Dear Sirs,

Sub: Press Release

Please find enclosed a Press Release titled "Tata Power Renewable Energy Limited Commissions 100.8 MW Jewali Wind Project in Maharashtra."

This is for your information and records.

Thanking you.

Yours faithfully,
For Tata Power Renewable Energy Limited

Santosh C.R.
Company Secretary

Tata Power Renewable Energy Limited Commissions 100.8 MW Jewali Wind Project in Maharashtra

- To generate 299 million units of clean electricity annually and offset over 245 million kg of CO₂ emissions
- Project to power Tata Power Mumbai Distribution consumers and support its Renewable Purchase Obligation compliance

Mumbai, India, July 3, 2026: Tata Power Renewable Energy Limited (TPREL), a subsidiary of The Tata Power Company Limited, has successfully commissioned its **100.8 MW Jewali Wind Project** in Dharashiv district, Maharashtra. The electricity generated from the project will be supplied to Tata Power Mumbai Distribution and will help contribute towards its Renewable Purchase Obligation targets, supporting its transition to a more sustainable and environmentally responsible Utility.

The project underscores TPREL's strong execution capabilities and commitment to delivering large-scale renewable energy projects. The milestone further strengthens the TPREL's growing renewable energy portfolio and reinforces its leadership in India's clean energy transition.

The project comprises **28 SG 3.6-145 Wind Turbine Generators**, based on advanced horizontal-axis wind turbine technology. The facility is expected to generate approximately **299 million units (kWh)** of clean electricity annually

The project is expected to offset nearly **245 million kg of CO₂ emissions every year**, based on an estimated emissions reduction of **0.82 kg of CO₂ per unit of electricity generated**, making a significant contribution towards decarbonisation and enhancing Tata Power's clean energy portfolio.

With this commissioning, TPREL's wind energy portfolio now exceeds **3.9 GW**, including more than **1.3 GW of operational capacity**, with the balance under various stages of development across Rajasthan, Gujarat, Maharashtra, Andhra Pradesh, Karnataka, and Tamil Nadu.

The project also advances Tata Power's long-term vision of achieving 100% clean energy generation by 2045 and complements its expanding renewable energy portfolio.

With the addition of the Jewali Wind Project, TPREL's total renewable utility capacity has reached 11.6 GW. Of this, 6.7 GW is operational, including 5.4 GW of solar and 1.3 GW of wind capacity, while 4.9 GW is under various stages of implementation. The under-construction portfolio comprises approximately 2.1 GW of solar, 2.6 GW of wind projects and 0.2 GW of BESS, which are expected to be commissioned in phases over the next 6-24 months.

About Tata Power Renewable Energy Limited: Tata Power Renewable Energy Limited (TPREL) is a subsidiary of The Tata Power Company Limited and is one of the country's most significant renewable energy players. TPREL is a developer of renewable energy projects (including solar, wind, hybrid, round-the-clock (RTC), peak, floating solar, and storage systems including battery storage) that it owns, operates, and maintains. It also offers comprehensive green energy solutions for rural and urban areas like turnkey, EPC and O&M solutions for various business segments like utility-scale projects, solar rooftop, and solar pump systems. Alongside its extensive portfolio of renewable solutions, the Company boasts a cutting-edge solar cell and module manufacturing plant in Bengaluru, with capacities of 530 MW for solar cells and 682 MW for modules. The Company's 4.3 GW cell and module manufacturing plant in Tirunelveli, Tamil Nadu is the country's largest single-location cell and module manufacturing plant. In addition, TPREL also provides electric vehicle (EV) charging solutions across various segments and other advisory solutions across the renewable sector. **As on date, TPREL's total renewable utility capacity is 11.6 GW (PPA capacity is 9.4 GW), including 4.9 GW projects under various stages of implementation, and its operational capacity is 6.7 GW, comprising 5.4 GW of solar and 1.3 GW of wind.** Presently, the Company's solar EPC portfolio is more than 16.7 GWp of ground-mount utility-scale, around 4.5 GWp of rooftop and distributed ground-mounted. TPREL aims to provide energy access to millions of people across the country via its integrated green energy solutions. Know more: www.tatapowersolar.com

About Tata Power: The Tata Power Company Limited, a leading integrated power company and a part of the Tata Group, India's largest multinational business conglomerate, owns a diversified portfolio of 16.3 GW. This portfolio spans the entire power value chain, from renewable and conventional energy generation to transmission, distribution, trading, storage solutions, and solar cell and module manufacturing. As a pioneer in India's clean energy transition, Tata Power has 7.5 GW of clean energy generation, constituting 46% of its total capacity. Committed to achieving Net Zero by 2045, Tata Power has successfully partnered with public and private entities across India's generation, transmission, and distribution sectors, serving ~13 million customers nationwide.
