From both the graphs, it can be observed that the boilers of both the units are not receiving coal of designed GCV of 4671 kcal/kg. Most of the time, the GCV of coal remained below 4200 kcal/kg.

Table 1: Results of proximate & ultimate analysis of raw coal samples of unit #1 & #2 (as fired basis)

Sl. No.	Particulars	Unit	Design	Unit – 1	Unit – 2
1	Gross calorific value	kcal/kg	4671.89	3978.62	3724.30
2	Carbon in fuel	%	47.84	40.39	37.47
3	Hydrogen in fuel	%	2.89	2.70	2.54
4	Sulphur in fuel	%	0.39	0.30	0.33
5	Ash in fuel	%	36.19	41.97	46.02
6	Moisture in fuel	%	7.11	6.85	6.13
7	Oxygen in fuel	%	4.58	7.78	7.34

3.2 Boiler Efficiency

The boiler (BHEL) is of the sub-critical cycle, balanced draught, forced circulation type with single reheat. The pulverized coal is fired in the boilers. Outer side of the steam generators and the flue gas ducts are insulated with wool mattresses.

As per scope of the study, the indirect method or heat loss method has been adopted for assessment of boiler performance as described in ASME standard: PTC-4-1, power test code for steam generating units. In short, the boiler efficiency is calculated as 100 minus all the computed energy losses taking place in the boiler.

Following losses are involved in the boiler efficiency calculation,

- Loss due to dry flue gas

- Loss due to hydrogen in fuel
- Loss due to moisture in fuel
- Loss due to moisture in air
- Loss due to carbon monoxide
- Loss due to surface radiation
- Unburnt losses in fly ash
- Unburnt losses in bottom ash

The unburnt analysis was carried out for the fly and bottom ash samples collected from Unit – 1 and 2 during test. The results are given in Table 2.

Table 2: Results of unburnt analysis of bottom ash and fly ash samples collected for unit -1 & 2

Sl. No.	Particulars	Unit	Unit – 1	Unit - 2
1	Bottom ash	%	3.39	4.57
2	Fly ash	%	2.95	2.27

The O_2, CO and temperature measurements in flue gas was carried out during testing of both the boilers. The measured values are given in Table 3.

Table 3: Flue gas analysis at different zones of boiler during heat rate test of unit - 1 & 2.

Sl. No.	Particulars	Unit - 1			Unit - 2		
		O_2, %	CO, ppm	Temp. °C	O_2, %	CO, ppm	Temp. °C

3	Before RAPH # B	3.63	9.00	316.63	3.69	8.75	308.35
4	After RAPH # B	6.00	6.75	136.10	6.33	6.67	131.13

The APHs in the plants are of tri-sector type. The dry flue gas analysis (O_2, CO and temperature measurement) were carried out at APH inlet and outlet to get the air leakage inside the APH. This leakage reduces the exit flue gas temperature. The outlet flue gas temperature is corrected to account for this leakage using the equation,

$$CorrectedExitFGTemperature = \frac{AirHeaterLeakage \times (C_P)_{air} \times (T_{gas} - T_{air})}{100 \times (C_P)_{gas}}$$

The corrected exit gas temperature calculated for LHS and RHS for both the units are given in Table 4 and 5. The dry flue gas loss forms biggest part of loss in boiler. After getting the corrected exit flue gas temperature, the same is used in boiler efficiency computation.

The water (product of combustion of H_2) released in hot vapour state along with exit flue gas incurs loss because of its latent heat. The loss due to H_2 is calculated for both the units as shown in table 6 and 7. The moisture in the fuel leaves the boiler as superheated steam along with dry exhaust after combustion. Some loss of heat takes place to convert the moisture (in liquid state) to superheated steam. The moisture % in coal samples taken during unit tests found to be 6.85 for Unit – 1 and 6.13 % for Unit - 2 against the design value of 7.11%. The loss due to this component is computed for both the units separately and given in table 6 and 7. Water vapours present in the incoming air get converted into water vapour during combustion and leaves the flue gas in superheated form. The relative humidity of atmospheric air measured during field visit was in the range of 74-78 % with barometric pressure of 995 mbar and atmospheric temperature was in the range of 30-33 ^{0}C during the performance test of Unit – 1 and 2 boilers.

The % of CO measured at APH inlet and outlet is given in table 3. The loss because of the incomplete combustion (presence of CO) is computed for both the units separately.

The measured values of boiler skin temperature at various levels on all sides of the boiler – 1 and 2 is given Annexure - 1. The boiler surface temperature was measured using infra-red camera during the test period. The surface heat loss due to radiation is computed as shown in table 6 and 7.

The overall boiler efficiency was computed for Unit – 1 and 2. The results of boiler efficiency for Unit – 1 and 2 are given in Table 6 and 7.

4.0 RESULTS AND DISCUSSIONS

From the performance testing results it can be observed that the boilers of Unit -1 and Unit – 2 are operating at an efficiency of 84.98 % and 84.89 % against the design value of 87.80 % at a maximum plant operating load of 528 and 524.74 MW.

The dry flue gas loss is predominant in both the boilers followed by the wet flue gas which is uncontrollable. The excess air ratio in both the boilers are maintained well within the limit. The measured CO varies from 8 to 9 ppm in Unit – 1 and the same for Unit – 2 varies from 7 to 8.75 ppm. These trace amount of CO indicates that the combustion is complete and hence there is no loss on account of CO.

From the coal analysis it can be observed that the boilers are designed to handle coal with GCV of 4671 and ash content of 36.19 %. During the performance testing the

GCV of coal used in boiler - 1 was 3978.6 and for boiler – 2 was 3724.3 kcal/kg. Ash content of the coal used in boiler – 1 was 41.97 % and for boiler – 2 was 46.02 %. Hence, to operate the plant with highest possible load, more coal has to be burnt in boiler as the used coal GCV is far below the design GCV. The ash content in coal is very high compared to the design. Thus with high firing rate of coal, more ash is being generated in the boiler. This will result in more boiler related auxiliary power consumption in terms of handling more fuel, flue gas and ash handling. The internal heat exchanging infrastructure of the boilers are exposed to such a high ash flow than it is designed for leads to high erosion rate and reduction in its life time.

From the past three years trend (refer Figure – 1 and 2) it can be seen that the plant has never received coal of design GCV and operated most of the time with coal of GCV less than 4000 kcal/kg.

The performance test results of boilers indicate that both the boilers are performing with a maximum achievable efficiency point even with firing of coal with low GCV and higher ash content.

5.0 CONCLUSIONS

The main conclusions from the study are as follows:

- The GCV of coal varies from 3724.3 to 3978.62 kCal/kg, which is lower than design GCV of 4671 kCal/kg for both the units. The boiler operates with a coal GCV far away from what it is designed for.

- The boiler efficiency for unit 1 and 2 were found to be **84.98 %** and **84.89%**, respectively at test conditions, against the design value of **87.80%**.

- The performance test results of boilers indicates that both the boilers are performing with a maximum achievable efficiency point even with firing of coal with low GCV and higher ash content.

Subject: Consent for Procurement of imported coal in compliance of directions given by Hon'ble CERC in MPL Tariff Order dated 08.01.2022

Dear Sir

As you are aware, Hon'ble CERC in its Order dated 08.01.2022 (Order) in MPL's Tariff Petition No. 408/GT/2020 (Petition) has revised the Station Heat Rate of Maithon Right Bank Thermal Power Plant (MRBTPP) of Maithon Power Limited (MPL) from 2375 kCal/kWh to 2326.03 kCal/kWh and has directed MPL to explore alternate coal to maintain design quality/GCV of coal (i.e. 4671 kCal/kg). Relevant extract of the Order is reproduced below for ready references:

> *"305. The Petitioner has considered PG Test performance based on the quality of coal permissible to the Boiler and Plant characteristics. Also, the PPA was executed by the Petitioner based on demonstrable plant characteristics. The Boiler efficiency had undergone changes due to receipt of poor quality of coal in comparison to the quality envisaged at the time of PG test. The deterioration of coal quality is temporary and cannot alter the plant characteristics on a perpetual basis. Coal is being procured by the Petitioner after execution of the Fuel Supply Agreement with the coal supplier. It was the obligation of the Petitioner, while entering into FSA, to ensure the desired quality of coal, by enforcing the provisions of FSA or by exploring any other alternate sources of coal.* ***The Petitioner, having not been prevented from exploring alternate source of coal, cannot, on a perpetual basis, be permitted to pass on the burden on the beneficiaries on this count****, more so when the Petitioner has not fulfilled the said obligations. It is further noticed that the Petitioner has not furnished any documentary evidence substantiating the efforts taken by it to ensure the good quality of coal. In our view, the relaxation of SHR of the generating station, in perpetuity, based on coal quality, will render the operational parameters specified under the 2019-24 Tariff Regulations for all generators redundant, as more often than not, the coal quality may no match with design coal. In view of this, there is no merit in the prayer of the Petitioner for relaxation of SHR on grounds of deterioration in quality of coal.* ***The Petitioner is directed to ensure the required quality of coal as envisaged during the PG test.*** *Accordingly, considering the operating margin of 5% as specified in Regulation 49(C)(b)(i) of the 2019 Tariff Regulations, the GSHR of the generating station works out as 2326.03 kcal/kWh [1945*1.05)/0.878] and the same is considered and allowed."*

With respect to the above Order, on 25.02.2022 MPL filed a Review Petition No. 04/RP/2022 (Review Petition) *inter-alia* seeking relaxation in heat rate norm from 2326.03 kCal/kWh to 2375 kCal/kWh and for withdrawing the direction for ensuring Design GCV coal. On the issue of SHR, vide its Order dated 26.05.2022 (Review Order), the Review Petition was held as not maintainable. Subsequently, an Appeal No. DFR 209 of 2022 was filed on 30.05.2022 mainly challenging

disallowance of relaxation of Station Heat Rate, which is pending before Hon'ble Appellate Tribunal for Electricity.

In another letter of even date, MPL has separately sought your consent for sourcing middling coal for meeting anticipated shortage of linkage coal. However, the same will also not enable MPL to meet the above direction as neither the quantum of middling coal would be enough nor design GCV would be achieved. Therefore, maintaining Design GCV as per above directions of Hon'ble CERC is possible only if the existing linkage coal is blended with high GCV imported coal.

Now, to comply with the above direction of Hon'ble CERC to MPL in order to ensure Design GCV, you are requested to give your consent latest by 24.03.2023 to import coal for required blending up to around 40-50% during FY 2023-24, which is expected to increase ECR by about 75%-100%. In case, MPL does not receive timely consent of beneficiary, which causes lower GCV due to use of only domestic coal and, hence, SHR to be above stipulated norm, all risks associated with attendant consequences shall be with the beneficiary.

Therefore, we earnestly request for your consent on the issues in preceding para latest by 24.03.2023 to proceed further in the matter.

Yours Faithfully

Subject: Consent for Procurement of imported coal in compliance of directions given by Hon'ble CERC in MPL Tariff Order dated 08.01.2022

Dear Sir

As you are aware, Hon'ble CERC in its Order dated 08.01.2022 (Order) in MPL's Tariff Petition No. 408/GT/2020 (Petition) has revised the Station Heat Rate of Maithon Right Bank Thermal Power Plant (MRBTPP) of Maithon Power Limited (MPL) from 2375 kCal/kWh to 2326.03 kCal/kWh and has directed MPL to explore alternate coal to maintain design quality/GCV of coal (i.e. 4671 kCal/kg). Relevant extract of the Order is reproduced below for ready references:

> *"305. The Petitioner has considered PG Test performance based on the quality of coal permissible to the Boiler and Plant characteristics. Also, the PPA was executed by the Petitioner based on demonstrable plant characteristics. The Boiler efficiency had undergone changes due to receipt of poor quality of coal in comparison to the quality envisaged at the time of PG test. The deterioration of coal quality is temporary and cannot alter the plant characteristics on a perpetual basis. Coal is being procured by the Petitioner after execution of the Fuel Supply Agreement with the coal supplier. It was the obligation of the Petitioner, while entering into FSA, to ensure the desired quality of coal, by enforcing the provisions of FSA or by exploring any other alternate sources of coal.* ***The Petitioner, having not been prevented from exploring alternate source of coal, cannot, on a perpetual basis, be permitted to pass on the burden on the beneficiaries on this count****, more so when the Petitioner has not fulfilled the said obligations. It is further noticed that the Petitioner has not furnished any documentary evidence substantiating the efforts taken by it to ensure the good quality of coal. Sub : Regarding import of coal

Ref:
1. Your letter No.-TPTCL-COMM-2022-23-132 dated 17.03.2023
2. Letter No.- MPL/FY23/23-03/009 dtd 17.03.2023 of MPL
3. Letter No.- MPL/FY23/23-03/010 dtd 17.03.2023 of MPL

Dear Sir,

We are in receipt of your letters dtd 17.03.2023 referred above through which you have raised the issue of requirement of imported coal. It is requested to clarify the following issues:-

1. Assured quantum of coal as per annual contracted quantity for Maithon Right Bank Thermal Power Station of MPL as per FSA and the average GCV of the coal.
2. Quantity of coal required for maintaining 85% availability of Maithon Right Bank Thermal Power Station of MPL. Quantum of coal expected to be delivered by Coal India month-wise.
3. Station heat rate of Maithon Right Bank Thermal Power Station of MPL is revised from 2375 Kcal/kg to 2326.03 kcal/kg, i.e., decreased approx. 2.06%. But, to ensure the design GCV your requirement for blending of imported coal upto around 40-50% is not clear to us. Please clarify the same.
4. Please furnish us the documentary evidence substantiating the effort taken by MPL to ensure the good quality of coal till date.

Hon'ble CERC in its order dtd 08.01.2022 against MPL tariff petition no. 408/GT/2020 has revised the station heat rate of Maithon Right Bank Thermal Power Station of MPL from 2375 Kcal/kg to 2326.03 kcal/kg and directed you to explore alternate coal to maintain design quality / GCV of coal. Further CERC in its order mentioned that the deterioration of coal quantity is temporary and can not alter the

22/03/23

plant characteristics on a perpetual basis and remind the obligation of MPL to ensure the desired quality of coal, by enforcing the provision of FSA. In this regard, you are requested to use indigenous coal and tight supervision with the objective of assurance of coal quality so that GCV loss at mines end to power station end should be minimized.

Please note that arranging coal of desired quality and quantity is the absolute responsibility and risk of the generator which cannot be passed on to the beneficiaries in any case.

We appreciate your effort in last year by not blending imported coal and managing operation with the domestic coal supply to keep the energy charge within control. This year also, you are requested to continue to pursue the coal company for supplying domestic coal of desired quality and quantity and put in sustained effort to keep the energy charge minimum.

Thanking you.

Yours faithfully,

Sd/-

Sub: - Procurement of imported coal in compliance of directions given by Hon'ble CERC in MPL tariff order dated 08.01.2022.
Ref: Your letter: MPL/FY23/23-03/011 dated 17.03.2023.

Sir,

This is with reference to your letter dated 17.03.2023.

Hon'ble CERC while pronouncing tariff order for MPL, has kindly noted that the obligation of MPL is to ensure the desired quality of coal or to explore alternate source of coal to restrict ECR within reasonable value so that the any extra burden may not pass on to the beneficiaries on a perpetual basis.

Further, you are kindly aware Ministry of Power, GOI, vide its order dated 9.1.2023 has directed to all Central & State GENCOs including IPPs to import coal through a transparent competitive procurement for blending @6% by weight for smooth operations of their power plants. DVC is also already complying with the above directives of MOP by restricting blending of imported coal within 6%.

In view of the above, DVC submits that MPL shall adhere to the above directives of Hon'ble CERC & MOP and any deviation in this regard is not acceptable to DVC.

Regards,

Yours sincerely,

Chief Engineer (Commercial)

TATA POWER-DDL

Tata Power-DDL/PMG/MPL-SHR/27032023 Dated: 27 Mar'2023

Mr. Sudip Dash
Head (Commercial & Regulation),
Maithon Power Ltd.,
Village Dambhuri, P.O. Barbindia, P.S. Nirsa,
Dhanbad – 828205

Subject: Seeking opinion/consent for import of coal in compliance to the directives by Hon'ble CERC in reference to MPL Tariff Order Dated 08.01.2022.

Reference:

i) **MPL letter no. MPL/FY23/23-03/010 dated 17.03.2023**
ii) **Hon'ble CERC Order for MPL's Tariff Petition No. 408/GT/2020**
iii) **MPL Review Petition No. 04/RP/2022**

Dear Sir,

This is in reference to your letter dated 17.03.2023 and Hon'ble CERC Order dated 08.01.2022 in MPL's Tariff Petition No. 408/GT/2020. As per the above-mentioned order MPL has to revise the Station heat Rate from 2375 kCal/kWh to 2326.03 kCal/kWh and directed MPL to explore alternate coal to maintain design quality/GCV of coal (i.e., 4671 kCal/kg)

Extract from the order is being reproduced:

> *"305. The Petitioner has considered PG Test performance based on the quality of coal permissible to the Boiler and Plant characteristics. Also, the PPA was executed by the Petitioner based on demonstrable plant characteristics. The Boiler efficiency had undergone changes due to receipt of poor quality of coal in comparison to the quality envisaged at the time of PG test. The deterioration of coal quality is temporary and cannot alter the plant characteristics on a perpetual basis. Coal is being procured by the Petitioner after execution of the Fuel Supply Agreement with the coal supplier. It was the obligation of the Petitioner, while entering into FSA, to ensure the desired quality of coal, by enforcing the provisions of FSA or by exploring any other alternate sources of coal. The Petitioner, having not been prevented from exploring alternate source of coal, cannot, on a perpetual basis, be permitted to pass on the burden on the beneficiaries on this count, more so when the Petitioner has not fulfilled the said obligations. It is further noticed that the Petitioner has not furnished any documentary evidence substantiating the efforts taken by it to ensure the good quality of coal. In our view, the relaxation of SHR of the generating station, in perpetuity, based on coal quality, will render the operational parameters specified under the 2019-24 Tariff Regulations for all generators redundant, as more often than not, the coal quality may no match with design coal. In view of this, there is no merit in the prayer of the Petitioner for relaxation of SHR on grounds of deterioration in quality of coal. The Petitioner is directed to ensure the required quality of coal as envisaged during the PG test. Accordingly, considering the operating margin of 5% as specified in Regulation 49(C)(b)(i) of the 2019 Tariff Regulations, the GSHR of the generating station works out as 2326.03 kcal/kWh [1945*1.05)/0.878] and the same is considered and allowed."*

TATA POWER-DDL

We understand that, MPL has also filed a Review Petition No. 04/RP/2022 inter-alia seeking relaxation in heat rate norm from 2326.03 kCal/kWh to 2375 kCal/kWh and for withdrawing the direction for ensuring Design GCV coal. On the issue of SHR, vide its Order dated 26.05.2022 (Review Order), the Review Petition was held as not maintainable. Further, an Appeal No. DFR 209 of 2022 has been filed by MPL before Hon'ble Appellate Tribunal for Electricity on 30.05.2022 mainly challenging disallowance of relaxation of Station Heat Rat and the same is pending adjudication.

As per letter referred above, it is submitted that MPL will have to import coal for blending around 40-50% during FY2023-24, which is expected to increase the ECR to 75-100%. Tata Power-DDL being a regulated entity and committed towards providing cost effective power to its consumers, any increase in ECR will have a significant impact on the Power Purchase cost.

Accordingly, Tata Power-DDL requests MPL to take necessary approval from appropriate Commission on the aforesaid matter for blending of 40-50% imported coal and relaxation in the Heat Rate norms.

Thanking you,
Yours Sincerely,
For **TATA Power Delhi Distribution Limited**

NOTICE

REVISION OF WATER TARIFF FOR SUPPLY OF RAW WATER FOR INDUSTRIAL & DOMESTIC USES

Damodar Valley Corporation (DVC) has revised, vide Resolution No.- 8900 (Agenda Item No. - 10) of 641 meeting of Corporation held on 25th June 2019, the rate for Industrial & Domestic Water Supply of raw water with effect from 01.04.2019 in exercise of its power under section 15 of the DVC Act 1948 & as per Clause No.- 11(a) of the agreement executed between DVC & Consumers based on the allocation of water by DVRRC (Damodar Valley Reservoir Regulation Committee). To stress upon the need for reducing water pollution, a scheme of incentive has been continued for 'Zero Effluent Discharge'. **All future bills for consumption of Industrial & Domestic raw water with effect from 1st April 2019 will be preferred at the Revised Water Tariff given below.**

REVISED WATER TARIFF FOR DOMESTIC/MUNICIPALITY/PHED AND INDUSTRIAL WATER SUPPLY

1. Damodar Valley Corporation has revised Water Tariff of Raw Water for Industrial & Domestic supply w.e.f. **01.04.2019**

2. The Revised water tariff for drawal of water from DVC sources as under:

SOURCES OF DRAWAL	INDUSTRIES	DOMESTIC/MUNICIPALITY/PHED
	Revised Rate	Revised Rate
Reservoir / River (Per KL)	Rs. 10.64	Rs. 1.725
Extra Charges for drawing water from water supply canal (Per KL)	Rs. 0.52	

3. The Tariff will be enhanced annually at the end of every financial year (i.e. w.e.f. 1st April) as follows:

(i) For Domestic/Municipality/PHED use - 05% shall be increased in raw water tariff annually.
(ii) For Industrial use - 10% shall be increased in raw water tariff annually.

4. The water supply bills shall be raised on the basis of actual drawal of water for all the consumers with the tariff as indicated above.

5. As incentive @ 10% on the monthly bills shall be allowed to those industries who have taken appropriate measures for " Zero Effluent Discharge". The said incentive shall be made applicable only if the payments are made within due date and on production of requisite certificate from **State Pollution Control Authority.**

All previous orders in this regard stand modified to the above extent.

MAITHON POWER LIMITED

Ref: MPL/FY20/2008 033 Date: 20.08.2019

To

Chief Engineer (Civil),
Damodar Valley Corporation,

Post - Maithon Dam, Dhanbad,

Jharkhand – 828207.

Ref: to earlier communications:

1) Notice ref no. CE-17/51-1120 dated 23rd July 2019
2) Agreement between Damodar Valley Corporation AND Maithon Power Limited for supply of raw water from Maithon Reservoir for Industrial & /or Domestic use
3) Bill for Raw water during the period from 01.07.2019 to 31.07.2019

Subject: MPL's observation regarding your revision of water tariff for supply of Raw water for Industrial and Domestic usage.

Dear Sir,

We are in receipt of a notice issued from your office referred as (1) above. As per the notice, water rate has been enhanced from Rs. 5.70/Kl to Rs. 10.64/Kl, also with a provision of 10% escalation of rate annually. We have started receiving our monthly water consumption bill as per the revised unit rate, with arrears with effect from 1st April 2019.

We find the above enhancement abrupt, arbitrary, uncalled for and without any prior intimation to us. As a result of this enhancement,

generation cost of power shall get costlier which will have adverse impact on all the long-term beneficiaries of MPL including DVC.

Therefore, considering all the above facts, this is to request your good office to reconsider this steep rise in water tariff.

A line of confirmation from your office in this regard will be highly appreciable.

Thanking you,

Yours truly,

For Maithon Power Limited,

MS Rahman 20/08/2019

(M S Rahman)

Head – Projects.

No.: MRO/ Water Tariff Cell/MPL/127/594 Date: 03.09.2019

To
The Chief Executive Officer,
Maithon Power Limited,
MA_5,Gogna Colony, P.O.-Maithon Dam,
Dist.- Dhanbad-828207.,

Subject: - Revision of Water Tariff for Supply of Raw Water for Industrial & Domestic uses.
Reference:-Your letter No.MPL/FY20/2008 033 dated 20.08.2019

With reference to your letter dated 20.08.2019, the comments of DVC are as follows.

- An agreement has been executed on 14.05.2010 between Damodar Valley Corporation and Maithon Power Limited for drawal of 30.0 MGD raw water from Maithon Reservoir at Maithon for Maithon Right Bank Thermal Power Project.
- As per clause No-11 of the agreement executed between Damodar Valley Corporation (DVC) & Maithon Power Limited (MPL) dated 14.05.2010 it is mentioned that **'the price for supply of water extracted shall be charged to the 'Second Party' in accordance with the First Party's Schedule of rates.**
- In the Schedule of rates on Annexure **–A** at page 13 of the agreement, it is clearly noted that **"Revised rate will be applicable as and when notified by the Corporation" & hence the argument raised by you in 2nd Para under your reference letter has no meaning at all.**
- The water tariff bills for supply of raw water for Industrial & Municipal uses was being raised by this office up to June 2019 considering the rate revised by the Corporation in the Year Oct. 2012, vide Office Order No. Coml/WS/Tariff Notice/2012-13/2240 dated 09/08/2012.
- Damodar Valley Corporation (DVC) revised the water tariff rate for Industrial & Domestic Water Supply of raw water with effect from 1st April 2019 in exercise of its power under Section 15 of DVC Act, 1948.

In the light the above, you are requested to make necessary arrangement for payment of arrear dues of amount of Rs.2,06,74,840/-**(Rupees Two Crore Six Lakh Seventy Four Thousand Eight Hundred Forty Only)** from 1st April 2019 to 30th June 2019 as mentioned in our bill no CE(C)/Tariff/19-20/MPL/127/Bill-216/1 dated 01.08.2019 as early as possible and make the monthly payment **on revised rates** on regularly basic against the raised bill on actual drawal.

An early action in the matter is highly solicited.

Yours faithfully

(S.K.Maji)

Independent Auditor's Report on Statement of details of actual expenses towards Water Charges, Ash Disposal Expenses and Security Expenses for financial years ended on March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024, in support to the requirements of Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019

To
The Board of Directors
Maithon Power Limited
Corporate Center 34,
Sant Tukaram Road,
Carnac Bunder, Mumbai- 400009

1. This Report is issued in accordance with the terms of our service scope letter dated November 18, 2024 and Master Engagement Agreement dated October 13, 2022, as amended with Maithon Power Limited (hereinafter the "Company")

2. At the request of the management, we have examined the accompanying Statement of actual expenses towards Water Charges, Ash Disposal Expenses and Security Expenses for financial years ended on March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024 (hereinafter referred to as the "Statement"), which we have initialled for identification purposes only.

3. The Company is required to submit the accompanying Statement in response to the information required in support of filing of its True up Petition in terms of the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 ("CERC Regulation") for the control period 2019-2020 to 2023-24 before Central Electricity Regulatory Commission (CERC).

Management's Responsibility

4. The preparation of the accompanying Statement is the responsibility of the management of the Company including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation and making estimates that are reasonable in the circumstances.

5. The Management is responsible for ensuring that the Company complies with the requirements of the CERC Regulation and for providing all relevant information to the CERC.

Auditor's Responsibility

6. Pursuant to the request of the Company for its onward submission to CERC as mentioned in paragraph 3 above, it is our responsibility to provide a limited assurance based on our examination whether details of actual expenses towards Water Charges, Ash Disposal Expenses and Security Expenses for the financial years ended March 31, 2020 to March 31, 2024 are in agreement with books of account and records which were examined by us as considered necessary for the purpose of our audit underlying the audited financial statements each of the years ended March 31, 2020 to March 31, 2024.

   The above paragraph constitutes the "Reporting Criteria".

7. The financial statements of the Company referred to in paragraph 6 above, were audited by us, on which we had issued unmodified audit opinions vide our report dated April 27, 2020, April 16, 2021, April 19, 2022, April 13, 2023 and April 16, 2024 respectively. Our audit of these financial statements was conducted in accordance with the Standards on Auditing, as specified under Section 143(10) of the Companies Act, 2013 and other applicable authoritative pronouncements issued by the Institute of Chartered Accountants of India. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test check basis, evidence supporting the amounts and disclosures in the financial statements. Our audits were not planned and performed in connection with any transactions to identify matters that may be of potential interest to third parties.

8. We conducted our examination of the Statement in accordance with the requirements of the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India ("ICAI"). The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the ICAI.

9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements.

10. Our scope of work did not involve us performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of the amounts reported in the Statement. We have not performed an audit, the objective of which would be the expression of an opinion on the financial results, specified elements, accounts or items thereof, for the Company taken as a whole. Accordingly, we do not express such opinion.

11. A limited assurance engagement involves performing procedures to obtain sufficient appropriate evidence on the Reporting Criteria mentioned in paragraph 6 above. The procedures performed vary in nature and timing from and are less extent than for, a reasonable assurance. Consequently, the level of assurance obtained is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement.

12. We have performed the following procedures in relation to the Statement:

    a. Expenses pertaining to security as set out in the Statement for financial years ended March 31, 2020 to March 31, 2024 were traced to the audited financial statements of the respective years.

    b. Expenses pertaining to water charges and ash disposal as set out in the Statement for the financial years ended March 31, 2020 to March 31, 2024 were traced to the books of account and other records maintained by the Company underlying audited financial statements of the Company.

    c. Obtained the listing of monthly bills of water consumption in Kilo Litres (KL) for each of financial years ended March 31, 2020 to March 31, 2024 as prepared and compiled by the management and traced it the invoices from Damodar Valley Corporation on a test check basis.

    d. Performed necessary enquires with the management and obtained necessary representations. The Company has provided all relevant information for the respective financial years as stated above. We have relied on the same and have not performed any independent procedures.

       The above-mentioned procedures include examining evidence supporting the particulars in this Statement. Further, our scope of work did not involve us performing audit test for the purposes of expressing an opinion on the fairness or accuracy of any of the financial information or the financial statements of the Company taken as a whole.

Conclusion

13. Based on procedures performed by us, and on observations as set out in paragraph 12 above and according to the information and explanations and management representations obtained, nothing has come to our attention that causes us to believe that the details provided in the Statement, together with explanatory notes thereon, are in agreement with books of account and records underlying the audited financial statements of the Company for the years ended March 31, 2020, March 31, 2021, March 31, 2022, March 31, 2023 and March 31, 2024.

Sub:- Request for Abandoned Mine Voids nearby of MPL for backfilling of fly ash.

Dear Sir,

Maithon Power Ltd., "MPL", is a 26:74 JV Company of DVC and Tata Power comprising of two units of 525 MW each operational since 2011 and 2012 and supplying power to DVC, WBSEDCL, KSEB and TPDDL as per CERC regulated tariff.

MPL is utilizing its generated ash for filling in abandoned mine voids as per Environment clearance laid down by the Office Memorandum of MOEF and CC as permitted for Fly Ash to be used in backfilling in mine voids.

As you are aware, evacuation of ash from MPL to abandoned mines is an utmost need to sustain its power generation as ash supply to cement industries and export through bulkers are limited.

We are greatly thankful for allotting us Gopinathpur Mine for backfilling purpose. However, due to conjested road conditions and limited access of Hywas in the Site, there is a restricted movement of Ash Hywas in the Site impacting our ash disposal process.

We therefore request your good office to enable allocation of additional mine voids in the vicinity of MPL Plant for backfilling of Fly Ash and help sustain power generation from MPL.

Your kind cooperation in this matter is highly solicited.

