## Tata Power Commissions 400 kV Koteshwar–Rishikesh Transmission Line, Strengthening North India’s Grid with 1,000 MW of Clean Hydropower

--Benefiting 6 Northern States and 3 Union Territories (UTs), project’s on-time commissioning reflects Company’s excellence in precision-driven execution.

**Mumbai, December 9, 2025:** In a major enhancement to India’s northern power corridor, the Company today announced the commissioning of the 400 kV Koteshwar–Rishikesh transmission line, a critical link that will enable the evacuation of 1,000 MW of hydropower from the Tehri–Koteshwar generation complex in Uttarakhand to multiple northern states and UTs.

The project was executed under NRSS XXXVI Transmission Limited (NRSS), acquired by Resurgent Power Ventures Pte Limited, a joint venture promoted by Tata Power, ICICI Bank Limited and global investors.

The new line will channel clean, renewable energy not only to Uttarakhand but also to Haryana, Punjab, Uttar Pradesh, Jammu & Kashmir, Himachal Pradesh, Chandigarh, Rajasthan, and Delhi significantly strengthening regional energy security and grid reliability.

Constructed across some of the most challenging Himalayan terrain in New Tehri and Dehradun districts, the transmission line climbs to altitudes exceeding 1,816 meters above sea level. The project demanded extraordinary engineering ingenuity, from transporting materials through head-loading in remote mountainous regions to adhering to strict environmental norms while operating in forested zones.

Despite the logistical and geographical hurdles, more than 500 skilled personnel completed the project’s physical work within a single year (November 2024 to December 2025), following land clearance for 103 hectares. The successful, on-time commissioning of the project demonstrates the Company’s strong capabilities in safety, high-precision execution and sustainable infrastructure development.

This line represents the third major commissioning milestone under the NRSS project. Earlier elements include the 400 kV LILO Sikar–Neemrana Double Circuit line (3.1 circuit km) and the 400 kV LILO Babai–Bhiwani Double Circuit line (222 circuit km).

With its addition, the Company now has 7,083 cKm of transmission lines operational / under execution across India, further reinforcing its role in fortifying the nation’s electricity transmission backbone.

### **About Tata Power:**

The Tata Power Company Limited, a leading integrated power company and a part of the Tata Group, India’s largest multinational business conglomerate, owns a diversified portfolio of 15.9 GW. This portfolio spans the entire power value chain, from renewable and conventional energy generation to transmission, distribution, trading, storage solutions, and solar cell and module manufacturing. As a pioneer in India’s clean energy transition, Tata Power has 7.0 GW of clean energy generation, constituting 44% of its total capacity. Committed to achieving Net Zero by 2045, Tata Power has successfully partnered with public and private entities across India’s generation, transmission, and distribution sectors, serving ~13 million customers nationwide.
