

Tata Power Safety Principles

Tata Power believes that Integrating safety & Occupational health in business helps in sustaining world-class business performance. Safety principles provide direction and focus to Safety and Occupational Health Program for achieving and sustaining safety excellence.

Our values and beliefs lead us to understand hazards & control measures, build competency in employees & contractors, report incident, investigate and share learning is crucial to prevent incident, recurrences and enhance safety performance.

Tata Power Safety Principles are:

- All injuries and occupational illnesses are preventable
- Safety is a core value over which no business objective can have higher priority
- All operating exposures can be safe guarded
- Management is accountable for providing a safe, healthy and clean working environment for the prevention of work-related injuries and ill-health
- Working safely is everybody's responsibility and a condition of employment
- Workforce commitment to Safety is essential
- Visible, demonstrated leadership commitment is essential to inculcate safety culture
- A job is successful only if it is done safely
- Everybody is empowered to stop unsafe work