Thanking You,

For Maithon Power Limited

Subject: Backfilling of mine void in Gopinathpur Colliery using flyash-regarding

Dear Sir,

With reference to your letter no. MPL/ECL/FY 22-23/131022 dated 13.10.2022, it is to be noted that the mine void of Gopinathpur Colliery is adjacent to both Pusai and Khoodia jores. As stipulated in the Office Memorandum of MoEF&CC dated 28th August, 2019 stated as,

" There should be at least clearance of 500 m of safe distance be maintained from river and water body in case of ash disposal in abandoned mines to prevent embankment failures and flyash flowing into the nearby water body".

The distance of the said mine void may be less than stipulated 500 metres from these jores. Hence, you are requested to stop dumping of flyash into mine void in Gopinathpur Colliery effective immediate in case you have already started flyash dumping activity in the area as this will amount to violation of conditions laid down in the OM of MoEF&CC.

This is for your kind information and necessary action please.

Sub: Utilization of Ash in filling abandoned mines.

Dear Sir
First, we would like to thank the E.C.L management for supporting us for the last 10 years by allowing us to fill up various abandoned mines available at Mugma area.

At present MPL generates approximately 2 million MT of ash every year through its 2 x 525 MW Thermal Power station which needs to be disposed of as per applicable guidelines of Ministry of Environment Forest & Climate change (MoEFCC). As there is no ash utilizing plant near the company premises for gainful ash utilization therefore the option left with us is disposing of the ash generated in nearby abandoned mines.

We have identified few abandoned OCPs in Mugma area, which as per our knowledge, are presently available for ash dumping-

Sl No	Name of Mines	Name
1	**RAJPURA**	S.N.C Quarry of Rajpura Colliery P.S. Chirkunda
2	**RAJPURA**	R.K. Rajpura Quarry P.S. Chirkunda
3	**GOPINATHPUR**	S.G. Quarry of Gopinathpur Colliery P.S. Nirsha
4	**GOPINATHPUR**	Gopinathpur Quarry of Gopinathpur
5	**KHOODIA**	Khoodia OCP of Khoodia Colliery P.S. Nirsha
6	**KUMARDHUBI**	1M South Quarry of Kumardhubi Colliery P.S. Chirkunda
7	**KUMARDHUBI**	S,K, Quarry, Kumardhubi Colliery P.S. Chirkunda
8	**HARIAJAM**	B.P. Seam quarry near 27 & 28 incline & KSGM College
9	**SHYAMPUR-A**	V & VI quarry Near Nayadanga Quarry

Therefore, we would request your kind intervention in this matter and request to allow us to dispose the ash in the above abandoned mines.
Looking forward for your continued support,

Thanking you

Yours faithfully

Subject: Requirement of bottom ash at Satgram-Sripur Area, ECL.

You don't often get email from gmsatgram.ecl@coalindia.in. Learn why this is important

[EXTERNAL sender, Exercise caution..!]

Dear Sir,

At present we are running depillaring districts underground mines in our area, as a result void is created in below ground working. We used to fill up those voids by sand. Now in the monsoon season sand supply will be stopped due to suspension of lifting of sand from river bed by district authority. Hence bottom ash from power plants is an alternative material in place of sand which may be used for filling up those voids.

Therefore it is requested to you for the supply of 25000 CUM of bottom ash monthly to the underground mines of Satgram-Sripur Area. If you agree to supply bottom ash to our area then our representative will contact you for discussion regarding the matter.

Awaiting for your positive response.
Thanking You,

Regards,
Upendra Singh

Sub:- Request for allocation of Abandoned Mine Voids nearby MPL for backfilling of fly ash.

Dear Sir,
Maithon Power Ltd., "MPL", is a 26:74 JV Company of DVC and Tata Power comprising of two units of 525 MW each operational since 2011 and 2012 and supplying power to DVC, WBSEDCL, KSEB and TPDDL as per CERC regulated tariff.

MPL is utilizing its generated ash for filling in abandoned mine voids as per Environment clearance laid down by the Office Memorandum of MOEF and CC as permitted for Fly Ash to be used in backfilling in mine voids. You are already aware that the evacuation of ash from MPL to abandoned mines is an utmost need to sustain its power generation as ash supply to cement industries and export through bulkers are limited.

As per Office Corigendum (OC) Ref: CPAM/43020/33/2023-CPIAM[e-357558] by the GOI (Ministry of Coal) regarding SOPs in respect to fly ash filling and as per OC Ref: 9/11/2022-St. th. regarding Inputs/Suggestions on Draft SOPs for disposal of fly ash we came to understand that it is required by the TPPs to apply to CEA for allocation of abaondoned mines for ash disposal.

We therefore would like to submit to your good office the list of Abandoned Mine Voids from ECL for backfilling of Fly Ash in the vicinity of MPL Plant for your kind consideration and onward allotment to us so that MPL could stow atleast some part of its ash to the allocated abandoned mines as per the rules and regulations laid down by the MOEFCC and continue its journey as a major power producing unit thereby serving the Nation.

Your kind cooperation in this matter is highly solicited.

Thanking You,

For Maithon Power Limited

Durgesh Sharma
(Head-FAM, MPL)

Annexure 1

Format of the request to CEA by TPPs for the allocation of the Mines

A	**List of Identified mines:**						
	Name of the TPP	Name of the mines	Distance (km)	Void space available (L cum)	Void space required (L cum.)	Tentative time required for dumping	Proposed mode of transport
1.	MPL	Rajpura-A	25	2.5	2.5	3 Months	Road-Hywa
2.	MPL	Rajpura-B	25	3.5	3.5	4 Months	Road-Hywa
3.	MPL	Raja Colliery	20	3	3	4 Months	Road-Hywa
4	MPL	Gopinathpur	20	1.5	1.5	2 Months	Road-Hywa

NOTICE FOR THE ATTENTION OF SHAREHOLDERS OF THE COMPANY
12th ANNUAL GENERAL MEETING AND INFORMATION ON E-VOTING

The 12th Annual General Meeting **("AGM")** of the Company will be held through Video Conferencing **("VC")**/Other Audio-Visual Means **("OAVM")** on **Wednesday, August 04, 2021** at **10:00 A.M IST**, in compliance with all the applicable provisions of the Companies Act, 2013 and the Rules made thereunder and the Securities and Exchange Board of India ("SEBI") (Listing Obligations and Disclosure Requirements) Regulations, 2015, read with General Circular No. 14/2020 dated April 08, 2020, General Circular No. 17/2020 dated April 13, 2020 and General Circular No. 20/2020 dated May 5, 2020, and Circular No. 02/2021 dated January 13, 2021 other applicable circulars issued by the Ministry of Corporate Affairs **("MCA")** and SEBI (collectively referred to as **"relevant circulars"**), to transact the business set out in the Notice calling the AGM. Members participating through the VC/OAVM facility shall be reckoned for the purpose of quorum under Section 103 of the Companies Act, 2013. In compliance with the relevant circulars, the Notice of the AGM and the standalone and consolidated financial statements for the financial year 2020-2021, along with Board's Report, Auditors' Report and other documents required to be attached thereto, have been sent on June 30, 2021 to the Members of the Company whose email addresses are registered with the Company/Depository Participant(s). The aforesaid documents are also available on the Company's website at **www.chemfabalkalis.com** and on the website of the Stock Exchanges, i.e., BSE Limited and National Stock Exchange of India Limited at **www.bseindia.com** and **www.nseindia.com**, respectively, and on the website of CDSL (agency for providing the e-voting facility and e-voting system during the AGM) i.e www.evotingindia.com. The documents referred to in the Notice of the AGM are available electronically for inspection without any fee by the members from the date of circulation of this Notice up to the date of AGM.
Members seeking to inspect such documents can send an email to ccaldcs@drraoholdings.com.

Instruction for E-voting and joining Meeting through VC/OAVM:

The Company is providing to its members facility to exercise their right to vote on resolutions proposed to be passed at AGM by electronic means ("e-voting"). Members may cast their votes electronically, using the electronic voting system of CDSL on the dates mentioned herein below **("E-voting")**
Further, the facility for voting through electronic voting system will also be made available at the AGM and members attending the AGM who have not cast their vote(s) by electronically will be able to vote at the AGM. The Company has engaged the services of **CDSL** as the agency to provide e-voting facility. Information and instructions including details of user id and password relating to e-voting have been sent to the members through e-mail as well as available in the Annual Report. The same login credentials should be used for attending the AGM through **VC/OAVM**. The manner of e-voting and shares in dematerialized mode, physical mode and for members who have not registered their email addresses is provided in the Notice of the AGM and is also available on the website of the Company: www.chemfabalkalis.com and on the website of the Stock Exchanges, i.e. BSE Limited and National Stock Exchange of India Limited at www.bseindia.com and www.nseindia.com, respectively, and on the website of CDSL, at www.evotingindia.com
The e-voting facility will be available during the following voting period:
Commencement of remote e-voting: **9:00 a.m. on Sunday, August 01, 2021**
End of remote e-voting : **5:00 p.m. on Tuesday, August 03, 2021**
The e-voting will not be allowed beyond the aforesaid date and time and the e-voting module shall be forthwith disabled by **CDSL** upon expiry of the aforesaid period.
A person, whose name is recorded in the register of members or in the register of beneficial owners maintained by the depositories as on the cut-off date, i.e., Wednesday, July 28, 2021 only shall be entitled to avail the facility of remote e-voting or for participation at the AGM and to cast AGM e-voting.
Manner of registering/updating email addresses is as below:
Members holding shares in physical mode, who have not registered/updated their email addresses with the Company, are requested to register/update the same by writing to the Company with details of folio number and attaching a self- attested copy of PAN card at ccaldcs@drraoholdings.com or to CAMEO at jessy@cameoindia.com
Members holding shares dematerialized mode, who have not registered / updated their email addresses with their Depository Participants, are requested to register / update their email addresses with the Depository Participants with whom they maintain their demat accounts.
After due verification, the Company / CDSL will forward their login credentials to their registered email address.
● Any person who becomes a member of the Company after dispatch of the Notice of the AGM and holding shares as on the cut-off date may obtain the User ID and password in the manner as provided in the Notice of the AGM, which is available on Company's website and CDSL website.
● Such members may cast their votes using the e-voting instructions, in the manner specified by the Company in the Notice of AGM.
The members who have cast their vote(s) by remote e-voting may also attend the AGM but shall not be entitled to cast their vote(s) again at the AGM. In case of any query pertaining to e-voting, members may refer to the "Help" and "FAQS" sections /E-voting user manual available through a dropdown menu in the "Downloads" section of CDSL website
All grievances connected with the facility for voting by electronic means may be addressed to Mr. Rakesh Dalvi, Manager, (CDSL,) Central Depository Services (India) Limited, A Wing, 25th Floor, Marathon Futurex, Mafatlal Mill Compounds, N M Joshi Marg, Lower Parel (East), Mumbai - 400013 or send an email to helpdesk.evoting@cdslindia.com or call on 022-23058542/43.

NOTICE OF 19th ANNUAL GENERAL MEETING TO BE HELD THROUGH VC/OAVM AND INTIMATION OF CUT-OFF DATE

Dear Shareholder,

NOTICE is hereby given that the **19th (Nineteenth) Annual General Meeting ("AGM")** of the Shareholders of Union Bank of India ("**Bank**") will be held on **Tuesday, August 10, 2021 at 11.00 am (IST)** at Central Office, Union Bank of India, Mumbai (the deemed venue of the Meeting) through Video Conferencing (VC) or Other Audio Visual Means (OAVM) facility.

In view of the continuing COVID-19 pandemic, the Ministry of Corporate Affairs(MCA) vide circular Nos. 14/2020, 17/2020, 20/2020, 22/2020, 33/2020, 39/2020 and 02/2021 dated 8th April 2020, 13th April 2020, 5th May 2020, 15th June 2020, 28th September, 2020, 31st December, 2020 and 13th January, 2021 respectively, ("MCA Circulars") and Securities and Exchange Board of India (SEBI) Circular No. SEBI/HO/CFD/CMD1/CIR/P/2020/79 dated 12th May 2020 and SEBI/HO/CFD/CMD2/CIR/P/2021/11 dated 15th January 2021 permitted the holding of AGM through VC/OAVM, without the physical presence of the members at a common venue. Accordingly, in compliance with the applicable provisions of the SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015 and the above guidelines, the AGM of the Bank will be held through VC/OAVM.

The Shareholders are further informed that:

i. The Notice of the AGM and the Annual Report including the financial statements for the year ended on March 31, 2021 will be sent only by email to all those shareholders, whose email addresses are registered with the Bank or with their respective Depository Participants (DP), in accordance with MCA Circulars and SEBI Circulars. Shareholders can join and participate in the AGM through VC/OAVM facility only. Shareholders participating through the VC/OAVM facility shall be counted for the purpose of reckoning the quorum.
ii. The instructions for joining the AGM and the manner for participation in the remote e-voting or casting vote through the e-voting system during the AGM will be provided in the detailed Notice of the AGM.
iii. The Annual Report along with Notice of AGM will also be hosted on the website of the Bank i.e. www.unionbankofindia.co.in and the website of BSE www.bseindia.com and NSE www.nseindia.com.
iv. In case you have not registered your email address with the Bank or Depository Participant, please follow below instructions to register your email ID:

Physical Shareholding	Send a duly signed request letter to the RTA of the Bank mentioning your email ID, mobile number and folio number to the following address: **Datamatics Business Solutions Ltd.,** Unit: Union Bank of India, Plot No. B-5, Part B, MIDC, Crosslane, Marol, Andheri (East), Mumbai - 400 093 You may also send scanned copy of the request letter to ubiinvestors@datamaticsbpm.com
Demat Holding	Please contact your Depository Participant (DP) with whom you are maintaining the demat account and register your email address as per the process advised by your DP.

v. The shareholders who have not registered their email ID can participate in the AGM after registering their email ID and Mobile Nos. in the weblink - https://ris.kfintech.com/clientservices/mobilereg/mobileemailreg.aspx The detailed process of participating in the AGM through VC / OAVM is also given in the Notice of the AGM.
vi. Bank has fixed Monday, July 12, 2021 as the Cut-off date to consider the names of the shareholders entitled to participate in the election i.e., to nominate and contest in the election of ONE Director from amongst shareholders other than the Central Government.

Notes:

a) The above is an extract of the detailed format of Quarterly/Annual Financial Results filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulation, 2015.The full format of the Quarterly/Annual Financial Results are available on the Stock Exchange websites www.nseindia.com and www.bseindia.com and on Company's website www.zodiaconline.com.

b) The Central/State Government authorities had imposed various restrictions to control the spread of Covid19 pandemic during the year and consequently, the low market demand had affected the Company's operations for the year ended March31,2021.However, the Company had taken various steps including cost reduction measures, bringing in operational synergies etc.to ensure sufficient liquidity for the Company's operations. Towards the end of the current year,the second wave of Covid-19 pandemic hit the country and has once again resulted in disruption of business as State government authorities had announced partial /complete lockdown.With easing of certain restrictions in June 2021 by State government authorities, the Management expects demand to revive. The Company's Management has done an assessment of the situation (including the liquidity position after taking into consideration continuing cost reduction measures, available investments, surplus funds with the Group, undrawn bank facilities etc.), and carrying value of all its assets and liabilities as at March31,2021and concluded that there are no material adjustments required in the financial statements as at March31,2021. However, the impact assessment due to COVID-19 is acontinuing process given the uncertainty associated with its nature and duration.The Company will continue to monitor any material changes as the situation evolves."

c) The Company has allotted 22,81,854 equity shares of face value of Rs.10 each at a premium of Rs.99.56 per equity share on preferential basis to two promoters of the Company on March 23,2021and March 25, 2021equally amounting to Rs.2,500 Lakhs.

d) The figures for the last quarter are the balancing figures between audited figures in respect of the full financial year and the unaudited published year to date figures upto third quarterof the financial year.

SLTRO for SFBs made on-tap following lacklustre auctions

Facility will allow banks to draw unutilised amount from previous auctions gradually

OUR BUREAU
Mumbai, October 11

The Reserve Bank of India seems to have turned the Special Long-Term Repo Operations (SLTRO) for small finance banks (SFBs) on-tap as the response to the monthly auctions it has conducted under SLTRO so far has been lacklustre.

In the five monthly auctions the central bank conducted since May, SFBs borrowed ₹2,040-crore funds for supporting the small business units, micro and small industries, and other unorganised sector entities adversely affected during the current wave of the pandemic.

In May, the RBI said it will conduct three-year SLTRO of ₹10,000 crore at the repo rate (4 per cent) for the SFBs, to be deployed for fresh lending of up to ₹10 lakh per borrower. There are 11 SFBs in the country.

As per the earlier SLTRO scheme, SFBs could have drawn the unutilised portion of ₹7,960 crore at the last auction, which was scheduled for October 14.

Meagre borrowings

But given that the average borrowing at the last five auctions was ₹408 crore, it is unlikely that these niche banks could have borrowed the unutilised portion in one go.

So, with the SLTRO going on-tap and available till December-end, SFBs can draw the unutilised amount gradually.

The central bank has also cancelled the last tranche of the SLTRO auction due on October 14.

In the revised SLTRO scheme, the RBI will aggregate all requests for funds and release them every Monday by initiating a 3-year repo contract at the repo rate with the requesting bank

As per the revised SLTRO scheme, RBI will aggregate all requests for funds and release them every Monday (on the subsequent working day if Monday is a holiday) by initiating a 3-year repo contract at repo rate with the requesting bank.

If a bank places multiple requests during the week, all such requests will be aggregated, and a single repo contract will be created on the date of operation.

Requests from SFBs desirous of availing funds from the RBI will be subject to availability of funds as on the date of application.

RBI said funds cannot be guaranteed in case the total amount of ₹10,000 crore is already availed.

PoI case: Airtel, Voda move tribunal against DoT's demand notice

PRESS TRUST OF INDIA
New Delhi, October 11

Bharti Airtel and Vodafone Idea have moved telecom tribunal to challenge Telecom Department's demand notices for payment of ₹3,050-crore cumulative penalties in the points of interconnect matter, a source said.

The Department of Telecommunications had recently issued demand notices to both the telcos to pay cumulative ₹3,050 crore in penalties in three weeks' time for violating norms by denying Reliance Jio points of interconnect (PoIs) way back in 2016.

Industry sources said that both Airtel and Vodafone Idea have now moved the Telecom Disputes Settlement and Appellate Tribunal (TDSAT) challenging DoT's demand notices and penalty and that the matter could come up for hearing on Tuesday.

E-mails sent to Bharti Airtel and Vodafone Idea Ltd did not elicit a response.

'Covid pandemic converted into opportunity in sectors like FMCG'

CEO of Cavincare says making quick decisions during crisis period helped

OUR BUREAU
Chennai, October 11

The Covid pandemic has been an adversity, but the adversity was converted into an opportunity in many sectors, including FMCG, said Venkatesh Vijayaraghavan, Group CEO and Director, FMCG, CavinKare.

He was speaking at the Straight Talk 2021 Brand Summit organised by MediaNews4U on the theme 'Predicting the Consumer Pulse and Pivoting for Growth- Lessons from the Pandemic'.

During the pandemic, Chennai-based CavinKare concentrated on the 4Ps - process, productivity, product and people, he said.

In the process category, the company automated as much as possible. The time to bring out a new product was reduced to three months from 18-24 months. Sanitizer was brought out in two months and hygiene product in three months, he said.

Venkatesh Vijayaraghavan, CEO and Director- FMCG, Cavinkare

Promoting innovation

Decisions were made faster, and employees were told to come out with ideas and innovate and not to worry even if the idea failed. For instance, a decision on a ₹10-crore project was taken within minutes while it would have taken a minimum of six months earlier, he said.

Vijayaraghavan said that over 50 products were launched in 3-6 months and five new brands were launched in three new categories, he said. Unlike in the past, what is different today is that the strategy is to go digital, he said.

Global reach and local connect, understanding data and analytics to derive insights, building capacity to understand India by regions and clusters and understanding rural areas better are the key. "Opportunity in the rural market is huge. Ignoring the rural market comes at the cost of opportunity," he said.

The event, among other subjects, discussed various issues related to pandemic and the lessons learnt from it.

There were panel discussions on topics like 'are ad dollars following audiences to digital screens commensurately?

Intel India imparts artificial intelligence training to over two lakh students

'AI for All' programme aims to reach 1 million citizens: Nivruti Rai

DEBANGANA GHOSH
Mumbai, October 11

While several major technology companies are lending a hand to budding engineers and existing employees to upskill them in new technologies amidst talent crunch, global chip maker Intel India is on a mission to demystify artificial intelligence (AI) for all age groups, different levels of students, citizens and researchers with its skilling programmes in India.

As of today, the company has already trained over 2 lakh students between 8th standard and 12th standard in AI and has upskilled 5,000 government officials.

In July this year, Intel launched another programme 'AI for All' with a target of enabling over one million citizens with knowledge and know-how of AI, Nivruti Rai, Country Head, Intel India, told *BusinessLine*.

"Talent is a critical need for Intel and everybody else. AI is important and will generate even more jobs. Yet AI is a black box and many people talk about it without really understanding the technology. So, we first trained all our Intel employees. Then, we started looking to train students, government officials and citizens," Rai said.

Nivruti Rai, Country Head, Intel India

Gamified course

"AI for All is a 4-hour long gamified course. You can take it on your phone and it is available in multiple languages. Without even doing much marketing, we already have over 2 lakh people taking this course. Going at this pace, I don't believe there will be any challenge in getting one million users in a year," she added.

Intel India is also funding and working with academicians on research programmes. It has partnered with other industry consortiums to enable skilling.

"We are preparing workforce for the needs of tomorrow and in areas we believe are going to be critical. Our goal is to demystify AI and show that AI is mathematics, statistics, programming, data analytics and just generating and creating clean data," Rai said.

Speaking of her own fear and reluctance of learning a new technology, she shared, "I remember when HTML was new. Everybody thought it was this scary new thing. I had similar inhibitions when I started coding, only to learn that it was even easier than BASIC. Unless people know it and do it themselves, they'll be scared."

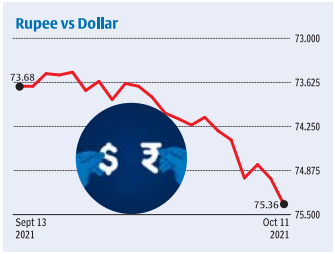
Rupee crashes to 15-month low with 17 paise slump against US dollar

OUR BUREAU
Mumbai, October 11

The rupee tumbled by 37 paise on Monday to hit the lowest level in about 15 months as oil marketing companies stepped up dollar purchases through banks in the wake of sharp uptick in Brent crude oil price and the greenback gaining strength.

The rupee closed at 75.36 to the US Dollar against the previous close of 74.99.

The Indian currency opened weaker at 75.11 per dollar. In intra-day trading, it saw a high and a low of 75.06 and 75.3950, respectively.



Crude oil price hike

Brent crude oil price rose almost 2 per cent to cross $84 a barrel.

A combination of factors, including banks' buying dollar on behalf of oil marketing companies, which probably expect crude oil to become more pricey and are mopping up dollars before it hardens further, and foreign institutional investors, who are liquidating some of their bond market positions before the ripple effect of the China's bond market slump is felt in emerging market economies, including India, pulling down the rupee, said a chief dealer with a private sector bank.

Brent crude oil could touch $90 per barrel as a global energy crisis looms and this could weaken the rupee further, cautioned the dealer.

Indian Bank to use Fisdom pact for more wealth management products

OUR BUREAU
Chennai, October 11

Indian Bank has said it has expanded the partnership with Fisdom, a fintech player, by adding new digital products to widen the suite of wealth management products for its customers.

In addition to existing products of mutual fund investment and e-NPS, new digital products such as mutual fund HNI advisory products, digital gold and e-tax filing were onboarded under the association by way of an agreement, according to a statement.

Imran Amin Siddiqui, Executive Director, Indian Bank pointed out that the bank's latest initiatives were part of its efforts to upscale business generation through digital channels both for liability and asset products of the bank. "We are confident that the partnership will be able to deliver a user-friendly wealth management ecosystem to Indian Bank customers," said Anand Dalmia, Co-founder, Fisdom.

WHEAT SHIPMENT BAN

Export firms cancel deals with domestic traders, brokers

Arrivals at APMCs almost double; private trade quotes above ₹2,100 a quintal

SUBRAMANIRA MANCOMBU
Chennai, May 23

Firms exporting wheat are backing out of contracts in the domestic market following Centre's ban on export, with ITC Ltd being one of those firms declaring *force majeure* for consignments delivered at port locations.

Wheat prices in private trade are quoted above a quintal barring a couple of places. At the agricultural produce marketing committee (APMC) yards, the weighted average modal price (rates at which most trades take place) is at least ₹50 a quintal higher than the minimum support price (MSP) of ₹2,015 fixed for this year.

Unusual development

ITC, in a letter to suppliers and brokers, said purchase contracts with them had been entered for wheat exports from India. But the ban on the grain's export has resulted in a *force majeure* event. "...all our balance contracts with you stands cancelled with immediate effect," the firm said.

An ITC official admitted that it had declared *force majeure*, an unusual development that prevents a person from fulfilling a contract, on its domestic purchase contracts but said it would be difficult to share more details.

A trader who shared the details of the cancellation of contracts said a few others were backing out of their contracts, resulting in trucks loaded with wheat piling up at some places.

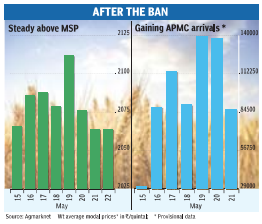
Growers counselled

One trader said companies such as ITC could have used the wheat for its flour manufacturing or even producing bread. An official of a multinational export-import company said wheat consignments, which were banned from exports and the cancelled lots, were of superior quality.

A Mumbai-based exporter said some sort of panic was setting in among growers but they have been counselled to hold back their produce as prices could tend to rule higher during the latter part of the year.

Commerce Ministry officials said they did not have any details of the cancelled contracts in the domestic market.

As a result of these developments, wheat arrivals between May 15, the day after the ban was imposed, and May 22, have almost doubled to 7.59 lakh tonnes (lt) against 3.95 lt during the year-ago period.



Wheat delivery to South

On Monday, the National weighted average modal price was ₹2,081, a four-day high, while arrivals by noon had topped 50,000 tonnes. A New Delhi-based trader said wheat was being delivered in South India at a price above ₹2,300 a quintal.

Though the ban on exports will bring down prices, traders and millers say wheat prices will rule still above the MSP this year. "It is unlikely that mills will be able to source wheat from the Food Corporation of India under the open market sale scheme (OMSS) this year due to low FCI procurement. They will have to buy wheat from the open market for their needs. This will keep prices above MSP," said a New Delhi-based analyst.

The Centre announced the ban on wheat exports as domestic production was feared to be lower than the initial record estimate of 111.32 million tonnes (mt). On May 22, the Ministry of Agriculture revised its estimate to 106 mt.

'Fraudulent' back-dated LCs being submitted for wheat: DGFT

PRABHUDATTA MISHRA
New Delhi, May 23

Pointing out that some fraudulent transactions have come to its notice, the Centre on Monday said it will not allow any wheat for export for which an irrevocable Letter of Credit (LC) has been opened after May 13, the day export was banned by India.

In a trade notice, the Directorate General of Foreign Trade said, "Information has been received from sources that fraudulent backdated LCs showing date of issuance as on or prior to May 13, 2022, are being submitted by some unscrupulous exporters for the issue of RCs. But as per LC's message exchange date between Indian and foreign banks and Swift message show it has been done after May 13."

So, it said both the LC and message exchange date between Indian and foreign banks should be "on or prior to May 13, 2022."

Meanwhile, a ship carrying 32,500 tonnes of Indian wheat arrived at Chittagong port in Bangladesh, while another ship laden with 65,000 tonnes of wheat left Kandla for Egypt during the weekend. This is India's first export to the African nation.

Soyabean output likely to be below Govt estimates: SEA

Industry pegs output at 10 mt against 13.83 mt forecast by Centre

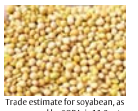
OUR BUREAU
Mangaluru, May 23

The Solvent Extractors' Association (SEA) of India feels that the soyabean crop is likely to be lower at 10 million tonnes (mt) against the government's estimate of 13.83 mt during the current season to June.

Atul Chaturvedi, President, SEA, in his monthly letter to members, said the Union Ministry of Agriculture and Farmers Welfare's third advance estimate for major crops had estimated the oilseeds output at 38.5 mt. It was at 35.95 mt last year.

Stating that these are good tidings, he hoped that oilseed production would continue growing in the coming years. According to the government estimate, the soyabean crop is at 13.83 mt, and the rapeseed seed crop at 11.75 mt.

The trade estimate for soyabean, as announced by SOPA, is 11.9 mt, he said, adding: "But many industry players believe the soyabean crop is much lower at 10 mt as they do not see the pressure of market-arrivals even at the current high price of soyabean."



Trade estimate for soyabean, as announced by SOPA, is 11.9 mt

Crop diversification

Stressing the need for crop diversification, he said the MSP-driven wheat and rice production in Punjab and Haryana has assured a ready market and reasonable returns to the farmers. But this has created huge anomalies and demand-supply mismatch. Mountains of wheat and rice are challenging the country's storage infrastructure.

Urging the need to divert some land in Punjab from wheat/rice cycle to sunflower, maize in kharif season, and to rapeseed/mustard in rabi season, he said: "We have to ensure farmers are suitably incentivised by ensuring better returns and assured market. If we can convince farmers in these north Indian States; "Yellow Revolution" can become a reality."

In this regard, SEA would establish model farms in two districts of Punjab during rabi season to show that crop diversification to rape-mustard seed can be more remunerative than wheat.

On inflation, he said, India's high dependence on imported fuel and edible oil are the primary reason. No country can have fuel security when it depends on to the extent of 85 per cent of its need. Edible oil security is also seriously compromised, with 65 per cent dependence on imports.

Mentioning that there are no quick-fix solutions to combat imported inflation that has been fuelled by easy monetary policies and geo-political issues plaguing the world, he said high prices have resulted in demand destruction to some extent which should help in bringing some sanity back in the markets.

The message of the Prime Minister for working towards aatmanirbharta in fuel and edible oils is now being acted upon in all seriousness by the concerned ministries. The thrust on biofuels, more particularly ethanol, and implementation of National Mission on Oilseeds should go a long way in reducing India's dependence on the world, he said.

MangoPoint gets licence to export to Europe, other countries

First consignment reaches Frankfurt

OUR BUREAU
Chennai, May 23

Chennai-headquartered MangoPoint, a company focused on preserving and promoting high-quality mangoes and mango-based products, announced on Monday that it has acquired rights to export mangoes to Europe.

The company also said it has completed its first consignment in the 2022 season to Germany successfully.

MangoPoint provides a sustainable integrated value chain for mangoes with single-origin, carbide-free, chemical-free, high-quality fresh mangoes and processed mango products through sustainable farming, processing and packaging.

The mangoes have also been exported to the US

Necessary certification

MangoPoint claims that it is the first company in Tamil Nadu to acquire certifications to export fresh mangoes to Europe and other countries. The company said the certifications were approved by the Department of Horticulture, which inspected the farms for good agricultural practices in the orchard, and the National Plant Protection Organisation (NPPO) and Agricultural and Processed Food Products Export Development Authority (APEDA), which inspected the MangoPoint Integrated pack-house facility to approve the preparing, assembling and packing procedures.

