Dear Sir/Madam,

Sub.: Press Release

Please find enclosed the press release titled “Tata Power’s Solar manufacturing arm (TP Solar Limited) crosses 4 GW of solar module production at its Tamil Nadu Facility.”

This is for your reference and records and is not a disclosure in terms of the requirements of Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

Yours Sincerely,
For **The Tata Power Company Limited**

Vispi S. Patel
Company Secretary

Tata Power's Solar manufacturing arm (TP Solar Limited) crosses 4 GW of solar module production at its Tamil Nadu Facility

National June 9, 2025: TP Solar Limited (TP Solar), a wholly owned subsidiary of Tata Power Renewable Energy Limited (TPREL), a subsidiary of The Tata Power Company Limited (Tata Power) and the manufacturing arm of Tata Power, today announced that it has crossed 4 GW solar module manufacturing at its Tamil Nadu plant.

The plant has cumulatively produced 4049 MW of solar modules and 1441 MW of solar cells upto May 31, 2025.

With a strategic focus on scaling up production, TP Solar is targeting 3.7 GW of solar cell output and 3.725 GW of module production in FY26, further solidifying its commitment to supporting India's clean energy transition.

Strategically built to comply with Domestic Content Requirement (DCR) norms, the facility is equipped to manufacture next-generation Mono PERC (Passivated Emitter and Rear Cell) and advanced TopCon (Tunnel Oxide Passivated Contact) modules using cutting-edge automated and AI-driven technologies. The ramp-up aligns with Tata Power's goal to strengthen India's solar supply chain resilience by reducing dependency on imports and enabling faster deployment of clean energy projects nationwide.

The facility is already supplying panels to meet Tata Power's order book requirements—including utility-scale solar farms, hybrid energy parks and distributed rooftop systems as well as serving marquee third-party installations across the country.

With its rated capacity of 4.3 GW expected to be fully realized in FY26, the plant would continue to support the nation's target of achieving 500 GW of non-fossil fuel capacity by 2030.

Beyond its technological prowess, the Tamil Nadu facility also stands out for its inclusive and sustainability-first approach. Over 80% of the plant's shop floor workforce comprises women, reflecting Tata Power's strong focus on gender diversity and equitable job creation in advanced manufacturing. The plant itself has been built using green building principles, energy-efficient processes and resource-conscious design, minimizing its environmental footprint.

As one of India's largest vertically integrated solar players, TP Solar is driving innovation and scale across the clean energy value chain—from manufacturing and engineering to deployment and digital energy services. The ramp-up of this 4.3 GW facility positions the company as a key enabler of India's clean energy independence, while advancing the global movement toward sustainable energy security.

TPREL also has a 682MW solar module and a 530MW solar cell plant at Bengaluru, which operates at full capacity to support the DCR Cells and Modules production.

About Tata Power:

Tata Power Company Limited, a leading integrated power company and a part of the Tata Group, India's largest multinational business conglomerate, owns a diversified portfolio of 15.7 GW. This portfolio spans the entire power value chain, from renewable and conventional energy generation to transmission, distribution, trading, storage solutions, and solar cell and module manufacturing. As a pioneer in India's clean energy transition, Tata Power has 6.9 GW of clean energy generation, constituting 44% of its total capacity. Committed to achieving carbon neutrality before 2045, Tata Power has successfully partnered with public and private entities across India's generation, transmission, and distribution sectors, serving approximately 12.8 million customers nationwide.
