Dear Sirs,

Sub: Press Release

Please find enclosed a Press Release titled "Tata Power Renewables marks a major milestone with commissioning of 190.5 MW FDRE Project in Rajasthan."

This is for your information and record.

Thanking you,

Yours faithfully,

For Tata Power Renewable Energy Limited

Santosh C.R.
Company Secretary

Tata Power Renewables Marks a Major Milestone with Commissioning of 190.5 MW FDRE Project in Rajasthan

Photo Caption: Tata Power Renewables advancing India's energy transition through its 190.5 MW FDRE Project at Kalasar, Bikaner, Rajasthan.

- The 190.5 MW project has been developed under SJVN FDRE Tranche-1 and is a part of the bigger 460 MW FDRE project.
- Project to strengthen grid reliability through 115 MWhr advanced Battery Energy Storage System (BESS).

National August 24, 2026: Tata Power Renewable Energy Limited (TPREL), one of India's leading renewable energy companies and a subsidiary of The Tata Power Company Limited (Tata Power), has commissioned its 190.5 MW Solar FDRE project at Kalasar, Bikaner, Rajasthan which is under the contractual capacity of 460 MW Firm and Dispatchable Renewable Energy (FDRE) Project.

The 190.5 MW project has been developed under SJVN FDRE Tranche-1. The project will supply energy to Haryana Power Purchase Centre (HPPC), Maharashtra State Electricity Distribution Company Limited (MSEDCL) and Noida Power Company Limited (NPCL) discoms.

The project marks another significant milestone in India's clean energy journey by integrating large-scale solar generation with advanced energy storage and grid support technologies to deliver reliable, dispatchable renewable power.

The project demonstrates TPREL's engineering excellence and execution capabilities, having overcome several complex challenges including compressed project timelines, global supply chain disruptions impacting the availability of transmission line materials, module mounting structures and other critical equipment. It has successfully adopted several new technologies such as BESS, Harmonic Filter Bank and Static Var Generator systems.

Among the project's notable execution milestones was the completion of the switchyard within just three months and the Harmonic Filter Bank within one month, reflecting TPREL's focus on speed, quality and execution excellence.

With this project, TPREL's total renewable utility capacity has reached 12.4 GW. Of this, around 6.9 GW is operational, including 5.6 GW of solar and 1.3 GW of wind capacity, while close to 5.5 GW is under various stages of implementation, are expected to be commissioned in phases over the next 24 months.

The Company remains committed to developing innovative clean energy solutions that contribute to India's target of achieving 500 GW of non-fossil fuel capacity by 2030 and Tata Power's vision of a sustainable energy future.

About Tata Power Renewable Energy Limited:

Tata Power Renewable Energy Limited (TPREL) is a subsidiary of The Tata Power Company Limited and is one of the country's most significant renewable energy players. TPREL is a developer of renewable energy projects (including solar, wind, hybrid, round-the-clock (RTC), peak, floating solar, and storage systems including battery storage) that it owns, operates, and maintains. It also offers comprehensive green energy solutions for rural and urban areas like turnkey, Engineering, Procurement and Construction (EPC) and O&M solutions for various business segments like utility-scale projects, solar rooftop, and solar pump systems. Alongside its extensive portfolio of renewable solutions, the Company boasts a cutting-edge solar cell and module manufacturing plant in Bengaluru, with capacities of 530 MW for solar cells and 682 MW for modules. The Company's 4.3 GW cell and module manufacturing plant in Tirunelveli, Tamil Nadu is the country's largest single-location cell and module manufacturing plant. In addition, TPREL also provides electric vehicle (EV) charging solutions across various segments and other advisory solutions across the renewable sector. As on date, TPREL's total renewable utility capacity is 12.4 GW (PPA capacity is 9.7 GW), including 5.5 GW projects under various stages of implementation, and its operational capacity is 6.9 GW, comprising 5.6 GW of solar and 1.3 GW of wind. Presently, the Company's solar EPC portfolio is more than 16.7 GWp of ground-mount utility-scale, around 5 GWp of rooftop and distributed ground-mounted. TPREL aims to provide energy access to millions of people across the country via its integrated green energy solutions. Know more: www.tatapowersolar.com

About Tata Power:

The Tata Power Company Limited, a leading integrated power company and a part of the Tata Group, India's largest multinational business conglomerate, owns a diversified portfolio of 16.3 GW. This portfolio spans the entire power value chain, from renewable and conventional energy generation to transmission, distribution, trading, storage solutions, and solar cell and module manufacturing. As a pioneer in India's clean energy transition, Tata Power has 7.5 GW of clean energy generation, constituting 46% of its total capacity. Committed to achieving Net Zero by 2045, Tata Power has successfully partnered with public and private entities across India's generation, transmission, and distribution sectors, serving ~13 million customers nationwide.