"NPPO and APEDA require pack-houses to follow stringent guidelines to meet standard procedures of quality check for export trade of goods to the international market," it added. The company said, MangoPoint's integrated pack-house consists of hot water treatment to sterilise the fruit flies inside the mangoes, mandatory for export to Europe. MangoPoint also sends mangoes to Bengaluru, where they are sent for the irradiation process, mandatory for export to the US.

Bet short on MCX aluminium

COMMODITY CALL

AKHIL NALLAMUTHU
B. Research Bureau

The aluminium futures on the MCX at ₹248 bounced off a key support at ₹225 last week, in line with our expectation. However, the overall trend is still bearish and a decisive breakout of ₹260 can probably change the near-term outlook positive.

Also, note that ₹252 is a resistance and there is a good chance for the contract to resume the downward movement anywhere within the price band of ₹252-260. Should it start falling again as we forecast, it could invalidate the support at ₹225 this time and the contract could even drop towards the crucial level of ₹200. But this is a strong support where it is highly likely that aluminium futures could establish a fresh medium-term uptrend. Given that the probability of fall from the price band of ₹252-260 is high, we suggest traders can consider initiating fresh short positions.

Currently the contract is at around ₹248. Wait for it appreciate to ₹252 and then go short. Initial stop-loss can be placed at ₹268. Once the price drops below ₹225, revise the stop-loss down to ₹245. Further, tighten it to ₹230 when futures drop below ₹200. Liquidate all the shorts at ₹205. Thereafter, fresh trades can be decided based on how the contract reacts to the support at ₹200.

Activated carbon shipments glitter as coconut product exports top ₹3,000 cr

Products helped by surge in gold prices, opening up of mines

V SAJEEV KUMAR
Kochi, May 23

India's coconut and product exports exceeded the ₹3,000 crore mark in the 2021-22 fiscal — up 40 per cent — riding on the comfort of increased shipments of activated carbon. The export figure in 2020-21 was ₹2,295 crore.

Official sources said that 65 per cent of the total exports constituted activated carbon, with the US continuing to be the leading destination with ₹400 crore followed by Germany, Russia, Korea, Netherlands, Belgium, Canada and South Africa. India exported 1.25 lakh tonnes of activated carbon till February. However, the official figures on the exact quantity and value of exports of all coconut products for 2021-22 are yet to be officially announced by the Coconut Development Board.

The global market for activated carbon is likely to touch $4.50 billion in 2028 at a CAGR of 5.4%

Rising acceptance

Joshy Joseph, Director, IndCarb Activated Carbon, Palakkad, said the surge in gold prices and the opening up of gold mines worldwide has facilitated a booming business for activated carbon, a medium used for gold extraction and purification. It is also used to purify air and water due to its high absorption potential for a wide variety of molecules ranging from odorous compounds to carcinogenic impurities. The global market for activated carbon is estimated to touch $4.50 billion in 2028 at a CAGR of 5.4 per cent, with the market returning to the pre-pandemic levels. The activated carbon from India is getting more acceptance in the global markets than the products of other coconut-producing countries such as the Philippines, Indonesia and Sri Lanka, he said.

Besides, the surging business of activated carbon has helped coconut farmers to earn revenue from coconut shells, India's desiccated coconut powder, coconut oil, raw nuts, copra etc. are also having more takers in the export market, especially in West Asian countries.

India will take 4 years to become self-sufficient in bamboo: Zed Black

OUR BUREAU
Chennai, May 23

India will take at least 4-5 years to attain self-sufficiency in bamboo production to meet the needs of the domestic industry, particularly incense (*agarbatti*) sticks manufacturers, says a top official of a leading incense stick brand.

"The National Bamboo Mission was launched only a couple of years ago and it was in 2019 that the Centre encouraged domestic planting of bamboo to make up for the imports. It will take 4-5 years for bamboo plants to grow and achieve self-sufficiency," said Ankit Agrawal, Director, Mysore Deep Perfumery House (MDPH).

MDPH — which is among the top three incense stick manufacturers in the country — markets its products under the brand name Zed Black across the country. Former Indian cricket team captian MS Dhoni and Bollywood actor Hrithik Roshan are its brand ambassadors.

Ankit Agarwal, Director, MDPH

Lack of options

"Currently, 5,000-6,000 tonnes of bamboo are imported every month, while domestic production is hardly 100 tonnes. Our company's demand for bamboo is 200-300 tonnes a month. We continue to import as there are no other options," he said.

MDPH sources bamboo locally to some extent from Assam and Tripura, taking advantage of the bamboo with a paste of charcoal, joss powder (made by crushing the bark of *litsea glutinosa* tree) and sawdust mixed with water in a machine.

Backward integration

"After 2019 when the Centre announced its policy to discourage bamboo imports, we have begun backward integration to produce our own raw incense sticks," Agrawal said.

MDPH had initially sourced the raw incense sticks till 2009-10 before beginning to import bamboo from Vietnam as raw material availability became a problem. Once the Centre took steps to promote bamboo cultivation, it began to buy bamboo locally to encourage domestic production.

On December 26, 2017, the Centre declassified bamboo as a tree and changed its status to grass. It also amended the 1927 Indian Forest Act and deregulated the bamboo trade, which was earlier regulated by State's forest departments.

Modernised units in M.P.

As part of its backward integration, MDPH has been investing in setting up modern manufacturing units near Indore in Madhya Pradesh. It has come up with two new manufacturing units, one at Rampipliya and another at Kshipra village, both near Indore. The greenfield units have added an additional manufacturing space of 5.3 lakh sq ft to the firm's 7 lakh sq ft area.

The Ram Pipliya unit of 3.5 lakh sq ft is the world's largest raw *agarbatti* manufacturing unit. The Kshipra unit has a manufacturing space of 1.8 lakh sq ft. Both plants will help MDPH which employs about 4,000 people with 80 per of it being women, generate 2,000 additional employment opportunities.

Agrawal said the new units will support expansion plans of Zed Black, which is exported to over 40 countries including the US, Australia, Brazil and Chile, and will cater to changing preferences of Indian consumers.

AgroStar opens agriculture advisory centre in Pune

OUR BUREAU
Pune, May 23

AgroStar, a digital farmer network and an end-to-end solutions provider for farmers, opened an agri advisory centre and a quality assurance lab for seeds and fertilisers at its headquarters in Pune.

The agri advisory centre and quality lab were inaugurated by the State Agriculture Commissioner Dheeraj Kumar.

The statement issued by the company said the AgroStar Quality Assurance Lab (AQAL), is part of the research and development efforts and innovation to ensure farmers get the best quality inputs through its platform. The lab is equipped with advanced equipment to conduct seed and fertiliser testing as per ISTA (International Seed Testing Association) protocols and standards. It is operated by a team of highly qualified professionals, including seed technologists, seed analysts, quality control professionals and chemistry quality analysts.

AQAL will carry out tests like physical purity test, moisture test, standard germination test, maintenance of relative humidity, temperature and time to time monitoring of germination samples.

Kotak Bank acquires agri, healthcare equipment financing portfolio of DLL

'Acquired portfolio will be transitioned in a planned manner over next few months'

SURABHI
Mumbai, July 8

Kotak Mahindra Bank has acquired the agri and healthcare equipment financing portfolio of De Lage Landen Financial Services India (DLL India), a subsidiary of Rabobank-owned De Lage Landen International.

"The operations of DLL India's acquired portfolio will be transitioned to Kotak Mahindra Bank in a planned manner over the next few months," said the bank in a statement, adding that until the transition, the portfolio will continue to be managed by DLL India. It did not disclose the value of the transaction.

The acquisition will help Kotak gain access to over 25,000 customers with a total standard loan outstanding of around ₹582 crore, and a non-performing assets portfolio with a total loan outstanding of around ₹69 crore.

"Kotak Mahindra Bank's acquisition of DLL India's agri and healthcare equipment portfolio reiterates our continued commitment towards a strong presence in this space, and gives us access to a high-quality customer base," said D Kannan, Group President – Commercial Banking, Kotak Mahindra Bank.

The acquisition will help Kotak gain access to over 25,000 customers with a standard loan outstanding of around ₹582 cr

Specialised units

The private sector lender's commercial banking business focusses on meeting the banking and financial needs of customer segments beyond metro and urban centres, with specialised units offering financial solutions for commercial vehicles, construction equipment, tractor and agriculture sector, said the statement.

Abhishek Mudgal, Country Manager, DLL India, said: "In the last nine years of operations in India, we have established an excellent customer base in India.

"We are glad that we are transferring our outstanding portfolio and customer base in India to Kotak Mahindra Bank."

New tech add-ons to motor own damage cover can bring down premiums: Experts

G NAGA SRIDHAR
Hyderabad, July 8

The provision for technology-driven add-ons in motor Own Damage (OD) insurance can lead to better customisation of policies and lower premiums, according to industry experts.

In a significant move, the Insurance Regulatory and Development Authority of India (IRDAI) has permitted general insurers to introduce tech-enabled concepts of 'pay as you drive', 'pay how you drive', and the floater policy for vehicles belonging to the same individual. These would be provided for two-wheelers and private cars as add-ons to the basic policy of motor OD, which, according to Rakesh Jain, CEO of Reliance General Insurance, is a win-win situation created by the IRDAI.

"We, at Reliance General Insurance, introduced similar concepts of Usage and Behaviour-based motor insurance offerings through sandbox products last year. Such models are cost-effective, futuristic and endorse good driving behaviour," he said.

The OD policy coverage, determined as per an individual's tailored coverage, can be based on a customer's driving behaviour patterns, general upkeep, mileage and vehicle usage patterns to offer the best features they need.

"This will do away with the 'standard premium for all' practice and enable customers to avail a premium as per their usage, consumption and other requirements," Jain added.

Changing lifestyles

The decision of the regulator in permitting new add-ons is in line with the changing nature of work and lifestyles in recent years. "It is a welcome move by the regulator, especially at a time when the pandemic has changed the way we work and travel, these add-on covers will definitely appeal to customers who are often working from home, thus making car insurance cost effective for them. Further, this will give lower-mileage drivers more transparency and control over their auto insurance," said Udayan Joshi, President - Underwriting & Reinsurance, Liberty General Insurance.

"Liberty General Insurance has the product concept of 'pay as you drive' under the regulatory sandbox, and is 'excited' about the opportunity given by the IRDAI," he said, adding: "The introduction of add-on covers will act as a catalyst in deepening the penetration of insurance in the country."

"Concepts such as 'pay as you drive' and 'pay how you drive' in motor insurance are quite popular in other markets, although they are yet to take off in a big way in our country," said Subramanyam Brahmajosyula, Head-Underwriting and Reinsurance, SBI General Insurance.

"With the regulator taking a proactive step in encouraging insurance companies to file these add-ons, customers will stand to benefit since it will bring in an element of customisation and flexibility to motor insurance, together with the possibility of lower premiums," he added.

ManipalCigna Health eyes 30% growth

Need for health cover moving from priority to a necessity, says CEO

SURABHI
Mumbai, July 8

Standalone health insurer ManipalCigna Health Insurance continues to remain bullish about growth prospects, and believes the demand for health insurance will not dim with the easing of the Covid-19 pandemic.

"The consumer mindset has changed. Health insurance is moving from a priority to a necessity," said Prasun Sikdar, Managing Director and CEO, ManipalCigna Health Insurance.

"The hope is that given the backdrop of the Covid-19 pandemic and regulatory and government measures, the health insurance industry will continue to grow well. The insurer reported a growth of 30.53 per cent in gross premium underwritten in FY22 to ₹986.18 crore from ₹755.49 crore in FY21. Its gross premium underwritten for the first two months of the current fiscal year grew by 34.26 per cent on a year-on-year basis.

Prasun Sikdar, MD and CEO of ManipalCigna Health Insurance

Sikdar noted that the insurer has a multi-product and a multi-channel distribution model.

"We have created our processes and products to suit digital distribution. Some of the products that we have are flexible enough to ensure that it can provide a sachet kind of insurance for only eyes or dental," he said, adding that the company is working on product and technology innovation in order to partner with digital players for distribution.

over the next couple of years," he said.

Growth momentum

The insurer hopes to continue its growth momentum, and believes it can grow at 30 per cent to 31 per cent in the current fiscal as

CUB, Shriram General Insurance in corporate agency deal

Bank to distribute the insurer's products through 727 branches

OUR BUREAU
Chennai, July 8

City Union Bank (CUB) and Shriram General Insurance, on Friday, signed a corporate agency agreement, wherein the bank will distribute the latter's insurance products through its network of 727 branches across the country.

Under this agreement, Shriram General Insurance will offer personal lines of insurance products such as motor, personal accident, home and travel, along with commercial lines of insurance products such as property, marine and engineering insurance to the bank's customers.

The agreement will help deliver enhanced customer experience by leveraging technology and augmenting the services distributed by the bank, says a release. N Kamakodi, MD & CEO, City Union Bank, told newspersons: "We are of firm belief that this partnership will certainly bring the best of non-life insurance products to our customers."

(from left) S Subhasri, CFO, Shriram Capital; Anil Kumar Aggarwal, MD and CEO, Shriram General Insurance; and N Kamakodi, MD & CEO, CUB, announce the tie-up, in Chennai, on Friday BIJOY GHOSH

IRDAI directive

The Insurance Regulatory and Development Authority (IRDAI) has permitted banks to have tie-ups with three companies each for general insurance, life insurance and health insurance. The bank has now entered in to a tie-up with Shriram Insurance.

Originally, the bank had a tie-up with broking firm, Bharat Re Insurance Brokers (of Shriram Group), to deal with customers and ascertain the risks and claim settlement. However, this is not there anymore. The bank has a tie-up with LIC for life insurance and with Start Health for health insurance.

For general insurance, the bank has now joined hands with Shriram General Insurance, and soon will sign an agreement with Royal Sundaram. For life insurance, along with LIC, the bank will have two more tie-ups — Bajaj and Tata AIG. For health insurance, the bank will have tie-ups with Aditya Birla and Care Insurance.

Of these six tie-ups, four are being signed today and on Monday, and the other two before the month-end, he said.

Anil Kumar Aggarwal, MD & CEO, Shriram General Insurance, said this is a strong relationship with the bank for the future. "Through this tie-up, we will provide the best services to the customers of CUB. By leveraging technology, we will ensure digital, instant, and seamless insurance experience to the bank's urban as well as rural customers," he added.

"Whatever we have done in Shriram General Insurance for small operators, where turnaround time for the claims settlement has reduced to 24 days from one-half-years a decade back, we will replicate the same thing in CUB. It is a win-win situation for both organisations," he said. "By using technology, we want to further reduce the claims settlement to around 20 days," he added.

Buy Now Pay Later products have costs similar to credit cards: Dvara Research

'Many of them also do not have enough safeguards for consumer protection'

SURABHI
Mumbai, July 8

'Buy Now Pay Later' products, which are growing in popularity, have monetary costs similar to those of credit cards, and many of them do not have sufficient safeguards for consumer protection, according to a new research.

"Our findings suggest that customers using BNPL incur monetary costs comparable to costs of using credit cards, and are susceptible to adverse risks emerging from gaps in customer protection," said a recent report by Dvara Research.

Authored by Madhu Srinivas and Srikara Prasad, the report said customers incur different costs that materialise before and after defaulting on BNPL repayments, with APR, or annual percentage rate, between 0 per cent and 36 per cent.

"...we caveat this by saying that a more thorough examination of actual costs based on customers' usage of BNPL products and credit cards over time is warranted," it further said.

The report, titled 'The Cost of Using BNPL Products', studied 10 BNPL providers, including Ola Money Postpaid, Amazon Pay Later, PayTM Postpaid, LazyPay, Unicard, FlexMoney, Zestmoney, Slice, Simpl and Kissht.

RBI scrutiny

The findings come at a time when there is increasing popularity of BNPL products, along with greater scrutiny of digital lending practices by the Reserve Bank of India. The report also highlighted that BNPL providers' terms and conditions are misaligned with key customer protection regulations, contravening key conduct obligations.

Customers are at risk of unknowingly incurring debt, borrowing credit that is unsuitable for them, and being subject to aggressive debt collection practices, it said.

For instance, while most BNPL providers provided a Key Facts Statement (KFS), some do not do so. In some cases where KFS was provided, the KFS omitted key details such as pricing, customer obligations and penalties.

RBI slaps ₹5.72-cr penalty on Federal Bank

Also imposes ₹70 lakh fine on BoI, ₹7.60 lakh on Dhani Loans

OUR BUREAU
Mumbai, July 8

Reserve Bank of India (RBI) has imposed monetary penalties on Federal Bank (₹5.72 crore), Bank of India (₹70 lakh) and Dhani Loans and Services (₹7.60 lakh).

The central bank said it imposed monetary penalty on Federal Bank for non-compliance with the provisions of 'Reserve Bank of India (Financial Services provided by Banks) Directions, 2016,'

The RBI noted its inspection findings (with reference to the bank's financial position as on March 31, 2020) revealed, inter alia, non-compliance with the aforesaid directions to the extent the private sector bank failed to ensure that no incentive (cash or non-cash) was paid to its staff engaged in insurance broking/ corporate agency services by the insurance company. In furtherance to the same, a notice was issued to the bank, advising it to show cause as to why penalty should not be imposed on it for failure to comply with the said directions.

"After considering the bank's reply to the notice and oral submissions made in the personal hearing, the RBI came to the conclusion that the aforesaid charge of non-compliance with the aforesaid RBI directions was substantiated and warranted imposition of monetary penalty, to the extent of non-compliance with such directions," per the statement.

Bank of India

The RBI imposed monetary penalty on BoI for non-compliance with certain provisions of the 'Reserve Bank of India – (Know Your Customer) Direction, 2016' and circular instructions on 'Compliance Function in Banks.'

The central bank observed that its inspection findings (with reference to the bank's financial position as on as on March 31, 2019) revealed, inter alia, non-compliance with the aforesaid directions to the extent the bank failed to allot Unique Customer Identification Code to a large number of customers, and failed to complete the process even within extended timelines.

In furtherance to the same, a notice was issued to the public sector bank advising it to show cause as to why penalty should not be imposed on it for failure to comply with the said directions.

After considering the bank's reply to the notice and oral submissions made in the personal hearing, the RBI came to the conclusion that the charge of non-compliance with the aforesaid directions was substantiated and warranted imposition of monetary penalty, to the extent of non-compliance with such directions, according to the central bank.

Dhani Loans and Services

The central bank said it imposed monetary penalty on Dhani Loans and Services Limited, Gurugram, for non-compliance with the 'Reserve Bank of India (Know Your Customer) Directions, 2016.'

Payment aggregator licence: RBI nod for PineLabs, Stripe, 1Pay and Razorpay

OUR BUREAU
Mumbai, July 8

A number of payment players, including Razorpay, PineLabs, Stripe and 1Pay, are understood to have received in-principle approval from the RBI for payment aggregator licences.

According to sources, a few more companies are likely to get approval in the coming days.

The RBI had, in 2020, issued guidelines on regulation of payment aggregators and payment gateways, under which non-bank PAs would require the central bank's authorisation under the Payment and Settlement Systems Act, 2007.

Such entities had to apply for authorisation, but the RBI had permitted them to continue their operations till they receive communication regarding their application.

A number of companies had applied for these licences.

Forex reserves shrink to $588 b

OUR BUREAU
Mumbai, July 8

India's foreign exchange reserves shrank by a whopping $5 billion to stand at $588.314 billion in the week ended July 1, 2022.

The dip in reserves comes in the backdrop of the Reserve Bank of India's intervention in the forex market to curb depreciation of the rupee against the dollar.

The last time the reserves were around the $588 billion level was in the week ended April 30, 2021.

The dip in reserves in the reporting week came mainly on the back of foreign currency assets declining by $4.471 billion.

FCA comprises multi-currency assets that are held in multi-asset portfolios (investment in securities, deposits with other central banks & BIS, and deposits with commercial banks overseas).

Of the other three components of the reserves, two declined: gold (by $504 million) and special drawing rights ($77 million).

UBI's 'Metaverse Virtual Lounge'

OUR BUREAU
Mumbai, July 8

Union Bank of India has launched the Metaverse Virtual Lounge, 'Uni-verse', and Open Banking Sandbox environment.

Uni-verse will host the bank's product information and videos in the initial phase, according to the public sector bank's statement.

With Uni-verse, customers can roam around the lounge, get information on the bank's deposits, loans, government welfare schemes, and digital initiatives, among others, similar to the real-world scenario, said the bank.

NOTICE

Notice is hereby given to the shareholders of the Company pursuant to Rule 6 of the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 as under:
In accordance with Section 124(6) of the Companies Act, 2013 read with amended provisions of Rule 6 of the Investor Education and Protection Fund (Accounting, Audit, Transfer and Refund) Rules, 2016, effective from September 07, 2016, all the shares in respect of which the dividend has not been claimed / paid for 7 consecutive years or more are liable to be transferred to the IEPF account. Hence, the shareholders may note that all the shares in respect of which the dividend has not been claimed / paid for 7 consecutive years since the FY 2014-15 are liable to be transferred to the Investor Education and Protection Fund Authority (IEPFA) account as per the said rules.
The Company has sent individual notices on 07.07.2022 through registered post to the concerned shareholders whose dividends are lying unclaimed / unpaid since 2014-15, advising them to claim their dividend amounts expeditiously.
The statement containing the details of name, address, folio number / demat account number and number of shares liable for transfer to IEPF account is made available in our website www.lambodharatextiles.com for necessary action by the shareholders.
The concerned shareholders, holding shares in physical form and whose shares are liable to be transferred to IEPF account, may note that the company would be issuing duplicate share certificate in lieu of original share certificate held by them for the purpose of transfer of shares to the IEPF account as per the rules and upon such issue, the original certificates which are registered in their name will stand automatically cancelled and to be deemed non-negotiable.
The shareholders are requested to contact M/s. S.K.D.C. Consultants Limited, Surya 35, Mayflower Avenue, Behind Senthil Nagar, Sowripalayam Road, Coimbatore - 641028, Registrar & Share Transfer Agent to claim their dividend(s) which is lying unclaimed / unpaid since 2014-15. In case, the Company does not receive any valid communication from the concerned shareholders within three months from the date of this notice, the Company shall transfer such shares to the IEPF account as per the rules.
The shareholders may note that they can claim back both the unclaimed dividend and the shares including all benefits accruing on such shares, if any, by making separate application to the IEPF Authority, in the prescribed Form IEPF-5, as stipulated under the said Rules and the same is available at IEPF website i.e., www.iepf.gov.in
For any further queries / clarification on the above subject matter, the shareholders may contact M/s. S.K.D.C. Consultants Limited, Registrar & Share Transfer Agent of the Company at Surya 35, Mayflower Avenue, Behind Senthil Nagar, Sowripalayam Road, Coimbatore - 641028, Phone: +91 422 4958995 / 2539835-836 | Fax: +91 422 2539837, Email: info@skdc-consultants.com.

NOTICE TO THE MEMBERS OF THE COMPANY FOR THE 28TH ANNUAL GENERAL MEETING

Dear Members,

1. Notice is hereby given that the 28th Annual General Meeting ('28th AGM') of Inditrade Capital Limited ('the Company') will be held on **Tuesday, 2nd August, 2022 at 10.30 A.M.** (IST) through Video Conferencing ('VC')/Other Audio Visual Means ('OAVM') in compliance with all the applicable provisions of the Companies Act, 2013 ('the Act') and the Rules made thereunder and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 read with the Ministry of Corporate Affairs ('MCA') General Circular dated 5th May, 2022 and SEBI Circular dated 13th May, 2022 and other relevant circulars previously issued by the MCA/SEBI, to transact the businesses set out in the Notice calling the 28th AGM.
2. In compliance with the aforesaid circulars, the Notice of the 28th AGM along with the Annual Report of the Company for the financial year 2021-22 is being sent only through electronic mode to all those **Members, whose e-mail addresses are registered with the Company's Registrar and Share Transfer Agent ('RTA') or Depository Participants (DPs). Members can attend and participate in the 28th AGM through the VC/OAVM facility ONLY.** The detailed instructions with respect to such participation and the remote electronic voting/e–voting system during the 28th AGM will be provided in the Notice convening the 28th AGM. The attendance of the Members attending the 28th AGM through VC/OAVM will be counted for the purpose of quorum under Section 103 of the Act.The Notice of the 28th AGM and the Annual Report will also be made available on the website of the Company i.e., www.inditrade.com and on the website of BSE Limited i.e., www.bseindia.com and Central Depository Services (India) Limited (CDSL) website i.e., www.evotingindia.com.
3. Members whose e-mail addresses are not registered with the RTA/DPs can register the same for obtaining login credentials for e-voting for the resolutions proposed in this Notice in the following manner:
   - **For Members holding shares in physical mode-**Please provide necessary details like Folio No., Name of the shareholder(s), scanned copy of the share certificate(s) (front and back), self-attested scanned copy of PAN card and Aadhar Card by e-mail to maya.menon@inditrade.com.
   - **For Members holding shares in Demat mode-**Please update your e-mail address and mobile no. with your respective DP at the earliest. This is mandatory while e-voting and joining virtual meetings through the Depository.

The above information is being issued for the benefit of all the Members of the Company and in compliance with the relevant circulars issued by MCA and SEBI.

By order of the Board

Subject: Re: Service Life(LCCA) of CT Fills & Drift Eliminator

[EXTERNAL sender, Exercise caution..!]

Dear Sir

It refers to the trailing email. In continuation with the same please find below our confirmation.

Ideally the useful working life of MM AQUA fills are about 8 years for optimum performance. However as is the case with all fills it depends upon deterioration of fill conditions due to other factors and parameters like

1. Weight Gain of the Fills which is directly related to TSS and Bacteria count in the recirculating water. Higher the weight gain faster the deterioration, performance and life of fills.
2. Handling of fills during routine maintenance work like change of nozzles and change or rearrangement of Drift Eliminators.
3. Covering of fill areas during gearbox and fan maintenance as any oil or grease leakage to the fill will create most suitable zone for clogging.
4. Operation of Cells, if cells are closed and operated intermittently then moisture remains in the fill and clogging rate is drastically increased. So ideally the fan should be operated dry for some time before closing so that all moisture is more or less removed.
5. Broken or dislodged nozzles, the huge continuous force of the water where nozzles are fallen can damage fills.
6. Poor distribution - areas of low water distribution can cause increased rate of clogging.

So, the actual life of fill will depend on all above parameters and will vary from plant to plant.

Thanks & regards,

Subrata Malakar

Terms & Conditions:-
1) Delivery: - Within 20 weeks after receipt of confirmed order.
2) Rate: - F.O.R. destination.
3) GST :- Extra IGST @18%.
4) HSN Code:- 40101290
5)**GST No. :- 23AADCK1959L1ZC**
6) Payment: - Within 30 days from the date of receipt of material at your end and the submission of bill.
7) Warrantee:- 12 months from date of fitment or 18 months from the date of supply ,whichever is earlier.Any deficiency due to faulty workmanship will be rectified / replaced.
8) Belt Life :- For coal, the expected life for the belt may be minimum 5 years.
9) Transit Insurance in your scope.
10) Tolerance in length: As per IS1891 tolerance is +2% ,-0.5%.
11) Validity:-15 Days from the date of offer.

We hope you will find our offer in line with your requirement and favour us with your valued order.

Thanking you,

Yours faithfully,
For **KRISHNA BELTS PVT. LTD.**

Dear Sir,

Sub.: Report on Health Survey of Battery Banks.

This has reference to your E-mail dtd.8th April'23 and visit of our representative to your plant on 14th April'23 in connection to the above job.

Our Observations are as under:

(1) Battery Type : 108LMLA-T-2000HDP

Location: 220V Stn. Battery Bank-1 (U#1).
Yr. of Installation: 2009.
Condition of the Battery Bank:
(a) Majority of cells in Service have bulged.
(b) Crack on sealing compound was noticed in 80%.
(c) 03 nos. are in deep discharged condition (Sl. No.39,45 & 60) and Cell Voltages are low in 14 nos. under Float Condition(Sl.No.22,26,37,53,54,57,58,63, 67, 68,81,83,86 & 93)
Recommendation: Battery Bank is completing its Service Life. You may plan for replacement of the battery bank with a new battery bank.

(2) Battery Type : 108LMLA-T-2000HDP

Location: 220V Stn. Battery Bank-2 (U#1).
Yr. of Installation: 2009.
Condition of the Battery Bank:
(a) Majority of cells in Service have bulged.
(b) Crack on sealing compound was noticed in 80%.
(c) Cell No.34 is lagging and Voltage of 11 nos. are low under Float Condition (Sl. No.: 1,5,19,20,22,41,43,48,54,65,80).
Recommendation: Battery Bank is completing its Service Life. You may plan for replacement of the battery bank with a new battery bank.

…….contd.

(3) Battery Type : 108LMLA-T-2000HDP
Location: 220V Stn.Battery Bank-1(U#2)
Yr. of Installation: 2009.

Condition of the Battery Bank:

(a) Majority of cells in Service have bulged.
(b) Crack on sealing compound was noticed in 80%.
(c) Cell No.40 is lagging and Cell Voltages under Float condition are inconsistent and Voltage of 06 nos. are low under Float Condition (Sl. No.: 22, 39,49,50,53 & 64).

Recommendation: Battery Bank is completing its Service Life. You may plan for replacement of the battery bank with a new battery bank.

(4) Battery Type : 108LMLA-T-2000HDP
Location: 220V Stn. Battery Bank-2 (U#2).
Yr. of Installation: 2009.
Condition of the Battery Bank:

(a) Majority of cells in Service have bulged.
(b) Crack on sealing compound was noticed in 80%.
(c) Crack noticed on the container of Cell No.54.
(d) Cell No.84 & +93 are in deep discharged state due to internal Short circuit.
(e) 17 nos. are lagging by voltage(Sl. No.: 20,34,35,38,44,45,52,53,60,61,62,65,67,74 76,104& 108)
(f) Sp. Gr. is low in 20 Nos.(7,11,20,34,35,38,44,45,52,53,60,61,62,65,67,74,76,90, 104 & 106)

Recommendation: Battery Bank is completing its Service Life. Present condition of the Battery Bank is not satisfactory. You may plan for replacement of the battery bank with a new battery bank.

A record of the Voltage and Specific Gravity of all Cells in Service measured and recorded during Survey is attached for your ready reference.

Yours faithfully
For Exide Industries Limited

J. L. Pradhan
Zonal Service In charge –Indl. (P&P-East)

9.6 LIFE EXPECTANCY OF VACUUM INTERRUPTER :

The vacuum interrupters used may not need replacement for the expected service life of circuit breaker. However, the vacuum interrupter may require replacement on applications with high frequency of operations. The life expectancy (Number of make-break operation) of interrupters is a function of breaking current. It is generally as high as 20,000 for switching at rated current and 100 for switching rated at max fault current. As it is not feasible to ascertain the fault current switched, the guideline for site staff to change the vacuum interrupter is provided by contact erosion mark. The permissible contact erosion is 3 mm for all interrupters and the interrupter must be changed after the erosion mark has reached the limit.

9.7 INSPECTION OF CONTACT EROSION :

A contact wear erosion mark (Red line/Stray mark) is painted on the stem of vacuum interrupter. The base of this mark is 3 mm outside the guide bush in breaker closed condition and this gap will gradually diminish with successive switching. The contact wear is still within permissible limit as long as this mark can be seen when the breaker contacts are closed.

