- Plant Capacity: 500 MW
- Source used to generate energy: Oil & Gas
- Number of Units: 1 (unit no 6)
- Year of commissioning: 1991
- Year of de-commissioning: 2016
- Plant location: Trombay, Maharashtra

Plant Description

Key Highlights of the Plant

- All the equipment are in excellent physical condition
- Boiler has been WET PRESERVED till Sep'23
- Majority of the equipment are imported from leading international manufacturers
- Renovation & Modernization undertaken in 2012
- Boiler superheater headers were replaced by BHEL in 2012
- Higher efficiency designed boiler tubes
- High heat absorption due to riffle tubes

Major Equipment

Electrical

- 200 MVA single phase Generator
- 40 MVA Station Transformer
- Misc other Transformers
- 1.5 MVA D G Set in working condition
- Sync, HT, LT Motors
- 9 MW HT Motor
- Panels

Mechanical

- Boiler (Capacity of generation – 500 MW)
- Turbine Driven Boiler Feed Water
- Motor Driven Boiler Feed Water
- FD, ID, GR Fans
- RAPH
- Debris Filters
- LP Heaters
- Titanium Plate Heat Exchanger
- Titanium Tube Condenser

Structural

- Pipelines
- Ducts
- Supporting structure of Boilers, equipment etc.

Financial

Audited Profit & Loss statement of last 3 financial years (FY23, FY22, FY21) indicating average Turnover \geq Rs. 75 Cr.

Bank Solvency Certificate / Unutilized Credit Limit Facility Letter issued by Scheduled Commercial Bank indicating Working Capital Adequacy of at least Rs. 50 crores.

Technical

A bidder should have dismantled a plant/equipment of minimum INR 50 crores / qty. \geq 15,000 MT in the last 5 years in a single project.
