

Tata Power bags Empanelment for 84MW Rooftop Solar Project worth INR400 Cr from Kerala State Electricity Board Limited

National, 9th July, 2021: Tata Power, India's largest integrated power company, has been empaneled and won a contract worth INR400cr from the Kerala State Electricity Board Limited (KSEBL) on July 2, 2021 to develop 84MW solar rooftop project for domestic consumers across all districts of Kerala. As a part of this agreement, the company will implement projects through KSEBL of 64MW for individual households with solar capacity ranging from 3kW - 10kW and 20MW for residential / housing society projects with solar capacity ranging from 11kW - 100kW.

The company has won this capacity in a bid announced by KSEBL in Feb 2021 under the 'Soura Subsidy Scheme in Domestic Sector', Kerala, in line with the Phase II Subsidy Programme of the Ministry of New & Renewable Energy. The project has to be commissioned within three months of receipt of an order from individual residential customers. The company had earlier received a Letter of Award from KSEBL on 6th January 2021 to develop a 110 MW rooftop solar project which is expected to generate about 274 MUs of energy per year.

Upon completion of this 84MW of solar rooftop project, it is expected to generate 120 MUs of energy per year and will annually offset approximately 100 Million Kg of CO₂

"We are delighted to secure the 84MW rooftop project from KSEBL and are proud to have this opportunity to support domestic consumers migrate to Green Energy. This project is testament to KSEBL's trust in our commitment to drive India's transition towards Clean Power through rooftop solar-based generation", said **Dr. Praveer Sinha, CEO & MD, Tata Power**

About Tata Power:

Tata Power is India's largest integrated power company and, together with its subsidiaries and jointly controlled entities, has an installed/ managed capacity of 12,808 MW. A pioneer in the field, it has a presence across the entire power value chain - generation of renewable as well as conventional power including hydro and thermal energy, transmission & distribution, coal & freight, logistics and trading. The company had developed the country's first 4000 MW Ultra Mega Power Project at Mundra (Gujarat) based on super-critical technology. With nearly 3.9 GW of clean energy generation from solar, wind, hydro and waste heat recovery accounting for 31% of the overall portfolio the company is a leader in clean energy generation. It has successful public-private partnerships in generation, transmission & distribution in India viz : Powerlinks Transmission Ltd. with Power Grid Corporation of India Ltd. for evacuation of Power from Tala hydro plant in Bhutan to Delhi, Maithon Power Ltd. with Damodar Valley Corporation for a 1050 MW Mega Power Project at Jharkhand. Tata Power is currently serving around 12 million consumers via its Discoms, under public-private partnership model, in India viz Tata Power Delhi Distribution Ltd. with Government of Delhi for distribution in North Delhi; Tata Power Ajmer Distribution Ltd. with Ajmer Vidyut Vitran Nigam Ltd. for distribution in Ajmer, Rajasthan; TP Northern Odisha Distribution Limited, TP Central Odisha Distribution Limited, TP Western Odisha Distribution Limited and TP Southern Odisha Distribution Limited with Government of Odisha.

With a focus on sustainable and clean energy development, Tata Power is steering the transformation of all its Discoms into integrated solutions providers by looking at new business growth in distributed generation through rooftop solar and micro grids, storage solutions,

EV charging infrastructure, ESCO, home automation & smart meters et al. With its 107 years track record of technology leadership, project execution excellence, world-class safety processes, customer care and green initiatives, Tata Power is well poised for multi-fold growth and committed to lighting up lives for generations to come.