9.8 CHANGE OF VACUUM INTERRUPTER :

Refer Fig.13. To change the vacuum interrupter following procedure shall be adopted.

1. Open and isolate the circuit breaker.
2. Disconnect AC/DC supply to motor and coils.
3. Discharge closing spring using manual push button (Green) and then trip the breaker using manual push button (Red).
4. Dismantle terminal calmp (77).
5. Disengage pin (78) from eyebolt after removing circlip.
6. Open top bolt (79) available in top pole head.
7. Do not change position of eye bolt of the interrupter..
8. Now dismantle vacuum interrupter.
9. Place old and new vacuum interrupter on flat surface and insert eyebolt in new interrupter matching the center. Now rotate the eye bolt of new interrupter till center of eye-bolt of both interrupter matches so that total distance "x" is maintained as original (14).

Maintenance - Lubrication

1 - Maintenance

The arc chutes and arcing contacts ensure :
*• 1500 closing cut-out operations at In**
*• 3 closing/cut-out operations at maximum short-circuit current**
*• 10 closing cut-out operations at 10 In**
All other components are designed to last as long as the breaker's normal service life (20,000 operations for the electrically-operated or manual operated breaker).
** In one of these cases : Remove the arc chutes and change the arcing contacts.*
Visual monitoring (every year) :
• cleanliness of the circuit breaker.
• cleanliness of grease (if the apparatus is exposed to dust)

2 - Revision

Inspection is to be performed every 3000 operations or 3 years (we recommend the intervention of the specialists in the service and verification for this revision).

A - Arc Chute

• wipe the insulating cover

B - Poles

• Fixed and Withdrawable Breakers

- remove dust from isolating parts
- check the gap on arcing contacts with the circuit-breaker closed.
• repeat the adjustment of fixed arcing contacts if the gap is greater than 1,5 mm.
• replace the arc barriers and the spark arresters if they are worn by more than 1 mm
• clean the surfaces of main contacts with fine-grain emery paper and wipe carefully.

• Removable Breakers

Clean the following parts with a cloth slightly dampened with carbon tetrachloride :
- the cluster contacts
- the studs for the cradle
Grease lightly

Poles Tightening :

The set of poles is maintained under pressure by six rams located on each flange of the circuit-breaker. Check the tightening torque.

C - Disconnection of Secondary Wiring

Clean the fixed and movable contacts with a cloth slightly dampened with carbon tetrachloride.
Check for contact pressure.
Grease lightly.

D - Overcurrent and Voltmetric Release

No maintenance.
In case of failure, replace the release.

3 - Lubrication

A - Components to be Lubricated
• all metal/metal friction surfaces must be kept greased.
• wipe off excess grease.
• grease characteristics : High Speed Grease 475HS mfd. by OKS Industries, Bangalore, India.

B - Components not to be lubricated
• current-threshold and voltmetric release.

[EXTERNAL sender, Exercise caution..!]

Dear Sir,

With reference to your mail, we all know the importance of the Tan Delta Test of Transformer. As you have informed that your Doble, USA make Tan Delta Test Kit Model: M4100 is around 9 years old and is being used extensively then we would like to inform you that Doble make equipment life is 9-10 years. Aging effect occurs in every Testing and Measuring equipment and after this, problems start appearing in them. The repair cost of Doble, USA make equipment are also on higher side because the new spare parts are imported from USA and it also takes a lot of time. So, we recommend you to purchase the new Tan Delta Kit to avoid this problem in future.
We can also offer you with buy back condition to purchase the new Tan Delta Test Kit of Doble make.

STAY SAFE, STAY HEALTHY

With Best Regards,

Product End-of-Life Notice

End-of-Sale and End-of-Life Announcement for the Cisco Catalyst 2960-S Series and 2960-SF Series Switches

EOL10043 - Amended

Cisco announces the end-of-sale and end-of-life Cisco Catalyst 2960-S Series and 2960-SF Series Switches. The last day to order the affected product(s) is November 6, 2015. Customers with active service contracts will continue to receive support from the Cisco Technical Assistance Center (TAC) as shown in Table 1 of the EoL bulletin. Table 1 describes the end-of-life milestones, definitions, and dates for the affected product(s). Table 2 lists the product part numbers affected by this announcement. For customers with active and paid service and support contracts, support will be available under the terms and conditions of customers' service contract.

Cisco will increase prices for these products following the End-of-Life announcement.

Table 1. End-of-Life Milestones and Dates for the Cisco Catalyst 2960-S Series and 2960-SF Series Switches

Milestone	Definition	Date
End-of-Life Announcement Date	The date the document that announces the end of sale and end of life of a product is distributed to the general public.	November 6, 2014
End-of-Sale Date	The last date to order the product through Cisco point-of-sale mechanisms. The product is no longer for sale after this date.	November 6, 2015
Last Ship Date: HW	The last-possible ship date that can be requested of Cisco and/or its contract manufacturers. Actual ship date is dependent on lead time.	February 4, 2016
End of SW Maintenance Releases Date: HW	The last date that Cisco Engineering may release any final software maintenance releases or bug fixes. After this date, Cisco Engineering will no longer develop, repair, maintain, or test the product software.	November 5, 2016
End of Vulnerability/Security Support Date: HW	The last date that Cisco Engineering may release a planned maintenance release or scheduled software remedy for a security vulnerability issue.	November 5, 2018
End of Routine Failure Analysis Date: HW	The last-possible date a routine failure analysis may be performed to determine the cause of hardware product failure or defect.	November 5, 2016
End of New Service Attachment Date: HW	For equipment and software that is not covered by a service-and-support contract, this is the last date to order a new service-and-support contract or add the equipment and/or software to an existing service-and-support contract.	November 5, 2016
End of Service Contract Renewal Date: HW	The last date to extend or renew a service contract for the product.	February 4, 2020
Last Date of Support: HW	The last date to receive applicable service and support for the product as entitled by active service contracts or by warranty terms and conditions. After this date, all support services for the product are unavailable, and the product becomes obsolete.	November 30, 2020

HW = Hardware OS SW = Operating System Software App. SW = Application Software

Product Migration Options

The Cisco Catalyst 2960-X Series provides a direct replacement for each Catalyst 2960-S Series Gigabit Ethernet model, at the same price. The Catalyst 2960-X provides better architecture, features, and performance than the 2960-S, doubling the feature set.

Customers for the Catalyst 2960-SF Fast Ethernet switches should also consider moving to the 2960-X switches, which provide the features of the Catalyst 2960-SF and more, including PoE Plus (PoE+), improved IPv6 performance, and optional StackWise stacking. The 2960-X PoE models have a premium of approximately 20 to 25 percent over the 2960-SF Series.

For more information about the Cisco Catalyst 2960-X Series Switches, visit http://www.cisco.com/c/en/us/products/switches/catalyst-2960-x-series-switches/index.html. Additional migration information and selling resources are available on the Catalyst Sales Enablement page, http://wwwin.cisco.com/tech/products/cat2k/.

Customers may be able to use the Cisco Technology Migration Program (TMP) where applicable to trade-in eligible products and receive credit toward the purchase of new Cisco equipment. For more information about Cisco TMP, customers should work with their Cisco Partner or Cisco account team. Cisco Partners can find additional TMP information on Partner Central at http://www.cisco.com/web/partners/incentives_and_promotions/tmp.html.

Customers may be able to continue to purchase Cisco Catalyst 2960-S Series and 2960-SF Series Switches the Cisco Certified Refurbished Equipment program. Refurbished units may be available in limited supply for sale in certain countries on a first-come, first-served basis until the Last Date of Support has been reached. For information about the Cisco Certified Refurbished Equipment program, go to: http://www.cisco.com/go/eos.

Service prices for Cisco products are subject to change after the product End of Sale date.

The Cisco Takeback and Recycle program helps businesses dispose properly of surplus products that have reached their end of useful life. The program is open to all business users of Cisco equipment and its associated brands and subsidiaries. For more information, go to: http://www.cisco.com/web/about/ac227/ac228/ac231/about_cisco_takeback_recycling.html.

CEA (Cyber Security in Power Sector) Guidelines, 2021

1.2 Government of India has set up the Indian Computer Emergency Response Team (CERT-In) for Early Warning and Response to cyber security incidents and to have collaboration at National and International level for information sharing on mitigation of cyber threats. CERT-In regularly issues advisories on safeguarding computer systems and publishes Security Guidelines which are widely circulated for compliances. All Central Government Ministries/ Departments and State/Union Territory Governments have been advised to conduct cyber security audit of their entire Cyber Infrastructure including websites at regular interval through CERT-In empanelled Auditors so as to identify gaps and appropriate corrective actions to be taken in cyber security practices. CERT-In extends supports to enable Responsible Entity in conducting cyber security mock drills and in assessment of their preparation to withstand cyber-attacks. The Responsible Entity must submit Reports of Cyber Audit of cyber security controls, architecture, vulnerability management, network security and periodic cyber security drills to sectoral CERT as well as CERT-In. Team of experts shall review these reports and shortcomings if any in the compliances shall be flagged by them. CERT-In on regular basis also conducts workshops and training programs to enhance Cyber awareness of all Stakeholders.

1.4 All Responsible Entities, Service Providers, Equipment Suppliers/Vendors and Consultants engaged in Power Sector are equally responsible for ensuring cyber security of the Indian Power Supply System. They are to act timely upon each threat intelligence, advisories and other inputs received from authenticated sources, for continuous improvement in their cyber security posture.

Article 7 Phasing out of Legacy System

a) As the life cycle of the Power System Equipment/System is longer than that of IT Systems deployed therein, the Responsible Entity shall ensure that all IT technologies in the Power System Equipment/System should have the ability to be upgraded.

b) The Responsible Entity shall ensure that the Information Security Division shall draw the list of all communicable equipments/systems nearing end life or are left without support from OEM. Thereafter CISO shall identify equipment/systems to be phased out from the list drawn, firm up their replacement plan and put up the replacement plan for approval before the Board of Directors.

c) The CISO shall ensure that till equipments/systems nearing end life or left without support from OEM are not replaced, their cyber security is hardened and ensured through additional controls provisioned in consultation with the OEM or alternate Supplier(s)*.

*e.g. Use of CDAC developed AppSamvid and whitelisting of applications installed may be explored across all legacy systems.

d) The Responsible Entity shall document in their Cyber Security Policy a Standard Operating Procedure for safe and secure disposal of outlived or legacy devices.

TATA POWER (MPL)

OT Assessment Report

Risk Rating Criteria

The risk rating is used to signify the level of risk due to gaps noted during the audit and is based on a qualitative criterion defined as follows:

Category of finding	Implication
Critical	High risk, requires immediate Senior Management attention.
Major	High risk, requires Senior Management attention.
Medium	Medium risk, requires corrective action.
Low	Low risk, with opportunities for improvement.

Project Timeline and Team

OT assessment timeline for Unit 1 as follows:

Assessment Start Date	Assessment End Date
24-01-2023	28-01-2023

OT assessment timeline for Unit 2 as follows:

Assessment Start Date	Assessment End Date
01-08-2023	03-08-2023

Following team member was involved in this assessment:

GT Security Team	Contact Information
Ujjwal Ranjan	M: +91 7739756835 E: ujjwal.ranjan@in.gt.com

Executive Summary

In this report, we provide an overview of current visibility and insight into your OT environment. We analyzed the network behavior of assets, provided asset visibility and machine learning. The amount of information obtainable is directly related to the amount of information within the traffic capture files. Using our hybrid threat detection, we were able to scan and provide real-time alerting for your OT environment using packet and Yara rules. Starting with asset visibility will begin the process of moving up the maturity curve in our OT environment. Analyzing the alerts can help clean up the environment and ensure assets are communicating and functioning in a proper secure manner. Visibility into the network and understanding how assets communicate will help provide a foundation for network segmentation.

This report contains the outcome of vulnerability assessment and pen testing performed at Maithon Power Limited.

Activities performed to conduct VAPT in OT environment at MPL are mentioned below:

1. Performed passive monitoring of network 16 and network 17 including backup switches.
2. Performed internal pen testing & external pen testing.
3. Carried out physical assessment of all the available workstations.

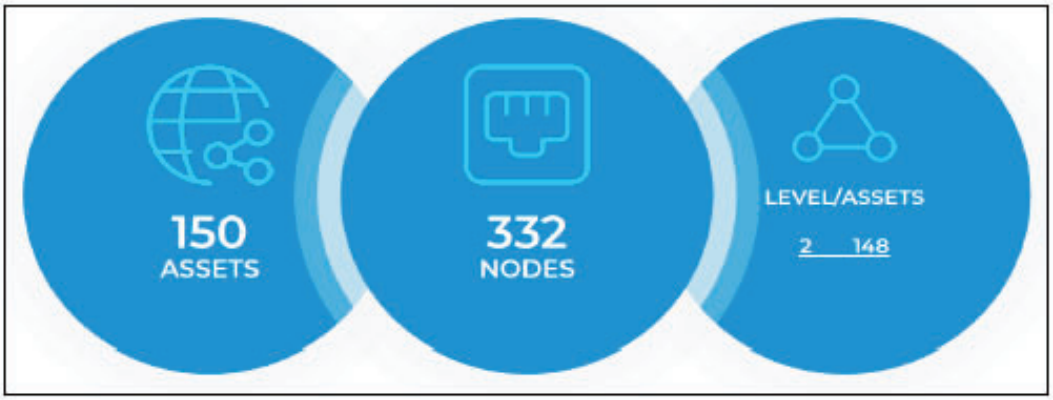
Unit 1

Asset Inventory

Discovered asset summary.

Summary of Network 16 is mentioned below.

Total number of assets discovered in network switch 16 including backup switch are 150.



Physical Assessment Observations

Observation Summary

Sl.No	Major Area	Description of Finding/Observation	Impact	Risk Rating	Recommendation
1	**Obsolete OS (Windows7 & Windows server 2008 R2)**	It was observed that the DCS is running on outdated OS that are Windows 7 and Windows server 2008 R2	An obsolete OS is no longer supported by the manufacturer, meaning that it no longer receives security updates, leaving it vulnerable to security breaches and attacks.	**Critical**	It is recommended to regularly update your operating system to avoid these issues and ensure optimal performance and security of the device. Immediate upgrade of OS is required since current control system are running on obsolete OS.
2	**Antivirus definition updates**	It was observed that most of the workstations and servers have similar status of Antivirus, where AV is installed however latest definition of AV is not updated. Note: **"Support of current antivirus installed in DCS workstations/servers is not available".**	Below are potential impacts of not having an antivirus: **Malware infections**: Without an antivirus program, the device is vulnerable to malware infections, which can cause data loss, system crashes, and other problems. Malware can also steal personal information, such as login	**Critical**	It is strongly recommended to upgrade the OS of DCS workstation/servers so that Antivirus support is available in the form latest AV definitions. It is also recommended to have a centralized AV manager so that AV definition can be updated regularly from it.

6	**Windows Patches updates**	It was observed that the systems which include workstation server, EWS, OWS are not updated with latest OS updates	Below are some potential impacts of not installing Windows patches: **Security vulnerabilities**: Not installing Windows patches can leave the device vulnerable to security threats, such as viruses, malware, and other types of attacks. This can result in data loss, system crashes, and other problems. **Reduced performance**: Over time, not installing Windows patches can result in reduced performance of the device. This can include slower load times for programs and applications, and overall sluggishness of the system. **Compatibility issues**: As software and hardware continue to advance, not installing Windows patches can lead to compatibility issues between the device and newer programs or devices. This can result in error messages or other problems when attempting to run certain software or hardware.	**High**	Create a policy and procedure inline to the OEM that OEM has to provide the validate patches as per patch management life cycle for OEM managed critical systems/ devices. Patch Manager needs to be integrated with DCS network so that workstations/server can be updated from centralized location and can be mapped with the OS update cycle .It is strongly recommended that you regularly install Windows patches and updates to ensure the device is protected from security threats, runs smoothly, and remains compatible with newer software and hardware.

Recommendations

- All unwanted ports & services running on the systems should be disabled. During this process, it is always good to check the effect on running SCADA system performance (with the help of SCADA vendor). System availability is more important in OT environment.
- Unused ports of network/OT devices such as switch should be disabled.
- Device control and application control policy for OT environment should be implemented.
- Upgradation of system OS should be conducted, and the systems should be on latest OS.
- Upgradation of Network Device Firmware should be carried out are regular intervals and should be on latest Firmware.
- Antivirus definitions and OS patch update rule should be defined and implemented.
- Monitor and implement security controls for the communication involving DCS systems (System PC and PLC) which are having the data flow between DCS systems and third-party sources / devices for security checks (with the support of vendor). This will add another layer of security in third party communication involving TCP/IP, OPC, Modbus, etc between DCS systems and third-party sources / devices.

As you are very much aware, HMI plays a crucial role in the control and monitoring of DCS in power plants and empowers the plant operators and engineers with critical data for better control, to make informed decisions, and thereby improved and reliable operation of the plant.

Microsoft has discontinued the product support for XP/Windows 7 operating system and disabled automatic security updates as no more security updates/virus definitions are available for that version. Hence the HMIs-max STATIONs are prone to vulnerabilities that can tamper with the operation of the plant.

The HMI systems presently in service at the site are quite old and outlived their service life. Some of these machines are slow in response and may hang quite frequently. Spares and services support for the old machines are restricted due to component obsolescence. The Workstations presently available in the market are with the latest Windows OS and these current machines are not one-to-one interchangeable with the existing old machines presently in use at these projects.

Our suggestion as advised by our field experts and engineering is highly recommended to upgrade the HMI-maxSTATIONs with the latest available hardware, and software with security features.

Yours faithfully,

(H Pavan Kumar)

Dear Shri Dhirendra,

Dear Sir,

With reference to your trailing email, we would like to convey that we are unable to manufacture the DPU-4F modules due to non-availability of components.

We can offer DPU-MR instead which will have to be replaced in pairs (i.e. both Primary & secondary). Kindly confirm with customer so that we can submit the offer.

Regards.

End of Sale Announcement for AP-10 Series Products

Dear Valued Partners,

Please be informed that we have decided to discontinue AP-10 series products.

This was due to the short supply or obsoleting many of the parts used with the products by sub-venders as the products have been in the market for a long time since around 1990.

The products/parts in question are as below;

1) AP-10A (Sampling card)
2) AP-10H (Housing)
3) AP-10Y (Junction box)

- AP-10B (Alarm contact input card) & AP-10C (Process data card) had already been obsolete for some time now.

We will stop taking orders for these on 31 Jan. 2016. EOS will be informed separately.

As a replacement, better functions and performances are available with DAQpod and VM-7B. Please start promoting and proposing DAQpod and VM-7B with analysis functions as from now on.

Should you have any questions, please let us know.

Yours faithfully,

.
Kind attn : **Mr. Prince Kumar Singh- Group Head-C&I Maintenance**
Subject : **Discontinuance notice for Genius Bus Controller and Path forward**

Thank you for the continued patronage over so many years. We understand that your esteemed organization has been using Emerson's (Formerly GE IP) automation technologies and solutions for various critical processes/applications.

GENIUS was the first intelligent, rugged, distributed I/O system for PLC systems. It was introduced in 1985 and was the first with extensive diagnostics and easy setup over a proprietary network. It quickly gained global acceptance in applications such as Oil & Gas, Metal, Power, Mining, Water, etc. Over the years we evolved our I/O offering bringing forward many of the GENIUS capabilities and marrying it with the latest technology and providing advanced functionality in more cost-efficient form factors. Controlling the I/O, the GENIUS Bus Controllers became the standard. Due to technological advances and obsolescence of various components, we declared Genius Bus Controller product family as mature on 1st January 2014. Genius Bus Controller parts are not available for sale anymore as this product has been moved to discontinued stage on 1st October 2017.

Our goal in evolving our technology is protect your investment – whether it is existing wiring, your application logic, etc. Emerson's Intelligent Platforms provides excellent upgrade path for your application to modern technology. We can convert your control, GENIUS LAN, and Genius I/O to multicore high-performance platform with an open protocol **Profinet** over high speed ethernet communication. All local and remote genius LAN can be migrated to open protocol Profinet. We can convert applications ranging from the simple to the highly complex. Minimum downtime, minimum effort, minimum cost – we provide the easiest upgrade path available!
Key Benefits of Migration to **Profinet**:

1. Proven, tested control with advanced security built-in
2. Open standard I/O connectivity with PROFINET over high-speed Ethernet
3. High performance and flexible high availability
4. Programming and data connections are easily transferred into new system
5. Advanced functionality through use of Proficy Machine Edition programming and configuration tools
6. System can be updated in just a few hours and in steps, minimizing downtime
7. High availability systems often can change over without stopping

We strongly recommend you upgrade Genius LAN to open protocol **Profinet** over high speed ethernet communication.

To,
Maithon Power Ltd.
Dhanbad, 828 205, Jharkhand

Dear Sir,

This has reference to our recent visit to your plant for maintenance of electrolysis modules of hydrogen generation plant. On detailed inspection it has been observed that these modules are beyond repair as they have already completed their useful life.

The typical life of our electrolysis modules is about 7 years and the modules installed at MPL have already completed more than 12 years life. We recommend to replace the modules to sustain the operations and ensure the availability of Hydrogen plant.

Thanking you,
Yours Sincerely
FOR **SUKAN ENGINEERING PVT. LTD.**

TO WHOMSOEVER IT MAY CONCERN

This is to mention that IMI Norgren Heroin make Solenoid valves are installed in BHEL Make Turbine for its governing system, as these solenoid valves are most reliable products from IMI Norgren Heroin. These Solenoid valves have long service life without any failure.

It has been observed that these solenoid valves perform very well throughout the years without any failure for at least five years of continuation operation in power the plants where these valves are installed. Norgren provides suitable guarantee/warranty certificate along with its products as 12 months from the date of commissioning or 18 month from the date of dispatch, whichever expires earlier.

However, This is strongly recommended that the IMI Norgren Heroin make Steam Turbine governing solenoid valves should be replaced after service of 5 years to safeguard your plant in terms of its operation.

CEA (Cyber Security in Power Sector) Guidelines, 2021

1.2 Government of India has set up the Indian Computer Emergency Response Team (CERT-In) for Early Warning and Response to cyber security incidents and to have collaboration at National and International level for information sharing on mitigation of cyber threats. CERT-In regularly issues advisories on safeguarding computer systems and publishes Security Guidelines which are widely circulated for compliances. All Central Government Ministries/ Departments and State/Union Territory Governments have been advised to conduct cyber security audit of their entire Cyber Infrastructure including websites at regular interval through CERT-In empanelled Auditors so as to identify gaps and appropriate corrective actions to be taken in cyber security practices. CERT-In extends supports to enable Responsible Entity in conducting cyber security mock drills and in assessment of their preparation to withstand cyber-attacks. The Responsible Entity must submit Reports of Cyber Audit of cyber security controls, architecture, vulnerability management, network security and periodic cyber security drills to sectoral CERT as well as CERT-In. Team of experts shall review these reports and shortcomings if any in the compliances shall be flagged by them. CERT-In on regular basis also conducts workshops and training programs to enhance Cyber awareness of all Stakeholders.

1.4 All Responsible Entities, Service Providers, Equipment Suppliers/Vendors and Consultants engaged in Power Sector are equally responsible for ensuring cyber security of the Indian Power Supply System. They are to act timely upon each threat intelligence, advisories and other inputs received from authenticated sources, for continuous improvement in their cyber security posture.

Article 7 Phasing out of Legacy System

a) As the life cycle of the Power System Equipment/System is longer than that of IT Systems deployed therein, the Responsible Entity shall ensure that all IT technologies in the Power System Equipment/System should have the ability to be upgraded.

b) The Responsible Entity shall ensure that the Information Security Division shall draw the list of all communicable equipments/systems nearing end life or are left without support from OEM. Thereafter CISO shall identify equipment/systems to be phased out from the list drawn, firm up their replacement plan and put up the replacement plan for approval before the Board of Directors.

c) The CISO shall ensure that till equipments/systems nearing end life or left without support from OEM are not replaced, their cyber security is hardened and ensured through additional controls provisioned in consultation with the OEM or alternate Supplier(s)*.

*e.g. Use of CDAC developed AppSamvid and whitelisting of applications installed may be explored across all legacy systems.

d) The Responsible Entity shall document in their Cyber Security Policy a Standard Operating Procedure for safe and secure disposal of outlived or legacy devices.

TATA POWER (MPL)

OT Assessment Report

Risk Rating Criteria

The risk rating is used to signify the level of risk due to gaps noted during the audit and is based on a qualitative criterion defined as follows:

Category of finding	Implication
Critical	High risk, requires immediate Senior Management attention.
Major	High risk, requires Senior Management attention.
Medium	Medium risk, requires corrective action.
Low	Low risk, with opportunities for improvement.

Project Timeline and Team

OT assessment timeline for Unit 1 as follows:

Assessment Start Date	Assessment End Date
24-01-2023	28-01-2023

OT assessment timeline for Unit 2 as follows:

Assessment Start Date	Assessment End Date
01-08-2023	03-08-2023

Following team member was involved in this assessment:

GT Security Team	Contact Information
Ujjwal Ranjan	M: +91 7739756835 E: ujjwal.ranjan@in.gt.com

Executive Summary

In this report, we provide an overview of current visibility and insight into your OT environment. We analyzed the network behavior of assets, provided asset visibility and machine learning. The amount of information obtainable is directly related to the amount of information within the traffic capture files. Using our hybrid threat detection, we were able to scan and provide real-time alerting for your OT environment using packet and Yara rules. Starting with asset visibility will begin the process of moving up the maturity curve in our OT environment. Analyzing the alerts can help clean up the environment and ensure assets are communicating and functioning in a proper secure manner. Visibility into the network and understanding how assets communicate will help provide a foundation for network segmentation.

This report contains the outcome of vulnerability assessment and pen testing performed at Maithon Power Limited.

Activities performed to conduct VAPT in OT environment at MPL are mentioned below:

1. Performed passive monitoring of network 16 and network 17 including backup switches.
2. Performed internal pen testing & external pen testing.
3. Carried out physical assessment of all the available workstations.

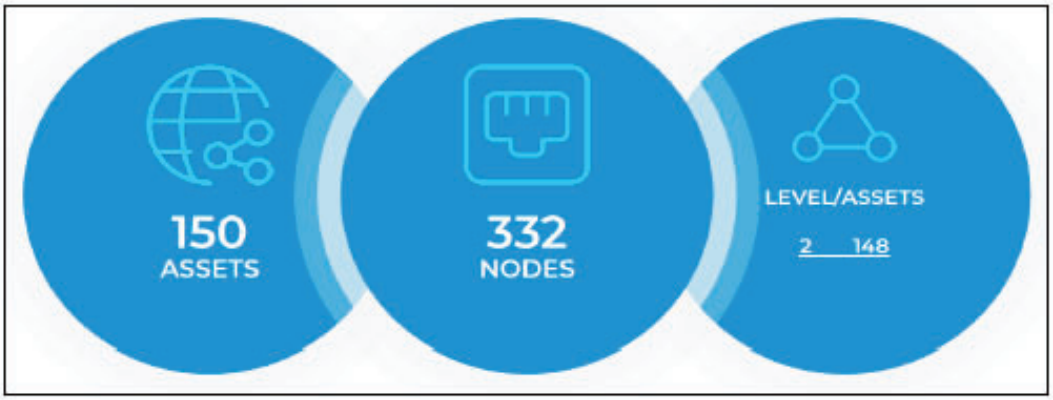
Unit 1

Asset Inventory

Discovered asset summary.

Summary of Network 16 is mentioned below.

Total number of assets discovered in network switch 16 including backup switch are 150.



Physical Assessment Observations

Observation Summary

Sl.No	Major Area	Description of Finding/Observation	Impact	Risk Rating	Recommendation
1	**Obsolete OS (Windows7 & Windows server 2008 R2)**	It was observed that the DCS is running on outdated OS that are Windows 7 and Windows server 2008 R2	An obsolete OS is no longer supported by the manufacturer, meaning that it no longer receives security updates, leaving it vulnerable to security breaches and attacks.	**Critical**	It is recommended to regularly update your operating system to avoid these issues and ensure optimal performance and security of the device. Immediate upgrade of OS is required since current control system are running on obsolete OS.
2	**Antivirus definition updates**	It was observed that most of the workstations and servers have similar status of Antivirus, where AV is installed however latest definition of AV is not updated. Note: **"Support of current antivirus installed in DCS workstations/servers is not available".**	Below are potential impacts of not having an antivirus: **Malware infections**: Without an antivirus program, the device is vulnerable to malware infections, which can cause data loss, system crashes, and other problems. Malware can also steal personal information, such as login	**Critical**	It is strongly recommended to upgrade the OS of DCS workstation/servers so that Antivirus support is available in the form latest AV definitions. It is also recommended to have a centralized AV manager so that AV definition can be updated regularly from it.

6	**Windows Patches updates**	It was observed that the systems which include workstation server, EWS, OWS are not updated with latest OS updates	Below are some potential impacts of not installing Windows patches: **Security vulnerabilities**: Not installing Windows patches can leave the device vulnerable to security threats, such as viruses, malware, and other types of attacks. This can result in data loss, system crashes, and other problems. **Reduced performance**: Over time, not installing Windows patches can result in reduced performance of the device. This can include slower load times for programs and applications, and overall sluggishness of the system. **Compatibility issues**: As software and hardware continue to advance, not installing Windows patches can lead to compatibility issues between the device and newer programs or devices. This can result in error messages or other problems when attempting to run certain software or hardware.	**High**	Create a policy and procedure inline to the OEM that OEM has to provide the validate patches as per patch management life cycle for OEM managed critical systems/ devices. Patch Manager needs to be integrated with DCS network so that workstations/server can be updated from centralized location and can be mapped with the OS update cycle .It is strongly recommended that you regularly install Windows patches and updates to ensure the device is protected from security threats, runs smoothly, and remains compatible with newer software and hardware.

Recommendations

- All unwanted ports & services running on the systems should be disabled. During this process, it is always good to check the effect on running SCADA system performance (with the help of SCADA vendor). System availability is more important in OT environment.
- Unused ports of network/OT devices such as switch should be disabled.
- Device control and application control policy for OT environment should be implemented.
- Upgradation of system OS should be conducted, and the systems should be on latest OS.
- Upgradation of Network Device Firmware should be carried out are regular intervals and should be on latest Firmware.
- Antivirus definitions and OS patch update rule should be defined and implemented.
- Monitor and implement security controls for the communication involving DCS systems (System PC and PLC) which are having the data flow between DCS systems and third-party sources / devices for security checks (with the support of vendor). This will add another layer of security in third party communication involving TCP/IP, OPC, Modbus, etc between DCS systems and third-party sources / devices.

[EXTERNAL sender, Exercise caution..!]

Dear Sir,

As discussed, option 2 is not feasible in present scenario due to cyber security guidelines and software/hardware obsolescence.
Although pls find below few points needs to be considered in support of SAS upgradation requirements.

1. The existing IT hardware (Servers, OWS/EWS) will not perform with new Windows Server 2022/ Micro-SCADA X as it is not as per minimum hardware requirement of Micro-SCADA X platform. So, this hardware needs to be changed / replaced with new Hardware with enhanced CPU & RAM capacity.
2. Service support for old IT hardware also not available right now.
3. Existing OS don't have support from OEM (Microsoft) for security patches and Windows system related updates. Hence this need to be upgraded to latest platform.
4. Antivirus also need to be upgraded with new platform as existing one does not have support of the latest OS.
5. Further, the new OS, Micro-SCADA have many updated features/benefit and complaint to new Cyber Security requirements, refer enclosed documents.

Further, the new OS, Micro-SCADA have many updated features/benefit and complaint to new Cyber Security requirements, refer enclosed documents.

Minutes of Sub-group (IPP's) Meeting Held on 25.10.2024

The meeting of the Sub-Group constituted by the Infrastructure Constraints Review Committee was held on 25.10.2024 at 12:00 noon in hybrid mode. It was chaired by Joint Secretary (CPD), Ministry of Coal and attended by officials of MoC, MoP, Railway Board, CEA & IPPs, as well as CIL Kolkata/Subsidiaries HQ/CIL Delhi.

Supply of coal to power sector (IPPs) was reviewed and discussed in order to augment it further to the IPPs having lesser coal stocks. Subgroup decisions on coal supply to Plants are as under:-

List of participants is at **Annexure.**

Subject: Revised Policy for Biomass Utilisation for Power Generation through Co-firing in Coal based Power Plants

Sir/Madam,

The undersigned is directed to refer to this Ministry's "Policy for Biomass Utlisation for Power Generation through Co-firing in Pulverised Coal Fired Boilers" issued in November, 2017

2. In order to further promote use of biomass pellets in coal based thermal power plants, the above Policy is further modified. A copy of "Revised Policy for Biomass Utlisation for Power Generation through Co-firing in Coal based Power Plants" is enclosed for information and necessary action please.

Yours faithfully

Encls: As Above

Kumar Saurabh
Deputy Director(Thermal)
Ministry of Power

Copy to:
(i) PS to Hon'ble Minister,
(ii) PS to Hon'ble MoS for Power,
(iii) Sr. PPS to Secretary(Power),
(iv) PPS to AS(SKGR), PPS to AS&FA, PPS to AS(VKD)
(v) All Joint Secretaries/EA/Chief Engineer, Ministry of Power
(vi) Incharge, NIC, Ministry of Power - with a request to upload this document on the website of MoP.

REVISED POLICY OF MINISTRY OF POWER FOR BIOMASS UTILIZATION FOR POWER GENERATION THROUGH CO-FIRING IN COAL BASED POWER PLANTS

1. The current availability of biomass in India is estimated at about 750 million metric tonnes per year. The estimated surplus biomass availability is at about 230 million metric tonnes per annum covering agricultural residues.

2. Ministry of Power (MoP) vide its policy dated 17-11-2017 on biomass utilization for power generation had advised that all fluidized bed and pulverized coal units (coal based thermal power plants) except those having ball and tube mill, of power generation utilities, public or private, located in India, to use 5-10% blend of biomass pellets made, primarily, of agro residue along with coal after assessing the technical feasibility, viz. safety aspect etc.

3. In order to further promote use of biomass pellets in coal based thermal power plants, the above Policy is further modified. The modifications in the above Policy are as under:

(i). All coal based thermal power plants of power generation utilities with **bowl mill**, shall on annual basis mandatorily use 5 percent blend of biomass pellets made, primarily, of agro residue along with coal with effect from one year of the date of issue of this guideline. The obligation shall increase to 7 percent with effect from two years after the date of issue of this order and thereafter.

(ii). All coal based thermal power plants of power generation utilities with **ball & race mill**, shall on annual basis mandatorily use 5 % blend of biomass pellets (torrefied only) made, primarily, of agro residue along with coal. This is to be complied within one year starting from this order. Two years from the date of issue of this order and thereafter the obligation will increase to 7 percent.

(iii). All coal based thermal power plants of power generation utilities with **ball & tube mills**, shall on annual basis mandatorily use 5 % blend of torrefied biomass pellets with volatile content below 22%, primarily made of agro residue along with coal. This is to be complied within one year.

(iv). Generating Utilities having certain units under Reserve Shutdown or not being despatched due to MOD (Merit Order Despatch) consideration would ensure to increase the percentage of co-firing up to 10 % in their other operating units/ plants (5 % in plants having ball and tube mills).

(v). Any power plants seeking exemptions / relaxation from co-firing may be considered on case to case basis, based on recommendations of CEA. A Committee headed by Chief Engineer (TE&TD), CEA, including representatives from NTPC, BHEL, CPRI, Ministry of Agriculture and Mission

Directorate shall examine the request of power plants for their exemption/relaxation from mandatory co-firing of biomass, as mentioned at para (i) to (iv) above.

(vi). The policy for co-firing of biomass would be in force for 25 years or till the useful life of the thermal power plant whichever is earlier. The minimum percentage of biomass for co-firing will be reviewed from time to time.

(vii) The minimum contract period for procurement of biomass pellets by generating utilities shall be for 7 years so as to avoid delay in awarding contracts by generating companies every year and also to build up long term supply chain. There may be provision of firm price of biomass pellets for the first year of the contract and yearly rate variation from second year onwards where rates can vary as per terms and conditions of the contract. In order to enable its implementation, a model RfP and contract shall be issued by MOP by 15.11.2021 for adhering to by all generating utilities. However, the ongoing process of contracting for biomass co-firing by generating utilities shall not be affected till issue of Model Contract.

(viii). Provisions related to tariff determination and scheduling shall be as given below:

a. For projects set up under Section 62 of the Electricity Act 2003, the increase in cost due to co-firing of biomass pellets shall be pass through in Energy Charge Rate (ECR).
b. For projects set up under Section 63 of the Electricity Act 2003, the increase in ECR due to biomass co-firing can be claimed under Change in Law provisions.
c. Such additional impact on ECR shall not be considered in deciding Merit Order Despatch (MOD) of the power plant.
d. Obligated Entities such as Discoms can meet their Renewable Purchase Obligations (RPO) by buying such generation of co-firing.

*****

Budgetary Proposal

To,
M/s. Maithon Power Ltd.

Kind Attn. : Mr. Manish Kumar (Head – CHP)

Dear Sir,

Sub. : Requirement of Stacker cum reclaimer with the same specifications and parameters as per our earlier supplied machine no. HM-451

We refer to your subject enquiry and are pleased to submit herewith our *Budgetary Proposal* for subject machine for your kind perusal.

We hope the offer will meet with your requirement of the equipment; should you require any clarification, please feel free to contact us.

Thanking you, In the meantime, we remain,

Yours faithfully,
For Elecon Engineering Co. Ltd. (MHE Divison)

Elecon Engineering Co. Ltd. Vallabh Vidyanagar

Nirav A. Vasavada
(Proposals & Marketing)

BUDGETARY PROPOSAL FOR Stacker cum Reclaimer FOR M/s. Maithon Power Ltd.

Client	M/s. Maithon Power Ltd.
Project	Requirement of Stacker cum reclaimer in line with earlier supplied M/c.

INDEX

Sr. No.	Title	Page No.

PRICE SCHEDULE

Client	M/s. Maithon Power Ltd.
Project	Requirement of Stacker cum reclaimer in line with earlier supplied M/c.

BUDGETARY PRICE SCHEDULE			
Price for Design, Engineering, Manufacturing & Supply of Stacker cum reclaimer (1 no.) on **Ex-works V. V. Nagar basis** & Supervision of Erection, Testing and Commissioning as per the Scope & Specifications mentioned here with.			
Sr. No.	**Description**	**Qty.**	**Total Ex-works Price, Rs.**
1.0	**Supply of Equipment:**		
1.1	Stacker cum reclaimer 1500 TPH (Stacking) and 1150 TPH (Reclaiming) (As per attached past order machine parameters)	1 No.	**24,10,00,000/-** (Rs. Twenty Four Crore Ten lakhs only/-)
2.0	Supervision of Erection Testing & Commissioning of Reclaimer (Excluding to & fro travel charges, local lodging and boarding charges and local conveyance charges)	**Lot**	**Rs. 18,000/-** **Per man per day**
3.0	Transportation to site, site un-loading, loading, storage including storage insurance, erection, testing and commissioning of equipment		**By PURCHASER**
4.0	All kind of taxes / duties and levies		**EXTRA AT ACTUAL**

COMMERCIAL TERMS & CONDITIONS

Our commercial offer is subject to following terms & condition mentioned herewith. Any other clause of the purchase enquiry or order printed or otherwise shall not be acceptable to us unless agreed before order finalization.

1. PRICE BASIS

The Prices quoted above are on **Ex-works V. V. Nagar** inclusive of Packing and forwarding charges wherever applicable. Transportation from our works including transit insurance to be arranged by Purchaser.

Un-loading at site, loading, site storage and insurance, site handling, erection, testing and commissioning should be in the scope of Purchaser and to be taken care by Purchaser.

2. TAXES & DUTIES

All Taxes / Duties such as GST / Octroi / Customers clearance charges / Terminal Tax as applicable, for items to be supplied shall be paid extra at actual by Purchaser.

3. TERMS OF PAYMENT

20 % : of the Contract Price for main package shall be paid as advance

80 % : Payment on pro-rata supply basis, based on dispatch documents and 100% taxes & duties through LC

Payments except the advance payment shall be secured with a suitable **Letter of credit** opened in favor of M/s Elecon Engineering Co Ltd, within 30 days of acceptance of Purchase Order. All usance charges for the LC shall be borne by PURCHASER.

4. WARRANTY PERIOD

Warranty period for our supplied equipment shall be 12 Months from the last major dispatch.

5. DELIVERY PERIOD / DISPATCH SCHEDULE:

Delivery period shall be mutually discussed and agreed before Order finalization. If delivery is delayed due to reasons beyond reasonable control of Elecon Engineering Co Ltd, the purchaser shall grant suitable extension in delivery period.

Seller will proceed with the execution of Contract/Purchase order as per the agreed delivery schedule. For reasons whatsoever if the Purchaser decides to postpone supply of such material, Purchaser shall compensate the manufacturer at the rate of 5% of the order value per month effective from the date of such postponement. The supply schedule will subsequently be revised based on mutual discussions and agreement, to facilitate restitution of the balance work. Furthermore, the Purchaser shall pay the amount thus accruing to the Seller before recommencing dispatches.

We shall only accept the order in the event of the said condition appearing in your Purchase Order ad verbatim.

6. SUPERVISION OF ERECTION, TESTING & COMMISSIONING

We strongly recommend Erection, Testing and Commissioning of the offered equipment under close supervision of our engineers for smooth and trouble free operation of the equipment after commissioning and warranty liability of equipment.

7. INSPECTION

We have considered inspection of various components based on our standard QAP. Cost of any third party inspection, if required shall be borne by you. Imported components shall be accepted on base on manufacturer's inspection at their shop. TC shall be furnished for these components as per our QAP during inspection visit of Purchaser, if desired.

8. FORCE MAJEURE

Any event including but not limited to an act of God, fire, epidemics, pandemics, natural calamities, riots, civil commotion or unrest, terrorism, war ,strikes or lockouts; expropriation or other governmental actions; any change in applicable law or regulations including change in market rules, currency restrictions, devaluations or fluctuations; market conditions affecting the execution or settlement of transaction or the value of assets; and breakdown, failure or malfunction of any telecommunication and information technology systems beyond the control of any party which restricts or prohibits the performance of the obligations of such party contemplated by Purchase order.

M/s Elecon engineering company limited shall not be held liable for any loss or damage or failure to perform its obligation hereunder, of for any delay in complying with any duty or obligations, under or pursuant to purchase order arising as direct or indirect results of any Force Majeure Event.

9. WHOLENESS OF ORDER

Our offer has been formulated on the quantity specified in the enquiry/recommendations. Should there be any deviation from the quantity offered either plus or minus, our offer will be subject to confirmation/revision.

10.CANCELLATION / ALTERNATION

In the event of cancellation of the Purchase Order, Purchaser shall pay to the Seller cost incurred in engineering, procurement and manufacture of items till the date of event including cost of raw material procured, semi-finished goods and other losses that the Seller may incur Plus overhead charges @20% of the cost. The Purchaser shall pay to manufacturer the total amount after due adjustment of advance amount.

11.ARBITRATION

Any dispute or difference arising between the parties in connection with the contract order shall be referred to arbitration in accordance with the provisions of the Indian Arbitration Act 1996 or any statutory modifications or re-enactment thereof. The arbitration will be given to Engineering Association of India and Gujarat Chamber of Commerce.

12.JURISDICTION

Contract will be subject to Indian Arbitration law / act.

13.VALIDITY

Our offer will remain valid for a period of **30 days** from the date of submission of this offer. Thereafter the same will be subject to our confirmation in writing.

14.EFFECTIVE DATE OF ORDER

Effective date of Order shall be from the date of receipt of Advance payment or from the date of G A Drawing approval or from the date of opening of full value of LC, whichever is later.

15. All other commercial terms / conditions shall be mutually discussed and agreed before Order finalization.

[A]	DESIGN BASIS:

1.0 Project Information:

- Tenderer : Elecon Engineering Company Ltd.
  Post box no. 33,
  Vallabh Vidyanagar – 388 120
  Gujarat State (India)
- Purchaser : Maithon Power Ltd.
- Location : Dhanbad

2.0 Material Characteristics:

The Equipment offered by us shall be designed to handle Material having following specification:

- Material : Crushed coal
- Bulk density : 0.8 T/M^3
- Lump size : < 25 mm

3.0 Codes of Practices:

- ISO-5049/1-1994: Mobile equipment for continuous handling of bulk materials. Part: 1; Rules for design of steel structures.
- FEM Section II - 1997: Rules for the design of mobile equipment for continuous handling of bulk materials.
- CEMA Version 5 - 1997: Belt Conveyors for Bulk Materials.
- STABILITY FACTORS:

	Stability Factor
Load Combination I	1.5
Load Combination II	1.3
Load Combination III	1.2

4.0 ELECTRICAL:

Data Considered :

- **For HT Power Supply: HT/LT** +/- 10%, 50 Hz +/- 5%, combined Voltage & Frequency variation of +/-10% 3 phase, 3 wire earthed system.
- **For LT Power Supply:** 415 V +/- 10%, 50 Hz +/- 5 % combined Voltage & Frequency variation of +/- 10%, 3 phase, 3 Wire AC earthed system for L. T. Motors.
- Control supply –:110V, Single phase, 50 Hz A.C.
- Space heater supply for motors 30 KW & above 240 V Single phase, 50 Hz, A.C.
- Fault level: 50 KA at 415 V.
  40 KA at 6.6 KV for 3 sec.
- Lighting supply 240V, 1Ph, 50Hz AC system

Site Conditions :

- Ambient Temperature : 50 Deg. C
- Relative Humidity : 100 % (Approx.)

5.0 BASIS OF OFFER FOR ELECTRICAL:

- Purchaser shall provide HT / LT supply up to Reclaimer LT/HT junction box installed on ground at the center feed point of machines.

- The length of cable shall be based on considering power feed point at centre of travel length of machines.

- PLC shall be pre-programmed as per application requirement.

[B]	SCOPE MATRIX:			
			ELECON	PURCHASER
[B.1]	MECHANICAL:			
1.0	**Stacker cum reclaimer (1No)**	:	√	X

Consisting of

- Rail Travel Mechanism
  - Drive bogies
  - Non Drive Bogies
  - Drives (Motor, Gearbox, Coupling)
  - Rail Clamps
  - Arms & Structures
- Under Carriage
- Upper Carriage
- Slewing Mechanism
  - Slewing ring with teeth
  - Drives (motor, gearbox & coupling)
  - Slewing Shaft & Pinion
- Pylon/Mast & Suspension
- Counter weight Boom
- Boom Conveyor
  - Drives (motor, gearbox & coupling)
  - Idlers & Pulleys

[C]	TECHNICAL SPECIFICATION FOR BUCKET WHEEL RECLAIMER:

Please find attached sheet as per part order.

[D]	LIST OF EXCLUSIONS:

- Any kind of civil work, i.e., rail & rails foundation, stockyard foundation, RCC counter weight, boom resting pad etc.
- Any kind of dismantling, strengthening work for existing facility.
- Yard conveyor & Rail and fixtures for rail.
- Dust suppression / dust extraction system for stockyard area & on machine.
- Any kind of other spares except mentioned in above scope.
- Development of storage yard / stockpile area.
- Fire fighting and fire detection system on machine as well as other area.
- Obtaining statutory approvals. However, we shall provide all the necessary information for the same and provide assistance whenever required.
- Drinking & service water arrangements & piping.
- All kind of earthing as well as erection of material including rail.
- Any approval from local authority / body etc for electrical installation.
- Illumination of open stockpile area and yard conveyor.
- Any flame proof electrical equipment.
- Rail to rail earthing, earthing along the rail, stockpile earthing and connection with purchasers earthing grid for machines.
- Interconnection between various our offered equipment and total plant facilities including electrical and instrumentation for the same.
- Spare feeders of any type and rating in LT MCC, spare feeders in VVVF panels and in other local panels located in e house of the yard machine due to space restriction.
- APFC panels / capacitor bank for power factor correction panel.
- HT power supply arrangement up to the power junction box / HT isolator fuse box located at center of travel of the yard machine. Cable for control communication from center point junction box.

[E]	COMMENTS / OBSERVATIONS / DEVIATIONS:

- Any kind of dismantling work, erection and testing work to be carried out by Purchaser.
- The accuracy of belt weigher for boom conveyor will be + / - 1 %.
- Walkway on both the sides of boom conveyor will be with width of 600 mm
- Slewing bearing will be external type with separate segmental toothed rim manufactured by Elecon. Elecon toothed rims are fitted at various locations in PSUs and are working satisfactorily in conjunction with slew bearing.

Importance: High

Some people who received this message don't often get email from ankush.dey@tkil.com. Learn why this is important

[EXTERNAL sender, Exercise caution..!]

Dear Sir,

This is in reference to your trailing email, regarding revised budgetary offer of TKIL Stacker cum reclaimer along with Yard conveyor package.

We are pleased to submit our revised Non-binding budgetary quote as below

Sr. No.	Description	Qty.	Total Price (In Cr, INR)
1	Design, Manufacture, Inspection, Assembly, Painting, and Supply and erection & commissioning of complete Stacker cum Reclaimer with Yard Conveyor on EPC basis as per the major scope of supply as below 1. Stacker cum Reclaimer (1500 TPH)- 1 No 2. Yard conv (1500 TPH, 825m C-C) & Drive house 2- 1 set 3. BFD – 1 no & FG – 1 no (in JNT 8) 4. Piping throughout the Yard Conv. for firefighting & Sprinkling system along with header in each 30 meter interval, Quick release Coupling(QRC), Sprinkler gun etc. 5. All related Civil, E&I, erection jobs.	1 Set.	**81.50**

Please note following:

1. Validity of our offer – 30 days
2. Our Budgetary quote are based on attached commercial terms and conditions. However, Final offer shall be submitted based on further discussion and subject to our Board approval.
3. All applicable taxes extra at actual.
4. Our supply price is excluding mandatory spares, recommended spares and insurance spares. However commissioning spare is included.
5. Pump House along with Pumps is excluded from our scope of supply. Client to provide water supply at JNT 8 at adequate pressure(approx. 7 kg) for the firefighting & Yard Sprinkling system.

Thanking you and assuring you of our best attention at all times.

Thanks & Regards
Ankush Dey

Subject: RE: Request for Budgetary Offer for Yard Conveyor with Stacker Reclaimer

Dear Ankush,

I hope this email finds you well.

This refers to our discussion during your site visit on 15.01.2025, where we elaborated on the need to include a fire-fighting system and dust suppression systems for the proposed coal yard in your budgetary offer. We kindly request you to submit a comprehensive budgetary proposal incorporating these systems, as it will greatly assist us in securing management approval for the entire project.

Additionally, we request you to arrange for a budgetary offer for a ground hopper with a 1000 TPH conveying system. This system is intended to discharge road-mode coal to BCN 3A/B during emergency situations, such as significant delays in rake unloading due to issues like oversized lumps or sticky coal, as experienced in the recent past.

Your prompt response will be highly appreciated.

Regards,
Ravindra Derla

विषयः– **स्वच्छ भारत मिशन 2.0 कार्यक्रम के अन्तर्गत ठोस एवं प्लास्टिक अपशिष्ट प्रबंधन नियमावली–2016 के क्रियान्वयन में राज्य के सभी Bulk Garbage generator को चिन्हीत कर अपशिष्ट प्रबंधन हेतू CSIR-CMERI दुर्गापुर द्वारा विकसित उर्पयुक्त (appropriate) तकनीक को लागू कराने के संबंध में।**

महाशय,

उपरोक्त विषयक विदित है कि, ठोस एवं प्लास्टिक अपशिष्ट प्रबंधन नियमावली–2016 के क्रियान्वयन में माननीय राष्ट्रीय हरित प्राधिकरण (NGT), नई दिल्ली के वाद संख्या 606 / 2018 में पारित आदेश आदेश के आलोक में,

1. सभी नगर निकायों अन्तर्गत Bulk Garbage generator को चिन्हीत किया जाना है।
2. वैसे सभी Bulk Garbage generator को अपने परिसीमा के अन्दर प्रतिदिन उत्पन्न अपशिष्टों का प्रसंस्करण कर Waste to wealth का निर्माण कराया जाना है।
3. इस कार्य से उत्पन्न होने वाले करीब 30% अपशिष्टों का सीधा निस्तारण होगा, जिससे नगर निकाय को उससे उत्पन्न अपशिष्टों का भार कम हो जाएगा।
4. Bulk Garbage generator के रूप में चिन्हीत शहरों में बड़े होटल,हॉस्टल, टाऊनशीप, होल–सेल सब्जी मंडी एवं मंदिर आदि जहाँ से 50–100 Kg प्रतिदिन अपशिष्ट उत्सर्जीत करते हैं।
5. डोर–टू–डोर कचरा संग्रहण गाड़ी द्वारा संग्रहित सूखे एवं गीले कचरे को भी Waste to wealth का निर्माण कराया जाना है।

उपरोक्त कार्य हेतु विज्ञान एवं प्राद्यौगिकी मंत्रालय, भारत सरकार के संस्था CSIR-CMERI दुर्गापुर के द्वारा 07 (अनुलग्नक 01 में वर्णित) प्रकार के तकनीक को अनुसाधन कर विकसित किया गया है, जो कि Zero waste तकनीक पर अधारित है, जिससे सभी अपशिष्टों का प्रसंस्करण किया जा सकता है, एवं इसके सतत् रख–रखाव के लिए उनके द्वारा प्रशिक्षण का भी व्यवस्था किया गया है।

अतः अनुरोध है कि सभी निकायों में इस तकनीक का प्रयोग कर झारखण्ड के हर शहर को Garbage free city बनाने के लिए अग्रतर कार्य किया जा सकता है। साथ ही किसी भी सुझाव के लिए संस्था CSIR-CMERI दुर्गापुर के वरिष्ठ वैज्ञानिक डा0 अमित गांगुली एवं वैज्ञानिक डा0 पार्था दास को दुरभाष संख्याः–9434214863 / 8967995858 से संपर्क सुझाव लिया जा सकता है।

विश्वासभाजन

विश्वनाथ सिन्हा, संयुक्त सचिव

MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE

NOTIFICATION

New Delhi, the 8th April, 2016

S.O. 1357(E).—Whereas the draft of the Solid Waste Management Rules, 2015 were published under the notification of the Government of India in the Ministry of Environment, Forest and Climate Change number G.S.R. 451 (E), dated the 3rd June, 2015 in the Gazette of India, part II, Section3, sub- section (i) of the same date inviting objections or suggestions from the persons likely to be affected thereby, before the expiry of the period of sixty days from the publication of the said notification on the Solid Waste Management Rules, 2015 in supersession of the Municipal Solid Waste (Management and Handling) Rules, 2000;

And whereas, copies of the said Gazette were made available to the public on the 3rd June, 2015;

And whereas, the objections or comments received within the stipulated period were duly considered by the Central Government;

Now, therefore, in exercise of the powers conferred by sections 3, 6 and 25 of the Environment (Protection) Act, 1986 (29 of 1986) and in supersession of the Municipal Solid Waste (Management and Handling) Rules, 2000, except as respect things done or omitted to be done before such supersession, the Central Government hereby makes the following rules for management of Solid Waste, namely:-

1. **Short title and commencement.-**

(1) These rules may be called the Solid Waste Management Rules, 2016.

(2) They shall come into force on the date of their publication in the Official Gazette.

2. **Application.-** These rules shall apply to every urban local body, outgrowths in urban agglomerations, census towns as declared by the Registrar General and Census Commissioner of India, notified areas, notified industrial townships, areas under the control of Indian Railways, airports, airbases, Ports and harbours, defence establishments, special economic zones, State and Central government organisations, places of pilgrims, religious and historical importance as may be notified by respective State government from time to time and to every domestic, institutional, commercial and any other non residential solid waste generator situated in the areas except industrial waste, hazardous waste, hazardous chemicals, bio medical wastes, e-waste, lead acid batteries and radio-active waste, that are covered under separate rules framed under the Environment (Protection) Act, 1986**.**

3. **Definitions –**(1) In these rules, unless the context otherwise requires,- (1) **"aerobic composting"** means a controlled process involving microbial decomposition of organic matter in the presence of oxygen;

2. **"anaerobic digestion"** means a controlled process involving microbial decomposition of organic matter in absence of oxygen;

3. **"authorisation"** means the permission given by the State Pollution Control Board or Pollution Control Committee, as the case may be, to the operator of a facility or urban local suthority, or any other agency responsible for processing and disposal of solid waste;

4. **"biodegradable waste "** means any organic material that can be degraded by micro-organisms into simpler stable compounds;

5. **"bio-methanation"** means a process which entails enzymatic decomposition of the organic matter by microbial action to produce methane rich biogas;

6. **"brand owner"** means a person or company who sells any commodity under a registered brand label.

7. "**buffer zone**" means zone of no development to be maintained around solid waste processing and disposal facility, exceeding 5 TPD of installed capacity. This will be maintained within total and area allotted for the solid waste processing and disposal facility.

8. **"bulk waste generator"** means and includes buildings occupied by the Central government departments or undertakings, State government departments or undertakings, local bodies, public sector undertakings or private companies, hospitals, nursing homes, schools, colleges, universities, other educational institutions, hostels, hotels, commercial establishments, markets, places of worship, stadia and sports complexes having an average waste generation rate exceeding 100kg per day**;**

9. **"bye-laws"** means regulatory framework notified by local body, census town and notified area townships for facilitating the implementation of these rules effectively in their jurisdiction**.**

10. **"census town"** means an urban area as defined by the Registrar General and Census Commissioner of India;

11. **"combustible waste"** means non-biodegradable, non-recyclable, non-reusable, non hazardous solid waste having minimum calorific value exceeding 1500 kcal/kg and excluding chlorinated materials like plastic, wood pulp, etc**;**

12. "**composting"** means a controlled process involving microbial decomposition of organic matter;

13. "**contractor**" means a person or firm that undertakes a contract to provide materials or labour to perform a service or do a job for service providing authority;

14. **"co-processing"** means use of non-biodegradable and non recyclable solid waste having calorific value exceeding 1500k/cal as raw material or as a source of energy or both to replace or supplement the natural mineral resources and fossil fuels in industrial processes;

15. **"decentralised processing"** means establishment of dispersed facilities for maximizing the processing of bio-degradable waste and recovery of recyclables closest to the source of generation so as to minimize transportation of waste for processing or disposal;

16. "**disposal"** means the final and safe disposal of post processed residual solid waste and inert street sweepings and silt from surface drains on land as specified in Schedule I to prevent contamination of ground water, surface water, ambient air and attraction of animals or birds;

17. **"domestic hazardous waste"** means discarded paint drums, pesticide cans, CFL bulbs, tube lights, expired medicines, broken mercury thermometers, used batteries, used needles and syringes and contaminated gauge, etc., generated at the household level;

18. **"door to door collection" m**eans collection of solid waste from the door step of households, shops, commercial establishments , offices , institutional or any other non residential premises and includes collection of such waste from entry gate or a designated location on the ground floor in a housing society , multi storied building or apartments , large residential, commercial or institutional complex or premises;**.**

19. **"dry waste"** means waste other than bio-degradable waste and inert street sweepings and includes recyclable and non recyclable waste, combustible waste and sanitary napkin and diapers, etc;

20. **"dump sites"** means a land utilised by local body for disposal of solid waste without following the principles of sanitary land filling;

21. **"extended producer responsibility" (EPR)** means responsibility of any producer of packaging products such as plastic, tin, glass and corrugated boxes, etc., for environmentally sound management, till end-of-life of the packaging products;

22. **"facility"** means any establishment wherein the solid waste management processes namely segregation, recovery, storage, collection, recycling, processing, treatment or safe disposal are carried out;

23. **"fine" means** penalty imposed on waste generators or operators of waste processing and disposal facilities under the bye-laws for non-compliance of the directions contained in these rules and/or bye- laws

24. **"Form"** means a F8orm appended to these rules;

25. **"handling"** includes all activities relating to sorting, segregation, material recovery, collection, secondary storage, shredding, baling, crushing, loading, unloading, transportation, processing and disposal of solid wastes;

26. **"inerts"** means wastes which are not bio-degradable, recyclable or combustible street sweeping or dust and silt removed from the surface drains;

27. **"incineration"** means an engineered process involving burning or combustion of solid waste to thermally degrade waste materials at high temperatures;

28. **"informal waste collector"** includes individuals, associations or waste traders who are involved in sorting, sale and purchase of recyclable materials;

29. "**leachate"** means the liquid that seeps through solid waste or other medium and has extracts of dissolved or suspended material from it;

30. **" local body"** for the purpose of these rules means and includes the municipal corporation, nagar nigam, municipal council, nagarpalika, nagar Palikaparishad, municipal board, nagar panchayat and town panchayat, census towns, notified areas and notified industrial townships with whatever name they are called in different States and union territories in India;

31. "**materials recovery facility" (MRF)** means a facility where non-compostable solid waste can be temporarily stored by the local body or any other entity mentioned in rule 2 or any person or agency authorised by any of them to facilitate segregation, sorting and recovery of recyclables from various components of waste by authorised informal sector of waste pickers, informal recyclers or any other work force engaged by the local body or entity mentioned in rule 2for the purpose before the waste is delivered or taken up for its processing or disposal;

32. **"non-biodegradable waste"** means any waste that cannot be degraded by micro organisms into simpler stable compounds;

33. **"operator of a facility"** means a person or entity, who owns or operates a facility for handling solid waste which includes the local body and any other entity or agency appointed by the local body;

34. **primary collection"** means collecting, lifting and removal of segregated solid waste from source of its generation including households, shops, offices and any other non-residential premises or from any collection points or any other location specified by the local body;

35. "**processing"** means any scientific process by which segregated solid waste is handled for the purpose of reuse, recycling or transformation into new products**;**

36. **"recycling**" means the process of transforming segregated non-biodegradable solid waste into new material or product or as raw material for producing new products which may or may not be similar to the original products;

37. **"redevelopment"** means rebuilding of old residential or commercial buildings at the same site, where the existing buildings and other infrastructures have become dilapidated;

38. **"refused derived fuel**"(RDF) means fuel derived from combustible waste fraction of solid waste like plastic, wood, pulp or organic waste, other than chlorinated materials, in the form of pellets or fluff produced by drying, shredding, dehydrating and compacting of solid waste ;

39. "**residual solid waste"** means and includes the waste and rejects from the solid waste processing facilities which are not suitable for recycling or further processing;

40. **"sanitary land filling "** means the final and safe disposal of residual solid waste and inert wastes on land in a facility designed with protective measures against pollution of ground water, surface water and fugitive air dust, wind-blown litter, bad odour, fire hazard, animal menace, bird menace, pests or rodents, greenhouse gas emissions, persistent organic pollutants slope instability and erosion;

41. **"sanitary waste"** means wastes comprising of used diapers, sanitary towels or napkins, tampons, condoms, incontinence sheets and any other similar waste;

42. **"Schedule"** means the Schedule appended to these rules;

43. "**secondary storage**" means the temporary containment of solid waste after collection at secondary waste storage depots or MRFs or bins for onward transportation of the waste to the processing or disposal facility;

44. **"segregation"** means sorting and separate storage of various components of solid waste namely biodegradable wastes including agriculture and dairy waste, non biodegradable wastes including recyclable waste, non-recyclable combustible waste, sanitary waste and non recyclable inert waste, domestic hazardous wastes, and construction and demolition wastes;

45. **"service provider"** means an authority providing public utility services like water, sewerage, electricity, telephone, roads, drainage, etc;

46. **"solid waste"** means and includes solid or semi-solid domestic waste, sanitary waste, commercial waste, institutional waste, catering and market waste and other non residential wastes, street sweepings, silt removed or collected from the surface drains, horticulture waste, agriculture and dairy waste, treated bio-medical waste excluding industrial waste, bio-medical waste and e-waste, battery waste, radio-active waste generated in the area under the local authorities and other entities mentioned in rule 2;

47. **"sorting"** means separating various components and categories of recyclables such as paper, plastic, card-boards, metal, glass, etc., from mixed waste as may be appropriate to facilitate recycling;

48. **"stabilising"** means the biological decomposition of biodegradable wastes to a stable state where it generates no leachate or offensive odours and is fit for application to farm land ,soil erosion control and soil remediation;

49. **"street vendor"** means any person engaged in vending of articles, goods, wares, food items or merchandise of everyday use or offering services to the general public, in a street, lane, side walk, footpath, pavement, public park or any other public place or private area, from a temporary built up structure or by moving from place to place and includes hawker, peddler, squatter and all other synonymous terms which may be local or region specific; and the words "street vending" with their grammatical variations and cognate expressions, shall be construed accordingly;

50. **"tipping fee"** means a fee or support price determined by the local authorities or any state agency authorised by the State government to be paid to the concessionaire or operator of waste processing facility or for disposal of residual solid waste at the landfill;

51. **"transfer station"** means a facility created to receive solid waste from collection areas and transport in bulk in covered vehicles or containers to waste processing and, or, disposal facilities;

52. **"transportation"** means conveyance of solid waste, either treated, partly treated or untreated from a location to another location in an environmentally sound manner through specially designed and covered transport system so as to prevent the foul odour, littering and unsightly conditions;

53. **"treatment"** means the method, technique or process designed to modify physical, chemical or biological characteristics or composition of any waste so as to reduce its volume and potential to cause harm;

54. **"user fee"** means a fee imposed by the local body and any entity mentioned in rule 2 on the waste generator to cover full or part cost of providing solid waste collection, transportation, processing and disposal services.

55. "**vermi composting"** means the process of conversion of bio-degradable waste into compost using earth worms;

56. "**waste generator**" means and includes every person or group of persons, every residential premises and non residential establishments including Indian Railways, defense establishments, which generate solid waste;

57. **"waste hierarchy"** means the priority order in which the solid waste is to should be managed by giving

emphasis to prevention, reduction, reuse, recycling, recovery and disposal, with prevention being the most preferred option and the disposal at the landfill being the least;

58. **"waste picker"** means a person or groups of persons informally engaged in collection and recovery of reusable and recyclable solid waste from the source of waste generation the streets, bins, material recovery facilities, processing and waste disposal facilities for sale to recyclers directly or through intermediaries to earn their livelihood.

(2) Words and expressions used herein but not defined, but defined in the Environment (Protection) Act, 1986, the Water (Prevention and Control of Pollution) Act, 1974, Water (Prevention and Control of Pollution) Cess Act, 1977 and the Air (prevention and Control of Pollution) Act, 1981 shall have the same meaning as assigned to them in the respective Acts.

4 Duties of waste generators.- (1) Every waste generator shall,-

(a) segregate and store the waste generated by them in three separate streams namely bio-degradable, non bio-degradable and domestic hazardous wastes in suitable bins and handover segregated wastes to authorised waste pickers or waste collectors as per the direction or notification by the local authorities from time to time;

(b) wrap securely the used sanitary waste like diapers, sanitary pads etc., in the pouches provided by the manufacturers or brand owners of these products or in a suitable wrapping material as instructed by the local authorities and shall place the same in the bin meant for dry waste or non- bio-degradable waste;

(c) store separately construction and demolition waste, as and when generated, in his own premises and shall dispose off as per the Construction and Demolition Waste Management Rules, 2016; and

(d) store horticulture waste and garden waste generated from his premises separately in his own premises and dispose of as per the directions of the local body from time to time.

(2) No waste generator shall throw**,** burn or burry the solid waste generated by him, on streets, open public spaces outside his premises or in the drain or water bodies.

(3) All waste generators shall pay such user fee for solid waste management, as specified in the bye-laws of the local bodies.

(4) No person shall organise an event or gathering of more than one hundred persons at any unlicensed place without intimating the local body, at least three working days in advance and such person or the organiser of such event shall ensure segregation of waste at source and handing over of segregated waste to waste collector or agency as specified by the local body.

(5) Every street vendor shall keep suitable containers for storage of waste generated during the course of his activity such as food waste, disposable plates, cups, cans, wrappers, coconut shells, leftover food, vegetables, fruits, etc., and shall deposit such waste at waste storage depot or container or vehicle as notified by the local body**.**

(6) All resident welfare and market associations shall, within one year from the date of notification of these rules and in partnership with the local body ensure segregation of waste at source by the generators as prescribed in these rules, facilitate collection of segregated waste in separate streams, handover recyclable material to either the authorised waste pickers or the authorised recyclers. The bio-degradable waste shall be processed, treated and disposed off through composting or bio-methanation within the premises as far as possible. The residual waste shall be given to the waste collectors or agency as directed by the local body.

(7) All gated communities and institutions with more than 5,000 sqm area shall, within one year from the date of notification of these rules and in partnership with the local body, ensure segregation of waste at source by the generators as prescribed in these rules, facilitate collection of segregated waste in separate streams, handover recyclable material to either the authorised waste pickers or the authorizsd recyclers. The bio-degradable waste shall be processed, treated and disposed off through composting or bio-methanation within the premises as far as possible. The residual waste shall be given to the waste collectors or agency as directed by the local body.

(8) All hotels and restaurants shall, within one year from the date of notification of these rules and in partnership with the local body ensure segregation of waste at source as prescribed in these rules, facilitate collection of segregated waste in separate streams, handover recyclable material to either the authorised waste pickers or the authorised recyclers. The bio-degradable waste shall be processed, treated and disposed off through composting or bio-methanation within the premises as far as possible. The residual waste shall be given to the waste collectors or agency as directed by the local body.

5. Duties of Ministry of Environment, Forest and Climate Change.- (1) The Ministry of Environment, Forest and Climate Change shall be responsible for over all monitoring the implementation of these rules in the country. It shall constitute a Central Monitoring Committee under the Chairmanship of Secretary, Ministry of Environment, Forest and Climate Change comprising officer not below the rank of Joint Secretary or Advisor from the following namely,-

1) Ministry of Urban Development

2) Ministry of Rural Development

3) Ministry of Chemicals and Fertilizers

4) Ministry of Agriculture

5) Central Pollution Control Board

6) Three State Pollution Control Boards or Pollution Control Committees by rotation

7) Urban Development Departments of three State Governments by rotation

8) Rural Development Departments from two State Governments by rotation

9) Three Urban Local bodies by rotation

10) Two census towns by rotation

11) FICCI, CII

12) Two subject experts

2. This Central Monitoring Committee shall meet at least once in a year to monitor and review the implementation of these rules. The Ministry of Environment, Forest and Climate Change may co-opt other experts, if needed. The Committee shall be renewed every three years.

6. Duties of Ministry of Urban Development.- (1) The Ministry of Urban Development shall coordinate with State Governments and Union territory Administrations to,-

(a) take periodic review of the measures taken by the states and local bodies for improving solid waste management practices and execution of solid waste management projects funded by the Ministry and external agencies at least once in a year and give advice on taking corrective measures;

(b) formulate national policy and strategy on solid waste management including policy on waste to energy in consultation with stakeholders within six months from the date of notification of these rules;

(c) facilitate States and Union Territories in formulation of state policy and strategy on solid management based on national solid waste management policy and national urban sanitation policy;

(d) promote research and development in solid waste management sector and disseminate information to States and local bodies;

(e) undertake training and capacity building of local bodies and other stakeholders;and

(f) provide technical guidelines and project finance to states, Union territories and local bodies on solid waste management to facilitate meeting timelines and standards.

7. Duties of Department of Fertilisers, Ministry of Chemicals and Fertilisers.- (1) The Department of Fertilisers through appropriate mechanisms shall,-

(a) provide market development assistance on city compost; and

(b) ensure promotion of co-marketing of compost with chemical fertilisers in the ratio of 3 to 4 bags: 6 to 7 bags by the fertiliser companies to the extent compost is made availablefor marketing to the companies.

8. Duties of Ministry of Agriculture, Government of India.- The Ministry of Agriculture through appropriate mechanisms shall,-

(a) provide flexibility in Fertiliser Control Order for manufacturing and sale of compost;

(b) propagate utlisation of compost on farm land;

(c) set up laboratories to test quality of compost produced by local authorities or their authorised agencies; and

(d) issue suitable guidelines for maintaining the quality of compost and ratio of use of compost visa-a-vis chemical fertilizers while applying compost to farmland.

9. Duties of the Ministry of Power.-The Ministry of Power through appropriate mechanisms shall,-

(a) decide tariff or charges for the power generated from the waste to energy plants based on solid waste.

(b) compulsory purchase power generated from such waste to energy plants by distribution company.

10. Duties of Ministry of New and Renewable Energy Sources- The Ministry of New and Renewable Energy Sources through appropriate mechanisms shall,-

(a) facilitate infrastructure creation for waste to energy plants; and

(b) provide appropriate subsidy or incentives for such waste to energy plants.

11. Duties of the Secretary–in-charge, Urban Development in the States and Union territories.- (1) The Secretary, Urban Development Department in the State or Union territory through the Commissioner or Director of Municipal Administration or Director of local bodies shall,-

(a) prepare a state policy and solid waste management strategy for the state or the union territory in consultation with stakeholders including representative of waste pickers**,** self help group and similar groups working in the field of waste management consistent with these rules, national policy on solid waste management and national urban sanitation policy of the ministry of urban development, in a period not later than one year from the date of notification of these rules;

(b) while preparing State policy and strategy on solid waste management, lay emphasis on waste reduction, reuse, recycling, recovery and optimum utilisation of various components of solid waste to ensure minimisation of waste going to the landfill and minimise impact of solid waste on human health and environment;

(c) state policies and strategies should acknowledge the primary role played by the informal sector of waste pickers, waste collectors and recycling industry in reducing waste and provide broad guidelines regarding integration of waste picker or informal waste collectors in the waste management system.

(d) ensure implementation of provisions of these rules by all local authorities;

(e) direct the town planning department of the State to ensure that master plan of every city in the State or Union territory provisions for setting up of solid waste processing and disposal facilities except for the cities who are members of common waste processing facility or regional sanitary landfill for a group of cities; and

(f) ensure identification and allocation of suitable land to the local bodies within one year for setting up of processing and disposal facilities for solid wastes and incorporate them in the master plans (land use plan) of the State or as the case may be, cities through metropolitan and district planning committees or town and country planning department;

(h) direct the town planning department of the State and local bodies to ensure that a separate space for segregation, storage, decentralised processing of solid waste is demarcated in the development plan for group housing or commercial, institutional or any other non-residential complex exceeding 200 dwelling or having a plot area exceeding 5,000 square meters;

(i) direct the developers of Special Economic Zone, Industrial Estate, Industrial Park to earmark at least five percent of the total area of the plot or minimum five plots or sheds for recovery and recycling facility.

(j) facilitate establishment of common regional sanitary land fill for a group of cities and towns falling within a distance of 50 km (or more) from the regional facility on a cost sharing basis and ensure professional management of such sanitary landfills;

(k) arrange for capacity building of local bodies in managing solid waste, segregation and transportation or processing of such waste at source;

(l) notify buffer zone for the solid waste processing and disposal facilities of more than five tons per day in consultation with the State Pollution Control Board; and

(m) start a scheme on registration of waste pickers and waste dealers.

12. Duties of District Magistrate or District Collector or Deputy Commissioner.- The District Magistrate or District Collector or as the case may be , the Deputy Commissioner shall, -

(a) facilitate identification and allocation of suitable land as per clause (f) of rules 11 for setting up solid waste processing and disposal facilities to local authorities in his district in close coordination with the Secretary-in-charge of State Urban Development Department within one year from the date of notification of these rules;

(b) review the performance of local bodies, at least once in a quarter on waste segregation, processing, treatment and disposal and take corrective measures in consultation with the Commissioner or Director of Municipal Administration or Director of local bodies and secretary-in-charge of the State Urban Development.

13. Duties of the Secretary–in-charge of Village Panchayats or Rural Development Department in the State and Union territory.- (1) The Secretary–in-charge of Village Panchayats or Rural Development Department in the State and Union territory shall have the same duties as the Secretary–in-charge, Urban Development in the States and Union territories, for the areas which are covered under these rules and are under their jurisdictions.

14. Duties of Central Pollution Control Board.-The Central Pollution Control Board shall, -

(a) co-ordinate with the State Pollution Control Boards and the Pollution Control Committees for implementation of these rules and adherence to the prescribed standards by local authorities;

(b) formulate the standards for ground water, ambient air, noise pollution, leachate in respect of all solid waste processing and disposal facilities;

(c) review environmental standards and norms prescribed for solid waste processing facilities or treatment technologies and update them as and when required;

(d) review through State Pollution Control Boards or Pollution Control Committees, at least once in a year, the implementation of prescribed environmental standards for solid waste processing facilities or treatment technologies and compile the data monitored by them;

(e) review the proposals of State Pollution Control Boards or Pollution Control Committees on use of any new technologies for processing, recycling and treatment of solid waste and prescribe performance standards, emission norms for the same within 6 months;

(f) monitor through State Pollution Control Boards or Pollution Control Committees the implementation of these rules by local bodies;

(g) prepare an annual report on implementation of these rules on the basis of reports received from State Pollution Control Boards and Committees and submit to the Ministry of Environment, Forest and Climate Change and the report shall also be put in public domain;

(h) publish guidelines for maintaining buffer zone restricting any residential, commercial or any other construction activity from the outer boundary of the waste processing and disposal facilities for different sizes of facilities handling more than five tons per day of solid waste;

(i) publish guidelines, from time to time, on environmental aspects of processing and disposal of solid waste to enable local bodies to comply with the provisions of these rules; and

(j) provide guidance to States or Union territories on inter-state movement of waste.

15. Duties and responsibilities of local authorities and village Panchayats of census towns and urban agglomerations.- The local authorities and Panchayats shall,-

(a) prepare a solid waste management plan as per state policy and strategy on solid waste management within six months from the date of notification of state policy and strategy and submit a copy to respective departments of State Government or Union territory Administration or agency authorised by the State Government or Union territory Administration;

(b) arrange for door to door collection of segregated solid waste from all households including slums and informal settlements, commercial, institutional and other non residential premises. From multi-storage buildings, large commercial complexes, malls, housing complexes, etc., this may be collected from the entry gate or any other designated location;

(c) establish a system to recognise organisations of waste pickers or informal waste collectors and promote and establish a system for integration of these authorised waste-pickers and waste collectors to facilitate their participation in solid waste management including door to door collection of waste;

(d) facilitate formation of Self Help Groups, provide identity cards and thereafter encourage integration in solid waste management including door to door collection of waste;

(e) frame bye-laws incorporating the provisions of these rules within one year from the date of notification of these rules and ensure timely implementation;

(f) prescribe from time to time user fee as deemed appropriate and collect the fee from the waste generators on its own or through authorised agency;

(g) direct waste generators not to litter i.e throw or dispose of any waste such as paper, water bottles, liquor bottles, soft drink canes, tetra packs, fruit peel, wrappers, etc., or burn or burry waste on streets, open public spaces, drains, waste bodies and to segregate the waste at source as prescribed under these rules and hand over the segregated waste to authorised the waste pickers or waste collectors authorised by the local body;

(h) setup material recovery facilities or secondary storage facilities with sufficient space for sorting of recyclable materials to enable informal or authorised waste pickers and waste collectors to separate recyclables from the waste and provide easy access to waste pickers and recyclers for collection of segregated recyclable waste such as paper, plastic, metal, glass, textile from the source of generation or from material recovery facilities; Bins for storage of bio-degradable wastes shall be painted green, those for storage of recyclable wastes shall be printed white and those for storage of other wastes shall be printed black;

(i) establish waste deposition centres for domestic hazardous waste and give direction for waste generators to deposit domestic hazardous wastes at this centre for its safe disposal. Such facility shall be established in a city or town in a manner that one centre is set up for the area of twenty square kilometers or part thereof and notify the timings of receiving domestic hazardous waste at such centres;

(j) ensure safe storage and transportation of the domestic hazardous waste to the hazardous waste disposal facility or as may be directed by the State Pollution Control Board or the Pollution Control Committee;

(k) direct street sweepers not to burn tree leaves collected from street sweeping and store them separately and handover to the waste collectors or agency authorised by local body;

(l) provide training on solid waste management to waste-pickers and waste collectors;

(m) collect waste from vegetable, fruit, flower, meat, poultry and fish market on day to day basis and promote setting up of decentralised compost plant or bio-methanation plant at suitable locations in the markets or in the vicinity of markets ensuring hygienic conditions;

(n) collect separately waste from sweeping of streets, lanes and by-lanes daily, or on alternate days or twice a week depending on the density of population, commercial activity and local situation;

(o) set up covered secondary storage facility for temporary storage of street sweepings and silt removed from surface drains in cases where direct collection of such waste into transport vehicles is not convenient. Waste so collected shall be collected and disposed of at regular intervals as decided by the local body;

(p) collect horticulture, parks and garden waste separately and process in the parks and gardens, as far as possible;

(q) transport segregated bio-degradable waste to the processing facilities like compost plant, bio-methanation plant or any such facility. Preference shall be given for on site processing of such waste;

(r) transport non-bio-degradable waste to the respective processing facility or material recovery facilities or secondary storage facility;

(s) transport construction and demolition waste as per the provisions of the Construction and Demolition Waste management Rules, 2016;

(t) involve communities in waste management and promotion of home composting, bio-gas generation, decentralised processing of waste at community level subject to control of odour and maintenance of hygienic conditions around the facility;

(u) phase out the use of chemical fertilizer in two years and use compost in all parks, gardens maintained by the local body and wherever possible in other places under its jurisdiction. Incentives may be provided to recycling initiatives by informal waste recycling sector.

(v) facilitate construction, operation and maintenance of solid waste processing facilities and associated infrastructure on their own or with private sector participation or through any agency for optimum utilisation of various components of solid waste adopting suitable technology including the following technologies and adhering to the guidelines issued by the Ministry of Urban Development from time to time and standards prescribed by the Central Pollution Control Board. Preference shall be given to decentralised processing to minimize transportation cost and environmental impacts such as-

a) bio-methanation, microbial composting, vermi-composting, anaerobic digestion or any other appropriate processing for bio-stabilisation of biodegradable wastes;

b) waste to energy processes including refused derived fuel for combustible fraction of waste or supply as feedstock to solid waste based power plants or cement kilns;

(w) undertake on their own or through any other agency construction, operation and maintenance of sanitary landfill and associated infrastructure as per Schedule 1 for disposal of residual wastes in a manner prescribed under these rules;

(x) make adequate provision of funds for capital investments as well as operation and maintenance of solid waste management services in the annual budget ensuring that funds for discretionary functions of the local body have been allocated only after meeting the requirement of necessary funds for solid waste management and other obligatory functions of the local body as per these rules;

(y) make an application in Form-I for grant of authorisation for setting up waste processing, treatment or disposal facility, if the volume of waste is exceeding five metric tones per day including sanitary landfills from the State Pollution Control Board or the Pollution Control Committee, as the case may be;

(z) submit application for renewal of authorisation at least sixty days before the expiry of the validity of authorisation;

(za) prepare and submit annual report in Form IV on or before the 30th April of the succeeding year to the Commissioner or Director, Municipal Administration or designated Officer;

(zb) the annual report shall then be sent to the Secretary -in-Charge of the State Urban Development Department or village panchayat or rural development department and to the respective State Pollution Control Board or Pollution Control Committee by the 31st May of every year;

(zc) educate workers including contract workers and supervisors for door to door collection of segregated waste and transporting the unmixed waste during primary and secondary transportation to processing or disposal facility;

(zd) ensure that the operator of a facility provides personal protection equipment including uniform, fluorescent jacket, hand gloves, raincoats, appropriate foot wear and masks to all workers handling solid waste and the same are used by the workforce;

(ze) ensure that provisions for setting up of centers for collection, segregation and storage of segregated wastes, are incorporated in building plan while granting approval of building plan of a group housing society or market complex; and

(zf) frame bye-laws and prescribe criteria for levying of spot fine for persons who litters or fails to comply with the provisions of these rules and delegate powers to officers or local bodies to levy spot fines as per the bye laws framed; and

(zg) create public awareness through information, education and communication campaign and educate the waste generators on the following; namely:-

(i) not to litter;

(ii) minimise generation of waste;

(iii) reuse the waste to the extent possible;

(iv) practice segregation of waste into bio–degradable, non-biodegradable (recyclable and combustible), sanitary waste and domestic hazardous wastes at source;

(v) practice home composting, vermi-composting, bio-gas generation or community level composting;

(vi) wrap securely used sanitary waste as and when generated in the pouches provided by the brand owners or a suitable wrapping as prescribed by the local body and place the same in the bin meant for non-biodegradable waste;

(vii) storage of segregated waste at source in different bins;

(viii) handover segregated waste to waste pickers, waste collectors, recyclers or waste collection agencies; and

(ix) pay monthly user fee or charges to waste collectors or local bodies or any other person authorised by the local body for sustainability of solid waste management.

(zh) stop land filling or dumping of mixed waste soon after the timeline as specified in rule 23 for setting up and operationalisation of sanitary landfill is over;

(zi) allow only the non-usable, non-recyclable, non-biodegradable, non-combustible and non-reactive inert waste and pre-processing rejects and residues from waste processing facilities to go to sanitary landfill and the sanitary landfill sites shall meet the specifications as given in Schedule–I, however, every effort shall be made to recycle or reuse the rejects to achieve the desired objective of zero waste going to landfill;

(zj) investigate and analyse all old open dumpsites and existing operational dumpsites for their potential of bio-mining and bio-remediation and wheresoever feasible, take necessary actions to bio-mine or bio-remediate the sites;

(zk) in absence of the potential of bio-mining and bio-remediation of dumpsite, it shall be scientifically capped as per landfill capping norms to prevent further damage to the environment.

16. Duties of State Pollution Control Board or Pollution Control Committee.- (1) The State Pollution Control Board or Pollution Control Committee shall,-

(a) enforce these rules in their State through local bodies in their respective jurisdiction and review implementation of these rules at least twice a year in close coordination with concerned Directorate of Municipal Administration or Secretary-in-charge of State Urban Development Department;

(b) monitor environmental standards and adherence to conditions as specified under the Schedule I and Schedule II for waste processing and disposal sites;

(c) examine the proposal for authorisation and make such inquiries as deemed fit, after the receipt of the application for the same in Form I from the local body or any other agency authorised by the local body;

(d) while examining the proposal for authorisation, the requirement of consents under respective enactments and views of other agencies like the State Urban Development Department, the Town and Country Planning Department, District Planning Committee or Metropolitan Area Planning Committee, as may be applicable, Airport or Airbase Authority, the Ground Water Board, Railways, power distribution companies, highway department and other relevant agencies shall be taken into consideration and they shall be given four weeks time to give their views, if any;

(e) issue authorisation within a period of sixty days in Form II to the local body or an operator of a facility or any other agency authorised by local body stipulating compliance criteria and environmental standards as specified in Schedules I and II including other conditions, as may be necessary;

(f) synchronise the validity of said authorisation with the validity of the consents;

(g) suspend or cancel the authorization issued under clause (a) any time, if the local body or operator of the facility fails to operate the facility as per the conditions stipulated:

provided that no such authorization shall be suspended or cancelled without giving notice to the local body or operator, as the case may be; and

(h) on receipt of application for renewal, renew the authorisation for next five years, after examining every application on merit and subject to the condition that the operator of the facility has fulfilled all the provisions of the rules, standards or conditions specified in the authorisation, consents or environment clearance.

(2) The State Pollution Control Board or Pollution Control Committee shall, after giving reasonable opportunity of being heard to the applicant and for reasons thereof to be recorded in writing, refuse to grant or renew an authorisation.

(3) In case of new technologies, where no standards have been prescribed by the Central Pollution Control Board, State Pollution Control Board or Pollution Control Committee, as the case may be, shall approach Central Pollution Control Board for getting standards specified.

(4) The State Pollution Control Board or the Pollution Control Committee, as the case may be, shall monitor the compliance of the standards as prescribed or laid down and treatment technology as approved and the conditions stipulated in the authorisation and the standards specified in Schedules I and II under these rules as and when deemed appropriate but not less than once in a year.

(5) The State Pollution Control Board or the Pollution Control Committee may give directions to local bodies for safe handling and disposal of domestic hazardous waste deposited by the waste generators at hazardous waste deposition facilities.

(6) The State Pollution Control Board or the Pollution Control Committee shall regulate Inter-State movement of waste.

17. Duty of manufacturers or brand owners of disposable products and sanitary napkins and diapers.- (1) All manufacturers of disposable products such as tin, glass, plastics packaging, etc., or brand owners who introduce such products in the market shall provide necessary financial assistance to local authorities for establishment of waste management system.

(2) All such brand owners who sell or market their products in such packaging material which are non-biodegradable shall put in place a system to collect back the packaging waste generated due to their production.

(3) Manufacturers or brand owners or marketing companies of sanitary napkins and diapers shall explore the possibility of using all recyclable materials in their products or they shall provide a pouch or wrapper for disposal of each napkin or diapers along with the packet of their sanitary products.

(4) All such manufacturers, brand owners or marketing companies shall educate the masses for wrapping and disposal of their products.

18. Duties of the industrial units located within one hundred km from the refused derived fuel and waste to energy plants based on solid waste- All industrial units using fuel and located within one hundred km from a solid waste based refused derived fuel plant shall make arrangements within six months from the date of notification of these rules to replace at least five percent of their fuel requirement by refused derived fuel so produced.

19. Criteria for Duties regarding setting-up solid waste processing and treatment facility.- (1) The department in- charge of the allocation of land assignment shall be responsible for providing suitable land for setting up of the solid waste processing and treatment facilities and notify such sites by the State Government or Union territory Administration.

(2) The operator of the facility shall design and set up the facility as per the technical guidelines issued by the Central Pollution Control Board in this regard from time to time and the manual on solid waste management prepared by the Ministry of Urban Development.

(3) The operator of the facility shall obtain necessary approvals from the State Pollution Control Board or Pollution Control Committee.

(4) The State Pollution Control Board or Pollution Control Committee shall monitor the environment standards of the operation of the solid waste processing and treatment facilities.

(5) The operator of the facility shall be responsible for the safe and environmentally sound operations of the solid waste processing and or treatment facilities as per the guidelines issued by the Central Pollution Control Board from time to time and the Manual on Municipal Solid Waste Management published by the Ministry of Urban Development and updated from time to time.

(6) The operator of the solid waste processing and treatment facility shall submit annual report in Form III each year by 30th April to the State Pollution Control Board or Pollution Committee and concerned local body.

20. Criteria and actions to be taken for solid waste management in hilly areas.- In the hilly areas, the duties and responsibilities of the local authorities shall be the same as mentioned in rule 15 with additional clauses as under:

(a) Construction of landfill on the hill shall be avoided. A transfer station at a suitable enclosed location shall be setup to collect residual waste from the processing facility and inert waste. A suitable land shall be identified in the plain areas down the hill within 25 kilometers for setting up sanitary landfill. The residual waste from the transfer station shall be disposed of at this sanitary landfill.

(b) In case of non-availability of such land, efforts shall be made to set up regional sanitary landfill for the inert and residual waste.

(c) Local body shall frame Bye-laws and prohibit citizen from littering wastes on the streets and give strict direction to the tourists not to dispose any waste such as paper, water bottles, liquor bottles, soft drink canes, tetra packs, any other plastic or paper waste on the streets or down the hills and instead direct to deposit such waste in the litter bins that shall be placed by the local body at all tourist destinations.

(d) Local body shall arrange to convey the provisions of solid waste management under the bye-laws to all tourists visiting the hilly areas at the entry point in the town as well as through the hotels, guest houses or like where they stay and by putting suitable hoardings at tourist destinations.

(e) Local body may levy solid waste management charge from the tourist at the entry point to make the solid waste management services sustainable.

(f) The department in- charge of the allocation of land assignment shall identify and allot suitable space on the hills for setting up decentralised waste processing facilities. Local body shall set up such facilities. Step garden system may be adopted for optimum utilisation of hill space.

21. Criteria for waste to energy process.- (1) Non recyclable waste having calorific value of 1500 K/cal/kg or more shall not be disposed of on landfills and shall only be utilised for generating energy either or through refuse derived fuel or by giving away as feed stock for preparing refuse derived fuel.

(2) High calorific wastes shall be used for co-processing in cement or thermal power plants.

(3) The local body or an operator of facility or an agency designated by them proposing to set up waste to energy plant of more than five tones per day processing capacity shall submit an application in Form-I to the State Pollution Control Board or Pollution Control Committee, as the case may be, for authorisation.

(4) The State Pollution Control Board or Pollution Control Committee, on receiving such application for setting up waste to energy facility, shall examine the same and grant permission within sixty days.

22. Time frame for implementation.- Necessary infrastructure for implementation of these rules shall be created by the local bodies and other concerned authorities, as the case may be, on their own, by directly or engaging agencies within the time frame specified below:

Sl. No.	Activity	Time limit from the date of notification of rules
(1)	(2)	(3)
1.	identification of suitable sites for setting up solid waste processing facilities	1 year

2.	identification of suitable sites for setting up common regional sanitary landfill facilities for suitable clusters of local authorities under 0.5 million population and for setting up common regional sanitary landfill facilities or stand alone sanitary landfill facilities by all local authorities having a population of 0.5 million or more .	1 year
3.	procurement of suitable sites for setting up solid waste processing facility and sanitary landfill facilities	2 years
4.	enforcing waste generators to practice segregation of bio degradable, recyclable, combustible, sanitary waste domestic hazardous and inert solid wastes at source ,	2 years
5.	Ensure door to door collection of segregated waste and its transportation in covered vehicles to processing or disposal facilities.	2 years
6.	ensure separate storage, collection and transportation of construction and demolition wastes	2 years
7.	setting up solid waste processing facilities by all local bodies having 100000 or more population	2 years
8.	Setting up solid waste processing facilities by local bodies and census towns below 100000 population.	3 years
9	setting up common or stand alone sanitary landfills by or for all local bodies having 0.5 million or more population for the disposal of only such residual wastes from the processing facilities as well as untreatable inert wastes as permitted under the Rules	3 years
10.	setting up common or regional sanitary landfills by all local bodies and census towns under 0.5 million population for the disposal of permitted waste under the rules	3years
11.	bio-remediation or capping of old and abandoned dump sites	5years

23. State Level Advisory Body. – (1) Every Department in-charge of local bodies of the concerned State Government or Union territory administration shall constitute a State Level Advisory Body within six months from the date of notification of these rules comprising the following members, namely:-

Sl. No	**Designation**	**Member**
(1)	**(2)**	**(3)**
1.	Secretary, Department of Urban Development orLocal self government department of the State	Chairperson, ex-officio
2.	One representative of Panchayats or Rural development Department not below the rank of Joint Secretary to State Government	Member, ex-officio
3.	one representative of Revenue Department of State Government	Member,ex-officio
4.	One representative from Ministry of Environment, Forest and Climate Change Government of India	Member, ex-officio

5.	One representative from Ministry of Urban Development, Government of India	Member, ex-officio
6.	One representative from Ministry of Rural Development, Government of India	Member, ex-officio
7.	One representative from the Central Pollution Control Board	Member, ex-officio
8.	One representative from the State Pollution Control Board or Pollution Control Committee	Member, ex-officio
9.	One representative from Indian Institute of Technology or National Institute of Technology	Member,Ex-officio
10.	Chief town planner of the state	Member
11.	Three representatives from the local bodies by rotation	Member
12.	Two representatives from census towns or urban agglomerations by rotation.	Member
13.	One representative from reputed Non-Governmental Organisation or Civil Society working for the waste pickers or informal recycler or solid waste management	Member
14.	One representative from a body representing Industries at the State or Central level	Member
15.	one representative from waste recycling industry	member
16.	Two subject experts	Member
17.	Co-opt one representative each from agriculture department, and labour department of State Government.	Member

(2) The State Level Advisory Body shall meet at least one in every six months to review the matters related to implementation of these rules, state policy and strategy on solid waste management and give advice to state government for taking measures that are necessary for expeditious and appropriate implementation of these rules.

(3) The copies of the review report shall be forwarded to the State Pollution Control Board or Pollution Control Committee for necessary action.

24. Annual report.- (1) The operator of facility shall submit the annual report to the local body in Form-III on or before the 30th day of April every year.

(2) The local body shall submit its annual report in Form-IV to State P Control Board or P Committee and the Secretary-in-Charge of the Department of Urban Development of the concerned State or Union Territory in case of metropolitan city and to the Director of Municipal Administration or Commissioner of Municipal Administration or Officer in -Charge of Urban local bodies in the state in case of all other local bodies of state on or before the 30th day of June every year

(3) Each State Pollution Control Board or Pollution Control Committee as the case may be, shall prepare and submit the consolidated annual report to the Central Pollution Control Board and Ministry of Urban Development on the implementation of these rules and action taken against non complying local body by the 31stday of July of each year in Form-V.

(4) The Central Pollution Control Board shall prepare a consolidated annual review report on the status of implementation of these rules by local bodies in the country and forward the same to the Ministry of Urban Development

and Ministry of Environment, Forest and Climate Change, along with its recommendations before the 31st day of August each year.

(5) The annual report shall be reviewed by the Ministry of Environment, Forest and Climate Change during the meeting of Central Monitoring Committee.

25. Accident reporting- In case of an accident at any solid waste processing or treatment or disposal facility or landfill site, the Officer- in- charge of the facility shall report to the local body in Form-VI and the local body shall review and issue instructions if any, to the in- charge of the facility.

SCHEDULE I

[see rule 15 (w),(zi), 16 (1) (b) (e), 16 (4)]

Specifications for Sanitary Landfills

(A) Criteria for site selection.-

(i) The department in the business allocation of land assignment shall provide suitable site for setting up of the solid waste processing and treatment facilities and notify such sites.

(ii) The sanitary landfill site shall be planned, designed and developed with proper documentation of construction plan as well as a closure planin a phased manner. In case a new landfill facility is being established adjoining an existing landfill site, the closure plan of existing landfill should form a part of the proposal of such new landfill.

(iii) The landfill sites shall be selected to make use of nearby wastes processing facilities. Otherwise, wastes processing facility shall be planned as an integral part of the landfill site.

(iv) Landfill sites shall be set up as per the guidelines of the Ministry of Urban Development, Government of India and Central Pollution Control Board.

(v) The existing landfill sites which are in use for more than five years shall be improved in accordance with the specifications given in this Schedule.

(vi) The landfill site shall be large enough to last for at least 20-25 years and shall develop 'landfill cells' in a phased manner to avoid water logging and misuse.

(vii) The landfill site shall be 100 meter away from river, 200 meter from a pond, 200 meter from Highways, Habitations, Public Parks and water supply wells and 20 km away from Airports or Airbase. However in a special case, landfill site may be set up within a distance of 10 and 20 km away from the Airport/Airbase after obtaining no objection certificate from the civil aviation authority/ Air force as the case may be. The Landfill site shall not be permitted within the flood plains as recorded for the last 100 years, zone of coastal regulation, wetland, Critical habitat areas, sensitive eco-fragile areas..

(viii) The sites for landfill and processing and disposal of solid waste shall be incorporated in the Town Planning Department's land-use plans.

(ix) A buffer zone of no development shall be maintained around solid waste processing and disposal facility, exceeding five Tonnes per day of installed capacity. This will be maintained within the total area of the solid waste processing and disposal facility. The buffer zone shall be prescribed on case to case basis by the local body in consultation with concerned State Pollution Control Board.

(x) The biomedical waste shall be disposed of in accordance with the Bio-medical Waste Management Rules, 2016, as amended from time to time . The hazardous waste shall be managed in accordance with the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016, as amended from time to time. The E-waste shall be managed in accordance with the e-Waste (Management) Rules, 2016 as amended from time to time.

(xi) Temporary storage facility for solid waste shall be established in each landfill site to accommodate the waste in case of non- operation of waste processing and during emergency or natural calamities.

(B) Criteria for development of facilities at the sanitary landfills.-

(i) Landfill site shall be fenced or hedged and provided with proper gate to monitor incoming vehicles, to prevent entry of unauthorised persons and stray animals

(ii) The approach and / internal roads shall be concreted or paved so as to avoid generation of dust particles due to vehicular movement and shall be so designed to ensure free movement of vehicles and other machinery.

(iii) The landfill site shall have waste inspection facility to monitor waste brought in for landfilling h, office facility for record keeping and shelter for keeping equipment and machinery including pollution monitoring equipment. The operator of the facility shall maintain record of waste received, processed and disposed.

(iv) Provisions like weigh bridge to measure quantity of waste brought at landfill site, fire protection equipment and other facilities as may be required shall be provided.

(v) Utilities such as drinking water and sanitary facilities (preferably washing/bathing facilities for workers) and lighting arrangements for easy landfill operations during night hours shall be provided.

(vi) Safety provisions including health inspections of workers at landfill sites shall be carried out made.

(vii) Provisions for parking, cleaning, washing of transport vehicles carrying solid waste shall be provided. The wastewater so generated shall be treated to meet the prescribed standards.

(C) Criteria for specifications for land filling operations and closure on completion of land filling.-

(i) Waste for land filling shall be compacted in thin layers using heavy compactors to achieve high density of the waste. In high rainfall areas where heavy compactors cannot be used, alternative measures shall be adopted.

(ii) Till the time waste processing facilities for composting or recycling or energy recovery are set up, the waste shall be sent to the sanitary landfill. The landfill cell shall be covered at the end of each working day with minimum 10 cm of soil, inert debris or construction material..

(iii) Prior to the commencement of monsoon season, an intermediate cover of 40-65 cm thickness of soil shall be placed on the landfill with proper compaction and grading to prevent infiltration during monsoon. Proper drainage shall be constructed to divert run-off away from the active cell of the landfill.

(iv) After completion of landfill, a final cover shall be designed to minimise infiltration and erosion. The final cover shall meet the following specifications, namely :--

a) The final cover shall have a barrier soil layer comprising of 60 cm of clay or amended soil with permeability coefficient less than 1 x 10^{-7} cm/sec.

b) On top of the barrier soil layer, there shall be a drainage layer of 15 cm.

c) On top of the drainage layer, there shall be a vegetative layer of 45 cm to support natural plant growth and to minimise erosion.

(D) Criteria for pollution prevention.-In order to prevent pollution from landfill operations, the following provisions shall be made, namely:-

(i) The storm water drain shall be designed and constructed in such a way that the surface runoff water is diverted from the landfilling site and leachates from solid waste locations do not get mixed with the surface runoff water. Provisions for diversion of storm water discharge drains shall be made to minimise leachate generation and prevent pollution of surface water and also for avoiding flooding and creation of marshy conditions.

(ii) Non-permeable lining system at the base and walls of waste disposal area. For landfill receiving residues of waste processing facilities or mixed waste or waste having contamination of hazardous materials (such as aerosols, bleaches, polishes, batteries, waste oils, paint products and pesticides) shall have liner of composite barrier of 1.5 mm thick high density polyethylene (HDPE) geo-membrane or geo-synthetic liners, or equivalent, overlying 90 cm of soil (clay or amended soil) having permeability coefficient not greater than 1 x 10-7 cm/sec. The highest level of water table shall be at least two meter below the base of clay or amended soil barrier layer provided at the bottom of landfills.

(iii) Provisions for management of leachates including its collection and treatment shall be made. The treated leachate shall be recycled or utilized as permitted, otherwise shall be released into the sewerage line, after meeting the standards specified in Schedule- II**.**. In no case, leachate shall be released into open environment.

(iv) Arrangement shall be made to prevent leachate runoff from landfill area entering any drain, stream, river, lake or pond. In case of mixing of runoff water with leachate or solid waste, the entire mixed water shall be treated by the concern authority.

(E) Criteria for water quality monitoring.-

(i) Before establishing any landfill site, baseline data of ground water quality in the area shall be collected and kept in record for future reference. The ground water quality within 50 meter of the periphery of landfill site shall be periodically monitored covering different seasons in a year that is, summer, monsoon and post-monsoon period to ensure that the ground water is not contaminated.

(ii) Usage of groundwater in and around landfill sites for any purpose (including drinking and irrigation) shall be considered only after ensuring its quality. The following specifications for drinking water quality shall apply for monitoring purpose, namely :-

S. No.	Parameters	IS 10500:2012, Edition 2.2(2003-09) Desirable limit (mg/l except for pH)
(1)	(2)`	(3)
	Arsenic	0.01
	Cadmium	0.01
	Chromium(as Cr^{6+})	0.05
	Copper	0.05
	Cyanide	0.05
	Lead	0.05
	Mercury	0.001
	Nickel	-
	Nitrate as NO_3	45.0
	pH	6.5-8.5
	Iron	0.3
	Total hardness (as $CaCO_3$)	300.0
	Chlorides	250
	Dissolved solids	500
	Phenolic compounds (as C_6H_5OH)	0.001
	Zinc	5.0
	Sulphate (as SO_4)	200

(F) Criteria for ambient air quality monitoring.-

(i) Landfill gas control system including gas collection system shall be installed at landfill site to minimize odour, prevent off-site migration of gases, to protect vegetation planted on the rehabilitated landfill surface. For enhancing landfill gas recovery, use of geomembranes in cover systems along with gas collection wells should be considered.

(ii) The concentration of methane gas generated at landfill site shall not exceed 25 per cent of the lower explosive limit (LEL).

(iii) The landfill gas from the collection facility at a landfill site shall be utilized for either direct thermal applications or power generation, as per viability. Otherwise, landfill gas shall be burnt (flared) and shall not be allowed to escape directly to the atmosphere or for illegal tapping. Passive venting shall be allowed in case if its utilisation or flaring is not possible.

(iv) Ambient air quality at the landfill site and at the vicinity shall be regularly monitored. Ambient air quality shall

meet the standards prescribed by the Central Pollution Control Board for Industrial area.

G. Criteria for plantation at landfill Site.- A vegetative cover shall be provided over the completed site in accordance with the following specifications, namely:-

(a) Locally adopted non-edible perennial plants that are resistant to drought and extreme temperatures shall be planted;

(b) The selection of plants should be of such variety that their roots do not penetrate more than 30 cms. This condition shall apply till the landfill is stabilized;

(c) Selected plants shall have ability to thrive on low-nutrient soil with minimum nutrient addition;

(d) Plantation to be made in sufficient density to minimise soil erosion.

(e) Green belts shall be developed all around the boundary of the landfill in consultation with State Pollution Control Boards or Pollution Control Committees .

H. Criteria for post-care of landfill site.- (1) The post-closure care of landfill site shall be conducted for at least fifteen years and long term monitoring or care plan shall consist of the following, namely :-'

(a) Maintaining the integrity and effectiveness of final cover, making repairs and preventing run-on and run-off from eroding or otherwise damaging the final cover;

(b) Monitoring leachate collection system in accordance with the requirement;

(c) Monitoring of ground water in and around landfill;

(d) Maintaining and operating the landfill gas collection system to meet the standards.

(2) Use of closed landfill sites after fifteen years of post-closure monitoring can be considered for human settlement or otherwise only after ensuring that gaseous emission and leachate quality analysis complies with the specified standards and the soil stability is ensured.

I. Criteria for special provisions for hilly areas.-Cities and towns located on hills shall have location-specific methods evolved for final disposal of solid waste by the local body with the approval of the concerned State Pollution Control Board or the Pollution Control Committee. The local body shall set up processing facilities for utilisation of biodegradable organic waste. The non-biodegradable recyclable materials shall be stored and sent for recycling periodically. The inert and non-biodegradable waste shall be used for building roads or filling-up of appropriate areas on hills. In case of constraints in finding adequate land in hilly areas, waste not suitable for road-laying or filling up shall be disposed of in regional landfills in plain areas.

J. Closure and Rehabilitation of Old Dumps- Solid waste dumps which have reached their full capacity or those which will not receive additional waste after setting up of new and properly designed landfills should be closed and rehabilitated by examining the following options:

(i) Reduction of waste by bio mining and waste processing followed by placement of residues in new landfills or capping as in (ii) below.

(i). Capping with solid waste cover or solid waste cover enhanced with geomembrane to enable collection and flaring / utilisation of greenhouse gases.

(iii) Capping as in (ii) above with additional measures (in alluvial and other coarse grained soils) such as cut-off walls and extraction wells for pumping and treating contaminated ground water.

(iv) Any other method suitable for reducing environmental impact to acceptable level.

SCHEDULE II

[see rule 16 (1), (b), (e), 16 (4))

Standards of processing and treatment of solid waste

A. Standards for composting.- The waste processing facilities shall include composting as one of the technologies for processing of bio degradable waste. In order to prevent pollution from compost plant, the following shall be complied with namely :-

(a) The incoming organic waste at site shall be stored properly prior to further processing. To the extent possible, the waste storage area should be covered. If, such storage is done in an open area, it shall be provided with impermeable base with facility for collection of leachate and surface water run-off into lined drains leading to a leachate treatment and disposal facility;

(b) Necessary precaution shall be taken to minimise nuisance of odour, flies, rodents, bird menace and fire hazard;

(c) In case of breakdown or maintenance of plant, waste intake shall be stopped and arrangements be worked out for diversion of waste to the temporary processing site or temporary landfill sites which will be again reprocessed when plant is in order;

(d) Pre-process and post-process rejects shall be removed from the processing facility on regular basis and shall not be allowed to pile at the site. Recyclables shall be routed through appropriate vendors. The non-recyclable high calorific fractions to be segregated and sent to waste to energy or for RDF production, co-processing in cement plants or to thermal power plants. Only rejects from all processes shall be sent for sanitary landfill site(s).

(e) The windrow area shall be provided with impermeable base. Such a base shall be made of concrete or compacted clay of 50 cm thick having permeability coefficient less than 10^{-7} cm/sec. The base shall be provided with 1 to 2 per cent slope and circled by lined drains for collection of leachate or surface run-off;

(f) Ambient air quality monitoring shall be regularly carried out. Odurnuisance at down-wind direction on the boundary of processing plant shall also be checked regularly.

(g) Leachate shall be re-circulated in compost plant for moisture maintenance.

(h) The end product compost shall meet the standards prescribed under Fertilizer Control Order notified from time to time.

(i) In order to ensure safe application of compost, the following specifications for compost quality shall be met, namely:-

Parameters	**Organic Compost (FCO 2009)**	**Phosphate Rich Organic Manure (FCO 2013)**
(1)	**(2)**	**(3)**
Arsenic (mg/Kg)	10.00	10.00
Cadmium (mg/Kg)	5.00	5.00
Chromium (mg/Kg)	50.00	50.00
Copper (mg/Kg)	300.00	300.00
Lead (mg/Kg)	100.00	100.00
Mercury (mg/Kg)	0.15	0.15
Nickel (mg/Kg)	50.00	50.00
Zinc (mg/Kg)	1000.00	1000.00
C/N ratio	<20	Less than 20:1
pH	6.5-7.5	(1:5 solution) maximum 6.7
Moisture, percent by weight, maximum	15.0-25.0	25.0
Bulk density (g/cm^3)	<1.0	Less than 1.6
Total Organic Carbon, per cent by weight, minimum	12.0	7.9

Total Nitrogen (as N), per cent by weight, minimum	0.8	0.4
Total Phosphate (as $P_2 0_5$) percent by weight, minimum	0.4	10.4
Total Potassium (as $K_2 0$), percent by weight, minimum	0.4	-
Colour	Dark brown to black	-
Odour	Absence of foul Odor	-
Particle size	Minimum 90% material should pass through 4.0 mm IS sieve	Minimum 90% material should pass through 4.0 mm IS sieve
Conductivity (as dsm-1), not more than	4.0	8.2

* Compost (final product) exceeding the above stated concentration limits shall not be used for food crops. However, it may be utilized for purposes other than growing food crops.

B. Standards for treated leachates.-The disposal of treated leachates shall meet the following standards, namely:-

S. No	Parameter	Standards (Mode of Disposal)		
		Inland surface water	Public sewers	Land disposal
(1)	(2)	(3)	(4)	(5)
1.	Suspended solids, mg/l, max	100	600	200
2.	Dissolved solids (inorganic) mg/l, max.	2100	2100	2100
3	pH value	5.5 to 9.0	5.5 to 9.0	5.5 to 9.0
4	Ammonical nitrogen (as N), mg/l, max.	50	50	-
5	Total Kjeldahl nitrogen (as N), mg/l, max.	100	-	-
6	Biochemical oxygen demand (3 days at 27^0 C) max.(mg/l)	30	350	100
7	Chemical oxygen demand, mg/l, max.	250	-	-
8	Arsenic (as As), mg/l, max	0.2	0.2	0.2
9	Mercury (as Hg), mg/l, max	0.01	0.01	-
10	Lead (as Pb), mg/l, max	0.1	1.0	-
11	Cadmium (as Cd), mg/l, max	2.0	1.0	-

12	Total Chromium (as Cr), mg/l, max.	2.0	2.0	-
13	Copper (as Cu), mg/l, max.	3.0	3.0	-
14	Zinc (as Zn), mg/l, max.	5.0	15	-
15	Nickel (as Ni), mg/l, max	3.0	3.0	-
16	Cyanide (as CN), mg/l, max.	0.2	2.0	0.2
17	Chloride (as Cl), mg/l, max.	1000	1000	600
18	Fluoride (as F), mg/l, max	2.0	1.5	-
19	Phenolic compounds (as C_6H_5OH) mg/l, max.	1.0	5.0	-

Note : While discharging treated leachates into inland surface waters, quantity of leachates being discharged and the quantity of dilution water available in the receiving water body shall be given due consideration.

C. Standards for incineration: The Emission from incinerators /thermal technologies in Solid Waste treatment/disposal facility shall meet the following standards, namely:-

Parameter	**Emission standard**	
(1)	**(2)**	**(3)**
Particulates	50 mg/Nm^3	Standard refers to half hourly average value
HCl	50 mg/Nm^3	Standard refers to half hourly average value
SO2	200 mg/Nm^3	Standard refers to half hourly average value
CO	100 mg/Nm^3	Standard refers to half hourly average value
	50 mg/Nm^3	Standard refers to daily average value
Total Organic Carbon	20 mg/Nm^3	Standard refers to half hourly average value
HF	4 mg/Nm^3	Standard refers to half hourly average value
NOx (NO and NO2 expressed as NO2)	400 mg/Nm^3	Standard refers to half hourly average value
Total dioxins and furans	0.1 ng TEQ/Nm^3	Standard refers to 6-8 hours sampling. Please refer guidelines for 17 concerned congeners for toxic equivalence values to arrive at total toxic equivalence.
Cd + Th + their compounds	0.05 mg/Nm^3	Standard refers to sampling time anywhere between 30 minutes and 8 hours.
Hg and its compounds	0.05 mg/Nm^3	Standard refers to sampling time anywhere between 30 minutes and 8 hours.

Sb + As + Pb + Cr + Co + Cu + Mn + Ni + V + their compounds	0.5 mg/Nm^3	Standard refers to sampling time anywhere between 30 minutes and 8 hours.
Note.- *All values corrected to 11% oxygen on a dry basis.*		

Note:

(a) Suitably designed pollution control devices shall be installed or retrofitted with the incinerator to achieve the above emission limits..

(b) Waste to be incinerated shall not be chemically treated with any chlorinated disinfectants.

(c) Incineration of chlorinated plastics shall be phased out within two years.

(d) if the concentation of toxic metals in incineration ash exceeds the limits specified in the Hazardous Waste (Management, Handling and Trans boundary Movement) Rules, 2008, as amended from time to time, the ash shall be sent to the hazardous waste treatment, storage and disposal fcaility.

(e) Only low sulphur fuel like LDO, LSHS, Diesel**,** bio-mass, coal, LNG, CNG, RDF and bio-gas shall be used as fuel in the incinerator.

(f) The CO2 concentration in tail gas shall not be more than 7%.

(g) All the facilities in twin chamber incinerators shall be designed to achieve a minimum temperature of 950^0C in secondary combustion chamber and with a gas residence time in secondary combustion chamber not less than 2 (two) seconds.

(h) Incineration plants shall be operated (combustion chambers) with such temperature, retention time and turbulence, as to achieve total Organic Carbon (TOC) content in the slag and bottom ash less than 3%, or the loss on ignition is less than 5% of the dry weight.

(i) Odour from sites shall be managed as per guidelines of CPCB issued from time to time

FORM – I

[see rule 15 (y) 16 (1) (c), 21(3)]

Application for obtaining authorisation under solid waste management rules

for processing/recycling/treatment and disposal of solid waste

To,

The Member Secretary,

State Pollution Control Board or Pollution Control Committee,

of…....

Sir,

I/We hereby apply for authorisation under the Solid Waste Management Rules, 2016 for processing, recycling, treatment and disposal of solid waste.

1.	Name of the local body/agency appointed by them/ operator of facility	
2.	Correspondence address Telephone No. Fax No. ,e-mail:	

3.	Nodal Officer & designation(Officer authorised by the local body or agency responsible for operation of processing/ treatment or disposal facility)	
4.	Authorisation required for setting up and operation of the facility (Please tick mark)	waste processing recycling treatment disposal at landfill
5.	Attach copies of the Documents Site clearance (local body) Proof of Environmental Clearance Consent for establishment Agreement between municipal authority and operating agency Investment on the project and expected return	
6.	**Processing/recycling/treatment of solid waste** (i) Total Quantity of waste to be processed per day Quantity of waste to be recycled Quantity of waste to be treated Quantity of waste to be disposed into landfill (ii)Utilisation programme for waste processed (Product utilisation) (iii)Methodology for disposal (attach details) Quantity of leachate Treatment technology for leachate (iv)Measures to be taken for prevention and control of environmental pollution (v)Measures to be taken for safety of workers working in the plant (vi)Details on solid waste processing/recycling/ treatment/disposal facility (to be attached)	
7.	**Disposal of solid waste** Number of sites identified Quantity of waste to be disposed per day Details of methodology or criteria followed for site selection (attach) Details of existing site under operation Methodology and operational details of landfilling Measures taken to check environmental pollution	
8	Any other information.	

Date: Signature:

Place: Designation

Form- II

[see rule 16 (1) (e)]

Format for issue of authorisation

File No.: _____

Dated:_____

Authorisation No_____

To

Ref: Your application number _____dt. _____

The _____State Pollution Control Board/Pollution Control Committee after examining the proposal hereby authorises_____ having administrative office at _____to set up and operate waste processing/recycling/ treatment/disposal facility at_____

The authorisation is hereby granted to operate the facility for processing, recycling, treatment and disposal of solid waste.

The authorisation is subject to the terms and conditions stated below and such conditions as may be otherwise specified in these rules and the standards laid down in Schedules I and II under these rules.

The _____State Pollution Control Board/Pollution Control Committees of the UT may, at any time, revoke any of the conditions applicable under the authorisation and shall communicate the same in writing.

Any violation of the provision of the Solid Waste Management Rules, 2016will attract the penal provision of the Environment (Protection) Act, 1986 (29 of 1986).

(Member Secretary)

State Pollution Control Board/Pollution Control Committee of the UT

Form – III

[see rule 19 (6), 24 (1)]

Format of annual report to be submitted by the operator of facility to the local body

1	Name of the City/Town and State	
2	Population	
3	Area in sq. kilometers	
4	Name & Address of the local body Telephone No. Fax No. E-mail:	
5	Name and address of operator of the facility	
6	Name of officer in-charge of the facility Phone No: Fax No: E-mail:	

7	Number of households in the city/town , Number of non-residential premises in the city Number of election/ administrative wards in the city/town	
8	Quantity of Solid waste	
	Estimated Quantity of solid waste generated in the local body area per day in metric tones	/tpd
	Quantity of solid waste collected per day	/tpd
	Per capita waste collected per day	/gm/day
	Quantity of solid waste processed	/tpd
	Quantity of solid waste disposed at landfill	/tpd
9	Status of Solid Waste Management (SWM) service	
	Segregation and storage of waste at source Whether solid waste is stored at source in domestic/commercial/ institutional bins If yes, Percentage of households practice storage of waste at source in domestic bins Percentage of non-residential premises practice storage of waste at source in commercial /institutional bins Percentage of households dispose of throw solid waste on the streets Percentage of non-residential premises dispose of throw solid waste on the streets Whether solid waste is stored at source in a segregated form If yes, Percentage of premises segregating the waste at source	 Yes/No % % % % Yes/No %
	Door to Door Collection of solid waste	
	Whether door to door collection (D2D) of solid waste is being done in the city/town	Yes/No
	if yes	
	Number of wards covered in D2D collection of waste	
	No. of households covered	
	No. of non-residential premises including commercial establishments ,hotels, restaurants educational institutions/ offices etc covered	

	Percentage of residential and non-residential premises covered in door to door collection through : Motorized vehicle Containerized tricycle/handcart Other device	% % %
	If not, method of primary collection adopted	
	Sweeping of streets	
	Length of roads, streets, lanes, bye-lanes in the city that need to be cleaned	km
	Frequency of street sweepings and percentage of population covered	frequency: Daily / Alternate days / Twice a week / Occasionally % of population covered
	Tools used Manual sweeping Mechanical sweeping Whether long handle broom used by sanitation workers Whether each sanitation worker is given handcart/tricycle for collection of waste Whether handcart / tricycle is containerized Whether the collection tool synchronizes with collection/ waste storage containers utilized	% % Yes/No Yes/No Yes/No Yes/No
.	Secondary Waste Storage facilities	
	No. and type of waste storage depots in the city/town Open waste storage sites Masonry bins Cement concrete cylinder bins Dhalao/covered rooms/space Covered metal/plastic containers Upto 1.1 m^3 bins 2 to 5 m^3 bins Above 5m^3 containers Bin-less city	No. Capacity in m^3
	Bin/ population ratio	

	Ward wise details of waste storage depots (attach) : Ward No: Area: Population: No. of bins placed Total volume of bins placed		
	Total storage capacity of waste storage facilities in cubic meters		
	Total waste actually stored at the waste storage depots daily		
	Give frequency of collection of waste from the depots Number of bins cleared	Frequency	No. of bins
		Daily	
		Alternate day	
		Twice a week	
		Once a week	
		Occasionally	
	Whether storage depots have facility for storage of segregated waste in green, blue and black bins	Yes/ No (if yes, add details) No. of green bins: No. of blue bins: No. of black bins:	
	Whether lifting of solid waste from storage depots is manual or mechanical. Give percentage	(%) of Manual Lifting of SOLID WASTE	%
		(%) of Mechanical lifting	%
	If mechanical – specify the method used	front-end loaders/ Top loaders	
	Whether solid waste is lifted from door to door and transported to treatment plant directly in a segregated form	Yes/ No (if yes, specify)	

	Waste Transportation per day Type and Number of vehicles used (pl tick or add)	No. Trips made waste transported
	Animal cart Tractors Non tipping Truck Tipping Truck Dumper Placers Refuse collectors Compactors Others JCB/loader	
	Frequency of transportation of waste	Frequency (%) of waste transported Daily Alternate day Twice a week Once a week Occasionally
	Quantity of waste transported each day	/tpd
	Percentage of total waste transported daily	%
	Waste Treatment Technologies used Whether solid waste is processed	Yes/No
	If yes, Quantity of waste processed daily Land(s) available with the local body for waste processing (in Hectares)	/tpd
	Land currently utilized for waste processing	
	Solid waste processing facilities in operation	
	Solid waste processing facilities under construction Distance of processing facilities from city/town boundary	
	Details of technologies adopted	

	Composting ,	Qty. raw material processed Qty. final product produced Qty. sold Qty. of residual waste landfilled
	vermi composting	Qty. raw material processed Qty. final product produced Qty. sold Quantity of residual waste landfilled
	Bio-methanation	Qty. raw material processed Qty. final product produced Qty. sold Quantity of residual waste landfilled
	Refuse Derived Fuel	Qty. raw material processed Qty. final product produced Qty. sold Quantity of residual waste landfilled
	Waste to Energy technology such as incineration, gasification, pyrolysis or any other technology (give detail)	Qty. raw material processed Qty. final product produced Qty. sold Quantity of residual waste landfilled
	Co-processing	Qty. raw material processed
	Combustible waste supplied to cement plant	
	Combustible waste supplied to solid waste based power plants	
	Others	Qty.
	Solid waste disposal facilities	
	No. of dumpsites sites available with the local body	
	No. of sanitary landfill sites available with the local body Area of each such sites available for waste disposal	
	Area of land currently used for waste disposal	
	Distance of dumpsite/landfill facility from city/town	kms
	Distance from the nearest habitation	kms
	Distance from water body	kms

	Distance from state/national highway	kms
	Distance from Airport	kms
	Distance from important religious places or historical monument	kms
	Whether it falls in flood prone area	Yes/No
	Whether it falls in earthquake fault line area	Yes/No
	Quantity of waste landfilled each day	tpd
	Whether landfill site is fenced	Yes / No
	Whether Lighting facility is available on site Whether Weigh bridge facility available	Yes / No Yes / No
	Vehicles and equipments used at landfill (specify)	Bulldozer, Compacters etc. available
	Manpower deployed at landfill site	Yes/No (if yes, attach details)
	Whether covering is done on daily basis	Yes/No
	If not, Frequency of covering the waste deposited at the landfill	
	Cover material used	
	Whether adequate covering material is available	Yes/No
	Provisions for gas venting provided	Yes/No, (if yes, attach technical data sheet)
	Provision for leachate collection	Yes/No, (if yes, attach technical data sheet)
10	Whether an Action Plan has been prepared for improving solid waste management practices in the city	Yes/No (if Yes attach Action Plan details)
11	What separate provisions are made for : Dairy related activities : Slaughter houses waste : C&D waste (construction debris) :	Attach details on Proposals, Steps taken, Yes/No Yes/No Yes/No
12	Details of Post Closure Plan	Attach Plan
13	How many slums are identified and whether these are provided with Solid Waste Management facilities :	Yes/ No (if Yes, attach details)
14	Give details of manpower deployed for collection including street sweeping, secondary storage, transportation, processing and disposal of waste	

15	Mention briefly, the difficulties being experienced by the local body in complying with provisions of these rules	
16	Mention briefly, if any innovative idea is implemented to tackle a problem related to solid waste, which could be replicated by other local bodies.

Project	Replacement of HP Bypass Steam valve and Spray control valve
Customer	MAITHON POWER LIMITED
Customer ref. No.	E-mail
Proposal #	210601-053333-8
Date of issue	July 04, 2023

TECHNICAL DISCUSSION FOR COMPLETE VALVE UPGRADE WITH EROSOLVE TRIM

Existing Valve Details:

Tag no.	BP1 & BP2
Service	HP turbine Bypass Valve
Valve Model	ARS-140

Existing valve issues

M/s. Maithon Power Ltd reported minor seat leakage on HP bypass valve. HP bypass valve actuator piston rod has broken two times and Actuator seals are also damaging that leading to leakage of hydraulic oil into atmosphere.

Proposed solution: ARS EroSolve upgrade

ARS high-pressure turbine bypass valve is upgraded with improved features that can assure better performance and reliability. EroSolve trim included in the ARS valve will extend the life of trim sealing surfaces against wet steam impingement erosion by slowing the wear, and thus longer seat leakage performance. The proposed upgrade solution adds value by addressing the following,

- Engineered and Improved minimum opening to protect plug sealing surface keeping flashing condensate away; reduces erosion
- Specially designed wing type stem minimizes vibration and extends life.
- Hard facing on erosion prone surfaces of plug and seat ring: fights erosion
- Special alloy coating; extends trim life.
- Optimized body shape to minimize thermal stress and multi-function contoured cage eliminates thermal shocks.
- Improved spray nozzle design; superior evaporation.
- **Quick change seat and replaceable trim components are incorporated. No welding and PWHT required which eases maintenance.**

IMI CCI recommends upgrading the complete HP bypass steam control valve(ARS) including actuator without accessories to ensure proper functionality. The existing valve assembly can be removed from the pipe by cutting at 50 mm upstream and downstream of the existing welding joint between the valve inlet and outlet. The Inlet and outlet nozzle of the valves shall be supplied with an additional length of 50 mm to compensate for the length.

STANDARDS FOR ROAD-RAIL LEVEL CROSSINGS

1. INTRODUCTION

1.1. Road-rail level crossings, however, adequately designed and constructed, are accident prone. However, where it is not possible from engineering and economic considerations to provide road over/under bridges, and level crossings have to be provided, the standards given here under should be followed in the interest of maximum safety.

1.2. These standards are intended primarily to be applied to new constructions or where an existing crossing is being reconstructed. Existing level crossings need not be altered merely to suit these standards.

1.3. The draft of this standard had been approved by the Specifications and Standards Committee at its meeting held at New Delhi in September 1961. Thereafter, as suggested by the Committee, it was forwarded to the Roads Wing of the Ministry of Shipping and Transport for finalisation in consultation with the Ministry of Railways. The Railways gave their concurrence to the standard in September 1970, after effecting slight changes in the original text. The draft standard was subsequently approved for publication by the Executive Committee and the Council at their meetings held respectively in November and December 1970. Provisions of this Standard have been separately circulated by the Railway Board among the different Zonal Railways.

1.4. On the request of the Indian Roads Congress, the first revision has been made by the Ministry of Transport, Department of Surface Transport (Roads Wing) after obtaining the comments from the Ministry of Transport, Department of Railways. Besides the minor editorial changes a fresh clause 21 "Safety Measures to Minimise Accidents" has been added in the revision.

2. LOCATIONS

As far as possible, road-rail level crossings should not be located near railway stations and marshalling yards. If this is unavoidable, they should be located beyond shunting limits.

3. CLASSIFICATION OF LEVEL CROSSINGS

3.1. Level crossings shall be classified as below :

Special A class B class C class	For vehicular traffic
D class	For cattle crossings and footpaths

3.2. The classification of a rail-road level crossing shall be settled mutually by the Railway and Road Authorities keeping in view the class of the road, visibility conditions, the volume of road traffic and the number of trains passing over the level crossing.

4. CATEGORIZATION OF ROADS

For the purpose of this standard, the roads shall be categorized as under :

(*i*) Class I Roads

(*a*) National Highways ;

(*b*) State Highways ;

(*c*) Important roads within municipal towns ; and

(*d*) Roads in and around towns where road and rail traffic is heavy.

(*ii*) Class II Roads

(*a*) Major and Other District roads ;

(*b*) Unimportant roads within municipal towns ;

(*c*) Roads within non-municipal towns including those within shunting limits of its railway stations ; and

(*d*) Other surfaced roads.

(*iii*) Class III Roads

(*a*) Earth roads ; and

(*b*) Cart tracks.

(*iv*) Class IV Roads

Cattle crossings and footpaths.

5. WIDTH OF CARRIAGEWAY

(*i*) Between gates

Between gates the width of carriageway shall be the same as that of the gates (see Clause 7).

(*ii*) Outside gates

The minimum width of carriageway immediately outside the gates (but tapering off to the existing carriageway width within a distance of 30 m from the gate) shall be as below :

(*a*) Class I Roads

7 m or the width of the existing carriageway, whichever is greater.

(*b*) Class II Roads

5.5 m or the width of the existing carriageway, whichever is greater.

(*c*) Class III Roads

3.75 m or the width of the existing carriageway, whichever is greater.

(*d*) Class IV Roads

Suitable width, subject to 2 m being the minimum.

6. TYPE OF THE PAVEMENTS

(*i*) Between gates

The surface shall not be of a lower standard than the surface outside the railway boundary. In case the surface outside the gates be of cement-concrete, black-topped surface may be provided.

(*ii*) **Outside gates**

The surface should not be of a lower specification than that of the existing road. However, in the case of Class I and Class II roads, it will be desirable to have a black-topped surface for a distance of at least 30 m beyond each gate.

7. MINIMUM WIDTH OF GATES AT RIGHT ANGLES TO THE CENTRE LINE OF THE ROAD

(*i*) **For Class I Roads**

9 m or equal to the width of the carriageway, immediately outside gates plus 2.5 m whichever is more.

(*ii*) **For Class II Roads**

7.5 m or equal to the width of the carriageway immediately outside gates plus 2 m whichever is more.

(*iii*) **For Class III Roads**

5 m or equal to the width of the carriageway immediately outside the gates plus 1.25 m whichever is more.

(*iv*) **For Class IV Roads**

Suitable width, subject to 2 m being the minimum.

8. MINIMUM LENGTH OF GUARD-RAILS

This should be 2 m more than the width of the gates on square crossings, and proportionately longer on skew crossings.

9. POSITION OF GATES WITH RESPECT TO THE CARRIAGEWAY

9.1. The gates may be swing gates, lifting gates or movable barriers of approved design.

9.2. The gates should be at right angles to the centre line of the road.

9.3. On level crossings across Class IV roads, stakes shall be fixed between the gate posts to prevent passage of road vehicles.

10. MINIMUM DISTANCE OF GATES FROM THE CENTRE LINE OF THE NEAREST RAIL TRACK

This should be 3 m on broad gauge lines and 2.5 m on metre gauge and narrow gauge lines.

11. WIDTH OF ROAD FORMATION OUTSIDE THE GATES

The width of the road formation for a distance of 30 m beyond the gate should be as follows :

(*i*) **Class I and Class II Roads**

Width of carriageway immediately outside the gates (see Clause 5) plus 5 m.

(*ii*) **Class III Roads**

Width of the carriageway immediately outside the gates (see Clause 5) plus 2.5 m.

(*iii*) **Class IV Roads**

Suitable width subject to 3 m being the minimum.

12. LEVEL LENGTHS AND GRADIENTS

(*i*) **Between gates**

Level for all classes.

(*ii*) **Outside gates**

(*a*) **Class I Roads**

Same level as between the gates upto 15 m beyond gates and not steeper than 1 in 40 beyond.

(*b*) **Class II Roads**

Same level as between the gates upto 8 m beyond gates and not steeper than 1 in 30 beyond.

(*c*) **Class III Roads**

Same level as between the gates upto 8m beyond gates and not steeper than 1 in 20 beyond.

(*d*) **Class IV Roads :** Not steeper than 1 in 15.

Note : Shock-free vertical curves as per Indian Roads Congress Standards should be provided at all gradient changes. The level distances mentioned above are exclusive of the lengths required for the provision of vertical curves.

13. ANGLE OF CROSSING BETWEEN THE CENTRE LINES OF THE RAILWAY TRACK AND THE ROAD

The angle of crossing between the centre line of the road and that of the railway track should ordinarily not be lower than 45 degrees* in the case of Class I, Class II and Class III roads. For Class IV roads, the angle of crossing should be 90 degrees.

14. MINIMUM RADIUS OF THE CENTRE LINE OF THE ROAD ON CURVED APPROACHES

14.1. Minimum radius of the curve shall depend upon the design speed, coefficient of friction between the tyres and road surface and maximum allowable value of superelevation. The minimum radii for different design speeds for good surfaced roads may be provided as indictated in the table below :

Speed km/h	Radius of horizontal curve (metres)		
	Plain and rolling terrain	Hilly	
		Not affected by snow	Snow bound
20	—	14	15
25	—	20	23
30	—	30	33
35	45	40	45
40	60	50	60
50	90	80	90
60	130	—	—
65	155	—	—
80	230	—	—
100	360	—	—

* An angle of crossing lower than 45 degrees can also be provided but only after special permission from the Railway Board which may be granted in exceptional cases.

14.2. In difficult terrain where it is not possible to adopt the above standard, the radius may be reduced with the concurrence of the Road Authority.

14.3. For other categories of roads, the best possible radius having regard to safety of the road traffic, should be adopted.

15. SIGHT DISTANCES

15.1. The roads in the vicinity of the level crossings shall be provided with sight distances depending upon the design speed as per table No. 11 of IRC : 73-1980 reproduced below :

STOPPING SIGHT DISTANCE FOR VARIOUS SPEEDS

Speed	Perception and brake reaction		Braking		Safe stopping sight distance (metres)	
V (km/h)	Time, t (Sec.)	Distance (metres) $d_1 = 0.278\ Vt$	Coefficient of longitudinal friction (f)	Distance (metres) $d_2 = \frac{V^2}{254\ f}$	Calculated values $d_1 + d_2$	Rounded off values for design
20	2.5	14	0.40	4	18	20
25	2.5	18	0.40	6	24	25
30	2.5	21	0.40	9	30	30
40	2.5	28	0.38	17	45	45
50	2.5	35	0.37	27	62	60
60	2.5	42	0.36	39	81	80
65	2.5	45	0.36	46	91	90
80	2.5	56	0.35	72	118	120
100	2.5	70	0.35	112	182	180

15.2. To further improve visibility, gate lodges should be so sited that a clear and unobstructed view is obtained by the road traffic of all approaching trains. While doing so, care should be taken to make allowance for all possible future extensions, *e.g.*, additions to the railway track(s) or widening of the road.

15.3. On unmanned level crossings, efforts should be made to keep the sight triangles demarcated in the four corners on the basis of speeds of trains and the road vehicles, clear of any obstruction to sight.

16. MINIMUM STRAIGHT LENGTH OF ROAD OUTSIDE THE GATES

This shall normally be 30 m, 22.5 m and 15 m for level crossings of Class I, Class II and Class III roads respectively. The straight length may, however, be reduced depending on sight conditions if difficult to attain. The reduction should, however, not go below the minimum straight lengths of 15 m, 9 m and 4.5 m for the three classes of roads respectively.

17. WARNING TO ROAD TRAFFIC OF THE PROXIMITY OF LEVEL CROSSING

17.1. Unguarded Railway Crossing

The sign should be used on the approaches of level crossings where there are no gates or other barriers. A pair of signs shall be used for the purpose : (i) an advance warning sign located at 200 metre away from the crossing, and (ii) a second sign to be erected near the crossing. The distance of the second sign from the crossing may be 50-100 metre in plain and rolling terrain and 30-60 metre in hilly terrain.

17.2. Guarded Railway Crossing

The sign should be used to warn traffic on the approaches of guarded railway crossings. A pair of signs shall be used for the purpose : (i) an advance warning sign located at 200 metre away from the crossing, and (ii) a second sign to be erected near the crossing. The distance of the second sign from the crossing may be 50-100 metre in plain and rolling terrain and 30-60 metre in hilly terrain.

17.3. Gates should be painted white, with a red disc not less than 60 cm in diameter in the centre. The gate posts also must be painted white. Where gates or chains are not provided, posts must still be provided at the position prescribed for gate posts and these should be painted white.

18. MINIMUM DISTANCE OF GATE LODGE

18.1. The minimum distance of gate lodge shall be as given below :

	Class I Roads	*Class II Roads*	*Class III Roads*	*Class IV Roads*
(*a*) From the centre line of the nearest rail track	6 m	6 m	6 m	6 m
(*b*) From the edge of the carriageway	6 m	6 m	6 m	6 m

18.2. The recommendation in Clause 15 regarding sight distances should also be kept in view.

19. PROVISION OF WICKET GATES FOR FOOT-PASSENGERS

19.1. In the case of level crossings on Class I and Class II roads, wicket gates for pedestrians shall be provided except where there are foot overbridges.

19.2. In the case of level crossings on Class III and Class IV roads, wicket gates need not be provided.

19.3. Wicket gates should be of such a design that cattle cannot easily and readily pass through them.

20. PROVISION OF LIGHT ON GATES AT NIGHT

(*i*) **Light as observed by road users**

(*a*) **Class I and Class II Roads**

Red when either gate is closed to the road. White, when the gates are opened to the road.

(*b*) **Class III Roads**

Same as above, but reflectors may be used as an alternative to lamps.

(*ii*) **Light as observed by drivers of approaching trains**

(*a*) **Class I Roads :** Red, when gates are closed across the railway track.

(*b*) **Other cases :** Nil.

21. SAFETY MEASURES TO MINIMISE ACCIDENTS

21.1. Latest IRC road signs indicating whether the railway crossing is manned or unmanned shall be installed on either end of the crossing at the prescribed distance as per IRC : 67-1977.

21.2. Speed limit road signs for the imposed Speed Signs of limit on speed of approaching traffic shall be installed on either end of the crossing at the prescribed distance.

21.3. Rumble strips on both sides of the Railway crossing shall be provided as per following specifications. A common application of rumble strips is the placement of intermittent, raised bituminous overlays across the roadway. Raised sections can be 15-25 mm high, 200-300 mm wide, and spaced about one metre centre to centre. A series of such strips, roughly 15-20 at one location shall be provided. The raised sections shall consist of premix carpet/semi-dense carpet/asphaltic concrete.

21.4. Speed breakers shall not be permitted.

21.5. Flashing signals shall be installed on both sides of the crossing after assessing their requirement for each case.

23.	Shri R. Nagarajan	Director (Civil Engineering), Indian Standards Institution, 'Manak Bhawan' 9-Bahadurshah Zaffar Marg, New Delhi-1,
24.	Seri K.K. Nambiar	Chief Engineer, Cement Service Bureau, "The Grove, Tynampel", Madras-18.
25.	Shri T.K. Natarajan	Scientist, Central Road Research Institute, P.O. CRRI, Okhla, New Delhi-20.
26.	Brig. K.U.K. Pandalai	D. of P., Engineer-in-Chief's Branch, Army Headquarters, D.H.Q. P.O., Kashmir House, New Delhi-11
27.	Shri B.P. Patel	Chief Engineer, Ministry of Shipping & Transport, Roads Wing, 'Transport Bhawan', New Delhi-1.
28.	Shri P.J. Prasad	Superintending Engineer (Designs), Bihar P.W.D., B & R., C.D.O. Building, Bailley Road, Patna-15
29.	Shri W.G.S. Saldanha	Chief Engineer, Mysore, P.W.D., C. & B. Deptt., Bangalore-1.
30.	Shri Satish Prasad	Asphalt Engineer, Indian Oil Corporation Ltd., B-11, South Extension (Part I), New Delhi.
31.	Shri A.R. Satyanarayana Rao	Chief Engineer (Highways), Andhra Pradesh, P.W.D.R. & B., Hyderabad.
32.	Prof. R.C. Sharma	Principal, Regional College of Engineering, Kurukshetra.
33.	Dr. N.S. Srinivasan	Scientist, Central Road Research Institute, P.O. C.R.R.I., Okhla, New Delhi-20.

Assumptions :

1) Ash Generation Considered at 85% PLF.
2) Ash production is based on 41.35% of coal consumption
3) Ash % in coal has been assumed as 41.35% as an average of FY 20 to FY 24
4) Cost effective Utilization has been taken 56% of Fly ash and 21% of bottom ash
5) Moisture % included in the quantity as Fly Ash -8%, Bottom Ash -33% and Pond Ash -27% based on past data
6) Ash Disposal Rate (Rs/MT) Considered is as per prevailing Rate for FY 24-25 for disposable distance of about 41 km as below:
Ash Disposal rate for Fly Ash - 353, Bottom Ash - 353 and Pond Ash -362 as per prevailing rate for FY 24-25 and with price escallation of 5% at every 2 year starting from FY 25-26.
7) Cost effective Disposal considered as an average rate of Rs 125/Mt as per prevailing rate for FY 24-25 and with price escallation of 5% at every 2 year starting from FY 25-26
8) Opening Pond Ash stock as on 1.4.2024 = 238884/0.73=327238 MT

Ash Disposal Expenses with Additional Capital Expenditure proposed FY25 to FY29

FY ---------->		FY 24-25	FY 25-26	FY 26-27	FY 27-28	FY 28-29
Gross Generation at	Mus	7818.30	7818.300	7818.300	7839.720	7818.300
Sp. Coal Consumptio	kg/Kwh	0.583				
Coal Consumption	MT	4555195	4555195	4555195	4567675	4555195

FY	Consumption Plan MT	Ash Generation	Fly Ash & Bottom Ash (Cost effective Utilisation)	FLY Ash (Stowing of Mines)	Bottom Ash (Stowing of Mines)	Lifting from Ash Pond	Closing Stock	Ash Disposal Cost (In Rs. Lakh)	Total Fly ash disposal including moisture	Total bottom ash disposal including moisture	Total Ash Utilization %	Difference between Original and Add cap_ash wharf (In Rs Lacs)
FY-25	4555195	1883573	8,35,507	5,40,504	5,55,232	4,30,000	2,07,519.68	5873.9	12,28,417.14	7,02,825.73	101.67	595.0
FY-26	4555195	1883573	9,12,757	4,91,367	5,27,119	4,30,000	1,76,155.63	6254.6	12,28,417.14	7,02,825.73	101.67	537.8
FY-27	4555195	1883573	9,12,757	4,91,367	5,27,119	4,30,000	1,44,791.57	6254.6	12,28,417.14	7,02,825.73	101.67	537.8
FY-28	4567675	1888733	9,15,257	4,92,713	5,28,563	4,30,000	1,14,201.58	6578.6	12,31,782.67	7,04,751.28	101.62	565.6
FY-29	4555195	1883573	10,09,319	4,29,946	4,91,978	4,30,000	82,837.53	5477.4	12,28,417.14	7,02,825.73	101.67	1652.0

Assumptions :

1) Ash Generation Considered at 85% PLF.
2) Ash production is based on 41.35% of coal consumption
3) Ash % in coal has been assumed as 41.35% as an average of FY 20 to FY 24
4) Cost effective Utilization has been taken as below considering the additional capitalisation of Ash Wharf in FY 24-25 and Ash Silos in FY29:

	Of 80% Fly Ash	Bottom Ash
FY 25	56%	21%
FY 26	60%	25%
FY 27	60%	25%
FY 28	60%	25%
FY 29	65%	30%

Balance of Fly Ash and Bottom Ash is being disposed off for filling Void mines and low lying areas to meet 100% ash utilisation target

5) Moisture % included in the quantity as Fly Ash -8%, Bottom Ash -33% and Pond Ash -27% based on past data
6) Ash Disposal Rate (Rs/MT) Considered is as per prevailing Rate for FY 24-25 for disposable distance of about 41 km as below:

Ash Disposal rate for Fly Ash - 353, Bottom Ash - 353 and Pond Ash -362 as per prevailing rate for FY 24-25 and with price escallation of 5% at every 2 year starting from FY 25-26.

7) Opening Pond Ash stock as on 1.4.2024 = 238884/0.73=327238 MT
8) Rake Handling Charges is considered at rate of Rs 168.93/Mt for pond Ash and Rs. 153/Mt for FLY Ash as per prevailing rate for FY 24-25 and with price escallation of 5% at every 2 year starting from FY 25-26
9) Subsidy of Rs. 100/Mt and Revenue of Rs. 110/Mt has been considered for offtake of Pond Ash and Fly Ash respectively in Rake mode as per prevailing rate for FY 24-25.
10)With commissioning of Ash Silos for loading, the net rate of disposal of FLY Ash in Rake mode has been considered as -Rs 50/Mt from FY 2028-29 onwards

Subject: Re: Requested to kindly provide the budgetary offer of Isolator set (complete for 3phase) with E/S and without E/S.

[EXTERNAL sender, Exercise caution..!]

Dear Sir,

Kindly refer to our discussion, Please note that M/s Siemens closed the manufacturing of isolators a few years back. We can offer the isolators of other make (S&S POWER, Chennai) as one to one replacement against Siemens make Isolators.
We recommend you to replace the defective/problematic Siemens make isolators with New S&S Power make isolators in a planned manner. We request you to kindly provide as the no of isolators you indent to purchase so that we can provide you the complete retrofitting Solutions & budgetary offer.

Thanks & Regards

FOREIGN OBJECT DAMAGED OF 1st STAGE BLADES (TS)

B) Repairs

- Aluminum oxide blasting to clean the inner casing
- cleaning & freeness of L ring
- Measurement of distortion and accordingly correction of fin clearance
- Dessing of FOD blades of Stage 1st (TS)
- Straightening of twisted inter stage fins

D) Assembly Highlights :

- OEM recommended practices are adopted during assembly

D) Recommendation Details:

- Water chemistry to be monitored to control the steam parameters
- All lubrite packers needs to be replaced in next overhauling
- Stationary blades healthiness of 1st stage to be inspected in next schedule AOH

<u>IP rotor</u>

A) Inspection Findings:

- BrownDeposits on blades
- Heavy Damage of blades trailing edge of TS stage 1,2 & 3 by foreign object (Detail attached-IP turbine fact finding report)
- Catenary value of rear journal was less than erection value
- Twisted of inter stage fins
- Rear gland fins partially eroded
- Front gland fins are partially eroded
- Caulking wire found came out from groove
- Hitting mark on airfoils of all stages by oxide hard components of steam

Rotor airfoil damaged due to FOD

IP ROTOR

IP ROTOR 1st STAGE DAMAGED BLADES

B) Repairs

- Aluminum oxide blasting of IP rotor to clean the deposits
- Catenary value is correction by add shim below bearing 3 support
- Straightening of inter stage fins
- Dressing of gland fins
- Refining of gland damaged fins as per requirement and made clearance
- Dressing of teared blades of TS stage 1,2 & 3
- Gland fins Caulking wire properly fitted in position

C.Assembly Highlights :

- OEM practice addoted for assembly

D.Recommendation Details:

- Ensure healthiness of HRH strainer element
- Spare blades to be kept in stock
- Water chemistry to be monitored to control the steam parameters
- Damaged blades to be replaced in next schedule MOH

WET MOTOR TYPE

OPERATION AND MAINTENANCE MANUAL

PRODUCT. NO. PU0092720
PUMP TYPE HLAV300X2-470/1C

IMPORTANT !

To assure safe and proper operation, be sure to read this "INSTRUCTION MANUAL" and the annexed "SAFETY PRECAUTIONS" prior to installing and using your pump.

TORISHIMA PUMP MFG. CO., LTD.
HEAD OFFICE & WORKS : 1-1-8, MIYATA-CHOU, TAKATSUKI-SHI, OSAKA, 569-8660 JAPAN
TEL : +81-72-690-2308
TELEFAX : +81-72-690-2329

9.2.2 Overhaul Inspection

For the first time approx. 1 year after the commissioning and thereafter once every 4 to 5 years, the pumps are recommended to be completely stripped.
On this occasion, at least the following inspections should be carried out:

(1) Inspection of all parts subject to wear and of their fastenings, including fits, bolts and screws, locking devices, pins and dowels. These components should be replaced by new ones, depending on their condition. Criteria for replacement: See table of clearances, Item 9.2.3.
(3) Cleaning of pumping set (the motor winding ends should be **lightly** rinsed with water).
(4) Out-of-round (true running) check of rotor (max. permissible out-of-round: 0.08 mm).
If a new impeller is fitted, the rotor must be dynamically balanced (See Item 9.4.).
(5) Check of flow conditions through the cooling channels in the heat barrier (clean out same if necessary). Pressure drop through heat barrier at the nominal rate of flow: 1 mAq approx.
(6) Cleaning out of LP side of the motor cooler.
Hydrostatic testing of the HP side.
(7) Cleaning out of the Filter
(8) Visual examination of the motor winding

For disassembly, please refer to Item 9.3.
For part inspection, please refer to Item 9.4.
For reassembly, please refer to Item 9.1 and 9.4.1.
For disassembly and inspection of Filter only, please refer to Item 4.6.

<Note>

In the case of major overhauls, or of damage to the motor winding, please contact to our office and dispatch the pumping set to our works for complete inspection and repairs.

POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS THAT Maithon Power Limited, a Company incorporated under the Companies Act, 1956 having its Registered Office at Corporate Center, 34 Sant Tukaram Road, Carnac Bunder, Mumbai – 400 009 (hereinafter called 'the Company'), do hereby nominate, constitute and appoint Mr. Angshuman Chakrabarti, Chief Financial Officer as Attorney of the Company in the name and on behalf of the Company to do and perform the following acts and deeds:

1. To appear, to prepare, to argue, to act, to sign and file documents, petition, applications, affidavits, declarations, forms and returns etc. and to represent on behalf of the Company before any Statutory/Regulatory Authorities, Judicial or Quasi Judicial Authorities under Direct and Indirect Taxes Acts, Rules and Regulations etc. including Income Tax Act, 1961, Custom Act 1962 and Central Excise Act 1944, Sales Tax, Service Tax, Value Added Tax, Director General of Foreign Trade (DGFT) and any other commercial taxes etc., whether Central or State, enacted or to be enacted anywhere in India, under Companies Act, 2013 and rules made thereunder, Employees' Provident Fund & Miscellaneous Provisions Act, 1952, Employees State Insurance (ESI) ACT, 1948 and Payment of Gratuity, (as amended from time to time and for the time being applicable in India).

2. To apply for, obtain, make sign, file and/or furnish and pursue any and all such documents, return, forms, declaration, reports, statements, certificates, notices or information including relating to the Accounts of the Company as the Company may be required to make, obtain, file or furnish before the any Statutory Authority, State or Central Government Authorities.

3. To prepare, modify, execute and sign all correspondence, return, forms, challans, road permits, invoices and other documents and paper etc. relating to the goods and materials of the Company for commercial purposes and also relating to billing and collection matter of the Company in transaction with any person or authorities in India that may be necessary in the ordinary course of business of the Company.

4. To appoint and authorize any Chartered Accountant or Company Secretary (in whole time practice) or legal consultant to certify the various forms/returns/applications and to sign, execute, verify and file written statements, affidavits, applications, petitions required to be filed with office of Hon'ble Ministry of Corporate Affairs/Regional Director/ National Company Law Tribunal (NCLT)/ National Company Law Appellate Tribunal (NCLAT)/Registrar of Companies/Direct or Indirect Tax Department/ DGFT/Labour Department or with any other Government (Central or State) Authorities in India.

5. To publish advertisement in newspapers as required under the provisions of Companies Act, 2013 and rules made thereunder or the Listing Agreement or the regulations of the Securities and Exchange Board of India.

6. To perform and observe and do all acts, deeds, matters and things whatsoever necessary to be performed and observed by the Company and all requirements or provisions affecting the Company contained in any act, statute, decree, ordinance or regulation and any rule(s) or order(s) made thereunder and any other enactment or statutory rules and regulations applicable to the Company in the place in which this Power of Attorney may for the time being be exercisable.

7. To make, enter into, sign and execute on behalf of the Company contracts, agreements, leases (whether as Lessor or Lessee) and other documents with the Government of India, State Governments, public and private bodies, joint stock companies and individuals for a period extending up to 3 years as are normally required in the conduct of the business of the Company.

Note: To be signed jointly with any one of the attorneys similarly authorised to exercise this power.

8. To sign all correspondence that may be necessary in the ordinary course of business of the Company.

9. While discharging his function with respect to matters involving financial implications, the said Mr Angshuman Chakrabarti, Chief Financial Officer shall exercise his powers granted vide the aforesaid Power of Attorney subject to the limits as prescribed in the Schedule of Authorities as may be approved by the Board of Directors of Maithon Power Limited, from time to time.

10. AND GENERALLY to do and execute or cause to be done and executed all documents and assurances, acts, deeds, matters or things ancillary or incidental to the abovementioned matters and all and whatsoever the Attorney shall do or cause to be done in or about the premises by virtue of the aforesaid powers or any of them, the Company doth hereby for itself, their successors and assigns covenant with the said Mr Angshuman Chakrabarti, his heirs, executors and administrators to allow, ratify and confirm.

11. And is hereby declared that the said Mr Angshuman Chakrabarti, Chief Financial Officer when signing on behalf of the Company shall sign "For and on behalf of Maithon Power Limited".

IN WITNESS WHEREOF the Common seal of the Maithon Power Limited has hereunto been affixed this 25th February 2025.

The Common Seal of Maithon Power Limited hereunto affixed pursuant to Resolution passed by its Board of Directors on 16th January 2025 in the presence of Ms. Anjali Pandey, Chairperson and Ms. Mona Purandare, Company Secretary of the Company
